PLACE OF
USE:

Place of use is within the service area of the City of Coeur d' Alene municipal water supply system as provided for under Idaho Law.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

To the extent necessary for administration between points of diversion for ground water, and between points of diversion for ground water and hydraulically connected surface sources, ground water was first diverted under this right from a well located in T51N, R4W, Section 28, SESW. The original well was replaced by the common municipal system described under Transfer approval 75824.

This right authorizes the diversion of ground water within the Rathdrum Prairie Ground Water Management Area (RPGWMA). Use of water under this right shall be subject to the provisions of the management plan approved by the director for the RPGWMA.

EXPLANATORY MATERIAL: BASIS OF CLAIM - License

Failure of the right holder to comply with the conditions of Transfer No. 75824 is cause for the Director to rescind approval of the transfer.

When notified by the Department, the right holder shall install and maintain a measuring device of a type acceptable to the Department as part of the diverting works.

When notified by the Department, the right holder shall record the quantity of water diverted and annually report diversions of water and/or other pertinent hydrologic and system information as required by Section 42-701, Idaho Code, and/or the management plan for the Rathdrum Prairie Ground Water Management Area.

The right holder shall accomplish the change authorized by Transfer No. 75824 by July 30, 2011.

The following rights are diverted through points of diversion described above: Rights 95-2111, 95-2133, 95-2198, 95-7142, 95-7181, 95-8565, 95-8647, 95-8672, 95-8938 and 95-9007.

The right holder shall not provide water diverted under this right for the irrigation of land having appurtenant surface water rights as a primary source of irrigation water except when the surface water rights are not available for use. This condition applies to all land with appurtenant surface water rights, including land converted from irrigated agricultural use to other land uses but still requiring water to irrigate lawns and landscaping.
