Steve,

I reviewed the recommendations for IDL's claims in the Spring 2013 Director's Report. Thanks for your good work. I have a few questions for three recommendations.

63-9457: I would like to discuss with you the POD and POU location. See the attached PDF for this recommendation with my notes.

OBJ FWAFA 7/22/13

63-9462 and 63-9479. I would like to follow up with you on a previous conversation we had about these claims. During our previous conversation we discussed the quantity element and whether IDL will need to file a permit application to add a quantity greater than 0.10 AFA, but you mentioned new permits have not been approved in Basin 63. I believe you were going to ask other IDWR staff about this issue. Were you able to obtain clarification on this issue? On another issue, a new storage use was recommended, but the recommendations do not have a remark for an accomplished change in purpose of use. Is such a remark needed? If so, is that something IDWR can add without an objection?

no OBJ filed.

Please feel free to call me to discuss these questions. I appreciate your help.

Thanks,

Tyson K. Nelson

*- met briefly w/ Pam Skaggs to confirm
a permit is possible for these 2 ponds.
= as de minimis it should be allowed.
Submit to get more detailed review.

est. GPS collection dates 5/22/13

WR Number	Field Work Notes
61-7418	
61-7418	
61-7419	Stock tank found in Sec. 21 SWSW in thick willow (very little use)
61-7419	Spring source found in Sec. 21 NWSW (cows watering at spring source)
63-9457	Pond size is 15'x15'; 4.5' deep; old stock tank was removed and replaced with pond approx. 6 yrs ago
63-9462	Pond size is 50'x60'; 8' high dam; approx. 3.5' of water currently in pond $= 0.55 \text{ AF}$ (GIS = 0.32 AF)
63-9465	Water system consists of two stock tanks north of the road
63-9465	This GPS point is not accurate; the tanks are in the same location
63-9465	Spring source is south of the road
63-9657	This claim is for a pond from a spring. The pond does not exist. The spring is the POD for 63-9465.
63-9479	The pond is the actual use for this source; pond is man-mand; pond size is 65'x90'; 8' high dam
63-9577	The lessee removed the stock tank and built a stock pond at the spring location
63-9587	Two stock tanks in Sec. 23 have been removed; the old pipeline has been abandoned; a new stock tank is in Sec. 24
63-9587	IDL believes the head box has always been in Sec. 24 NWSW, and the original claim location in SWNW is a mapping error
63-9588	There are 4 small ponds along a stream channel north of the road
63-9590	Water system consists of four stock tanks south of the road
63-9590	Consists of a collater system at spring sources south of the road
63-9591	
63-9591	The head box is located in the fenced enclosure
63-9804	Water system consist of two stock tanks in Sec. 11, SESW; IDL did not find any other tar
63-9804	IDL did not find any other head boxes in Sec. 14

$$\begin{aligned}
 & \underbrace{50' \times 60' \times 8'}_{\text{GIS}} = .07 \text{ AC} \\
 & \quad \quad \quad \times 8' = .04 \text{ AC} \\
 & \quad \quad \quad \times 8' = 0.32 \text{ AF} \\
 & \quad \quad \quad = 0.55 \text{ AF} \\
 & \quad \quad \quad @ 3.5' = .24 \text{ AF}
 \end{aligned}$$

Claimed

POD: T01N, R06E, S23, SWNW
POU: T01N, R06E, S17, SWNW

63-09462

The application for permit describes this right as a pond developed from a spring. Aerial photography shows that the pond is located in SENE instead of SWNW.
