Two women are now the sole owners of this place of use. They are Violet Rich - 208-684-4755 + LaRue J. Rich, phone # 208-684-4737.

Permits 27-7013 + 27-7020 still belong to Thousand Springs Trout Farm + I have contacted Shelly Keen at the IDWR State office about getting at least one permit licensed + then have Violet + LaRue Rich file a change of ownership.

My attached e-mail to Shelly explains the current situation now on hold until Boise decides on a licensing strategy.

X-Attachments:

Shelley, Im working on SRBA claims A27-7020, A27-7013 and A27-4001. These are all for the same fish hatchery near the Tilden bridge south of Blackfoot. The Rich family has owned this facility for many years but leased it out to Aqua Life Inc back when. Aqua Life is long gone and the facility is not being used now but the two permits are still in the Aqua Life name.

Tony Koslowski did the original exam back in the late 1970's for the two permits and found 81.39 cfs going through the facility. I have convinced the current owners, Violet and LaRue Rich to accept that amount on permit 27-7013 and to let permit 27-7020 be disallowed since there is no additional water.

These would have to be done in the name of Aqua Life since they were the permit owners. When licensed, Violet and LaRue can file a change of ownership for 27-7013.

I also have beneficial use claim A27-4001 which claims 41.10 cfs. Supporting evidence from engineer, Jack Kelly, says he measured 130 cfs in 1970 going through the hatchery facility. I advised the Rich's to amend this 1952 priority claim to to 48.60cfs to try to achieve the 130 cfs Kelly measured when this claim was combined with future license 27-7013.

Since both owners are elderly widows, I would suggest contact with Chase Rich in Pocatello at 208-233-9622. He is LaRue's son and accompanied me on the field exam.

If you need any additional data contact me at powder1@ida.net or my home phone which is 208-523-7240.

Exhibit C

A F F I D A V I T

STATE OF IDAHO)
 : SS
COUNTY OF ADA)

Jack E. Kelly, being first duly sworn on his oath, deposes
and says:

I am a registered professional engineer residing in Boise,
Idaho. I am a partner in the consulting engineering firm
of Anderson & Kelly which specializes in water resource
work.

I have personally visited a series of springs known as Indian
Springs located just west of Ferry Butte (Gibson Butte)
and just east of the Snake River below its confluence with
the Blackfoot River in Bingham County, Idaho. On April
16, 1970 I observed the use of water on that date and measured
the flow of the water with a flow meter. The water being
used was in constructed channels that the owner refers to
as run and identifies with a letter designation. In run
A I measured 15.75 cfs, run B 9.23 cfs, runs C & D combined
14.23 cfs, and run F, 1.89 cfs, making a total of 41.10 cfs in
used on that date.

On April 16, 1970 I measured a total of about 130 cfs of
water from spring arising on the property. Old check dams
and fish screen lead me to believe that much of this water
had been used in the past. The flow of the springs are
expected to vary from season to season and from year to
year. Therefore, I intended to make additional measurement
to better document the flows. The management of the dike
impounding the water in the large spring area north of Run

A is also a factor affecting the total flow of the springs. The practice is to back water up over the spring area in order to gain additional head for the water released into the runs. By raising and lowering the head on the spring area itself the flow from the spring area would be reduced or increased. The measurements made on April 16, 1970 indicate the flow rate with the head on top of the spring that they were using to operate on that given date.

RE: Preliminary Director's Reports & Change of Ownership

Dear Violet:

Enclosed for your review are the Preliminary Director's Reports for SRBA claims 27-4001, 27-7013 and 27-7020.

These reports have been prepared to reflect the work done by Harold Jones, contractor, and Chase Rich to get the license for 27-7013 issued and claim 27-4001 amended so the combine quantity of the two rights equals 130 cubic feet per second and to relinquish permit 27-7020. Please note August 29, 2005 is the end date for submitting the Notice of Error Reply.

In response to the change in ownership recently received at this office the reports also show yourself and LaRue as the current owners. The change in ownership also included the names of Chase Rich and Jan Denlinger. However, because they were not listed on the documents we received comprising the chain of title they are not shown as current owners. Their names can be added should the warranty deeds be changed to include them. You will need to submit a new change of ownership along with a copy of the modified deed.

Respectfully yours,

Ernest Carlsen
Water Rights Supervisor

NOTICE OF CHANGE IN WATER RIGHT OWNERSHIP

Please print or type. Attach pages with additional information. Instructions are included at the end of this form.
Incomplete forms will be returned.

