)

I. Brief Procedural Background

On December 19, 2006, the *Director's Report for Irrigation and Other Uses for Basin 63 Part III* was filed. No objections were filed. On July 10, 2008, the Idaho Department of Water Resources sent correspondence, together with an *Amended Director's Report*, notifying this Court of clerical errors. The *Amended Director's Report* was filed July 14, 2008.

II. Order

Therefore, based on the foregoing, THE FOLLOWING ARE HEREBY ORDERED:

1. Deadline for Objections is September 29, 2008.
2. Deadline for Responses is October 10, 2008.

If no objections are filed, the water rights will be decreed in conjunction with the uncontested rights for Basin 63 Part III.

Dated August 21, 2008

RE: Subcase No. 63-7218 (J.R. Simplot Co.)

Dear Judge Melanson:

The Director's Report for Basin 63, Part 3 was filed with the SRBA Court on December 19, 2006. The deadline to file objections was June 20, 2007. Contained in the Director's Report for Basin 63, Part 3 was the recommendation for water right number 63-7218. No objections were filed to this water right recommendation and a partial decree has not yet been issued.

It has recently come to the attention of the Department that the water right recommendation contained clerical errors, wherein the Department recommended the diversion volume for the industrial purpose of use as a year around use. This was in error, as this water right was licensed with a four-month period of use for the industrial component of this right. A copy of the license is attached hereto for reference.

I am also attaching an Amended Director's Report wherein the changes concerning the annual diversion rate are identified in underline/strikeout format for ease of identification. Please set the standard objection and response deadlines for this Amended Director's Report.

I am sending a copy of this letter to counsel for the claimant, so that he is aware of this error.

If you should have any questions or comments, please feel free to contact me at (208) 287-4813.

Sincerely,

A handwritten signature in black ink that reads "Nick Spencer".

Adjudication Recommendation Report 63-7218 V1

Conditions of Approval:

1. C18 This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.
2. Industrial use is for a potato processing plant.
3. S39 The use of water for irrigation under this right may begin as early as March 1 and may continue to as late as November 15, provided other elements of the right are not exceeded. The use of water before May 31 and after August 15 under this remark is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date a partial decree is entered for this right.

The uncontested hearing won't be for a while. If you send me the revised recommendation, we could probably treat it as a clerical error and send it to the court with a short letter of explanation.

Thanks,

Vicky,

I received a voice message from Shelley Keen while you were gone regarding 63-7218 – Simplot. It appears the afa amount given is more than what the cfs amount for the season of use will supply. After you review this one we should talk about it and see what can be done.

Thanks,
 Jan

Well, I requested the calculations because you provided a number only with no information as to how the number was arrived at. If it is metered, it it a totalizing meter so you took one number from the one meter running from 1/1/06 and added it to the volume from 8/05 to get the volume? Do you have one meter ? when you say that the 400,000,000 is an average, how did you arrive at the average? Did you take gallons per year per process for the past 5 years? Etc.

Thanks. Vicky M

Vicki,

As I described, below are the average annual volumes used at our Nampa food processing plant:

Annual fresh water usage for Nampa (average data)

Cooling water	10,000,000 gallons
Boiler Makeup	20,000,000 gallons
Process water	348,000,000 gallons
Sanitary (domestic)	2,000,000 gallons
Irrigation	20,000,000 gallons
Total	400,000,000 gallons

Vicki,

These are metered volumes, so I don't know what you need in terms of calculations. Please keep in mind these are averages. I am rounding up the allocation of the total volume among the various uses; food processing, irrigation, fire suppression, etc. I should have these later today. What is your advice on the fact these are averages? Should we look back into our records and find a "high" year - or will your recommendation contain enough flexibility for the volume to expand and contract depending on market and raw input (potato) conditions provided the flow rate is not exceeded?

Hi Vic -

I have received no response from Simplest to my emails to you of 4/10/06 and 5/8/06 and my letter to Ron Graves dated 5/8/06 requesting information about the license referenced above. Specifically, I requested in all of the correspondence information regarding the industrial use from which I could calculate an annual volume component for the industrial use.

Therefore, I will be using the following minimum well design assumptions for my annual volume calculation: assume the well pumps 2 hours per day x 5 days a week x 26 weeks annually.

Hi Vic -

I am reviewing the above license in preparation for recommending it to the SRBA Court in Basin 63 Part 3. It is a license and one of the uses is industrial. It was originally owned by Carnation and the industrial use is milk processing. I have to have the annual volume of water used for industrial or additional information so that I can calculate the annual volume for this industrial use. This is important because, though not required when the license was issued, it is a component of a groundwater right now and is considered to be a limitation on the right so we want to make sure it is as accurate as possible.

Please let me know who I can contract for this information. Attached is the water right printout. Thanks.

Dear Lori:

Enclosed for filing in the Snake River Basin Adjudication are claims to the above water rights. It is my understanding that the IDWR is adopting a policy of waiving the additional charges that are assessed for filing late claims in circumstances where a landowner discovers there are unclaimed rights appurtenant to real property when it is newly acquired. When Simplot recently acquired the real property to which these rights are appurtenant we discovered that our predecessor in interest had not yet filed claims in the SRBA.

Assuming the late fees are waived under these circumstances please file the enclosed claims and apply the enclosed check in the amount of \$1,195.00 toward covering the standard SRBA filing fees.

Sincerely,

RE: ANNUAL VOLUME DATA
Snake River Basin Claim No(s): A63-7218

Dear Claimant(s),

In the past, you submitted the above referenced claim(s) during the Snake River Basin Adjudication (SRBA) claims taking. Enclosed is a printout of the water right report for your reference only.

This claim is for a license with an industrial use. At the time this right was licensed, no annual volume component was required. However, to recommend this in the SRBA, IDWR must have additional information regarding how the water is used and the volume used. The annual volume is an important component of a right because it is a limitation on the use of ground water sources. Please call me by May 15, 2006, at (208) 334-2190 with a contact name and phone number of a plant engineer or another employee knowledgeable about the water use at this facility.

Thank you for your attention to this matter.

WATER RIGHT LICENSE

License of Water Right No. 63-7218 Priority April 18, 1969 Amount 3.40 cfs

THIS IS TO CERTIFY, that CARNATION COMPANY

of Los Angeles, California, has complied with the terms and conditions of Permit No. 63-7218 issued pursuant to Application for Permit dated April 18, 1969, and has submitted proof to the Department of Water Resources on June 3, 1974, that he has applied water to a beneficial use; an examination by the Department indicates that the works have a capacity for the diversion of 4.0 cfs of water from a ground water source, tributary to _____, and that the permit holder has applied to a beneficial use and established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
Fire Protection	from Jan. 1 to Dec. 31	at 3.40 cfs and	n/a
Industrial	from Dec. 1 to March 31	at 2.00 cfs and	n/a
Irrigation	from May 31 to August 15 (both dates inclusive)	at 0.20 cfs and	22.5 acre feet or 4.5 af per acre

Subject, however, to the condition that no more than 3.40 cfs of water be diverted at any one time, and that the amount of water so diverted and to which such right is entitled and confirmed is for the purpose aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed 22.5 acre feet per year/said waters to be diverted within the NW1/4NW1, Sec. 8,
