MEMORANDUM

Date: October 26, 1995
From: Jim Johnson
To: Glen Saxton, File
Subject: Applications for Permit 22-07504 and 22-07505

=====

These two applications are being forwarded to you for approval, at this time, because they do not represent a new appropriation of water. These filings were made in 1985 to include lands that were irrigated as part of the Teton Pipeline Development (Teton Pipeline). In total there are approximately 30 water rights associated to this development which the department is in the final processing the rights for licensing.

Approval of these two applications has been delayed until department staff could verify that the lands described on the applications were in fact irrigated prior to 1987. Through reviewing the field examiner's reports completed on the other rights used in the Teton Pipeline, the staff has confirmed that the lands listed under these two applications have been irrigated prior to 1987. The permits now contain a condition that prevents additional appropriation water which could not be assured prior to the measurement of water at the points of diversion listed on the other Teton Pipeline water rights.

Both applications cover the same land, one application (22-07504) is for groundwater and the other (22-07505) is for Teton River when this source is available. The application for groundwater is actually for exchange for the Teton River water diverted at the main diversion facility.
