**AMENDED STIPULATION
TO RESOLVE OBJECTION**

This form is used to report the stipulated elements of one water right acquired under state law and/or one federal reserved water right. Submission of this form will not automatically result in the issuance of a partial decree. The Presiding Judge or Special Master will conduct any hearing necessary to determine whether the facts, data, expert opinions and law support the issuance of a partial decree for the water right.

The parties agree that the Snake River Basin Adjudication Court has jurisdiction of the parties and subject matter to enter a partial decree for this water right; that they have been served with sufficient process, according to the law; and that they have appeared, prosecuted, and defended their positions with regard to this water right dispute.

The Claimant, IDWR, United States Bureau of Indian Affairs and the Shoshone-Bannock Tribes agree and stipulate to the elements as changed in the attached document as indicated in underline/strikeout format.

The Claimant and IDWR acknowledge that there still remain outstanding objections by the Shoshone-Bannock Tribes and the objection by the United States Bureau of Indian Affairs to the lack of annual volume and any responses by the State of Idaho.

E. REASON SUPPORTING OBJECTIONS

ELEMENT 3. QUANTITY. In order to administer all surface and groundwater rights on the Blackfoot River, it is necessary for the total annual volume of diversion to be decreed with respect to each and every water right in Basin 27. The Director's report recommends the total annual diversion volume for some, but not all, water rights. This water right is one of those where this necessary element is omitted. Tribal water rights are defined by the total annual diversion volume. See, e.g., Tribal Water Right No. 27-11375.ii. The Partial Final Consent Decree Determining the Rights of the Shoshone-Bannock Tribes to the Use of Water in the Upper Snake River Basin, (August 2, 1995), contains a provision whereby, the Shoshone-Bannock Tribes of the Fort Hall Indian Reservation and the United States agree to effectively subordinate the exercise of tribal water right No. 27-11375 to certain private surface water rights in the Blackfoot River. See water right No. 27-11375.x.d. The subordination provision was based upon an estimate that the total annual diversion volume of these water rights would not exceed 45,000 acre-feet per year (AFY) in total annual diversion volume. Thus, in order to comply with the above-referenced Decree of this Court, to administer all water rights in the basin and to comply with Idaho water law, it is necessary that all water right decrees issued by the Court in this basin must include a total annual diversion volume measured in acre-feet per year (AFY).

The Idaho Department of Water Resources has reported to the Court on a general methodology to estimate annual volumes of water required at field headgates throughout the state of Idaho. See "Report Regarding Development of Standards for Annual Volume of Irrigation Requirements at the Field Headgate" (August 1, 1996). Maps of Basin 27 identify that field headgate requirements are 4.0 acre-feet per acre in the lower reaches of the watershed and 3.5 acre-feet per acre in the upper watershed. The Technical Team (state, federal and tribal representatives) utilized in the final negotiations for the Partial Final Consent Decree for the Fort Hall Indian Water Rights Agreement estimated an average conveyance efficiency of 66 percent for the overall basin. Applying this efficiency to the field headgate diversion volumes noted above, results in river diversion volumes of 6.0 acre-feet per acre and 5.3 acre-feet per acre in the lower and upper areas, respectively, of Basin 27. These figures should be applied to derive the total annual volume for this water right.

In addition, the quantity of use should be reduced to account for the water rights transferred from the same tract of land. See Element 9, *infra*.

ELEMENT 9. PLACE OF USE. Water Transfers 2445 and 2468 document that 1.49 cubic feet per second (cfs) of Blackfoot River surface water rights associated with 74.5 acres of land were transferred from the Stechlein property in Section 23, T35, R34E. IDWR records document that there have not been any subsequent transfers to the Stechlein property to replace these water rights. Therefore, the combined total irrigated acreage base should be reduced from 466 acres to 391.5 acres.

Dear LaVerelle,

Almost two months ago you visited me at my office in Soda Springs with a copy of the map for the Steven's Ranch as of 1918. During that time we discussed "proof of ownership" on your SRBA claims and that I need some additional documents to support your claims. **I haven't heard from you since your visit. These documents are still required to recommend your claims.**

This office must receive your response by the response date shown above. If not response is received, then your claim will be recommended as "DISALLOWED" for lack of proof of ownership of the rights.
