file

Dear Ernest,

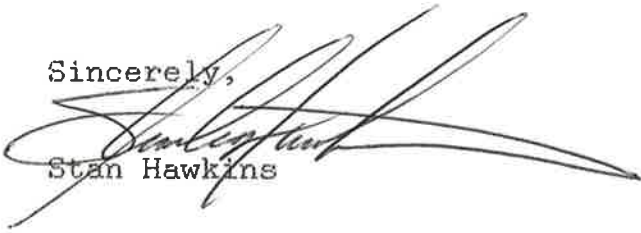

As I mentioned to you, my claim # A 25-13029 is not capable of being evidenced by affidavits, etc. Those persons who could have provided first hand knowledge of beneficial use are either deceased or are prevented by advanced age and poor health from being able to help.

As I indicated when I filed this claim, the only way to utilize the water right pertaining to this land, was to divert it out of this storage pond and into a system of ditches. While doing repairs to the dam I have uncovered the old diversion works. It consisted of a pipe and a headgate that was installed in an existing beaver dam to provide for water to enter a ditch which then followed along a hillside for some distance and was ultimately used to irrigate pasture and hay. Because the old diversion works is located away from the old stream channel, and because of the features of the area and the original system of water delivery, it would have been impossible to irrigate without the use of the storage pond.

For the above mentioned reasons the priority date of storage pond should be the same or nearly the same as the water right appurtenant to the land.

I would appreciate being advised to the status of this storage right.

Sincerely,

Stan Hawkins

RE: **Evidence of Priority**

Dear Mr. Hawkins:

The Notice of Claim identified with the number shown at the end of this letter has been filed in the Snake River Basin Adjudication (SRBA). The Notice indicates the water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed, at or on the place of use identified on the Notice. The date the water was first put to use, known as the priority date, has not been confirmed by a License, Decree, or Permit. For this reason, proof must be provided supporting the priority date.

For your reference I have provided a printout of your Notice and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. While I encourage you to read all of the pamphlet, I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date".

It is our goal to recommend this historical water rights within the Snake River Basin as accurately as possible. Field exams to verify other items of the Notice have been or soon will be conducted by Department personnel. But, the Department will not recommend the Notice be decreed by the court if no evidence of a priority date is submitted.

Please submit the required evidence supporting the priority date by **June 3, 1991**, referencing all documents with the corresponding Notice number. If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

MICROFILMED

All Notices required to submit this evidence are currently being reviewed for recommendation to the court. Hence, the need for expediency on your part or your agency. every effort should be made to submit this information within 30 days of the date of this letter.

Respectfully submitted,

Ernest Carlsen
Water right Supervisor, Adjudication
