We had previously requested that your office send Vicki Enders Hansen a letter since she doesn't respond to our office. Just checking to make certain it wasn't lost in all the shuffle.

Thanks.

Hi Vicky,

Here is another slow claimant. We last wrote Vicki Enders Hansen, 3493 Sioux Circle, Provo, UT 84604 concerning changes in the POD, POU AND SOU. The last letter covering both claims was dated September 29 and we requested a response date by October 29.

We requested "they provide us with the date the change was made and some evidence tending to support the changes. If the changes occurred prior to November.....prior to November 19, 1987."

We have called them on numerous occasions but no answer. (801) 373-6733.

Perhaps they will respond if you rattle their cage.

Thanks.

Re: Snake River Basin Adjudication (SRBA)
Water Rights Claims A27-02009 & A27-02040
Subject: Changes in the POD, POU and SOU
Response Date: 29 October 2003

Dear Claimant(s):

Our office is reviewing your above referenced Notice of Claims and needs some additional information to recommend your claims to the SRBA Court.

A water right owner who has made changes in the Point of Diversion (POD), Place of Use (POU), and Season of Use (SOU) of a water right prior to the commencement of the SRBA without prior IDWR approval may claim the change in the SRBA. IDWR may recommend a right as changed, however, only if the change meets certain requirements. One of those requirements is that the change not result in injury to another water user.

Before we can recommend your claims, you must provide us with the date the change was made and some evidence tending to support the changes. If the changes occurred prior to November 19, 1987, then the date must include the month, day and year the change occurred. If the change occurred after November 19, 1987, then no date or evidence is required and the claim will be recommended as it was prior to November 19, 1987.

You will need to contact IDWR after the partial decree has been issued for approval to change the components on the decree.

Your response must be received by this office by the response date shown above. If no response is received then your claim to Water Rights 27-2009 and 27-2040 will not be recommended to be decreed.

If you have any questions please feel free to contact me at 547-3993.

Respectfully,

Attn: Craig Saxton

Dear Mr. Saxton,

I am enclosing with this letter the form to change the ownership of the Enders Dam and associated water rights to my name. Also enclosed are the deed to the Enders Ranch and a copy of my marriage licence.

I was able to speak to Delwyn Ellis today on the telephone. He said he would come by your office today, Friday, to draw out the Enders Dam and the irrigated acres of the ranch on a USGS map, as we agreed on Wednesday. Delwyn has leased the ranch for many years and also handles all maintainance on the dam and the ditches. He knows much more about the water than I do.

I told him to ask for you personally, but that if you were unavailable he could work with someone else and then just leave the map to be given to you. I hope that all went well and that by the time you receive this letter you have the map as well.

Thank you so very much for helping me with this. It really looked impossible for me to come up with the required documentation before I talked to you. I hope, though, that you now have everything you need.

Sincerely,
Tikki L. Hansen

Remarks: Through the discharge flume of the Reservoir with headgate as above described, the stored waters of the reservoir, when used for irrigation, will be spilled into the natural bed of Cut-off Canon creek, which runs through the West half of section 5 and the north west quarter of section 8 a distance of about 2 miles and enters then section 7 of T. 6 S. R. 43 E. of B.M. where the water will be used for irrigation. The creek has a well defined channel through the north half of section 7 and irrigation ditches will be constructed for the diversion of the water from this channel. Four main ditches will be constructed with a bottom width of from 2 to 3 feet and the points of diversion for said ditches will be 1, in the NE4 of NE4, 2, in the NE4 of NW4 and 3, lot 1 all of section 7, T. 6 S. R. 32 E. of B. M.

Section 7 contains in its western part and south of the creek, wild hay meadows, originally made by the overflows and seepage of the creek water and at the present time these meadows have been improved by the irrigation with the summer flow of Cut off Creek. The creek sinks near the West Boundary of section 7 and has a relatively very small flow during the later part of the irrigation season and the stored water will be used for irrigation of the meadow land in all the quarter sections of Sec. 7, to irrigate in the later part of the season those portions of the meadow which will dry up early - The area thus irrigated will aggregate 150 acres.
