Subject: Staff Meeting

Importance: High

Good Morning

Below is a list of items suggested for topics of discussion at the Supervisors meeting next week in Boise. I would like some input on how to utilize contractors to assist us in reviewing basin 29 claims. If you think there are other items that need discussion please let me know.

1. Status of Claims Investigation
2. Contractors
 - A. GIS
 - B. Field Exams
3. Water Delivery Organizations Place of Use - Eric Norquest
4. Adjudication Memos
5. Claims Investigation Handbook
6. Quality Enhancement Initiatives
7. Remote Offices
8. Pre-Investigation Public Meetings (Representation by IDWR, Legislature and Court)
9. Database Migration Enhancements

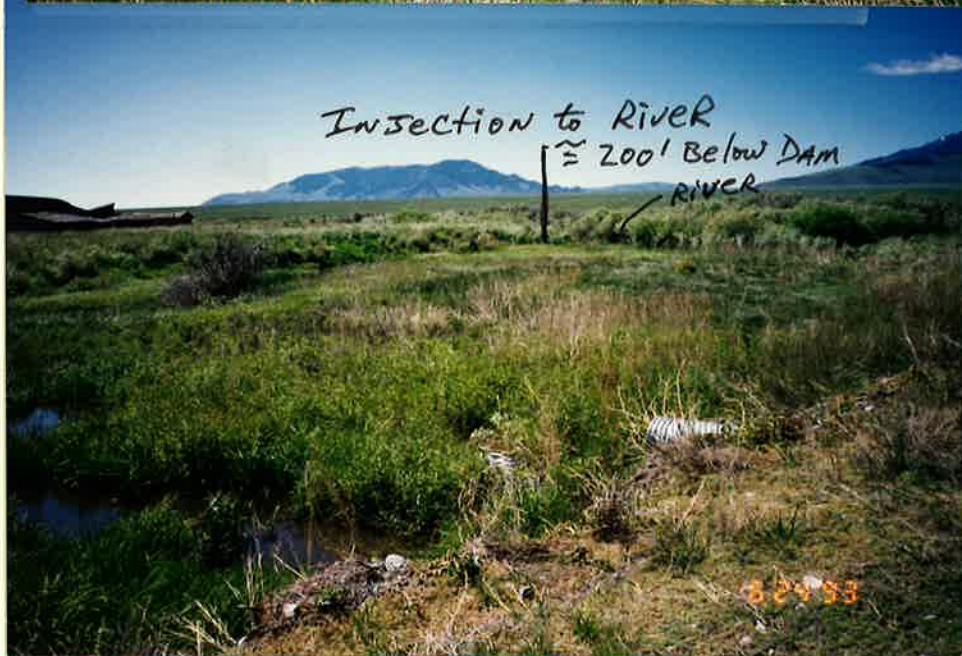

Lets meet this morning at 10:00 in the conference room to discuss this.
Ernie

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE
STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS

In Re SRBA	)	Water Rights: See Exhibit A
	)	
Case No. 39576	)	NOTICE OF COMPLETED ADMINISTRATIVE PROCEEDING

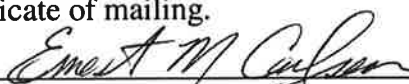

IDWR has completed the following Administrative proceeding:

- ☐ Address change
- ☐ Substitution of Party
- ☒ I.C. § 42-222 transfer **4221, 4222, 4223, 4224, 4225, 4226, 4227**
 - ☒ **Withdrawn per letter from attorney Kent Foster attached**
 - ☐ point of diversion ☐ place of use
 - ☐ period of use ☐ nature of use
 - ☐ split of water right ☐ change in ownership

IDWR certifies that it has completed its investigation into the changes to the elements of the water rights listed above as set forth in the attached *Amended Director's Reports* for said water rights. No other changes have been made to the elements of these water rights except as set forth above.

IDWR has served copies of the *Notice of Completed Administrative Proceeding* and *Amended Director's Report(s)* on the claimant(s), prior claimant(s) and all parties in the subcases affected, if any, as reflected on the attached certificate of mailing.

