Right Nos. 22-7205, 22-7265A, 22-7265B, 22-7270, and 22-7314 are limited to the irrigation of a combined total of 2740.2 acres in a single irrigation season.

Place of use does not include federal public lands unless authorized in writing by the managing federal agency.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

No demand on upstream prior rights or existing prior exchanges can be made and no interference with prior rights located between the rediversion pump and the exchange wells will be allowed even if the exchange wells are pumping water into the Teton River.

This right is subject to regulation by the watermaster of Water District No 01.

The rate of rediversion from the Teton River shall not exceed the rate of injection into the Teton River from the exchange wells.

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

The exchange wells must inject water into the Teton River whenever water is being diverted from the river under this license, and the injection must continue after the diversion from the Teton River ceases until the water not diverted reaches the point of injection.

Totalizing measuring devices shall be maintained at the exchange wells and rediversion pumps from the Teton River.

EXPLANATORY MATERIAL: BASIS OF CLAIM - License

Exchange well diversion capacity is owned half by Schwendiman Farms and half by M & B Enterprises for a total capacity of 56.36 cfs.

Right Nos. 22-7205, 22-7210, 22-7265A, 22-7265B, 22-7313A, 22-7313B, and 22-7314 are also diverted through points of diversion and injection described above.

Right Nos. 22-7205, 22-7265A, 22-7265B, 22-7270, and 22-7314 are also diverted through point of rediversion described above.

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Use of water under this water right will be regulated by the watermaster of State Water District No. 01.
6. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 3.5 afa per acre for the lands above.
7. Unperforated well casing shall be retained above the first confining layer to prevent interference with shallow wells and recharge to the river.
8. No demand on upstream prior rights or existing prior exchanges can be made and no interference with prior rights located between the redirection pump and the exchange wells will be allowed even if the exchange wells are pumping water into the Teton River.
9. Totalizing measuring devices shall be maintained at the exchange wells and redirection pump from the Teton River.

12. The rate of rediversion from the Teton River shall not exceed the rate of injection into the Teton River from the exchange well.
13. The director retains jurisdiction of this right to adjust the terms of the exchange if necessary to prevent injury to prior rights.