1. Please list the water right number(s) and/or adjudication claim number(s) (if any) for each water right to be changed. List just the adjudication claim number if there is no corresponding water right record on file with the department. Indicate, by checking in the space provided (under the "split" heading), if the change in ownership is limited to a portion of a water right in which case division of the existing water right or adjudication claim record will be required.

Water Right No(s).	Adjudication Claim No(s).	Split	Water Right No(s).	Adjudication Claim No(s).	Split
	27-4001				

2. The following **REQUIRED** information must be submitted with this form:

A. The appropriate **FILING FEE**. See instructions for fee amounts.

B. A copy of the most recent **DEED, TITLE POLICY, CONTRACT OF SALE** or other legal document indicating your ownership of the property and water right(s) or claim(s) in question, **WITH ATTACHED LEGAL DESCRIPTION**.

C. Either of the following (if necessary to clarify division of water rights or other complex property descriptions):
PLAT OF PROPERTY or **SURVEY MAP** clearly showing the location of the point(s) of diversion and place of use of your water right(s) and/or adjudication claim(s) (these are usually attached to your deed or on file with the county).

OR

If your water right(s) and/or adjudication claim(s) is for ten or more acres of irrigation, you must submit a USDA Farm Service Agency **AERIAL PHOTO** with the irrigated acres outlined and point(s) of diversion clearly marked. The **AERIAL PHOTO** should be submitted in place of the **PLAT OF PROPERTY** or **SURVEY MAP**.

3. Name and Address of Former
Owner/Claimant(s)

RE: Amended Claim 27-4001A
Change of Ownership

Dear Violet:

With the recent issuance of license 27-7013, it is appropriate to proceed with submitting a change of ownership for notice of claim 27-7013 and 27-4001A. Claim 27-4001A also needs to be amended. For your convenience I have included both a change of ownership form and an amended claim.

The amended claim is prepared in an underline/overstrike format. Those underlined items are being added to the claim the overstrike items will be omitted. The points of diversion and place of use have been changed to reflect the licensed locations. The quantity is increased so the total between license 27-7013 and beneficial use claim 27-4001A equals 130 cubic feet per second. Both yourself and LaRue Rich need to sign this document in the presence of a notary. Since the total quantity has already been filed on there is no filing fee for making this change.

The purpose for filing a change of ownership is to get both claims in the name of LaRue and yourself. A separate change of ownership needs to be filed for each water right. Evidence of ownership for both of you needs to accompany the ownership changes. At this time there is no fee associated with either change.

Naturally if you have questions feel free to call me.

Respectfully

Ernie Carlsen
Water Rights Supervisor

Subject: Ownership Change

Dear LaRue,

I'm sorry to hear about the death of your husband. I spoke with your son and discussed the documents I'll need to make the ownership change. I'm sending you this form to do an ownership change of the water right to your name. I have noted on the bottom of the front page the supporting documents I'll need to accompany the form and please fill in the areas of the form that are highlighted in yellow.

I also discussed with your son the documentation need to support the priority date. If you have any questions, please feel free to contact me at 547-3993.

Sincerely;

Cindy E. Bird

Re: Evidence of Priority

Claim No.(s) A27-04001A

Dear Claimant (s):

The Idaho Department of Water Resources has begun its water right review in Basin 27. The Notice(s) of Claim identified with the number shown above, has been filed in the Snake River Basin Adjudication (SRBA). The Notice indicates water usage is based on "Beneficial Use". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed, at or on the place of use identified on the Notice. The date the water was first put to use, known as the priority date, has not been confirmed by a license, Decree, or Permit. For this reason, proof must be provided supporting the priority date. As the claimant, you are responsible for submitting the necessary proof to support the priority date.

It is important that each element of the Notice be substantiated. For instance, regarding claims for irrigation, the evidence should tend to show that diversion works were in place, that they were capable of diverting the claimed diversion rate, and that the diverted water was beneficially used on the entire claimed place of use on or before the claimed priority date.

For your reference, I have enclosed the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. While I encourage you to read the entire pamphlet, I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some examples of Documents Which May Be Evidence of the Priority Date".

It is our goal to recommend historical water rights within the Snake River Basin as accurately as possible.

.....
The Department cannot recommend the court decree the Notice if no evidence of a priority date is submitted.
.....

Please submit the documentation supporting the priority date by May 23, 2003, referencing all documents with the corresponding Notice number. If you have any questions not covered by this letter, please feel free to contact me at 547-3993.

