Subcase No. 27-2126

STIPULATION TO RESOLVE
OBJECTION

This form is used to report the stipulated elements of one water right acquired under state law and/or one federal reserved water right. Submission of this form will not automatically result in the issuance of a partial decree. The Presiding Judge or Special Master will conduct any hearing necessary to determine whether the facts, data, expert opinions and law support the issuance of a partial decree for the water right.

The parties agree that the Snake River Basin Adjudication Court has jurisdiction of the parties and subject matter to enter a partial decree for this water right; that they have been served with sufficient process, according to the law; and that they have appeared, prosecuted, and defended their positions with regard to this water right dispute.

The Claimant, IDWR and the Shoshone-Bannock Tribes agree and stipulate to the elements as changed in the attached document as indicated in underline/strikeout format.

The Claimant and IDWR acknowledge that there still remains the outstanding objection by the Shoshone-Bannock Tribe to the lack of annual volume and any responses by the State of Idaho.

RE: SRBA Subcase Nos. 27-25B, -26A, -37G, -10552, -10555, -10557, & -12137

Dear Mr. & Mrs. Stecklein,

On August 16, 2011, Special Master Bilyeu issued an *Order Setting Status Conference Regarding Correction to Combined Use Limitation*. I write to explain the reason the Idaho Department of Water Resources ("Department") requested a correction to the combined use limits of the above-referenced seven surface water rights, and hopefully to alleviate any questions or concerns that you may have.

While reviewing ground water right (27-2126 in the name of Laverelle Stecklein) for unrelated reasons, Michael Holliday, Water Rights Supervisor with the Department's Eastern Regional Office, discovered an issue concerning a Place of Use remark on your water rights. Specifically, the combined use limits for your seven surface water rights contained a reference to ground water right no. 27-2126 and should not have. With the inclusion of 27-2126, your irrigated acreage appears to total more than 400 acres. Currently, however, pursuant to *Amended Stipulations* filed with the SRBA Court in June of 2007, the total place of use for these 8 rights (including 27-2126) totals only 387.3 acres. Ground water right 27-2126 is based on a license which does not specify the ground water right is supplemental to the above-referenced seven surface water rights. Moreover, a subsequent transfer affecting -2126 did not add a combined use limit tying the -2126 acres to the seven surface water rights. For these reasons, the Department seeks to remove 27-2126 from the list of rights comprising the combined use limit of 387.3 acres on the seven surface water rights. An updated recommendation for -2126 is expected by the end of September.

If you should have any questions or comments, please feel free to contact me at 287-4810.

Sincerely,

A handwritten signature in black ink that reads "Andrea L. Courtney".

Andrea L. Courtney
Deputy Attorney General, IDWR

Cindy,

I worked on the shapes for 2126 and 7065. I could not get the acreage in 7065 split like the license but I "adjusted" the shape and got the total acres correct. I made a separate project for it and started the layout.

I snapped 2126 to 7065 and adjusted the shape to conform to the 2003 imagery. I'm not sure I made the changes on either layout that I used 2003 instead of 1987. 2126 is also in a separate project and the layout is started.
