November 4, 1982

The Honorable Steve Symms
The United States Senate
Washington, D.C. 20000

FROM FILE
1-10210

Dear Senator Symms:

The Tendoy Area Council, Boy Scouts of America, holds a special use permit for an Organization Site in the Caribou National Forest in Idaho. The Forest Service currently charges an annual fee computed at 2% of the appraised fair market value of the land under permit. The permit costing \$256.00 in 1972 will cost \$1,172.00 in 1986.

Our Boy Scout Council's officers do not object to paying for the use of land. We do, however, wonder at the current rate of escalation of fees, if we can afford to stay on the particular site if fees increase above \$1,172.00.

Numerous capital improvements have been made to the property at the total expense of the Boy Scout Council. These include construction of a four-acre lake, six major buildings, roads, program areas, and a water system. The camp is heavily used from early June to the first week of September each year.

Our concern is for the youth of tomorrow. A permanent camping facility is the heart of the character building, physical fitness training program of the Boy Scouts of America. We are hesitant to make capital improvements needed as our camp use expands, in the face of escalating use cost. Our council seeks a solution to the problem of the escalating use fees. We, of course, desire ownership of a summer camping facility. Our first choice would be to gain title to the Forest Service property for which we now have a use permit.

We would appreciate counsel and guidance in this matter.

Sincerely yours,

Larry K. Vaughn
Scout Executive
