

IDAHO DEPARTMENT OF WATER RESOURCES
RECOMMENDED WATER RIGHTS ACQUIRED UNDER STATE LAW

RIGHT NUMBER: 22-13342

NAME AND ADDRESS: CONSOLIDATED FARMERS CANAL CO LTD
C/O DELL RAYBOULD SEC
3215 N 2000 W
REXBURG ID 83440

SOURCE: HENRYS FORK

TRIBUTARY: SNAKE RIVER

QUANTITY: 120.000 CFS

PRIORITY DATE: 06/01/1892

POINT OF
DIVERSION:

T07N R40E S10 NESE Lot 25 Within FREMONT County

PURPOSE AND
PERIOD OF USE:

<u>PURPOSE OF USE</u>	<u>PERIOD OF USE</u>	<u>QUANTITY</u>
SUBIRRIGATION	11/01 03/31	120.000 CFS
IRRIGATION	04/01 10/31	120.000 CFS

Sub-irrigation is authorized between 11/1 and 3/31 consistent with the practices described in the Rexburg Irr. Co. v. Teton Irr. Co. Decree (including paragraph 31).

PLACE OF USE:

6018 ACRES TOTAL

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

Place of use is within the area served by Consolidated Farmers Canal Co.

The rights listed below are limited to the irrigation of a combined total of 6018 acres in a single irrigation season. Combined Right Nos.: 22-13342, 22-13343, 22-13344, 22-13347, 22-13349.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

Water is delivered through Consolidated Farmers Canal.

This right is former right no. 1-44.

Renumbered from 01-44 to 21-12905 to 22-13342.

Consolidated Farmers Canal Co. LTD

Consolidated

- Has 7712.7 ~~acres~~ acres based on calculation done on Roxana Consolidated overlap.
- 2582 acres overlap with island ward
- That leaves 5130.7 not overlaped
- Of the overlap Consolidated gets 38%
= 981.2
- ~~5130.7~~ 5130.7 + 981.2 = 6111.9 acres to be recommended.

Roxana claimed 1235.4 acres on map.

Consolidated claimed ~~8386.5~~ 2622.2

The shareholders that own shares in both canal companies were subtracted from both canal companies 1210.8 from consolidated and 1047.3 from Roxana. This included land owned by shareholders outside of overlap and inside. So if a portion of Johns land was overlapped that land and all other land ~~covered~~ covered by a canal company was subtracted.

Then Based on 57% for Roxanna and 43% for Consolidated, 713.5 acres was added back to Roxanna for a total of 901.6 and 537 acres was added back to Consolidated for a total of ~~7948.4~~ 7712.7

$$\begin{array}{r} \text{Roxana} \\ 1235.4 \\ - 1047.3 \\ + 713.5 \\ \hline 901.6 \end{array}$$

I have received a list of shareholders for Consolidated and Island Ward. The lists don't seem to be accurate. I am taking how many share of consolidated the people on the Island Ward list own and adding that to the total shares on the Island Ward list. That gives me a total amount of shares. I am then finding out the percentage of those shares each company owns and applying that percentage to the overlapped acreage.

Island ward lists 106.5 shares.

People from Island ward also own 65.5 shares in consolidated.

Total shares is 172

Island ward owns 62% of those shares and Consolidated owns 38%.

Consolidated will get 38% of the overlap acres and Island Ward will get 62%

Affidavit of Reed Oldham

Re: Winter water use from the Consolidated Farmers Canal.

My name is Reed Oldham. I am a retired farmer, former President of the Consolidated Farmers Canal, former member of the Committee of Nine, and have been involved in water management all of my life. I reside at 1670 West 3000 North Rexburg, Idaho 83440. I have lived within one-half mile of my present residence all of my life. I was born in 1914 across the street from my present home, in my grandfather Phost's home. My grandfather homesteaded his farm, and was instrumental in the construction of the canal on the south side of the Teton River to his property. My mother was born on this farm in 1891, so I am confident that the canal water was used in the winter prior to that date.

Before the Consolidated Farmers Canal (CFC) was constructed, my grandfather watered his stock from the slough south of his barn fed from the Teton river. After the construction of the CFC the slough was fed during the entire year from the canal and provided water for livestock and kept the water table high enough for everyone in the area to get their culinary water from shallow wells using sandpoints and hand pumps. Without the water in the canal and ditches, these shallow wells would dry up.

