Mr. Ogawa called today to ask about the letter we sent on 8-10-92. After some investigation, I learned that he needs to have his permit reinstated. It lapsed because he did not pay the examination fee in 1986 after he submitted proof of beneficial use. In order to get the permit reinstated, Mr. Ogawa will have to complete an examination fee form and pay the required exam fee. If he comes in to do so this year, his priority date will get advanced 6 years to 1983. That means he will still need to file an SRBA claim. We should get that claim when his permit is reinstated.

Re: Snake River Basin Adjudication (SRBA)
Canyon County - Claim No. A63-08802

Dear Ms. Ogawa,

We are returning your Notice of Claim to a Water Right filed for your property in Canyon County.

You are given the opportunity to withdraw this claim. Any water right developed from a groundwater source after March 25, 1963, for any use other than single family domestic use, is required to have an application for permit filed. Your Permit, 63-08802, has lapsed and is no longer in effect. We can find no other record of a permit for this property. The claim you have presented conflicts with the Ground Water Statute at §42-229 and defined in §42-230, Idaho Code, and Water Appropriation Rules and Regulations, paragraph 2,15.

I have enclosed an application for permit, with instructions for your use in this matter. We will be happy to proceed if you will return the completed form to:

Idaho Department of Water Resources
Western Region
2735 Airport Way
Boise, ID 83705

Should you wish to pursue before the court the exact water right you have presented on this claim, simply return the claim form to this office. The claim form should be delivered to our office or postmarked by September 10, 1992, otherwise we will assume you wish to withdraw the claim. If you do not wish to file your Notice of Claim, please complete the enclosed Request For Withdrawal Of Claim and return it to the address shown. Your request for refund will be processed as quickly as possible.

E. NARRATIVE/REMARKS/COMMENTS

Well is located in SENESW on north side of lateral which runs through the property, right next to Ten Lane.

The well discharges through an 8" open pipe to an open ditch on the east/north side of the lateral. This ditch parallels the lateral through the IDS+G property.

Approximately 145 ft from the well, water can be diverted from the ditch, under the lateral, and into a ditch which parallels the lateral on the west/south side. This second ditch terminates in the NW corner of the NESE.

Another ditch runs along the south border of the SENW.

The water in this ditch does not come from the well in the SENESW as per field exam. Mr. Ogawa (original permit owner) confirmed that the SENW was never irrigated with water from this well - a delivery system was never developed to that Q.Q. See photos for tracing of ditch on south line of SENW.

Anacor, Inc., a cement plant, owns the N2NESE. The land west of the lateral ^{in that location} was found irrigated during the field exam.

Idaho Sand & Gravel owns the S2NESE. This entire parcel, with the exception of a small piece in the NE corner (of S2NESE) is now a sand and gravel operation. The 1987 ASCS map shows irrigation as does the 1994 scanned air photo. Mr. Glauser indicated that his position is that his company bought the full permit and will be able to put that amount to beneficial use at the sand and gravel operation.

As per 1987 ASCS photo, there were 17 acres of irrigation on the IDS+G property. These acres are confirmed with the 1994 air photo. These acres are recommended as proof of beneficial use.

Have conditions of permit approval been met? ☐ yes ☒ no No measuring device or access point

was submitted 05/03/1982. Recommendation includes only those acres owned by Idaho Sand & Gravel. Additional acres are owned by Anacor, Inc.

Anacor has not indicated any interest in this permit.

Original permit owner filed in SRISA on 15 acres.

RE: Mr. Ogawa called to discuss the well and irrigation development of this permit.

Mr. Ogawa said the well is 200 ft deep. Layne Pump did the installation and should be able to provide a pump curve.

The northern-most 40 acres of the permit never had well water. The 20 acres were sold to Amcor and have not been irrigated. The only remaining irrigation is on the land owned by Idaho Sand and Gravel.

[Amcor was ~~not~~ has a license (63-10257) for industrial use for .56 CFS. Beneficial use proof was submitted 07/09/1985]
