Re: Water Rights at Gray's Lake

Dear Michael,

Pursuit to your letter of June 22, 2004 to Ernest Lombard / Lombard Land and Livestock LLC. I wish to clarify the use of the water originally used on section 20 the SE ¼ of the SE ¼ and section 21 the SW 1/4 of the SW ¼. (Approximant 80 acres) The property was in the ownership of our parents for many years. The water used on this 80 acres originally was transferred by our parents to other property they owned at that time namely that property described in adjudication claim number 25-14097 and is presently used at that location.

This has been the case for many years, infact there is no longer a culvert under Gray's Lake Road that originally allowed the use of this water.

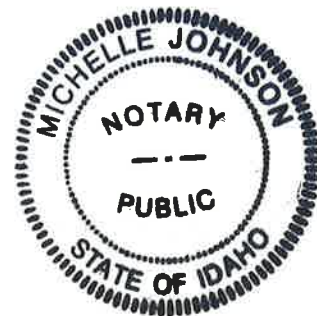

I do wish to point out that the original flow line of Meyers creek (Herman Creek) does flow through the lower corner of this 80 and I do wish to retain stock water rights to the minimal flow going to U.S. Fish and Wildlife.

Sincerely,

has been established and duly consummated, in conformity to law, for the East half of the South East quarter, the North West quarter of the South East quarter and the East one half one of Section twenty eight in Township Three South of Range forty three East of Boise Meridian in Idaho containing one hundred and fifty-one acres and thirty hundredths of an acre.

according to the official plat of the survey of said land, returned to the General Land Office by the Surveyor General.

Now know ye that there is, therefore, granted by the United States unto the said Moses H. Wakerman

the tract of land above described: To have and to hold the said tract of land, with the appurtenances thereof, unto the said Moses H. Wakerman and to his heirs and assigns forever; subject to any vested and accrued water rights for mining, agricultural, manufacturing, or other purposes, and rights to ditches and reservoirs used in connection with such water rights as may be recognized and acknowledged by the local customs, laws, and decisions of courts, and also subject to the right of the proprietor of a vein or lode to extract and remove his ore therefrom, should the same be found to penetrate or intersect the premises hereby granted, as provided by law, and there is reserved from the lands hereby granted a right of way thereon for ditches or canals constructed by the authority of the United States.

In testimony whereof, I, Sheldon B. Bennett, President of the UNITED STATES OF AMERICA, have caused these letters to be made patent, and the seal of the General Land Office to be hereunto affixed.

Given under my hand at the city of Washington, the thirtieth day of June, in the year of our Lord one thousand nine hundred and five and of the Independence of the United States the one hundred and twenty-ninth

Dear Ernest,

While reviewing water right claim 25-229 I noticed that, according to the Bonneville County tax lot data, the place of use found in the decree does not coincide with any of the land now owned by Lombard Land and Livestock. Unless you can provide me with evidence that shows how the water right was transferred to your property, I will have to recommend that your claim be disallowed.

Please contact me at 525-7161 if you have evidence you wish to submit or if you would like to discuss this matter further. If I do not hear from you by July 2, 2004, I will proceed with a recommendation of disallowal.

Sincerely,

A25-00229 Summary 11/11/03

1) Lombard Land / Livestock general Summary.

There are five water rights associated with this ranch:

A25-00229 based on the Rexburg decree, $\approx$ 600 acres from Herman Creek

A25-02030 based on a license from a spring, $\approx$ 5 acres

A25-02092 based on a license from a creek / springs $\approx$ 75 acres

A25-12923 beneficial use from Willow Creek $\approx$ 300 acres

New Claim beneficial use from a creek $\approx$ 10 acres.

The actual irrigated POA for each of these rights is sketched on a map in file A25-00229. The uphill extent of the POA is based on a GPS traverse documented on two other maps and yellow notes in A25-00229. For

A25-00229 summary p2

11/11/02

convenience in transcribing locations these points are recorded in lat/lon, DMS format. POD points will be reported in IPTM in the summaries and GPS data file.

The sketch for A25-02030, A25-02092 and the new claim are closed polygons. The sketch for A25-00229 and A25-12923 is open on the south west. This is because there is a boundary dispute w/ USFWS and BIA regarding the location of the property line. Mr. Lombard is working w/ Clive Strong's office to resolve this issue. The irrigation (when water is adequate) continues clean to the wetland boundary, so whatever is owned by Lombard appears to be a legitimate part of the POD.

These sketches describe what is irrigated, w/o looking at what is claimed. In the individual summaries I may propose an amendment and/or enlargement.