DATED: 15 June 2003

Signature of IDWR Representative

*Re: Application for Transfer Nos. 4221, 4222, 4223, 4224, 4225, 4226, and 4227
In the name of Sagewillow, Inc.*

Dear Ladies and Gentlemen:

We are writing this letter at the request of our client, Sagewillow, Inc. We hereby withdraw the above-numbered applications for transfer. The decision of the Idaho Supreme Court appears to be final in the appeal of this matter and the final order of the director in these transfer proceedings has now been vacated. Sagewillow, Inc., is considering the filing of new applications for transfer.

Yours very truly,

Kent W. Foster

Re: *Sage Willow Claims* 33-02133 and 33-11003

Dear Ernie:

We are writing to provide additional information relevant to claims numbers 33-02133 and 33-11003. You will recall that 33-02133 is the old license for "Root Zone Storage" on the Knollin Ranch now owned by Sage Willow. Last January, we began a process (I think at your suggestion) which resulted in a late claim also being filed, No. 33-11003. 33-02133 covers the winter time diversion for storage; 33-11003 was designed to cover the summertime use of the storage water.

I probably do not remember the details, but as I recall, when you prepared the recommendation for 02133, there was a time constraint or some reason for not determining the correct acres affected by this right, and you used the same description (698 acres) recommended for the high water rights (33-00069, etc.). We filed an objection because we thought there should be some 1,480 acres as shown on the license. The U.S. Forest Service filed an objection because the 698 acre description taken from the high water rights showed Township 27 East instead of 28 East. When I prepared the late claim, 11003, I perpetuated the problem because I used the same 698 acres you did. The U.S. Forest Service again objected. I think we have all agreed that for the 698 acres, the township should be corrected from 27 East to 28 East. However, I seem to recall that you and I have previously recognized the 698 acres is not the correct place of use for 02133 and 11003 anyway; the

SCANNED

JUN 19 2000

Mr. Ernest Carlson
November 8, 2000
Page 2

license says 1,480 acres, and some of the 698 acres shown on the high water rights is not even included within the 1,480.

We had asked Dr. Charles E. Brockway, who had previously done significant work on this property, to do an analysis of the place of use for the "Root Zone Storage". He has just provided us with his analysis and I am forwarding a copy to you in hopes it will be helpful as we reach the time to resolve the objections. I have enclosed copies of his letter of November 3, and the attachments (an acreage spreadsheet and three maps). I expect the time to address this matter will come soon.

Very truly yours,

Kent W. Foster

Subject: Sagewillow Water Right 33-02133, Root Zone Storage

Dear Kent:

I have reviewed the permit, license, and IDWR Director's report on irrigated acreage on Ed Dumke's Sagewillow Ranch and, as you indicated, there are some definite discrepancies.

Figure 1 is a 1984 aerial photo of the Sagewillow ranch with the government land survey grid superimposed. The acreages in each 40 acre section listed on the permit for 33-02133, the licensed acres, and the recommended acres in the Directors Report are also shown on Figure 1. The permit requested 2440 acres; the license allowed 1480 acres although the sum of the listed acreages is 1440 acres. Note that the Director's Report shows only 698 acres and the 220 acres listed in Section 18 T7N R27E should actually be in T7N R28E. It should also be noted that the 698 acres listed in the Director's Report do not appear to reflect the hydrology of the area and the areas benefiting from the application of non-irrigation season diversions.

The objective of the non-irrigation season diversions allowed under the license is essentially to provide and store water to the shallow aquifer in the area to maintain water tables high enough to allow access by crop roots. This is essentially the definition of sub-irrigation, as we know it in Idaho. The area or acreage benefiting from the deep percolation of this water depends on the geology, timing and location of water application and shallow aquifer parameters.

I have utilized a 1984 color aerial photo of the ranch to delineate the distribution system utilized to 'spread' the water from diversions from Upper Spring Creek and Little Lost River on to the ranch. The ditch system is shown on the photograph attached as Figure 2. This delineation is based on field observations, which I made during several site visits to the ranch and on numerous aerial photographs of the area.

