As a youth growing up in Teton Valley, my father, Charles Elmer Christensen, told me about land he and his father, Charles Christensen, put under cultivation from its natural state. My father related to me that in 1936 he diverted water from the North and South Forks of Darby Creek to provide water for lands currently owned by my brother Alvie Christensen and me.

My father also related that in 1937 he and his father diverted water from a small creek, known then as Elliot Creek, or its tributaries to provide irrigation water for the adjoining 320 acres of land to the south of the 320 acres I currently own. The purpose of the diversion was to provide irrigation for that land where they were developing hay meadows. The adjoining land described here is currently owned by Gary Hill.

I personally remember going with my father during the winter of 1947-48 to feed beef cows that were being fed hay on the property presently owned by Gary Hill. The hay fed to the cows that winter had been raised on meadows put into cultivation during the latter 1930s which were well established "hay fields" and producing good meadow hay by 1947.

RE: EVIDENCE OF PRIORITY FOR SRBA WATER RIGHT CLAIM 22-4086

Dear Claimant (s):

The Idaho Department of Water Resources is nearing the end of water rights review in Basin 22, the Teton River drainage. The Notice(s) of Claim identified with the number shown above has been filed in the Snake River Basin Adjudication (SRBA). The Notice of Claim indicates water usage is based on "Beneficial Use". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed, at or on the place of use identified on the Claim. The date the water was first put to beneficial use, known as the priority date, has not been confirmed by License, Decree, or Permit. For this reason, proof must be provided supporting the priority date. **As the claimant, you are responsible for submitting the necessary proof to support the priority date.**

Your claim, as referenced above, claims a Priority Date AUG 17 1945 from STREAM.

It is important that each element of the Notice of Claim be verified. For instance, regarding claims for irrigation, the evidence should tend to show that diversion works were in place, that they were capable of diverting the claimed diversion rate, and that the diverted water was beneficially used on the entire claimed place of use on or before the claimed priority date.

For your reference, I have provided a printout of your Notice of Claim and the pamphlet entitled "**Evidence of Priority**". The pamphlet describes the types of evidence which are acceptable and suggests which documents will fulfill this requirement. While I encourage you to read the entire pamphlet, I direct your attention to the two sections entitled "**What Kind of Evidence is Required**" and "**Some Examples of Documents Which May Be Evidence of the Priority Date**". **PLEASE READ THE ENCLOSED PAMPHLET.**

It is our goal to recommend historical water rights within the Snake River Basin as accurately as possible. Field exams to verify other elements of the Notice of Claim have been or soon will be conducted by Department personnel.

.....
The Department will not recommend the Notice of Claim be decreed by the court if evidence of a priority date is not submitted. The Notice of Claim will be disallowed.
.....

Please submit documentation supporting the priority date within 30 days of the date of this letter, referencing all documents with the corresponding claim number. If you have any questions not covered by this letter or the enclosed pamphlet, please feel free to contact this office.

Respectfully submitted,

Allen B. Ruberry
Sr. Water Resource Agent
