REASONS SUPPORTING EACH BOX CHECKED

In response to Statement of the Objection items 9, 9a., and 11 and all allegations of the objection regarding these items, IDWR responds as follows:

IDWR lacks sufficient information to form a belief as to whether any or all of the lands upon which water is used pursuant to this right are owned by the United States. IDWR further lacks sufficient information to form a belief as to whether the claimant's use of any lands owned by the United States is subject to an agreement with the United States. IDWR denies that federal ownership of the place of use or agreements with the federal government as to use of lands within the place of use are necessary to define the water right. IDWR denies the objection and all allegations of the objection not expressly admitted

herein.

SUBJECT: QUESTIONS ON SPECIAL MASTER'S RECOMMENDED ORDER???
phone call (.) walk-in (X)

He had received a Special Master's Recommended Order in the mail recently and didn't understand what it meant. I looked it over and it referred to an SF5 between the BLM, IDWR, and Mr. Carney which was signed in July of 1995. He questioned the recommended acres of 331, when the original permit requested 386 acres? I told him we had recommended and reported this right to the court just as it had been licensed, back in 1992. There was never an objection by him on the acres and if he had a problem with that, he should have said something back when the License was issued. He took copies of the map which was submitted with the Application for Permit and the one from the license exam, comparing how and where the acres were reduced. Told him I didn't know if there was anything he could do about that now though...
