ST ANTHONY, ID 83445

SOURCE: TETON RIVER TRIBUTARY: HENRYS FORK

QUANTITY: 77.84 CFS

PRIORITY DATE: 06/01/1884

POINT OF DIVERSION: T07N R41E S28 NWNWNE Within Fremont County

| PURPOSE AND PERIOD OF USE: | PURPOSE OF USE | PERIOD OF USE  | QUANTITY  |
|----------------------------|----------------|----------------|-----------|
|                            | Irrigation     | 04-01 TO 10-31 | 77.84 CFS |
|                            | Stockwater     | 01-01 TO 12-31 | 40.00 CFS |
|                            | Subirrigation  | 11-01 TO 03-31 | 37.84 CFS |

Sub-irrigation is authorized between 11/1 and 3/31 consistent with the practices described in the Rexburg Irr. Co. v. Teton Irr. Co. Decree (including paragraph 31).

PLACE OF USE:

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary. The rights listed below are limited to the irrigation of a combined total of 2616.2 acres in a single irrigation season. Combined Right Nos.: 22-673, 22-12654, 22-12655, 22-13165 and 22-13412.

2740.7 ACRES TOTAL

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

THIS PARTIAL DECREE IS SUBJECT TO SUCH GENERAL PROVISIONS NECESSARY FOR THE DEFINITION OF THE RIGHTS OR FOR THE EFFICIENT ADMINISTRATION OF THE WATER RIGHTS AS MAY BE ULTIMATELY DETERMINED BY THE COURT AT A POINT IN TIME NO LATER THAN THE ENTRY OF A FINAL UNIFIED DECREE. I.C. SECTION 42-1412(6).

RE: Supporting documentation for Stock Water or Ground Water Recharge

Dear Brant:

Over the past several months numerous meetings have taken place with individuals and representatives of water delivery organizations in the upper Snake River Valley and the Department of Water Resources (IDWR) concerning the non-irrigation season diversion of stock water and ground water recharge. In response to these meetings the following criteria were identified for evaluating and recommending these two uses.

- The claimant will have to provide documentation that verifies a historical practice of diverting water during the non-irrigation season for the purpose of providing stock water and ground water recharge. An example would be copies of the minutes for a water delivery organization referencing the diversion of water for these two uses. This information also will be used to help establish the priority date of the use.
- The claimant needs to provide copies of records showing the quantity of water historically diverted during the non-irrigation season. These records will be used as a basis for recommending the diversion rates for these two uses.
- The claimant will have to provide documents, written statements and/or affidavits from individuals who have witnessed the non-irrigation season diversion of water. These individuals need to provide a historical perspective based on actual observation.

SCANNED

JUL 31 2007

Claimants need to assess their actual diversion requirements for stock water and ground water recharge. The quantity of water claimed for non-irrigation season stock water should be the amount needed to reach the end of the delivery system plus provide drinking water for stock. Claimants should not rely upon ground water recharge as a use to supplement the stock water in order for water to reach the end of the delivery system. *Claimants holding Winter Water Savings contracts may have lost their entitlement to divert water for 150 days between November 1 and April 30 through either abandonment or forfeiture.*

For some claimants, amending claims to reflect the necessary quantity for stock water will result in a substantial filing fee (\$100 per cfs). This fee is not refundable, which emphasizes the importance of providing documentation that supports the claimed uses.

*If you or the organization you represent have already amended one or more claims and provided the documentation identified above, you may disregard this letter.*

Individuals or organizations wishing assistance in amending their claims can call the Eastern Region office.

Respectfully yours,  
Ernest Carlsen

Water Right Supervisor

DECREE OF THE SNAKE RIVER AND ITS TRIBUTARIES

Arranged According to

PRIORITY OF RIGHTS

By

CHAS. H. DeCAMP, Water Commissioner Division No. 1.

Current Journal Filed, Rexburg, Idaho

UNED

JUL 31 2007

amount so assessed against him to the the Clerk of this Court.

And it is further ordered that each party hereto shall pay his own necessary costs for witnesses and other individual expenses.

This decree is rendered and entered without prejudice as to any and all rights or claims to waters of Snake River, or any of its tributaries, or any of the parties to this action, who are not in default herein, and whose rights accrued or would take priority as of a date subsequent to the first day of June, 1906.