In addition to the sloughs, the lateral ditches were fed from the canal to supply water to those living in the western and southern part of our community. I remember as a small boy, ice skating on the large ditch behind our house that ran from the CFC to the Saurey property and the Rigby property two miles west of our farm. They used this water for cattle and to recharge the shallow water table. Many times the headgate would freeze up and we would have to chop ice or plug the gate with straw to stop flooding in our field.

Having been involved in the management of the CFC, I believe that it will take in excess of 80 cfs to get water to the end of the canal, considering small diversions for stock water and transmission loss in the canal.

It is my testimony that water from the Consolidated Farmers Canal was used during the winter months for purposes of stock water and groundwater recharge from the time the canal was constructed and a decree was issued in 1890.

Affidavit of Dell Raybould

Re: Winter water use from the Consolidated Farmers Canal

My name is Dell Raybould. I farm at 3215 N 2000 W. Rexburg, Idaho. I have farmed here and lived here since 1952. Before that time the land I am farming was owned by my grandmother and I had knowledge of the irrigation from the Consolidated farmers Canal prior to the time I bought the land. I have been a director of the Consolidated Farmers Canal Co. since 1955. I have served as secretary/treasure since 1962, and have a through knowledge of the operation of the canal since that time.

The Consolidated Farmers Canal provided irrigation water for our crops and ground water recharge for the domestic wells in this area. These wells were sand points driven into the ground, some as shallow as 15 feet. The water in the canal kept the water table up high enough during the winter months so that when the canal would freeze there would be enough water to supply these wells until water could be diverted into the canal late in the winter or early spring. In addition to the shallow wells, most livestock was watered in the ditches and sloughs that were fed from the canal throughout the year.

I personally watered my cattle from the sloughs and ditches as long as water was available into winter and as soon as we could get water from the canal in the late winter and early spring. At that time I had about 270 head of beef cattle that I wintered here on this farm. Prior to the time I owned this farm it was rented to Alvin Lusk who also followed the same practice of watering his livestock from the sloughs and ditches.

It was of great importance that the water table be kept as high as possible in the winter so that the community would have water in their domestic wells. After the decision was made by the department to charge winter water use against the next season's storage allotments, many of the wells had to be re-drilled deeper. Every year the directors of the canal company receive many complaints from shareholders that they do not have water for their cattle and have to pump water. The water right under the Rexburg decree anticipated that water would be used throughout the entire year for irrigation and "other purposes". These "other purposes" included stock water and ground water recharge as evidenced by the historical uses acknowledged by this affidavit and the affidavits of others being submitted.

SCANNED

JUL 31 2007

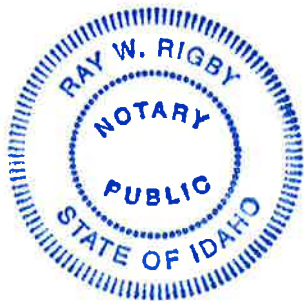

The 80 cfs of water claimed by the Consolidated Farmers Canal Co for winter use is the amount needed for the purposes stated above. Transmission losses in the canal, for the length of the canal, require at least this amount of water to get water to the end of the system. These transmission losses are beneficial to provide recharge in the area served by the canal. Only due to the threat, by the Department, of a loss of storage allotment for the following year, has water been denied to our shareholders during the winter months. It is my testimony that this right must be restored, without reservation, for the beneficial use of our shareholders and the aquifer in general.

To whom it may concern,

My name is Blair Calaway
I was born on Feb. 1931

I have lived in the same

area North of Folsom my

entire life. My parents

always had livestock. The

neighbors did also. Our farm

never had electricity until

around 1934. There is a story

about our house that my

parents ran water out of

the consolidated canal all

winter to water our stock

Our farm never had access

to the river. A few years

ago some one ordered the

canal co. to not run water

in the winter. The results

of this is every well in my

neighborhood had to be

2-

deepened they would all go dry in the winter.

If the Canal did not run water year around these wells would have had to be deepened long ago.

The person that gave the order to not run water in the winter in my opinion. accomplished two things. they gave the well drillers a lot of business and warped a hardship on a lot of families that had to deepen their wells that had been sufficient for years. the water that the Canal runs in the winter is not lost. It either end up back in the river or in the aquifer.

If this isnt so no wells would have to be deepened when the Canal is shut out in the winter.

Aug 15 - 1915. In the
Salem Area I have lived
here all my life. I
watered my livestock
in the Consolidated Canal
in the winter as well
as summer. To my
knowledge ^{canal} had water
in year around except
for cleaning. When the
water was ordered shut
out a few years ago all
the wells in the
neighborhood had to
be deepened. Some of
these wells were the first
that was drilled in the
Area.

