**E. REASONS SUPPORTING OBJECTION(S):**

**Quantity:** The Director's Report, at page 6, states: "IDWR recommends each claim and its corresponding overlapping decreed BLM water right should be limited to a combined total of 13,000 gallons per day." BLM decreed water rights are not before the court. Such decrees are final judgments accorded finality. Combined use remarks in the BLM decrees are not appropriate. The decisions in Basin-Wide Issue #12 resulted in the use of the standard de minimis cap remark ("The quantity of water under this right shall not exceed 13,000 gallons per day.") but not combined use remarks.

**Period of Use:** The period of use should be consistent with the authorized season of use, as follows: "The period of use under this right is limited to the authorized season of use for grazing Federal land."

**Place of Use:** In *Joyce Livestock Co. v. United States*, 156 P.3d 502 (Idaho 2007), the court held that stockwater on Federal land could be claimed as an appurtenance to the claimant's "base property." IDWR's recommendation of "base property" only describes one section within T12N, R03W, S24; however, the official "base property" description defined in BLM's grazing records for the claimant contains more property than is listed in this recommendation. This "base property" description should be amended to comport with official records.

**Current Authorized Permittees:** It should be noted that on February 3, 2016, Harry C. Soulen filed a Grazing Preference Transfer and Preference Application to transfer all of Soulen Livestock Co.'s grazing interests, preference, and grazing permit to Soulen Grazing Association, LLC. BLM approved the transfer on March 4, 2016. The current authorized grazing permittees in the Crane Creek Allotment (#361) are: Soulen Grazing Association, LLC; David Maddox, Jerome & Jill Grandi; and Sutton Ranches, Inc.
