Remarks:Comments:

1. dnelson 3/30/2006 Claim Review

Comment: This adjudication claim is based on a statutory claim that was filed with the department in 1983. During the filing of the statutory claim, the then owner supplied the well log and well drilling receipt as evidence of priority. This evidence is sufficient to recommend the adjudication claim for that same date of 5-20-1979.

A department contractor visited the site of this claim in 2003, and found a 2 Hp pump in the well. The contractor used a theoretical calculation to determine the flow rate, but this calculation was based on total well depth and open discharge conditions. When using the well log and standard pressures, a theoretical calculation actually shows the rate of diversion that filed for under the statutory claim. The adjudication claim requests a higher rate of diversion, but it appears as though the system was designed for the lower rate claimed earlier. Therefore, the total rate of diversion will be limited to 0.07 cfs, which was claimed on the statutory claim.

The property associated with this claim is approximately 1.4 acres, but with the driveway, home, and barns there is only 1 acre actually irrigated. The domestic and stockwater place of use is the entire property.

The canyon county tax lot information shows the property in the ownership of Carol J. Carson and Wayne B. Gammel. A change of ownership letter has been sent.

An aerial photograph of a rural landscape. A large, irregularly shaped parcel of land is outlined in green with a black dotted pattern. This parcel is situated in the upper-middle portion of the image, adjacent to a large, light-colored rectangular field on the right. The surrounding area includes various smaller fields, some with buildings or structures, and a network of roads or paths. The overall scene is captured from an elevated perspective, showing the textures of the land and the layout of the property.

GROUNDWATER THEORETICAL ANNALYSIS

FILE: 103-5245

DATE: 3-30-06

BY: Daniel A. Nelson

THEORETICAL RATE OF FLOW: $Q = \frac{(8.8 \times (HP) \times (EFF.))}{TDH}$

Q = CFS

HP = Total Brake Horsepower of pumping plant (including booster)

Eff. = Pumping plant efficiency (assume 70% or 0.70)

TDH = Total dynamic head = [(LIFT) + (PSI X 2.31)]

LIFT = Depth to water in FEET from land surface to pumping water level

PSI = Pumping pressure measured in PSI near pump (if open discharge assume [0])

$Q = \frac{(8.8) \times (2 HP) \times (0.70) = 12.32}{173.95} = 0.07 \text{ CFS.}$

$[(70 \text{ FT.}) + (45 \text{ psi.} \times 2.31)] = 173.95$

REMARKS: The well log supplied with the statutory
claim shows the static water level at
60 FT. Using the standard drawdown of
10 FT for pumps under 10 HP, the pumping
water level should be 70 FT. The standard
pressure for an irrigation / domestic system is
approximately 45 psi.

The field examiner ~~used~~ found the HP of the
pump, but used the total well depth and an
unrealistic pressure to determine the flow
rate. This ~~calculation~~ calculation is more reasonable
and fits what was claimed in the
statutory claim, and what is actually
done!

CLAIM TO A WATER RIGHT

Under the provisions of Section 42-243, Idaho Code, any person using or claiming rights to the public waters of Idaho established by diversion and application to a beneficial use must file a claim with the Department of Water Resources on or before June 30, 1983. Exempted from this filing are single family domestic uses as defined in Section 42-230(d), Idaho Code. Also exempted are rights represented by a permit, license, decree, adjudicated right, or a previously filed claim.

The filing of this claim does not confirm the water right claimed but failure to file may result in forfeiture of a water right.

RE: Investigation of Water Right Claims in the Snake River Basin Adjudication, Basin 63

Dear Claimant:

As you may be aware, the Idaho Department of Water Resources (IDWR) is commencing its Snake River Basin Adjudication (SRBA) investigation of water rights in the Boise River Basin (Basin 63). This investigation is a major effort, and IDWR has hired a contractor, Water Works, Inc., to assist us with this task.

The purpose of this letter is to advise you that Water Works, Inc. might be contacting you to conduct a field investigation of your water use. This investigation is meant to provide important information to the IDWR Senior Water Resource Agent who will be making a recommendation for your water rights. Accordingly, we request that you provide Water Works, Inc. with access to your water diversion system so that their personnel can conduct this field examination. Water Works, Inc. will be gathering information on the rate of flow, diversion location and place of use of your water rights, and will be reporting this information to IDWR.

If you have sold your property in the Boise River Basin, we request that you forward this letter to the purchaser, so that the purchaser can report the new name and address to our office. If you are unable to forward this letter, please send any information regarding a new owner to our Western Regional Office located at 2735 Airport Way, Boise, 83705, (208) 334-2190.

The process of adjudicating your water rights is straightforward for most people, resulting in the issuance of decreed water rights on your property. ~~Experience has shown that water users who~~ work with our agency early in the process to ensure that their recordings are correct have a better experience than those who wait until IDWR has filed its findings with the SRBA Court. Thus, we encourage you to work with our staff and with Water Works, Inc. to ensure that the results accurately reflect your water uses.

Sincerely,

Jan Shurte
Adjudication Section Supervisor
Western Regional Office