SCANNED

JUN 19 2000

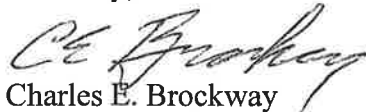

The ground water gradient is from north to south across the ranch so that water applied in the north effectively raises the water table for some distance south of the point of application. This water raises the water table, which benefits the vegetation and ultimately feeds some of the many springs and seeps on the south part of the ranch.

Figure 3 shows the boundaries of the area of the ranch which are benefited by the application of water under this right. Again, the location of water application, and geohydrology of the shallow aquifer system dictate the limits, of the area.

Acres within each 40 acre tract, which will receive the most benefit from the root zone storage allowed under water right 33-2133 are shown on Figure 3. The potential area benefited is greater than the 1440 acres allowed under the license; however, I have selected the 1440 acres which will receive the most benefit by the storage to be consistent with the license.

Table 1 is a spreadsheet showing the permit acreage, licensed acreage, Director's recommended acreage, and the acreage which will receive benefit from the root zone storage.
Please call if you have further questions.

Sincerely,

Charles E. Brockway

Case No. 39576

A. Subcase: See attached list
**STANDARD FORM 1
OBJECTION**

Please fill in the following information:

B. NAME AND ADDRESS OF PERSON OBJECTING

Name: United States of America, Acting through the USDA Forest Service

Address: 550 West Fort Street
MSC 033
Boise, Idaho 83724

Daytime Phone: (208) 387-0835

Name and Address of Attorney, if any:

Randall J. Bramer
550 West Fort Street
MSC 033
Boise, Idaho 83724

C. CLAIMANT OF WATER RIGHT AS LISTED IN THE DIRECTOR'S REPORT

Name: Sagewillow Inc.

Address: c/o Kent Foster
P.O. Box 50130
Idaho Falls, ID 83405

D. I object to the following elements as recommended in the Director's Report.
(Please check the appropriate box(es)).

1. ☐ **Name and Address**

Should be:

2. ☐ **Source**

Should be:

3. ☐ **Quantity**

Should be:

4. ☐ **Priority Date**

Should be:

5. ☐ **Point(s) of Diversion**

Should be:

6. ☐ **Instream Flow Description**

Should be:

7. ☐ **Purpose(s) of Use**

Should be:

8. ☐ **Period of Year**

Should be:

9. ☒ **Places of Use**

Should be: T07N R27E S18 should be T07N R28E S18

11. I object because:

☐ This water right should not exist.

☐ This water right was not recommended, but should be recommended with the elements described above.

E. **REASONS SUPPORTING OBJECTION(S):**

The Places of Use in Section 18 are misdescribed in Range 27E. They should be in Range 28E.

- (17) Potential Range of Reduction in Little Lost River Streamflow Caused by Increased Consumptive Use at the Knollin Ranch.
- (18) Recommended Reductions in Acres and Diversion Rates for Transfer Nos. 4221 - 4227.
- (19) Estimated Evapotranspiration (ET) Based on Pre- and Post-Transfer Irrigation Method - Sagewillow Transfers (assuming typical yield)
- (20) Estimated Evapotranspiration (ET) Based on Pre- and Post-Transfer Irrigation Method - Sagewillow Transfers (assuming below typical yield)

MEMORANDUM

TO: HAROLD JONES

FROM: TIM LUKE

DATE: June 28, 1993

RE: KNOLLIN RANCH PONDS - WATER DISTRICT 33

=====

On the morning of June 24 I visited the Knollin Ranch with watermaster David Andreason. Meeting us at the ranch were ranch manager Jerry Pancheri and owner Ed Dumke. My purpose of visiting the ranch was to look at some ponds about which Vance Hawley had complained directly to you. I had agreed to look at the ponds since I was going to the area on this date to visit with the watermaster and review certain water district matters.

During my visit, I saw a total of about eight ponds. These ponds are located on the attached map. The actual locations are approximate as I did not have a topo map in the field with me. The size of the ponds are not drawn to scale. Pond numbers 2, 3, 7 and 8 on the map were only viewed from a distance and not up close as I did with the others. The ranch manager told me that there were a total of about 11 or 12 ponds. Based on his description, the remaining ponds not shown on the map are in the same general area as ponds 5 through 8. He mentioned that these ponds did not have water in them at this time.

