BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE STATE OF IDAHO

IN THE MATTER OF PERMIT NO. 23-7065 IN THE
NAME OF WADE ELLIS

ORDER OF REINSTATEMENT

WHEREAS, the Department has issued the above-captioned permit with the condition that complete proof of construction of works and application of water to beneficial use (proof of beneficial use) be submitted on or before August 1, 1987; and,

WHEREAS, the Department notified the permit holder by certified mail that proof was due and instructed the permit holder of the steps to be taken to submit the proof of beneficial use; and,

WHEREAS, the permit lapsed for failure of the permit holder to submit an acceptable proof of beneficial use; and,

WHEREAS, Section 42-218a of the Idaho Code provides that a permit may be reinstated upon a showing of reasonable cause; and,

WHEREAS, the permit holder has provided a reasonable showing why the permit should be reinstated;

IT IS, THEREFORE, HEREBY ORDERED that Permit No. 23-7065 be REINSTATED and the priority advanced to April 6, 1981.

Dated this 5th day of November, 1987.

Dear Mr. Ellis:

Re: Permit No. 23-7065

This office acknowledges receipt of the assignment conveying the above referenced permit to you. The assignment has been entered into the department's records. A copy of the permit is enclosed for your records.

Note the source of water described on the permit. The permit indicates the water source as springs. The source of water described by the extension request is a well. Can you advise me of whether or not there is a valid water right permit for the groundwater use?

Please provide me with this information by October 20, 1987.

If you have any questions concerning this matter, please feel free to contact this office.

Sincerely,

RITA I. FLECK
Secretary/Records Manager

Prepernit Exam

- Application intends to develop 2 springs with source headbates and pipelines. to be changed to "springs"

2) Applicant is aware that he will probably have to

the present experiment 7 (The present experiment 7 is not more than 25 gpm, combined)

Applicant is considering the possibility of drilling a well at the top of the above development. Because he is concerned about water quality problems existing in the spring located downhill from the houses, I advised Mr. Ford to file an application for this well.

E. NARRATIVE/REMARKS/COMMENTS

Small Chat.

He is in conversation with caretaker of Mopac State Estates it was suggested that for the 15 HP pump was removed it was possible that a 7.5 HP pump was put in the well.

Question: There is a 600 foot deep in elevation from where pump well is located to last house on system. There are 49 lots situated in for water and this is currently 9 lots occupied. From pump well to Bessels Chat's house and they are the water junction by gravity. There is a 200 gal holding tank at Humphreys. After a 200 foot deep in elevation there is a 100 gal pressure tank reducing the PSI to 0. That there is another 200 foot deep in elevation to a 1000 gallon pressure tank, reducing PSI to 0. The Chat indicates that without the pressure tanks in place the system will not be done. Even with the tanks in place the PSI at his house is 127 PSI. He has a pressure reducer in place as do the other 2 places of residence. The Chat reducer has pressure to 30. Pressure at pump house is 30 PSI.

Observed: HP = 7.5

PSI = 30

EFF = 70%
