Conditions of Approval:

1. C18 This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

4. X01 Domestic use is for 6 homes.

Remarks:Comments:

1. dnelson 4/4/2006 claim review

Comment: This adjudication claim is based on a statutory claim filed on 3/1/1984. This claim is for 6 homes in the Vanal Heights Subdivision, more specifically Lots 1 thru 6, block 2. The well is located in Lot 7, block 2 in the southeast corner of lot 1. There is 1 acre of irrigation for all six homes, so the standard season of use of 3/1 to 11/15 was applied. The acres irrigated were determined using the 2004 aerial photography. This imagery is better than 1987 aerial photos, so it allowed a more precise determination of acres.

No proof of priority date was submitted with the claim. However, the Canyon County Tax lot information shows that 2 of the 6 homes were built in 1962. 4 well logs were also found in this area that were drilled between 1958 and 1959. Therefore, the priority date of 6/1/1962 does seem reasonable, and will be recommended.

According to the standard allotment for in-house use (see attached sheet), the maximum allowable rate of diversion for 6 homes is 0.11 cfs. The maximum allowable rate of diversion for one acre is 0.03 cfs. The claimant claimed 0.12 cfs for domestic and 0.02 cfs for irrigation. Whereas both variations of rates equal the 0.14 cfs total claimed, the changes were made to the original rates per the department standards for maximum allowable rates.

The volume was determined using 4.5 afa per acre for a total of 4.5 afa for the irrigation use. Whereas each home is owned separately, the standard of 0.6 afa per home for in-house use only was given for the 6 homes or 3.6 afa. The total volume is 8.1 afa for both irrigation and domestic uses.

IDWR standards of 0.11 cfs for 6 homes and 0.03 cfs for 1 acre of irrigation was used to determine the flow rate. Description for Question 10 - The standard allowable volume for in-house use only is 0.6 afa per home. Therefore 6 homes X 0.6 afa = 3.6 afa for the domestic use portion of this claim. The irrigation was based on the 4.5 afa per acre standard for 1 acre for a total of 4.5 afa for irrigation. When the two are combined, the total volume is 8.1 afa.

MEMORANDUM

TO: ADJUDICATION CLAIM FILE 63-5280

FROM: DANIEL A. NELSON

DATE: 4/4/06

SUBJECT: CLAIM REVIEW

This adjudication claim is based on a statutory claim filed on 3/1/1984. This claim is for 6 homes in the Vanal Heights Subdivision, more specifically Lots 1 thru 6, block 2. The well is located in Lot 7, block 2 in the southeast corner of lot 1. There is 1 acre of irrigation for all six homes, so the standard season of use of 3/1 to 11/15 was applied. The acres irrigated were determined using the 2004 aerial photography. This imagery is better than 1987 aerial photos, so it allowed a more precise determination of acres.

No proof of priority date was submitted with the claim. However, the Canyon County Tax lot information shows that 2 of the 6 homes were built in 1962. 4 well logs were also found in this area that were drilled between 1958 and 1959. Therefore, the priority date of 6/1/1962 does seem reasonable, and will be recommended.

According to the standard allotment for in-house use (see attached sheet), the maximum allowable rate of diversion for 6 homes is 0.11 cfs. The maximum allowable rate of diversion for one acre is 0.03 cfs. The claimant claimed 0.12 cfs for domestic and 0.02 cfs for irrigation. Whereas both variations of rates equal the 0.14 cfs total claimed, the changes were made to the original rates per the department standards for maximum allowable rates.

The volume was determined using 4.5 afa per acre for a total of 4.5 afa for the irrigation use. Whereas each home is owned separately, the standard of 0.6 afa per home for in-house use only was given for the 6 homes or 3.6 afa. The total volume is 8.1 afa for both irrigation and domestic uses.