You will note from inspection of a topo map that ponds 3, 4, and 5 actually appear as ponds or dikes. The owner, ranch manager and watermaster all stated to me that pond 5, the largest pond which I had seen, had been in existence for a long time and certainly before Dumke bought the Knollin Ranch. The owner and ranch manager also stated that all of these ponds are covered by water right number 33-2133 and all were in existence in one form or shape since or after the right was originally approved. Their description of the dams for most of these ponds reminded me of some type of dike structures. Inspection of the 1952 beneficial use exam in the water right file indicates that there is some reference to several large dikes. The owner and manager mentioned that some of the ponds had become deteriorated or were breached at the time Dumke purchased the ranch. It is obvious that Dumke has made some improvements of the ponds, including installation of new culverts and gates around the dams.

The source of water for all of the ponds is groundwater from one or more of the wells located just south and along the farm road that divides sections 1 and 12 of T7N, R27E. A ditch from these wells runs one-half mile south to another ditch running east-west which then conveys the groundwater to all of the ponds. Groundwater was

SCANNED MICROFILMED
JUN 19 2008 APR 15 1994

being diverted into these ditches during my visit. Another well located in the NWSW of section 7, T7N, R28E can provide water to ponds 5 through 8, and possibly the other ponds in this same area. This well was in fact diverting water to at least ponds 5, 6 and 7 during my visit. Additional sources of water for the ponds may also be naturally occurring seeps and small springs within the ponds. Some of the areas around the ponds look as though they might be naturally sub-irrigated, although much of this may be due to the mere presence of the ponds. You will note from the topo that there are a number of small creeks and springs which form and rise just east of ponds 5 through 8. One of these creeks in fact form just above pond 4 and runs through ponds 5, 6, and 8.

Finally, you should be aware that Dumke and Pancheri both told me that Kent Foster had some information about these ponds, particularly as they relate to water rights. I was also told that Chuck Brockway has some detailed information regarding the ponds, including 'measurements' and other hydrologic information. I expressed some interest in the Department obtaining the latter information but I think it was undecided as to whether I would be receiving something from Foster or Brockway or if I had to contact them directly. They also mentioned that Charlie Mullin had looked at the ponds sometime within the past year or two and gave them his opinion that there was nothing wrong with the ponds and that no permits or authorizations were required. I believe Charlie had only seen the ponds in passing and that he was actually on the ranch in relation to some stream channel activity which may have been connected to some irrigation diversion and drop structures on the Little Lost River and Spring Creek.

I hope this information is of help. Contact me if you have any questions or if I can assist in reviewing or providing you with any of that other information within the transfer that was sent to Jim Johnson. You should know that Jim is having our Remote Sensing section provide us with some landsat images and data. We may be able to look for evidence of the ponds using this data. Ponds 1, 2 and 3 can return water to the Little Lost River once they are filled and were doing so during my visit. Ponds 5 through 8 and any other ponds in that area do return or spill water to either the river or any tributary of the river.

Some Detailed Pond Information

- Pond 1 & 2: Water impounded by earthen berm/dam 210 ft. long and approx. 7 ft. high on downstream side. Water flows out of pond via 2 ft. wide metal corrugated stand pipe in pond, connected to horizontal pipe which passes water to downstream side of dam approx. 200 ft. above river. Water exiting this culvert will go to river. Pond length is about 180 ft. and perhaps about 5-6 ft deep at maximum. This pond narrows at inflow end and then widens again into pond no. 2. No measurements were taken on this pond but I would guess it is slightly smaller than pond 1.

- Pond 5: Earthen dam about 660 ft. in length (size of pond is

MICROFILMED
SCANNED
APR 15 1994
JUN 19 2008

about 650 ft. x 300 ft.). A mainline is connected between the well west of the pond and the pond itself. A culvert on the southwest corner of the pond can divert water to pond no. 7, while a second culvert and gate on the dam can divert or spill water to ponds 6 and 8.

MR GEORGE WOODIE
HC 65 BOX 1018
HOWE ID 83244

RE: YOUR INQUIRY FROM BIG SPRING CREEK RE: A33-02133

Dear George:

I have further investigated your inquiry regarding the diversion from Big Spring Creek at the Knollin (Knowlen) Ranch, now under the holdings of Sage Willow Inc.