Respectfully,

Cindy E. Bird

IDAHO DEPARTMENT OF WATER RESOURCES
Water Right Report 27-7020

Conditions of Approval:Remarks:

1. General Measuring devices of a type approved by the department shall be maintained at such locations as necessary to measure the total quantity of water diverted and the total quantity of water returned to the Snake River after being used.
Some of the water use authorized by this right is claimed with an earlier priority date on Snake River Basin Adjudication claim A27-04001A. In the event that claim A27-04001A is decreed as it is claimed, the Director may amend this right to eliminate any redundancy of water rights. Rights 27-07013 and 27-07020 when combined shall not exceed a total diversion rate of 81.39 cfs and a total annual maximum diversion volume of 58,814.0 af.
Right 27-07013 is also diverted through the point(s) of diversion described above.

IDAHO DEPARTMENT OF WATER RESOURCES

Water Right Report 27-7013

Conditions of Approval:

1. 042 The right holder shall provide the Department, upon request, information showing volume changes per hour necessary to maintain an adequate environment for the fish propagation facility. Volume changes per hour shall be based upon actual fish production.

Remarks:

1. General Measuring devices of a type approved by the department shall be maintained at such locations as necessary to measure the total quantity of water diverted and the total quantity of water returned to the Snake River after being used.
Some of the water use authorized by this right is claimed with an earlier priority date on Snake River Basin Adjudication claim A27-04001A. In the event that claim A27-04001A is decreed as it is claimed, the Director may amend this right to eliminate any redundancy of water rights.
Rights 27-07013 and 27-07020 when combined shall not exceed a total diversion rate of 81.39 cfs and a total annual maximum diversion volume of 58,814.0 af.
Right 27-07020 is also diverted through the point(s) of diversion described above.

**STATE OF IDAHO
DEPARTMENT OF RECLAMATION
CLAIM TO A WATER RIGHT**

Established by Diversion and Application to Beneficial Use

Under the provisions of Section 42-225, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. The filing of this claim does not confirm the water right but will serve for information purposes only. It may, however, become the basis for future adjudication of the water right by the Court.

(Please refer to the instructions on the back of this form)

1. Name of claimant Thousand Springs Trout Farms, Inc.
post office address Box 232, Buhl, Idaho

2. The point of diversion is in _____ 1/4 of _____ 1/4 Section 31 Township 3S (See Remarks)
Range 34E B.M. located on Indian Springs

(name of source)
tributary to Snake River in Bingham County County.

3. Dates of priority claimed: list the priority for each section _____ tity that you claim. Priority dates should be based upon the earliest diversion of the water which has been in continued beneficial use since that time. If there has been an interval of five years or greater when the water was not beneficially used for the same purpose as originally appropriated, the priority that you claim should date from the time that the water was again beneficially applied following the period of non-use.

a. Date of priority claimed: _____ or more (See Remarks)
1952 amount: 41.10 c.f.s. or _____ acre feet
amount: _____ c.f.s. or _____ acre feet
amount: _____ c.f.s. or _____ acre feet
Total claimed 41.10 c.f.s. or _____ acre feet.

b. Explain the purpose for which the water has been used and the time during the year when you have used the right claimed:
Use Fish Propagation period of use from Jan 1 to Dec. 31 (both dates inclusive)
Use Fish Hatchery period of use from Jan 1 to Dec. 31 (both dates inclusive)
use _____ period of use from _____ to _____ (both dates inclusive)
use _____ period of use from _____ to _____ (both dates inclusive).

4. Description of diverting works:

a. Surface water diversion dam and/or headgate: material is composed of See remarks
_____ ; length is _____ feet; height is _____ feet;
width at bottom is _____ feet; width at top is _____ feet; explain any increase in diversion capacity since structure was first built, giving dates and estimated capacities if known _____

b. Underground water diverting works: is well flowing or pumped NA ; depth of well is _____ feet; diameter of well is _____ inches; type of pump is _____
capacity of pump is _____ g.p.m.; name and address of well driller is _____

27-4001

attach well logs if available; has there been any change in pump or motor since well was first completed _____; if so, give dates and explain _____

c. Conveying works: length of ditch to place of use is _____ feet; width of ditch at top is _____ feet; width of bottom of ditch is _____ feet; depth of water is _____ feet; grade of ditch per 1000 feet is _____ feet; material through which ditch passes is _____; maximum length of pipe line to first place of use is _____ feet; diameter of pipe line is _____ inches; type of pipe _____; grade of pipe per 1000 feet is _____.

