My father filed for the use of this water when irrigation by ditch was done & later sub irrigation we had to make a ditch from the west side of the highway between St Anthony & Teton City to water the land on the east side of that highway. The State Engineer wouldn't believe it could be done so insisted that the wide mouth to culvert under hwy may be placed at the east end. However the water flowed east & watered the Teton area! Part of that land is a swell. With sprinkling is there really that much water coming down that waste ditch?