I am enclosing several documents which I hope will answer your question. Included in these documents is a hand-written letter from L.R. Hawley which references the Upper Spring Creek (also referred to as Spring Creek and Big Spring Creek in other documents) diversion during the winter months. You should note the water right was licensed for the diversions from Upper Spring Creek and Little Lost River.

Please peruse these documents. If you should have additional questions please contact me.

Respectfully submitted,

Allen B. Ruberry
Sr. Water Resource Agent
Adjudications Bureau

Enclosures

6 Nov 95. Spoke to Tim Lohs. He has personal knowledge of the historic use of waters of Big Spring Creek to the Ranch. Photo of the diversion is contained in his Distribution Book - and a description of the diversion and rights.

New pipeline installed about August 1995.

RE: Sagewillow -- SRBA Claim No. A33-02133

Dear Eric:

I have just received from Dr. Brockway a copy of a map and some charts which contain additional information regarding the pond system under the above-referenced claim. The ponds have been highlighted in yellow on the map. We hope this additional information will be of use to you.

Yours very truly,

Kent W. Foster

RE: A31-02133.

To: File

30 March 93,

From: E. CARLSEN,

It has been decided to code the nature of use for "Soil Root Zone Storage" as "Irrigation Storage" and to use "Irrigation Storage" as the nature of use for the P.O.U. The use of Irrig. Storage seems to be consistent with the coding of notices 34-04023 & 34-04006.

Gentlemen:

We are enclosing for filing in the Snake River Basin Adjudication proceeding 8 claims (1 licensed right and 7 stockwater rights) on behalf of Sagewillow, Inc.

We have also enclosed our check in the amount of \$800.00 for the filing fee, which represents \$50.00 per claim for the flat fee and \$50.00 per claim for the late fee. If additional filing fees are required, please contact us and we will forward the same to you.

Thank you for your assistance with this matter.

Yours very truly,

Kent W. Foster

DATE WHEN SENT 9:00 AM

DATE OF FIELD DATA 11/14/95

9 Nov 1995, 11:25 a.m. Contacted Kent Foster, Attorney for SAGE Wilson, to inquire into a visit to the KNOWLIN RANCH for the purpose of measuring the Little Lost River and Big Springs Creek winter diversions (for which this license is issued).
9 Nov 1995, 1:25 p.m. Saw Jerry Pinckard to make appointment to visit the R.O.B./R.O.M. or this night for photos & measurements, etc. Arranged to meet Ric Pinckard at 9:00 a.m. 14 Nov 1995, at Mr. Big Springs. CL Div.
14 Nov 1995, visited the system represented by this license. Accompanied by Ric Pinckard.
15 Nov 1995, (After Ric (Spoke to wife) left message that I would like to measure this system tomorrow. He also not be there. Call if there is a problem.)
16 Nov 1995, visited Knowlin Ranch, met Ric Pinckard, measured Big Springs Creek diversions and creek flow. Ric left, Keith Wilson & Mr. Ruggery went to Little Lost River diversion and measured. See pg. 10.

$\frac{d}{dt} \left(\frac{\partial L}{\partial \dot{x}} \right) = \frac{\partial L}{\partial x}$

1. The first step is to identify the problem.
 2. The second step is to define the problem.
 3. The third step is to analyze the problem.
 4. The fourth step is to develop a solution.
 5. The fifth step is to implement the solution.
 6. The sixth step is to evaluate the solution.
 7. The seventh step is to monitor the solution.
 8. The eighth step is to maintain the solution.
 9. The ninth step is to improve the solution.
 10. The tenth step is to document the solution.

CONCLUSIONS

1. $\mathcal{H}$ is a Hilbert space.

1. *Journal of the American Medical Association*, 1997; 277: 1039-1043.