It is further ordered, adjudged and decreed that the above mentioned and described awards of the right to use the waters of Snake River and its tributaries, respectively, are declared to be appurtenant to and are awarded for the purposes of irrigating the following described lands of the respective claimants, and for the following manufacturing, power, and other purposes, respectively, to-wit:

Acuff, J. H., a tract of land lying adjacent to the NW $\frac{1}{4}$  of SW $\frac{1}{4}$  and Lots 3 and 4, Sec. 15; NE $\frac{1}{4}$  of SE $\frac{1}{4}$  of Sec. 16, and SE $\frac{1}{4}$  of SE $\frac{1}{4}$  of Sec. 16, T. 3 S., R. 34 E., B. M., containing 160 acres.  
 Adams, E. G., S $\frac{1}{2}$  of NE $\frac{1}{4}$  and N $\frac{1}{2}$  of SE $\frac{1}{4}$  Sec. 12, T. 5 N., R. 44 E., B. M., containing 160 acres.  
 Adams, Lot, S $\frac{1}{2}$  of NE $\frac{1}{4}$ , NE $\frac{1}{4}$  of SE $\frac{1}{4}$  and SE $\frac{1}{4}$  of NW $\frac{1}{4}$  of Sec. 2, T. 3 S., R. 34 E., B. M., containing 160 acres.  
 Allen, Amos, NW $\frac{1}{4}$  Sec. 35, T. 4 N., R. 45 E., B. M.

## Winter Water Of The Wilford Canal

The Wilford Canal is diverted from the Teton River. It runs from east to west down through the community of Wilford.

Many families had access to, and used the water for all their needs! Our small log home, which still stands today, was located on the north bank of the canal. The barns, Corrals, and livestock were on the South side.

As with others the canal was very important to our lively hood. We used the water in the home; for bathing, laundry, cooking and also for drinking both summer and winter. In the winter two holes were chopped in the ice: One upstream for the house hold needs, and one down stream for livestock to drink from. I was involved using the canal in this way in the late 30's and early 40's. My grand parents used the canal beginning in 1908. Then 12 years later my parents moved to this home site.

After the war in 1945 we drilled out first well for house hold needs. The well, like most others in the area was dug to 60 feet. Many years wells in the area would go dry in February. We learned that if we would divert a small stream of water on the fields near the well site, the well would not dry up. This made for many iced skating rinks in our community. We played a lot of Iced Hockey. We would also skate for miles on the ice within the canals. It was an extra thrill when we would find fish trapped between the layers of ice. They seemed to be dead, but we would bring them home and put them in metal bathing tubs; and soon they began to swim.

Many of us in this area were disappointed when the law was passed in the late 70's that defined the irrigation season. It prevented us from diverting small amounts of water during winter months; to recharge our wells and also provide water for our livestock.

We live in an area where the land is porous, water sinks quickly. This water that we diverted in the winter not only helped us, but I fell and many agree, that it also helped to recharge the entire aquifer.

There is talk of spending millions on recharge projects. First of all we know there can be no recharge without water; and no water without more snow in winter. Why spend dollars to build recharge sights when in this area there are recharge sights already in place.

First there is an artery of 40 canals that fan out between Ashton and Rexburg where 15 to 20% of water is lost to seepage during the irrigation season. Water in these canals during winter months would contribute to under ground storage. There are excavation pits along the free-way from Ashton to Idaho Falls that could have water in them if and when this drought ends and there is water available to do so.

## WILFORD CANAL WINTER WATER

This is a brief history as I recall of the Wilford Canal running water during the winter months.

I am seventy four years old and our family has always been involved in the operation of this canal.

My father was a Director and Secretary for twenty four years (1936-1960) and was very active in the day to day operations of the Wilford Canal. I was a Director, Secretary and Board Chairman from 1964 to 1996 (32 Years).

We have always felt the Wilford Canal was the economic life blood of our community (what would our land be worth without water and how deep would our domestic wells have to be?)

I recall in the 1930's nearly everyone relied on water in the canal in the winter for domestic and livestock use. Beginning in the 1940's some domestic wells were being drilled but most everyone watered their livestock from the canal. The early wells were not very deep 50-60 feet and they would start getting low or go dry in the winter so farmers would run water in barrow pits, sloughs or on their land and this would raise the water level, as we leveled our land, filled sloughs, borrow pits our water table continued to drop, our first well was 60 feet, then around 1950 we lowered it to 90 feet and in 1960 we drilled down to 120 feet.

The years I was a director, (1964-1996) there was a definite need for water to be in our canal for land recharge, well recharge, and livestock use. Nearly every year some wells would get very low or go dry. If we would increase the flow of water in the canal our stockholders could run water around their place and water their livestock and the wells would come back in.

