RE: Water Right Number 95-15143

To whom it may concern:

Enclosed is a Notice of Error reply form with noted correction.

I recently spoke with your representative, Kayla, and explained our current situation to her. Specifically, our well went dry a couple of years after it was drilled. We later paid to have it deepened, but there was still no available water. At that time we did not have the pipes and electrical re-installed, so what remains, if anything, is literally just a hole in the ground. We currently pay for and haul our water. We use no water from our property because it's not available to us.

We hope to be able to have a new well drilled in the future. When I explained this to Kayla, she said that if we drill another well at the same property description, we would be able to attach the subject water rights to that well. I just wanted to formally reiterate that conversation here in order to protect our future water rights.

If you have questions or comments, please contact us.

Thank you.

Sincerely,

Frances Drake