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE STATE OF IDAHO,
IN AND FOR THE COUNTY OF TWIN FALLS

IN RE THE GENERAL ADJUDICATION
OF RIGHTS TO THE USE OF WATER FROM
THE SNAKE RIVER BASIN WATER SYSTEM

CIVIL CASE NUMBER: 39576

Ident. Number: A33-02133

Date Received: _____

Receipt No.: _____

Received By: _____

SECOND AMENDED

NOTICE OF CLAIM TO A WATER RIGHT
ACQUIRED UNDER STATE LAW

SECOND AMENDED

1. Name: SAGEWILLOW INC
Address: C/O HOLDEN KIDWELL HAHN CRAPO
PO BOX 50130
IDAHO FALLS ID 83405

208-523-0620

2. Date of Priority: JUN 22, 1949

3. Source: LITTLE LOST RIVER
BIG SPRING CREEK

Trib. To: SINKS
LITTLE LOST RIVER

4. Point of Diversion:

Township	Range	Section	1/4 of	1/4 of	1/4 of	Lot	County
07N	27E	2		SW	NE		BUTTE
		12		SE	NW		BUTTE
	28E	5		NW	SW		BUTTE

5. Description diverting works:

CONCRETE HEADGATE WITH DITCHES. 17 SMALL PONDS IMPOUNDED BY DIKES

6. Water is used for the following purposes:

Purpose	From	To	C.F.S.	(or)	A.F.A.
IRRIGATION STORAGE	04/01	11/01			2960.00
STOCKWATER	04/01	11/01	0.040		

7. Total Quantity Appropriated is:

C.F.S. (and/or) 2960.00 A.F.A.

8. Total consumptive use is

2960.0 Acre Feet Per Annum.

9. Non-irrigation uses.

STOCKWATER, 900 RANGE CATTLE

SCANNED

JUN 19 2008

Department of Water Resources
Eastern District OfficeNOTICE OF CLAIM
TO A
WATER RIGHT
ACQUIRED UNDER STATE LAW1. Name of Claimant(s) Sagewillow, Inc. Phone (208) 523-0620
c/o Holden, Kidwell, Hahn & CrapoMailing Address P.O. Box 50130, Idaho Falls, Idaho Zip 834052. Date of Priority (Only (1) per claim) June 22, 19493. Source of water supply (a) Upper Spring Creek or Big Spring Creekwhich is tributary to (b) Little Lost Riverwhich is tributary to (c) Sinks

4.a. Location of existing point of diversion on Upper Spring Creek is:

Township 7N. Range 28E. Section 5, 1/4 of NW 1/4 of
SW, Govt. Lot, B.M., County of ButteAdditional points of diversion if any: Big Lost River: T.7N, R.27E, S.2,
SW NE; S.12, SE NW.

b. If instream flow, beginning point of claimed instream flow is:

Township Range Section , 1/4 of 1/4 of 1/4,Govt. Lot B.M., County of ending point is: Township Range Section , 1/4 of1/4 of 1/4 Govt. Lot B.M., County of 5. Description of existing diversion works (Dams, Reservoirs, Ditches,
Wells, Pumps, Pipelines, Headgates, Etc), including the dates of any
changes or enlargements in use, the dimensions of the diversion works as
constructed and as enlarged and the depth of each well.Concrete headgates with ditches. There are also 17 ponds created by
construction of relatively small dikes which impound water from the
ditches and also from some small springs. In addition, water pumped from
a number of applicant's wells is often used to augment the waters from
the surface sources to keep water in the ponds to provide the root zone
storage effect during drouth times.

APR 15 1994

6. Water is claimed for the following purposes:

(Both dates are inclusive) (cfs) (acre feet)

Soil Root Zone

For Storage purposes from 04/01 to 11/01 amount _____ or 2,960

For Stockwater purposes from 04/01 to 11/01 amount .04 or _____

For _____ purposes from _____ to _____ amount _____ or _____

For _____ purposes from _____ to _____ amount _____ or _____

7. Total quantity claimed (a) _____ (cfs) and/or (b) 2,960 (acre feet)

8. Total consumptive use claimed is 2,960 acre feet per annum.

9. Non-irrigation uses; describe fully (eg. Domestic: Give number of households served; Stockwater: Type and number of livestock Etc.)
Stock drink from the ponds and ditches -- 900 head of range cattle.

10. Description of place of use:

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- b. If water is used for other purposes, place a symbol of use (example: D for Domestic) in the corresponding place of use below. See instruction for standard symbols.