In the late 1970's our district water master petitioned the Idaho Legislature to define the water as far only irrigation and set the irrigation season from April 1 to Oct 31.

In the 1910 adjudication of our water rights, the judge ruled our water rights were for irrigation, manufacturing, power and other purposes. (Page 31)..

In the late 70's or early 80's the District water master started sending letters to the canal company's stating if water was used between Nov 1 and March 31 they could be charged storage water from the following years allocation.

Since this has happened many wells have had to be drilled deeper, the water table under our farms is lower and it takes more water the following summer for our crops and our canal has a greater loss from shrinkage.

We are now seeing many lawsuits be filed from those holding senior water rights. The water table is dropping every year; stream flow and drainage into the rivers are lower.

We need to realize that you have to put as much into the system as we take out.

In reading minutes of meeting between 1978 to present, we used winter water when the board felt it would not jeopardize our storage water the following summer.

A few personal experiences of having water in the Wilford Canal in the winter.

1. In 1941 when I was attending Wilford School, the North branch of the Wilford Canal flooded the entire school grounds and surrounding areas. All of the students had a great time skating for a month or longer.
2. Winter water in Wilford Canal meant chopping holes everyday for livestock and providing great skating for the entire length of the canal.
3. I recall after blizzards the canal would fill with snow. My dad and neighbors would take a sharp – shoed team of horses and a single wing ditcher and go through drifted areas making a path to keep water flowing in the canal and not flood over.
4. In 1962 and 1967 we received much rain and warm weather in late January and early February. The Teton River flooded many homes and farm land and both times we were asked to open our gates to help relieve the high water down river.

## WINTER WATER IN THE WILFORD CANAL

I was born in Wilford in 1930. Our home was across the street from the Wilford Canal. The water in the canal was the primary source of water for our cows and horses as well as everyone else that lives close by. It was also used for our household purposes.

After I was old enough to go to school it was my chore to keep the ice out of the water hole so the cows could drink. There was water running in the canal all winter long. All the neighborhood kids used it as a skating rink. Many times we could skate all the way to the canal. I'm sure that all the domestic wells in the area have benefited running water in the canal all winter.

## WILFORD IRRIGATION AND MANUFACTURING COMPANY

In the years between 1833 and 1900, many people came from Utah communities to find new homes on the sagebrush flats between the North Fork of Snake River and the Fall River on the north and the Teton River on the south. Those who were members of the Latter-day Saints Church were encouraged by the leaders of the Church to build their homes in communities where they could preserve their religious ideals, and be mutually helpful in withstanding the hardships and dangers of a pioneer life. The Wilford and Twin Groves Communities were established in this way.

Through the efforts of those early pioneers this area is now under irrigation and served by the Salem Union, Fall River, Farmers' Friend, and Wilford Canals and by three smaller ditches known as the Pioneer, The Good Luck, and the Stewart Ditches.

To the Wilford Community in 1883 and 1884 came the Birch Brothers, Thomas, Edward, James, Dave, Robert, Jack, and William from Coalville and Willard, Utah. From Cache Valley came the families of George David Black, William E. Pratt, William and Joseph Brower, and John Burrell. Lysander Dayton came from Cedar Fort. George and Bill Davis came from Hooper, Utah and Thomas S. Smith and several grown sons from Farmington, Utah. These first families chose the land nearest to the Teton River and the sloughs which meandered from it from which they could get culinary water and enough water to irrigate a few acres of crops.

But as other families arrived, it became evident that only by the co-operative efforts of groups could the life sustaining water be led out to the fertile but thirsty lands farther from the rivers. On February 2, 1884, a group began work on a dam across the Teton River for the purpose of diverting water through a ditch which was to be called "The Wilford Mechanical and Agricultural Water Ditch. Some of the men who were there that day were James Birch, Ernest Chase, William J. Pratt, Nelson Russ, George D. Black, James Powell, Edward Birch, H. B. Heninger, John Burrell, and William Birch. On May 1, 1884, they posted the notice at the head of the canal claiming 14,000 inches.

The company was organized in 1885 with the following officers: Thomas S. Smith, President; George David Black, vice-president; William J. Pratt, Treasurer; and C. A. Powell, Secretary. Other directors were Edward A. Smith, Richard Funk, and Edward Birch.

