Conditions of Approval:

1. THIS CLAIM IS A RESULT OF A SPLIT OF CLAIM NO. A63-03193.
2. C18 This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

Remarks:Comments:

1. dnelson 3/21/2006 claim review

Comment: Water right 63-3193 was licensed in 1965. A measurement of the system capacity was made at the time of licensing, which was well above the allowable rate per acre. The license was limited to the rate per acre or 0.05 cfs for 2.4 acres. The right was then split between two owners. The split gave fifty percent of the right to each homeowner or 0.025 cfs and 1.2 acres. This rate falls within the allowable rates for a half-acre of irrigation, so there should not be any problems with the rate in the splits. There is no evidence of the split in the 1987 aerial photos, so I recommended the full 1.2 acres for each portion. No volume was included in the right, so I used the standard 4.5 afa diversion volume for this area to calculate the volume for these groundwater rights. Domestic use claimed under water right 63-27186, so removed from license.