Please explain any changes or increase in size of conveying system since water was first appropriated, giving date and dimensions if possible _____

See Remarks

d. If water is stored: name of reservoir NA ;
total capacity of reservoir is _____ acre feet; active capacity of reservoir is _____ acre feet;
year construction commenced _____; year completed _____; date first used _____
period of storage is from _____ to _____; is reservoir drained each year _____;
is reservoir on or off stream _____ explain _____

if feeder canal is used give maximum carrying capacity _____ c.f.s.; if reservoir is off stream, describe location of reservoir by 40-acre subdivisions _____

has there been any enlargement of the reservoir since it was first built. _____, if so, give dates and describe _____

5. a. Where water is used for irrigation, describe area irrigated by 40-acre subdivisions and give total acres:

[illegible]

Total number of acres to be irrigated _____

Explain any significant increase in area irrigated since first use, give dates and acreages if known.

b. Do you get water through a ditch owned by several users? _____ If yes, give the name of the ditch
_____ The other users and their respective
interests in the ditch are (if known) _____

6. Where water is used for stock watering, give number of each kind of stock watered _____

7. Where water is used for domestic or municipal purposes give number of families served _____
name of town supplied _____

8. Where water is used for other purposes not above enumerated, give the nature of use, the extent of use,
and any details regarding the initiation of the right or subsequent later expansion. Be as specific as possible,
For Item 8 see 8 under remarks. 2 Con't.
giving dates and quantities. Para. 3a. The springs arise along the eastern edge
of Section 31, T. 3S., R. 34E. in lots 9 (NE1/4), 10 (SE1/4), and 11 (NE1/4)
and 12 (SE1/4) and are ponded and/or diverted and used at various points along
their course. Exhibits A and B should be consulted for a more definite
location.

~~2. Remarks: please explain in detail of your claim which you feel need clarification or additional explanation~~
3a. Con't. The flow of springs arising on the property were measured in 1970
at about 130.00 cfs. The amount claimed as listed in para. 3a. represent the
measured flow that was being used on April 16, 1970. Jack E. Kelly, an engineer,
made the measurements. Mr. Kelly's affidavit has been marked "Exhibit C". As
additional data is obtained the amount claimed under this right will be modified.
The locations of runs referred to in Mr. Kelly's affidavit can be observed on
Exhibit A which is a poor copy of a 1962 U. S. Government aerial photo. The
colors and notes are to help explain the photo as the copy is not clear. Exhibit
D is a copy of pages 137 and 138 of WSP 774 published by the U. S. Geological
Survey. It is believed that the springs numbered 5 and 6 are located on the
property. However, data to document this is not now available. The springs are
shown on Exhibit B which is a map composed of portions of the U.S. Geological
Survey's Pingree and Rockford topographic quadrangles. It should be noted
that the map indicates culture and drainage as it appeared in 1946 before the

State of Idaho

County of San Jelle ^{is.}

Be it known that the undersigned, being duly sworn, deposes and says that he, she, they subscribed the
foregoing claim to a water right, together with all attached information, and that the matters and facts therein are
true to the best of the affiants knowledge.

Sworn to before me this 27th day of August, 1970.

RECEIVED

JAN 07 1999

Department of Water Resources
Eastern Region

MEMORANDUM

To: Ernie Carlsen**FROM: Sharla Curtis****DATE: December 31, 1998****RE: Claim 27-04001A and Overlapping Rights 27-07013/07020**

Ernie, attached is a breakdown of how the facility volume was developed under a total of three rights for which adjudication claims have been filed. The two permits were just reviewed for licensing and in order to accurately describe the facility volume for each as it was developed, I reviewed maps and diagrams that were submitted with the statutory claim and the applications when they were filed. I also looked at maps and diagrams that were attached to the field reports and compared them with other data later collected by Keith Wilson. After a lengthy process, I linked everything together and the attached materials reflect my efforts.

I'm sending this stuff to you because I thought it may help with the claims review process by saving time and effort on the part of your agents not having to duplicate the effort and spending considerable time laying the whole thing out again.

If you need copies of any other documentation we have in our permit files, let me know. The total facility volume and individual pond volumes were calculated from individual information sheets listing the length and width of the ponds/raceways. These sheets appear to have been collected by Keith Wilson. So if you don't have copies available at your office, I'd be glad to send them to you.