Stockholders then comprising the company were: Edward Birch, William Allgood, Thomas Birch, James Birch, William Birch, George D. Black, Ernest Chase, Lysander Dayton, W. J. Elliot, W. R. Funk, C. A. Gordon, Thomas Gooch, John Hansen, H. F. Heninger, W. R. Jack, S. G. Johnson, Joseph Johnson,

COPIED

JUL 31 2007

John Burrell, Reuben Belnap, Joseph Byington, Joseph Brower, C. A. Powell, James Powell, William J. Pratt, Nelson Russ, and John Robb.

At first it was decided to dig three branches of the canal, the two which are now used, and a third branch which was to have watered lands farther to the north which are now served by the Fall River and Farmer's Friend Canals. The third branch was never dug. The canal flows due west from the Teton River for three quarters of a mile to the dividing gates. Here it divides into the north and south branches which then flow west four miles paralleling each other at a distance of one-hundred rods. The course of the north branch was surveyed along the side of the hill by J. R. Meservy. Then at the place where the canal dropped from the hill to the flat below, the water was run through a penstock to supply power for the sawmill and gristmill erected by J. R. Meservy in 1887 and 1888. People came from miles around to have grain ground into flour at the Meservy Mill.

Serving as President of the canal company in 1886 was Jesse L. Smith; in 1887-88 was Richard Funk; in 1889 was Joseph Byington; and in 1890 was Charles A. Gordon.

In the years that followed, other families came from Utah who helped to widen the canal, build headgates, clear the land from sagebrush and make irrigation ditches. They were the families of Francis Roueche, Eric Johnson, Samuel W. Orme, Joseph and Fred Romrell, William H. Panter, and many others.

In the years between 1905 and 1910, the decrees of the canals of Snake River and its tributaries were determined through the decisions handed down by the District Court. These decisions and decrees were made and based on the testimonies of the very earliest pioneers and river engineers. The men who testified that they were on the dam site on February 2, 1884 and that the notice was posted on May 1, 1884 were William Birch, Edward Birch, John Hansen, and John Pincock.

Some of the officers during those critical years were T. F. Roueche, President; O. K. Meservy, Secretary; and board members S. W. Orme, S. A. White, Eric Johnson, C. E. Murri, George McArthur, and Joseph Romrell.

As the decrees were finally determined by the courts, the Wilford Canal was given a low decree of 3,392 miners inches dated June 1, 1884 and a high decree of 6,608 inches dated April 1, 1898.

When it became evident that the Wilford Canal heading in the Teton River could not adequately supply the north-eastern parts of the Wilford farming area, practical minded men, some of whom had just finished helping build the Wilford Canal began to explore the possibilities for other canals heading from the North Fork of the Snake River and from its tributary, the Fall River.

# Sketches of a Pioneer Community

## Wilford, Id.

### Volume II

A Sketch of the Meservy Mill made by Mrs. Rozelia Watson from her memory of it.

The millrace and the penstock were open on top. The millrace was about fifteen feet long and five feet wide. The penstock was about five feet square and extended up above the millrace a foot or two. Both the millrace and the penstock were made of very heavy solid lumber.

The building was about thirty feet long and was made of logs. It was two stories high. The machinery was run by the power derived from a large wheel that lay flat at the bottom of the penstock onto which the water fell as it dropped down through the penstock. There was a foot-bridge near the door over the stream of water that flowed out of the penstock and back into the canal farther downstream.

The products of the mill were whole wheat flour, shorts and bran.

In 1975 Wilford had 215 cfs as a maximum average monthly diversion. When Good luck was added in 1980 through transfer 2046, there was no spike in flow rate. The maximum after 1980 was less than 200. I am using the average of 3 days in July of the year 1975 for my recommendation. July 5, 6 and 7. So the maximum I am able to recommend is 268 CFS. I am decreasing their 1939 priority dates to satisfy that flow rate.

Dear Mr. Beech;

Attached are copies of your original claims for the Wilford Canal Company. Claims numbered A22-12655, A22-12654, and A22-00673 lacked the proper legal description for the Point of Diversion. Descriptions on the original claims were made to forty acre parcels. However, descriptions need to be made to the nearest ten acre parcel.

I have input the apparent additional information from the maps attached to the claims. Would you please review the descriptions. If correct, please sign, notarize, and return to us for our files.

