3934.2 ACRES TOTAL

Place of use does not include federal public lands unless authorized in writing by the managing federal agency.

The rights listed below are limited to the irrigation of a combined total of 3,933.5 acres in a single irrigation season. Combined Right Nos.: 22-7210, 22-7271, 22-7287, 22-7313A, 22-7313B & 22-12656

This right is limited to the irrigation of 2560 acres within the place of use described above in a single irrigation season.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

Totalizing measuring devices shall be maintained at the exchange wells and redirection pumps from the Teton River.

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

The right holder shall accomplish the change authorized by transfer 74650 within one year of the date of February 20, 2009

No demand on upstream prior rights or existing prior exchanges can be made and no interference with prior rights located between the redirection pump and the exchange wells will be allowed even if the exchange wells are pumping water into the Teton River.

Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 01.

Failure of the right holder to comply with the conditions of transfer 74650 is cause for the Director to rescind approval of the transfer.

The exchange wells must inject water into the Teton River whenever water is being diverted from the river under this license, and the injection must continue after the diversion from the Teton River ceases until the water not diverted reaches the point of injection.

The rate of diversion from the Teton River shall not exceed the rate of injection into the Teton River from the exchange wells.

EXPLANATORY MATERIAL: BASIS OF CLAIM - License

This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the lands above.

If the surface water right(s) appurtenant to the place of use is abandoned, forfeited, sold, transferred, leased or used on any other place of use, this right to divert ground water shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.

A lockable device subject to the approval of the Department shall be maintained on the diverting works in a manner that will provide the watermaster suitable control of the diversion.

Exchange well diversion capacity is owned half by Schwendiman Farms and half by M & B Enterprises for a total capacity of 56.36 cfs.

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Use of water under this water right will be regulated by the watermaster of State Water District No. 01.
6. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 3.5 afa per acre for the lands above.
7. Unperforated well casing shall be retained above the first confining layer to prevent interference with shallow wells and recharge to the river.
8. No demand on upstream prior rights or existing prior exchanges can be made and no interference with prior rights located between the redirection pump and the exchange wells will be allowed even if the exchange wells are pumping water into the Teton River.
9. Totalizing measuring devices shall be maintained at the exchange wells and redirection pumps from the Teton River.