December 1982 – Deed of distribution from Leva Hoge (representative of Leva Rich) to Myrthon and Roland Rich (Lots 9-12, Section 31 and other lots not part of the permits' places of use) – this deed appears to be a moot point since the property had already been deeded as a gift in June 1970

February 1994 – Lease between Leva Rich and Idaho Springs Trout (a division of Thousand Springs Trout Farms Inc.) expires

January/February 1997 – flood wiped out most of the outlets and silted in a lot of the ponds. Keith Wilson told me in a phone conversation 12/16/98 that it's going to take a considerable amount of time and effort to reconstruct the system and an extension of time to avoid forfeiture will no doubt be filed soon since last use appears to be the summer of 1994.

June 1998 – Change of Ownership form filed in Snake River Basin Adjudication from Aqua Life to Roland Rich

August 1998 – Letter from Greg Taylor to Roland and Violet Rich notifying them that the claims were changed back to Aqua Life as they had been filed – stated that Aqua Life claims they don't have the property but still own the water rights

The permits are in the name of Thousand Springs Trout Farms Inc.; none of the deeds, etc. submitted are acceptable to change the name on the permits. A license for 27-07013 should be issued; the Snake River Basin Adjudication staff can then do what they think is appropriate as to ownership change(s).

The facility volume was calculated based on the pond information sheets. The numbering system on these sheets is slightly different from the 1977 examiner's diagram and other maps outlining the raceways. But all the diagrams correspond with one another and only the physical numbering differs from one map/diagram to another. Per a discussion with Keith Wilson, an average depth of seven (7) feet was used to calculate the facility volume as follows:

Pond #	Cubic Feet	Pond #	Cubic Feet	Pond #	Cubic Feet
A1	1764	A15(E12)	6552	D2	46,200
A2(E5)	2078	A16(E13)	6552	D3	47,957
A3(E6)	2078	B1	16,422	D4	44,702
A4(E7)	2078	B2	19,320	D5	30,968
A5(E8)	2078	B3	17,976	D6	31,185
A6(E9)	2078	B4	18,480	D7	31,185
A11(E10)	3927	B5	21,168	D8	49,518
A12(E11)	3927	C1	27,489	E1	124,740
A13(E3)	8190	C2	93,380	E2	130,410
A14(E4)	8190	D1	32,928

SPRINGS IN THE FORT HALL BOTTOMS

GENERAL FEATURES AND DISCHARGE

Springs rise at intervals for a distance of 10 miles or more along the Fort Hall bottoms and adjacent to the Portneuf River near its mouth. Most of these springs rise on the valley floor at heights of 10 to 15

fig. 11.—Sketch map showing the location of spring-measuring stations in the vicinity of the American Falls Reservoir. (See table, p. 138, for explanation of numbers.)

above the river. They have a fairly uniform aggregate discharge about 1,400 second-feet, and most of them issue from basalt which underlies the alluvium in this area. The flow and the names of 30 the larger springs in the vicinity of the American Falls Reservoir are given below. The location of the stations where the flow from these springs was measured is shown in figure 11. Additional details

14.	Crystal	32.8	29.	Fish Hatchery	2.8
15.	Danielson	51.1	30.	Wide	69.7

On September 14, 1925, Batise Spring, on the west side of the Portneuf River about 4 miles northwest of Pocatello, discharged about 50 second-feet,⁹⁴ and the Fish Hatchery Springs, about 1½ miles downstream from Batise Spring, about 75 second-feet.⁹⁵ Wide Creek, which is among the largest of the spring-fed streams in this area, a tributary to the Portneuf River from the south, had an average discharge during 1926 of 60 second-feet at a point near the center of the W½ sec. 26, T. 5 S., R. 33 E.⁹⁶ The largest spring-fed tributary to the Portneuf River is Big Spring Creek, which had an average discharge of 442 second-feet of spring water during the irrigation season of 1926 at a point in the SE¼ sec. 9, T. 5 S., R. 33 E.⁹⁶ This stream rises in spring pools on the south side of Gibson Butte and flows into the Portneuf River from the north. Clear Creek, also spring-fed, had an average discharge during 1926 of 120 second-feet at a point in the SW¼ sec. 11, T. 5 S., R. 33 E.⁹⁶ This stream flows into Ross Fork and thence into the Portneuf. Ford Creek is a tributary to Clear Creek from the west and has an average flow of about 7 second-feet. Another spring-fed tributary to the Portneuf from the north is Kinney Creek, which had a discharge of about 28 second-feet during 1926 at a point near the center of sec. 15, T. 5 S., R. 33 E.