Respectfully,

  
Bruce A. Schuld

To Change the Point of Diversion and/or the Place of Use

**APPROVED**

Name of applicant Good Luck Canal c/o Larry Kerbs Phone 458-4134  
Post office address Rt. #1, St. Anthony, Idaho 83445

A. DESCRIPTION OF RIGHT AS RECORDED

1. Right evidenced by:
- a. Decree to \_\_\_\_\_ (Name)  
in case of \_\_\_\_\_ vs \_\_\_\_\_  
dated \_\_\_\_\_ in \_\_\_\_\_ county of \_\_\_\_\_  
(Name of court)
- b. <sup>Transfer</sup> License No. 2046 issued by the Idaho Department of Water Resources  
~~XXXXXX~~
- c. Claim No. \_\_\_\_\_ on file with the Idaho Department of Water Resources
2. If applicant is not the original holder of this right, explain how it was acquired and attach a copy of the deed or other evidence of ownership of the land to which the right is appurtenant \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_
3. Source of water Teton River tributary to Snow River
4. Date of priority 6-01-1884 (22-0275) 4-01-1898 (22-0274)
5. Water is used for the following purposes:
- 22-0275 amount 3.85 cfs for Irrigation purposes from Apr. 1 to Nov. 1
- 22-0274 amount 10.01 cfs for " purposes from " to "
- amount \_\_\_\_\_ for \_\_\_\_\_ purposes from \_\_\_\_\_ to \_\_\_\_\_  
(month/day – both dates inclusive)
6. Total amount of water under right: a. 13.86 cubic feet per second  
&/or  
b. \_\_\_\_\_ acre feet per annum
7. Location of original point of diversion is NE 1 % of SE 23 % of Section 23  
Township 7N Range 42E, B.M., in Fremont County
- Additional points of diversion, if any \_\_\_\_\_

8. Lands irrigated or place of use:

[illegible]

Total number of acres to be irrigated 181.

9. Describe any other water rights used for the same purposes as described above

B. DESCRIPTION OF PORTION OF RIGHT OWNED BY APPLICANT (If the entire right is owned by the applicant, omit part B).

1. Amount of water: a. \_\_\_\_\_ cubic feet per second  
&/or  
b. \_\_\_\_\_ acre feet per annum
2. Point of diversion \_\_\_\_\_ ¼ \_\_\_\_\_ ¼, Section \_\_\_\_\_ Township \_\_\_\_\_  
Range \_\_\_\_\_, B.M., \_\_\_\_\_ County  
Additional points \_\_\_\_\_

3. Place of use:

C. DESCRIPTION OF RIGHT OR PORTION THEREOF, AFTER THE REQUESTED CHANGE

1. Change in point of diversion

- a. Amount of water to be diverted 36.0 c.f.s. &/or \_\_\_\_\_ acre feet
- b. Point(s) of diversion NW ¼ NE ¼, Section 28 Township 7N  
Range 41E, B.M., Fremont County  
Additional points \_\_\_\_\_

c. Description of diverting works headworks for Wilford Irrigation & Manufacturing Canal Co.

d. Describe the reasons for applying for a change in the point(s) of diversion  
Lease agreement with Bob Parkinson lapsed, and the applicant wishes to transfer water into Wilford Irrigation & Manufacturing Canal Co. to be applied to lands it was appurtenant to prior to Transfer NO. 2046

2. Change in place of use

- a. Describe the lands or place of use to which the right will be transferred:

| TWP. | RANGE | SEC. | NE¼ |     |     |     | NW¼ |     |     |     | SW¼ |     |     |     | SE¼ |     |     |     | TOTALS |

Total number of acres to be irrigated 328

# A. DESCRIPTION OF RIGHT AS RECORDED

## 1. Right evidenced by:

a. Decree to \_\_\_\_\_

(Name)  
in case of \_\_\_\_\_ vs \_\_\_\_\_

dated \_\_\_\_\_ in \_\_\_\_\_ county of \_\_\_\_\_

(Name of court)

b. ~~Decree~~ Transfer Decree No. 2249 issued by the Idaho Department of Water Resources

c. Claim No. \_\_\_\_\_ on file with the Idaho Department of Water Resources

2. If applicant is not the original holder of this right, explain how it was acquired and attach a copy of the deed or other evidence of ownership of the land to which the right is appurtenant \_\_\_\_\_

3. Source of water Teton River tributary to Snake River

4. Date of priority 6-01-1884 (22-0275) 4-01-1898 (22-0274)

5. Water is used for the following purposes:

22-0275 amount 6.15 for Irrigation purposes from Apr. 1 to Nov. 1

22-0274 amount 15.99 for " purposes from " to "

amount \_\_\_\_\_ for \_\_\_\_\_ purposes from \_\_\_\_\_ to \_\_\_\_\_  
(month/day - both dates inclusive)