PROFILED

In general I found an actively operated ranch, fences and ditches maintained,

A25-00229 Summary p3 11/11/03

and water use taking place (except as limited by drought).

2) General Comments specific to A25-00229

I don't have a copy of the decree, but the claim is for 4.50 cfs on ≈ 600 acres or about 0.008 cfs/acre. While both seem reasonable for current practice I expect the original POA was closer to 240 acres. You may want to consider inviting an enlargement claim.

3) Ownership appears to be correct.

4) POD is approximately correct on claim & layout. Use GPS location, waypoint 26
IDTM 710,094 E 230,347 N.

Photos of POD are described in the photo section. The POD is just a rocky split in the stream bed but it does direct water to the ditch / POA.

5) POA. The region "E2" on the map is the POA I found. There is more land

A25-00229 Summary p 4

11/11/03

claimed in section 29 than I have sketched. My sketch is based on the tax notices w/ the Δ ownership papers & corresponds with what Mr. Lombard & I discussed looking over the POB from the road.

Depending on where the SW boundary is, I want 500 acres + using a topographic overlay w/ 10-acre grid cells.

The NE edge of my sketched POB is based on GPS readings. The S. edge extends below the claimed QQ - you may want to invite amended claim.

Because this is high altitude (and usually fairly high precip) pasture, any application of water is "beneficial" and there should not be a problem w/ recommending less than 0.01 cfs/acre.

- 6) Overlap. On the south end there is some mingling of water from this right w/ water from A25-02030, A25-02092, and A25-12923. I don't know how important it would be to recommend

A25-00229 Summary p 5

places of use w/ appropriate remarks. It may be clearest to just recommend adjacent POWs.

- 7) Conflict. Collins has a beneficial use claim in Section 29 (A25-04070). Lombard acknowledges allowing "stormwater" to go down Herman creek to Gene Lombard, USFWS, and Collins. My guess is in good water years there would be adequate water to supply Lombard's 4.8 cfs and some irr. to Collins, but that Lombard would be able to direct & use more than 4.8.

USFWS has a claim for 3.2 cfs (A25-0229A) as a split or perhaps competing claim. I have not researched this.

11) List of Photos

A25-00229-1.jpg. POD. This is hard to see, the rocks in the center of the photo are where the channel splits. The ditch goes to the left and the creek goes to the right.

A25-00229-2.jpg. Just downstream from the POD. The ditch goes under the gray log, the stream continues down to the right.

NOTICE OF CHANGE IN WATER RIGHT OWNERSHIP

Please print or type. Attach pages with additional information. Instructions are included at the end of this form.
Incomplete forms will be returned.

1. Please list the water right number(s) and/or adjudication claim number(s) (if any) for each water right to be changed. List just the adjudication claim number if there is no corresponding water right record on file with the department. Indicate, by checking in the space provided (under the "split" heading), if the change in ownership is limited to a portion of a water right in which case division of the existing water right or adjudication claim record will be required.

2. The following **REQUIRED** information must be submitted with this form:

- A. The appropriate **FILING FEE**. See instructions for fee amounts.
- B. A copy of the most recent **DEED, TITLE POLICY, CONTRACT OF SALE** or other legal document indicating your ownership of the property and water right(s) or claim(s) in question, **WITH ATTACHED LEGAL DESCRIPTION**.
- C. Either of the following (if necessary to clarify division of water rights or other complex property descriptions):
PLAT OF PROPERTY or **SURVEY MAP** clearly showing the location of the point(s) of diversion and place of use of your water right(s) and/or adjudication claim(s) (these are usually attached to your deed or on file with the county).

OR

If your water right(s) and/or adjudication claim(s) is for ten or more acres of irrigation, you must submit a USDA Farm Service Agency **AERIAL PHOTO** with the irrigated acres outlined and point(s) of diversion clearly marked. The **AERIAL PHOTO** should be submitted in place of the **PLAT OF PROPERTY** or **SURVEY MAP**.

6. If the change in ownership affects the entire water right for each water right or adjudication claim number listed in item 1, THEN SKIP THIS ITEM AND GO TO ITEM 7. If the change in ownership divides the water right(s) among multiple owners, you must describe, in detail, your portion of each water right after the change. Fill in the appropriate spaces in the box(es) below to describe your water right(s) after the change (one water right per box, you may copy this page as necessary). If your quantity of water is greater than a proportionate split, you must attach documentation to show justification for a larger amount. If you are not sure how to identify your portion of the original water right or adjudication claim records, please contact the nearest IDWR office for assistance.