The ground-water contours (pl. 19) indicate that the springs bordering the Fort Hall bottoms should be divided into two groups. Batise Spring, Fish Hatchery Spring, and Wide Creek, in the Portneuf Valley form one group, and Big Spring Creek, Clear Creek, and Kinney Creek, the waters of which come from the valley of the Snake River north and east of Fort Hall, form the other group.

⁹⁴ Meinzer, O. E., Large springs in the United States: U. S. Geol. Survey Water-Supply Paper 357, p. 11, 1927.

⁹⁵ Idem, p. 52.

⁹⁶ Smith, T. R., Hydrometric report on the American Falls Reservoir area for 1926 (unpublished rept. U. S. Bur. Reclamation, American Falls, Idaho, 1927).

In addition to these springs by 13 springs in the Aberdeen springs issue from the basalt from under the irrigated area the Snake River. At most by the American Falls lake

The Portneuf and the Snake springs and by inflow rising location of the larger of these are given in figure 11. The Blackfoot River and American has a total gain, exclusive of about 2,500 second-feet, 1

The origin of the springs about 1,400 second-feet, or been variously attributed down the valley of the Portneuf drainage basin of that stream: (1) precipitation; (2) underflow along the Snake River; (3) underflow along the Snake River. Analysis is made of the possible

POSSIBLE SUPPLY

The average annual run for the years 1920 to 1927 of 0.26 foot over its study of the records for the Creek leads to the conclusion that the average run of the Creek is about 0.26 foot. The smaller relative thus indicated may be assumed through the springs near the creek. The smaller relative thus indicated may be assumed through the springs near the creek. The smaller relative thus indicated may be assumed through the springs near the creek.

A possibility of a slight rise in the Blackfoot River is flow in the River Valley in a canyon gaging stations measuring ground water moving past might not be measured at

duly sworn on her oath, deposes and says:

That she is personally familiar and has been for many years
with the property in Lots 9, 10, 11, and 12 in Sec. 31, T.
3S., R.34E., and with the many large springs which have
become known as Indian Springs that arise on the property.
The property was bought from the Indians by my father-in-law,
H.C.C. Rich in the early 1900's.

The area was used for stock grassing, hunting and fishing.
In about 1952 the land then under my control was leased by
a Mr. Ralph Nelson. In that year and in 1953 and 1954
he constructed a series of ponds to raise fish commercially.
These ponds are in use now and are being used for fish
propagation by Mr. William Connell on what has become known
as Indian Spring Trout Ranch.

Mr. Kenneth Hoskins of American Falls, Idaho, being first duly sworn on his oath, deposes and says:

That he is personally familiar with the springs located on the property owned by the Rich family west of Ferry Butte, and the business operated on that land known as Nelson Trout Ranch, Pingree, Idaho, and now known as Indian Springs Trout Farm.

Before my employment at the Nelson Trout Ranch in May 1959, I was employed by the Meader Trout Farm, Pocatello, Idaho (now known as Papoose Springs Trout Farm) for several years. I have a good working knowledge of trout rearing, feeding, sorting for market, selection for brood fish, spawn-taking, water control, carrying capacity of ponds, temperature effects, and requirements for successful transportation of trout and such other skills as are required in this type of business. I am a competent and capable fish hatcheryman.

While working at the Nelson Trout Ranch, 6,000 ounces (1.5 million) trout eggs were cared for in each trough in the hatchery until ready for shipping. A total of 12 million eggs were cared for in the several troughs at a single time. Eyed trout egg sales during the six month 1960-1961 season were over 40 million eggs. Up to 4 million trout were hatched in a season and reared to a size of 2 to 3 inches in the 28 fry and fingerling runs located near the spawning shed. This is shown as area C on the attached map marked Exhibit I.

27 401

~~NOT FOR RELEASE~~
NOV 13 1996

The accompanying map indicates areas and water sources used by the Nelson Trout Ranch and the pounds of fish held at one time during the 1960-1961 season. Time span covered twelve months from August of 1960 to August of 1961. Figures on the map in pounds of fish being held total almost 400,000 pounds. This includes brood fish, market fish, and fingerlings for the following year's crop.

At the time of my employment, the hatchery facility was capable of handling 500,000 pounds of live trout at one time in the ponds, water sources, and facilities used by the trout farm.
