Re SRBA Claim Nos. 63-3498, 63-5371 and 63-5372

Dear Mr. Van Schyndel,

Thank you for your response to my letter request of March 14, 2006, regarding the claims referenced above. Enclosed with your response, dated April 13, 2006, was my original correspondence to NNU. I am returning this correspondence to you for your files. The pages entitled "IDAHO DEPARTMENT OF WATER RESOURCES Adjudication Claim Report [number]" are printouts from the IDWR database of the claims NNU filed in the Snake River Basin Adjudication (SRBA).

Also enclosed are "Statutory Claims" filed by NNU in 1985 and aerial photographs of NNU for 1987 and 2004. Statutory claims were made pursuant to an attempt by IDWR to identify water uses prior to the current licensing procedure. These claims were superseded by the SRBA claims filed in 1989. NNU employee, Hal (surname illegible), formerly the business manager and then V.P., Financial Affairs, filed all of the claims. He may be a source of information for some of issues presented herein. I will be referring to both sets of claims in this letter. The aerials are included for illustrative purposes as I describe NNU's claims and water use. The SRBA seeks to verify water uses at a point in time, which is 1987 when the SRBA commenced, so I included the 1987 photo. I included the 2004 aerials because the resolution is excellent in establishing points of reference.

Your response to my March 2006 letter was sufficient for evidence of priority but did not adequately explain changes made to NNU's historical water use. Idaho statutes require that changes made to a use of water after 1987 be approved by IDWR through a transfer process. If an additional quantity of water is needed, an application for a new water right must be made and approved by IDWR through the licensing process before the water is used. The licensing statute for groundwater was enacted in 1963.

Issues:

1 – The statutory claims filed in 1985 indicate that Well 3 irrigated 12 acres of soccer, baseball fields and a track and associated field in the SWSW of Section 27 (63-5371), and that Well 2

Dick Van Schyndel letter
Director of Operations, NNU
May 8, 2006
Page 2

provided water for the heating and cooling of the Student Center and irrigated 2 acres of lawn in the SESW of section 27 (63-5372). However, the SRBA claims for uses from these wells are for 22.5 acres irrigation each, though 63-5271 claims the 22.5 acres in the SWSW and 63-5272 claims the 22.5 acres irrigation in the SESW of Section 27. Both claim heating and cooling uses as well.

Based on my review of aerials from 1987 to 2004, NNU has not historically irrigated nor does it own 22.5 acres in the SWSW Section 27. The 2004 aerial indicates that NNU is currently irrigated about 8 acres in the SWSW Section 27. Further, the 2004 aerial shows irrigation of approximately 14 acres in the SESW, though irrigation was not claimed in this quarter-quarter section in the SRBA claims.

2 – All three SRBA claims add a point of diversion in Section 34. This appears to be an attempt to correct the legal description of Well 2. However, the Student Center building is approximately 13'-14' from the Section 34 line and if it is located as close to the building as the diagram sent to me indicates, the well is in Section 27. NNU will have to actually measure the distance of the well from the Student Center to determine what section it is in. A 2004 aerial blow-up of the Student Center is provided for this purpose.

3 – The quantity of water claimed in 63-5371 and 63-5372 is for .45 cfs. An IDWR subcontractor who conducted a field exam at NNU in 2002 calculated theoretical flows for the 2 wells based on information provided by NNU. The calculated flows were 0.14 cfs from Well 3 (63-5371) and 0.16 cfs from Well 2 (63-5372) for a total of 0.30 cfs. Based on the current statutory standard of 0.02/acre irrigation, this is enough water to irrigate 15 acres, which comports with acres claimed as irrigated in the 1985 statutory claims.

I have provided with this letter a list of consultants, one of which you may want to retain to assist you in clarifying NNU's historical water use and reconciling discrepancies in the claims. Presently and if I do not hear from NNU, I intend to recommend to the SRBA court that NNU's water rights are for a total of 14 acres of irrigation in the SESW of section 27 for claims 63-5371 and 63-5372, and the cooling use as licensed for 63-3498.

Please call me at (208) 334-2190. Thank you for your timely attention to this matter.

Sincerely,

RE: SRBA Claims 63-3498, 63-5371, and 63-5372.

Dear Ms. Music,

Attached find a diagram that describes the three wells on the campus of Northwest Nazarene University and their delivery systems. 63-3498 is used for both irrigation and HVAC cooling. The other two wells are used exclusively for irrigation. All wells can be combined or isolated depending on usage and need. This flexibility was engineered into the system gradually over the past five years.

As evidence of priority we offer for well 63-5372 evidence of the date of construction (01/01/61) of the student center building. The well is located just off the South foundation of the building and was created to support the landscaping and at that time, the water based "swamp cooler" used to cool the building. The current cooling system for the student center does not use the well water. Well 63-5371's priority date of 03/15/48 coincides with the construction of Chapman Hall, a residence hall that was demolished in CY 2000. The well was used to support landscaping and athletic fields in that area and is still in use for that purpose.

If you have any questions, please feel free to call at 208-467-8445.

RE: Investigation of Water Right Claims in the Snake River Basin Adjudication, Basin 63

Dear Claimant:

As you may be aware, the Idaho Department of Water Resources (IDWR) is commencing its Snake River Basin Adjudication (SRBA) investigation of water rights in the Boise River Basin (Basin 63). This investigation is a major effort, and IDWR has hired a contractor, Water Works, Inc., to assist us with this task.

The purpose of this letter is to advise you that Water Works, Inc. might be contacting you to conduct a field investigation of your water use. This investigation is meant to provide important information to the IDWR Senior Water Resource Agent who will be making a recommendation for your water rights. Accordingly, we request that you provide Water Works, Inc. with access to your water diversion system so that their personnel can conduct this field examination. Water Works, Inc. will be gathering information on the rate of flow, diversion location and place of use of your water rights, and will be reporting this information to IDWR.

If you have sold your property in the Boise River Basin, we request that you forward this letter to the purchaser, so that the purchaser can report the new name and address to our office. If you are unable to forward this letter, please send any information regarding a new owner to our Western Regional Office located at 2735 Airport Way, Boise, 83705, (208) 334-2190.

The process of adjudicating your water rights is straightforward for most people, resulting in the issuance of decreed water rights on your property. Experience has shown that water users who work with our agency early in the process to ensure that their recordings are correct have a better experience than those who wait until IDWR has filed its findings with the SRBA Court. Thus, we encourage you to work with our staff and with Water Works, Inc. to ensure that the results accurately reflect your water uses.

Sincerely,

Jan Shurte
Adjudication Section Supervisor
Western Regional Office

CLAIM TO A WATER RIGHT

Under the provisions of Section 42-243, Idaho Code, any person using or claiming rights to the public waters of Idaho established by diversion and application to a beneficial use must file a claim with the Department of Water Resources on or before June 30, 1983. Exempted from this filing are single family domestic uses as defined in Section 42-230(d), Idaho Code. Also exempted are rights represented by a permit, license, decree, adjudicated right, or a previously filed claim.

The filing of this claim does not confirm the water right claimed but failure to file may result in forfeiture of a water right.

Notice is hereby given that NORTHWEST NAZARENE COLLEGE
