I met with Ben Brown at KLB, Inc.'s farm in Clendenburg. Mr Brown went over the

map of their poll.

I questioned him about their exchange wells that are located south of Sugar City

on the Teton River.

He told me that they can only use the west well because the east well interferes with the neighboring ordinary wells.

When I did a field exam on 8/2/05 of the wells, the east well was not in use and it appears to have not been used for some time. The west well was running.

and was pumping 5540 gallons per minute as indicated by the magnet flow meter.

8/2/05 Met with Brown again. They indicated that they do not want to abandon the east exchange well. They will get me the information about the pump and motor for the east exchange well.

8/4/05 Ben Brown called with information

about and exchange well - (longer well) There is at least one more claim that goes with this claim. I am not sure of the number of that claim.
