I think AI's objections were only to the quantity, and it looks like that's resolved. Dana had the "ownership/title" objections that she w/drew. The only mention that I noticed to the waste water was in the e-mail. I don't see any proposals. It looks like we can go with the original language. I'll let AI know that we will proceed with the SF5s, unless either of you want me to hold up. I can let him know that there is a wastewater remark in the "other provisions" portion of the recs as well.

I don't remember the status of these vis a vis wastewater. Did Riverside or Obendorf object to the original wastewater remark? Did we propose to AI (and Dana if Obendorf objected to wastewater) that we substitute the "new and improved" version of the remark? Unless somebody objected to the remark we originally recommended--or unless we subsequently proposed something different--I think we should just stick with the original version. NBS

Hi Ray,

I am attaching a copy of Nick's email concerning the wastewater issue. If you look at both rights they have the original wastewater language that we used for B63Prt3 on them. I have the measurements and have agreed to change the recommendations, however, due to the message attached I thought there was an outstanding issue with the wastewater language. After you respond to AI, please let me know and we can get these out.

Thanks,
Jan

Our objection was to the volume on these two rights. We sent some measurements in taken by Lee Sisco. I understood that we had an agreement on the volume based on those measurements. I don't have any wastewater language issue that I remember. I don't see a waste water remark on the Riverside did object to the number of acres originally recommended and I thought we had that issue worked out, too? Did that get taken care of at the Notice of Error stage?

Al,

With the Obendorf objections withdrawn, we should be ready to complete SF5s on these two water rights. In looking back at the notes in the files, it looks like you were considering providing us with some alternative language for the wastewater remark. If you could let us know what you would like the remark to look like, we should be able to take care of these pretty quickly.

Thanks,

Re: the withdrawal of objections for Ray Obendorf ^{on 5/1/09} we can now proceed with the settlement of the cfs amounts.

On 8/25/08 we received measurements from Lee Trico while he was still watermaster for the Boise River showing that the Meadow Gulch Drain (63-4007) could flow through its system 8.6 cfs & the system for the West End Drain was measured with a Double AA current meter at 92.83 cfs.

Therefore, the settlements for 63-4007 will be to increase the cfs to ^{8.6} ~~8.6~~ cfs and 63-4010 will be increased to 70 cfs

Re: Riverside Irrigation District Objections to Rights 63-4007 and 63-4010

Dear Nick:

At the initial hearing on these two water rights, I advised you and the Department that we had obtained additional measurements supporting the basis for the objections to these two rights. In 63-4007, the Meadows Gulch Drain, Riverside claimed a diversion rate of 10 cfs. The Department recommended 5 cfs. We asked Lee Sisco, the water master for District 63 to conduct measurements. He calculated flow at the entry to the canal from the Meadows Gulch Drain at 8.6 cfs. Riverside requests that the Department adjust its recommendation and Riverside would be willing to execute an SF5 for 8.6 cfs for the Meadows Gulch Drain right (63-4007).

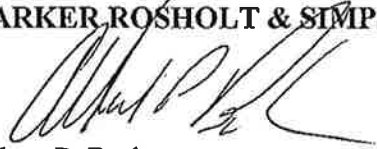

The West End Drain was claimed in the rate of 70 cfs. The Department recommended 30 cfs. Last fall the water master for District 63, Lee Sisco, also measured the flow into the Canal from the West End Drain as described in his attached letter. The flow measurement was 92.83 cfs. Accordingly, the Riverside irrigation District requests that the right (63-4010) be decreed as claimed since the flow into the canal exceeds the amount of water claimed for this right.

Dear Al,

This letter is to confirm the measurement that I made on your behalf while still Watermaster of the Boise River. The measurement of the West End Drain was made on October 4th, 2007 and was done with a Double A Current Meter and the flow measured on that day was 92.83 cubic feet per second. Also, I looked at a measuring site for the Meadow Gulch Drain but there was insufficient water at the site to make a measurement. At the site there was a 24 inch culvert about twenty feet in length with evidence that at least one foot of head had regularly been against the concrete head wall above the pipe. In reviewing pipe capacity charts, I estimated that the pipe would carry about 8.6 cubic feet per second of flow under these conditions.

Should you need any additional information or help regarding these measurement, please feel free to contact me.

Sincerely,

A handwritten signature in cursive script, appearing to read "Lee Sisco".

REPORT OF ENGINEER

State name of applicant and number of permit: W. V. Quinn 1000 10
State source of water supply: Woodrow Wilson Drain - 1000
Location of point of diversion: NW 1/4, Sec. 24, T. 1 N., R. 1 W., S. 1 E.

State whether or not the works of diversion are fully completed and in accordance with terms of permit: Yes, but sufficient to care for the water

Describe works as they exist, giving dimensions and capacities of same: Constructed ditch, changing natural water course. 2' on water line, 5' on bottom. 2 1/2' deep, heavy grade. At a point about 1400' from main canal, the ditch changes to 1' on bottom, 2' on water line, 3' deep, grade about 20' to mile. Employs into main Riverside Canal, which is 2 1/2' on bottom, 3' on water line, 3 1/2' deep, grade of 2' 6 1/4' per mile.

State whether or not water has been turned into works of diversion: Yes - running about 5 sec ft. at time of exam.

Give exact location of lands to be irrigated. Give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if for other than irrigation): Application to lands in the Riverside Irrigation District.

Submit map on enclosed plat, showing location and details of above description: see map on file

Remarks: Application calls for headgate - none constructed, as it would be of no use. Channel constructed to carry water direct into main Riverside Canal.

This examination was made on the 5th day of June, 1926

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
CLAIM TO A WATER RIGHT

Established by Diversion and Application to Beneficial Use

Under the provisions of Section 42-225a, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. The filing of this claim does not confirm the water right but will serve for information purposes only. It may, however, become the basis for future adjudication of the water right by the Court.

(Please refer to the instructions on the back of this form)

1. Name of claimant Riverside Irrigation District, Ltd.

9. Remarks: please explain any details of your claim which you feel need clarification or additional explanation
The water from this stream enters the canal at the level of the
water in the canal and is carried in the canal. The source of this
water is drainage water from the Wilder Irrigation District and
stops with the end of irrigation.

Permit No. 11826 was filed with the Department of Reclamation. Proof
of completion of works was submitted and fees paid. However, beneficial
use of water was never made. This claim is filed to replace this
permit in order to retain the original priority.

BE IT KNOWN that the undersigned hereby makes claim to a water right as described above together with
all attached information and certifies that all statements are true and accurate to the best of his knowledge.
