RE Water right 95-13975

Mr. Scott called regarding the letter I sent him on March 28th. I explained that the above mentioned water right should never have been changed into his name as there was no conveyance document transferring it from the Clemson's to him. He thought both water rights should remain in his name. I had Evan look at this water right along with 95-15282 and he agreed that 95-13975 should not have been transferred. Evan called Mr. Scott back and explained that even though we are taking one of the water rights out of his name, he is not losing any benefits to using the water. He still has a water right and is allowed 13,000 gallons a day. Mr. Scott understood and was ok with that.
