RE: POU Boundary. - Amended Claims, deed.

Conversation: Per the warranty deed we corrected the ownership layer for the B portion of these rights. In the SWNW of section 10, it should be a rectangle of approximately 20 acres, (5 1/2) and the W 1/2 SENW of section 10, is also approximately 20 acres. Gregg Draney farms the NW corner of the SENW of section 10 although it's owned by Zane. The SE corner of the SENE of section 9 is farmed by Zane

Action Required:

The PPU boundaries for both A & B needs to be adjusted in the SWNW of section 10 to stay within the boundary. The change in the overall total number of acres under both A & B that diversion rate was not adjusted.

Claim 24-2003A, 24-2011A, 24-2022A

Subject: CHANGE IN PLACE OF USE (POU) & POINT OF DIVERSION (POD)

Response Date: 17 October 2005

Dear Claimant (s):

The Idaho Department of Water Resources initial investigation of the Notice of Claims listed above indicates that there has been a change in the point of diversion and place of use.

The claims that have been filed split each of the licenses between W. Gregg Draney and Gleno Draney. We have three issues that need to be clarified before a recommendation can be made to the Court.

1. The original licensed POU of these claims are different than the SRBA claimed POU.
2. The original licensed POD of these claims are different than the SRBA claimed POD.
3. The total number of acres being irrigated on the six claims are more than the combined 3 licenses.
- 4.

There are no known previous transfers requesting the POU and POD be moved from the licensed POU and POD to the claimed POU and POD.

A water right owner who has made a change in use of a water right prior to commencement of the SRBA without prior IDWR approval may claim the change in the SRBA. IDWR may recommend a right as changed, however, only if the change meets certain requirements. One of those requirements is that the changes not result in injury to other water rights, or that the change be conditioned to prevent injury to other water rights.

SCANNED

APR 02 2009

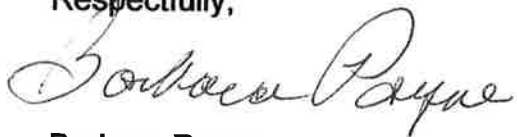

Before IDWR may recommend your claim, you must provide IDWR with the date the change was made and some evidence tending to support that date. If the change was made before November 19, 1987, then the date provided must include the month, day and year. If the change was made after November 19, 1987, then a specific date is not necessary, and the evidence need only support that the change occurred sometime after November 19, 1987.

It is our goal to recommend historical water rights within the Snake River Basin as accurately as possible.

I have also enclosed a Change In Address form. Please complete this form and return it to this office.

To resolve these issues, please call our Soda office to make an appointment with our Agent, Cindy Bird. If no response is received by the above response date, then your claims may not be recommended to be decreed. Our telephone number is 547-3993.

I propose leaving the licensed diversion rate intact in order to preserve the ability to resume the original licensed practice of gravity irrigation, which requires more diversion rate than sprinklers. This requires individual acreage limits that add up to more than the PPU acreage, so a combined acreage limit may also be appropriate.
