Theron Ashment met with me this afternoon to explain how his rights have been administered per transfer 533 and 565 since he purchased the property some thirty years ago. Mr. Ashment stated the natural flow in Palisades Creek historically has been greater than the amount needed for filling rights based on the priorities being filed on the South Fork, Snake River. Consequently there was justification for approving transfers 533 and 565. But because the rights being transferred had priorities earlier than those decreed from Palisades Creek a condition was imposed to protect the original Palisades Creek rights. Essentially the condition gave the transferred rights a floating priority date equal to the most junior priority being delivered on the South Fork and subordinate to valid (deliverable) decreed rights from Palisades Creek. This way the deliverable rights originally decreed from Palisades Creek were given preference and only if there was water still available in the creek would the transferred rights be delivered. The wording in the old "Blue Book" from Water District 01 contains a foot note concerning transfers 533 and 565. It reads: **"Inoperative at times when amount of water in Palisades Creek is insufficient to fill all of the valid rights on Palisades Creek as determined by priorities being filled on main river."** In the context of the remark I believe "valid rights" refers to rights with priorities being delivered based on the rights existing in Palisades Creek at the time of the transfer.

I am just now doing the preliminary review of the claim so I have time for a recommendation. A field exam is also needed.

First take is yes, this makes the 1886 water right the most junior on Palisades Creek (or at least junior to those that existed at the time transfer was approved). This condition should be part of the recommendation but I think we should consider re-wording it to something we are used to seeing. I'll have to think about the re-wording and would like to review the transfer file to confirm my conclusions here. I'll get back to you with a reworked remark.

Subject: 23-106B

This right originated as a right from Fall Ck., May 1, 1886, in B23. Then Tx # 533 (1934) split the right to A and B. Part A, 0.20 cfs stayed in Fall Creek. Part B, 3.80 cfs was moved to Palisades Creek. Priority date stayed at 1886. However, the Tx has a clause in it that is troublesome, as; **PROVIDED: that this Certificate of Transfer shall be temporarily inoperative at any time when the amount of water flowing in Palisades Creek shall be insufficient to fill all of the valid water rights now existing on said Palisades Creek.**

Now, my question is..... with an 1886 priority date it is senior to any right on Palisades Ck. (except 23-00035, 1885). Any other irrigation right, same source, goes from 1889 on up. So, with the above language does that make this a junior right? If so, should the above language become a part of the recommendation? The claim references; 14. Remarks: "See decree about low water status".

As per transfer #533.

situate, lying and being in the County of Bonneville, State of Idaho, said water to be limited at any given time to an amount actually needed and beneficially used for such purposes and shall not exceed the following amount, to-wit:

2.8 cubic feet per second dated May 1, 1898

THE WATER RIGHT hereby transferred has heretofore been diverted from said FALL CREEK at a point in the

NE $\frac{1}{4}$ NE $\frac{1}{4}$ Sec. 9, T. 1 N., R. 43 E.

and conducted to the first above described lands through privately owned ditches, and will hereafter be diverted from PALISADE CREEK at a point in the

SE $\frac{1}{4}$ of Sec. 23, T. 1 N., R. 44 E., B. M.

and conducted to the last above described lands through the canal known as the Palisade Irrigation Company's Canal.

PROVIDED: That this Certificate of Transfer shall be temporarily inoperative at any time when the amount of water flowing in Palisade Creek shall be insufficient to fill all of the valid water rights now existing on said Palisade Creek.

THAT IN ADDITION to the foregoing right, the last above stated lands have appurtenant to them a right to the use of 6.4 cubic feet per second of the waters of PALISADE CREEK with a priority of June 1, 1898, such water being a Flood Right only, is not ample, generally, to mature a crop.

THAT The right to the use of the water aforesaid, hereby confirmed, is restricted to the lands or place of use last above described, as provided by the laws of the State of Idaho.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the Department of Reclamation of the State of Idaho to be hereunto affixed at Boise, Idaho, this twenty-eighth day of May, 1934.

ss.

I, Lynn Randall, Watermaster of Snake River

Water District No. 36, County of Bannock, State of Idaho, whose postoffice address is Idaho Falls, have read or heard read the foregoing affidavit and petition of Waldemar Olsen, and, of my own knowledge, believe the same to be

true as to all matters therein alleged, and that no one will be injured by the transfer prayed to be authorized; and I hereby endorse my approval of said petition, and request that the Commissioner of Reclamation issue the certificate of transfer as petitioned; ~~or (do not approve of the issuance of the~~

~~certificate of transfer prayed for)~~ for the following reasons: higher use of water will result from transfer. Certificate of transfer should contain a provision that transfer will be temporarily inoperative any time the flow of Palisade Creek is insufficient to full valid rights now existing on Palisade Creek. The creek has always had a surplus of water discharging into Snake up until now but if the surplus gets dried it might not have at some future date. Watermaster Dist. No. 36 Lynn Randall

Theron Ashment met with me this afternoon to explain how his rights have been administered per transfer 533 and 565 since he purchased the property some thirty years ago. Mr. Ashment stated the natural flow in Palisades Creek historically has been greater than the amount needed for filling rights based on the priorities being filed on the South Fork, Snake River. Consequently there was justification for approving transfers 533 and 565. But because the rights being transferred had priorities earlier than those decreed from Palisades Creek a condition was imposed to protect the original Palisades Creek rights. Essentially the condition gave the transferred rights a floating priority date equal to the most junior priority being delivered on the South Fork and subordinate to valid (deliverable) decreed rights from Palisades Creek. This way the deliverable rights originally decreed from Palisades Creek were given preference and only if there was water still available in the creek would the transferred rights be delivered. The wording in the old "Blue Book" from Water District 01 contains a foot note concerning transfers 533 and 565. It reads: **"Inoperative at times when amount of water in Palisades Creek is insufficient to fill all of the valid rights on Palisades Creek as determined by priorities being filled on main river."** In the context of the remark I believe "valid rights" refers to rights with priorities being delivered based on the rights existing in Palisades Creek at the time of the transfer.