Re: Ground water recharge claims in the Upper Snake River Valley

I have lived in the area served by the Consolidated Farmers Canal company since 1946. The canal always had water in it during the winter up until we were told we would have the water taken out of our storage for the irrigation season if we ran winter water and American Falls Reservoir didn't fill.

When we first moved here, the older people that had lived here all their lives said if we didn't run water through the canal in the winter, all the wells would go dry. They were right. I don't know anybody in this area that hasn't had to drill a deeper well since we quit doing it.

We have some river bottom pasture and there is a pond down there that I had never seen the bottom of until 3 or 4 years ago. Since then it goes dry every spring. This year we were about half way through the irrigation season before it had water in it again. When it fills, it drains to the river.

It appears from all that I've heard from others and from my own experience in moving here in 1946, that the water was run through this canal year round from the time it was put in use.

TO WHOM IT MAY CONCERN;

I was born in 1924 and grew up on a farm in Hibbard, Idaho. My father was the watermaster and I assisted him in many capacities, both in summer and in winter, with the water. In my adult life, I have served as watermaster on the Island Ward Canal and Consolidated Farmer's Canal for many, many years. The only years that we have not run water in the winter is when we have been advised by the Water District that, if the reservoirs did not fill, we would be charged for storage on the water that we diverted during the winter.

Respectfully yours,

Ross Clements

Water problem in the upper valley,

I've lived here in Salem next to the Farmers Consolidated Canal for seventy-nine and one half years, nearly all of this time except for last few years we have had water running in the canal the year around. In the winter it has not been full but there has been enough to keep the under ground water table up which keeps the wells in this area from going dry and supplies water for so many farmers and cattle men who have always depended on this source to get them through the winter.

I have noticed through the summer the ditches around me where I live, are carrying hardly half the water in them they use to carry, by giving us more water we are able to put water back into the river almost more than we used. All the springs that drained of into sloughs and would drain back into the river have all dried up. By letting the farmers use the water and keeping the water table up you will find it will help keep the rivers fuller for the people down the river, you might say this area is like a hidden reservoir. For some of us it is known as sub water and taking the water away and lowering the water table in winter and giving it back to us in summer defeats the purpose. In studying the under ground lava beds through this area will prove what I'm saying.

We need to work hard to get things back the way it used to be, and you will find it will help the people down in the lower part of the valley, as well as us in this part of the valley.

RE: Supporting documentation for Stock Water or Ground Water Recharge

Dear Dell:

Over the past several months numerous meetings have taken place with individuals and representatives of water delivery organizations in the upper Snake River Valley and the Department of Water Resources (IDWR) concerning the non-irrigation season diversion of stock water and ground water recharge. In response to these meetings the following criteria were identified for evaluating and recommending these two uses.

- The claimant will have to provide documentation that verifies a historical practice of diverting water during the non-irrigation season for the purpose of providing stock water and ground water recharge. An example would be copies of the minutes for a water delivery organization referencing the diversion of water for these two uses. This information also will be used to help establish the priority date of the use.
- The claimant needs to provide copies of records showing the quantity of water historically diverted during the non-irrigation season. These records will be used as a basis for recommending the diversion rates for these two uses.
- The claimant will have to provide documents, written statements and/or affidavits from individuals who have witnessed the non-irrigation season diversion of water. These individuals need to provide a historical perspective based on actual observation.

SCANNED

JUL 31 2007

Claimants need to assess their actual diversion requirements for stock water and ground water recharge. The quantity of water claimed for non-irrigation season stock water should be the amount needed to reach the end of the delivery system plus provide drinking water for stock. Claimants should not rely upon ground water recharge as a use to supplement the stock water in order for water to reach the end of the delivery system. *Claimants holding Winter Water Savings contracts may have lost their entitlement to divert water for 150 days between November 1 and April 30 through either abandonment or forfeiture.*

For some claimants, amending claims to reflect the necessary quantity for stock water will result in a substantial filing fee (\$100 per cfs). This fee is not refundable, which emphasizes the importance of providing documentation that supports the claimed uses.

If you or the organization you represent have already amended one or more claims and provided the documentation identified above, you may disregard this letter.

Individuals or organizations wishing assistance in amending their claims can call the Eastern Region office.

Respectfully yours,
Ernest Carlsen
