INTERDEPARTMENT MEMO

DATE: 26 May 93
FROM: Ernest Carlsen
RE: Application for transfer
22-07127, 22-07222, 22-07406
Bruce Arnold

FINDINGS:

- The total irrigated acreage and system capacity was determined during a licensing field inspection conducted by Keith Wilson and Eric Verner in 1987. The POU for the three licenses are connected by a common mainline and operated as a single system.
- The rate per acre of 0.007 cfs/acre is below the minimum of 0.01 cfs/acre adopted by adjudications for evaluating whether or not there is an adequate water supply.
- Diverting water at a rate of 9.29 cfs for the irrigation season of 214 days produces 3943 af which is less the 4651 af allowable by the department standard of 3.5 af/acre.
- During a telecon with the applicant on 25 May, he indicated the diversion capacity of the system has declined by 25% to 30%. To compensate for this decline the applicant has used both the yearly government set-aside program to remove acreage for production plus the normal cropping pattern for the POU is 40% seed potatoes and 60% grains which puts most of the land on a 3 year rotation. Mr. Arnold indicated the practice was to irrigate grain first and then switch to the potatoes.
- Mr. Arnold admits the licensed rate of diversion of 9.29 cfs is marginal for irrigation of 1329 acres. To provide sufficient water he needs average rain fall and have the ability to pump the licensed rate of diversion.
- Mr. Arnold expects having to drill around 1100 feet with a pumping lift of 500 feet. He would eventually like to appropriate more water but while the moratorium is in place he stated the licensed rate of diversion would be adequate.
- On 25 May, spoke with Dave Steube, Conservation Technician, for SCS in Madison County. Mr. Steube stated, that because of the high elevation, annual precipitation of around 15", soil profile and type of crops raised in the area of the POU, the SCS uses an application rate of 6.5 gallons per acre for evaluating irrigation systems. Dividing the licensed rate of diversion by 6.5 indicates there is sufficient water for 641 acres. Mr. Steube stated this acreage can be doubled by using a grain potato rotation. Also for the location of the POU the SCS irrigation handbook lists a total net irrigation requirement of 14.8"/ac for potatoes (less for seed potatoes) and

MICROFILMED

NOV 93

12"/ac for grain. Figuring ~~and~~ irrigation requirement of 14.8"/ac for the entire 1329 acre totals 1639 af. ~~Using~~ Based on his experience with this type of farming practice and the cropping pattern used by Mr. Arnold, Mr. Steube felt the 9.29 cfs would be sufficient to irrigate 1329 acres in years of normal precipitation.

CONCLUSIONS:

- There is the potential that adding a second point of diversion will result in a combined rate of diversion in excess of 9.29 cfs.
- Based on the farming practice where the POU is located, the combined licensed rate of diversion and annual diversion volume are sufficient for irrigation of 1329 acres during years of normal precipitation.
- The application does not request a change in place of use.

RECOMMENDATION/CONDITIONS:

- The transfer should be **granted** with the following conditions:
- Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
 - Use of rights 22-07127, 22-07222 and 22-07406 is limited to a total combined rate of diversion of 9.29 cfs and a total combined annual diversion volume of 3943 af.
 - A flow measurement port or other device as specified by the Department shall be installed by the right holder to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.
 - Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

ADJUDICATION FOLLOWUP:

Should the transfer be approved the Notices will have to be changed to include the new POD. Also since the irrigation system covers the entire POU, Mr. Arnold should be consulted about listing a 1329 acre permissible place of use for each right.