6. Total amount of water under right: a. 22.14 cubic feet per second

&/or  
b. \_\_\_\_\_ acre feet per annum

7. Location of original point of diversion is NW  $\frac{1}{4}$  of NE  $\frac{1}{4}$  of Section 28

Township 7N Range 41E, B.M., in Fremont County

Additional points of diversion, if any \_\_\_\_\_

8. Lands irrigated or place of use:

| TWP.      | RANGE      | SEC.      | NE $\frac{1}{4}$ |                  |                  |                  | NW $\frac{1}{4}$ |                  |                  |                  | SW $\frac{1}{4}$ |                  |                  |                  | SE $\frac{1}{4}$ |                  |                  |                  | TOTALS     |

Total number of acres to be irrigated 171

9. Describe any other water rights used for the same purposes as described above \_\_\_\_\_

A. DESCRIPTION OF RIGHT AS RECORDED

1. Right evidenced by:

- a. Decree to \_\_\_\_\_ (Name)  
in case of \_\_\_\_\_ vs \_\_\_\_\_  
dated \_\_\_\_\_ in \_\_\_\_\_ county of \_\_\_\_\_  
(Name of court)
- b. Transfer License No. 2249 issued by the Idaho Department of Water Resources
- c. Claim No. \_\_\_\_\_ on file with the Idaho Department of Water Resources

2. If applicant is not the original holder of this right, explain how it was acquired and attach a copy of the deed or other evidence of ownership of the land to which the right is appurtenant \_\_\_\_\_

3. Source of water Teton River tributary to Snake River

4. Date of priority 6-01-1884 (22-0275) 4-01-1898 (22-0274)

5. Water is used for the following purposes:

22-0275 amount 6.15 for Irrigation purposes from Apr. 1 to Nov. 1

22-0274 amount 15.99 for " purposes from " to "

amount \_\_\_\_\_ for \_\_\_\_\_ purposes from \_\_\_\_\_ to \_\_\_\_\_  
(month/day — both dates inclusive)

6. Total amount of water under right: a. 22.14 cubic feet per second  
&/or  
b. \_\_\_\_\_ acre feet per annum

7. Location of original point of diversion is NW  $\frac{1}{4}$  of NE  $\frac{1}{4}$  of Section 28  
Township 7N Range 41E, B.M., in Fremont County  
Additional points of diversion, if any \_\_\_\_\_

8. Lands irrigated or place of use:

Total number of acres to be irrigated 171

9. Describe any other water rights used for the same purposes as described above \_\_\_\_\_

3. Draw a map indicating the new point(s) of diversion and/or the new land to be irrigated. Show clearly the land involved by section, township and range number.

SCALE: 2 inches equal 1 mile. Draw plan in ink.

3. Draw a map indicating the new point(s) of diversion and/or the new land to be irrigated. Show clearly the land involved by section, township and range number.

SCALE: 2 inches equal 1 mile. Draw plan in ink.

4. Remarks Intent of this application is to consolidate all of the water rights  
for the Good Luck Canal.

I hereby assert that no one will be injured by such change and the change does not constitute an enlargement in use of the original right. The information contained in this application is true to the best of my knowledge.

Larry Kerbs  
(Signature of applicant)

Subscribed and sworn to before me this 4<sup>th</sup> day of January, 19 80.

Allen May  
(Notary public)

My commission expires 6/15/81

#### ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Transfer of Water Rights No. 22-0274/0275 and said application is hereby approved, subject to the following limitations and conditions:  
(1) Measuring devices of a type acceptable to the Department shall be permanently installed and maintained as a part of the diverting works from the Teton River and at each point of re-diversion of Good Luck Canal Company water from the Wilford Canal. (2) Use of water under this transfer is subject to the control by the watermaster of State Water District # 01, Snake River. (3) The amount of water diverted under this right shall not exceed that amount being utilized upon the lands of the Good Luck Canal Company to which the water was decreed plus a reasonable amount to provide a proportionate share of canal delivery system losses, if any, incurred by transporting the water in the Wilford Canal system. Such use of water shall not exceed that reasonably necessary to irrigate the lands of the Good Luck Canal Company to which the water was decreed.

Witness my hand this 10<sup>th</sup> day of March, 1980.

Norman C. Young
