REF: SRBA Rights 27-4058, 27-94, 27-11930 and 27-12080

Subject: Basin 27 Objections to Irrigation Use

Dear Claimants:

This letter concerns the objection filed by the Shoshone-Bannock Tribes and/or the Bureau of Indian Affairs (collectively referred to as "the Tribal Objectors") to your water right in the Snake River Basin Adjudication (SRBA) and the concurrence of the Idaho Department of Water Resources (IDWR) in a proposed settlement agreement to resolve the objection.

It is IDWR's understanding that you have agreed to settle the volume objection made by the Tribal Objectors to your water right by including a specific total annual volume limit on your irrigation water right. Recently, the Tribal Objectors requested that IDWR concur in the settlement agreement. IDWR is reluctant to concur in such settlements because of a lack of information regarding actual diverted volumes in Basin 27. If a volume limit is to be included in a water right, IDWR wants to make sure that the volume limit is as accurate as possible. To this end, IDWR is currently in the process of implementing a study intended to provide a basis for determining diverted volumes in Basin 27. Still, IDWR realizes that that some water users might have information that would provide actual diverted volumes for their water rights, thus eliminating the need to wait for completion of the study. As such, IDWR is requesting any information you have to support historical diversion amounts for your water right. If you have any such information, please send it to the address listed above.

AFFADVIT OF WATER USE UNDER 27-4058 BY DELWYNN ELLIS.

July 12, 2006

I Delwynn Ellis have observed the irrigation of the ground owned by Sid Thompson under 27-4058 for the irrigation season of April 15th to October 31st each and every year since 1972 from a spring. I have leased the farm to the north of Sid Thompson since that time and have witnessed his irrigation of the ground. The spring doesn't run every year but when the water is available the Sid uses it for irrigation of his ground through ditches to flood irrigate.

RE: Notice of Error Reply 27-94, 27-4058 & 27-11930

Dear Sid and Cheryl:

In response to the Notices of Error you submitted after the initial mailing of the Preliminary Director's Reports in May 2005, enclosed for your records are the revised Preliminary Director's Reports for the above listed water rights and maps of the place of use. These reports are based on information obtained subsequent to the initial mailings and replace the previous Preliminary Director's Reports.

The Department expects to submit to the Snake River Basin Adjudication Court all recommendations for the Blackfoot Drainage, Basin 27, in November 2005. At that time you will receive a Director's Report for each of your water rights, which should mirror each of the revised preliminary recommendations. The Director's Report mailing will not include a map.

Naturally if you have questions please call me at the above phone number.

Respectfully Submitted,

Subject: RESERVOIR

Response Date: 10 JUNE 2005

Dear Claimant (s):

During the process of evaluating claims filed in the Snake River Basin Adjudication (SRBA), it was discovered that a reservoir is located on the land claimed by one of the two above referenced claims. Please advise when the reservoir was constructed and how you utilize the water from the reservoir.

If the reservoir holds more than one day's worth of water usage, you will need to file a water right for the reservoir.

Re: Evidence of Priority

Claim No.(s) A27-04058

Dear Claimant (s):

The Idaho Department of Water Resources has begun its water right review in Basin 27. The Notice(s) of Claim identified with the number shown above, has been filed in the Snake River Basin Adjudication (SRBA). The Notice indicates water usage is based on "Beneficial Use". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed, at or on the place of use identified on the Notice. The date the water was first put to use, known as the priority date, has not been confirmed by a license, Decree, or Permit. For this reason, proof must be provided supporting the priority date. As the claimant, you are responsible for submitting the necessary proof to support the priority date.

It is important that each element of the Notice be substantiated. For instance, regarding claims for irrigation, the evidence should tend to show that diversion works were in place, that they were capable of diverting the claimed diversion rate, and that the diverted water was beneficially used on the entire claimed place of use on or before the claimed priority date.

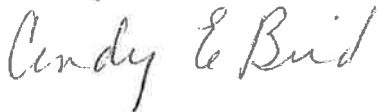

For your reference, I have enclosed the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. While I encourage you to read the entire pamphlet, I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some examples of Documents Which May Be Evidence of the Priority Date".

It is our goal to recommend historical water rights within the Snake River Basin as accurately as possible.

.....
The Department cannot recommend the court decree the Notice if no evidence of a priority date is submitted.
.....

Please submit the documentation supporting the priority date by May 23, 2003, referencing all documents with the corresponding Notice number. If you have any questions not covered by this letter, please feel free to contact me at 547-3993.

Respectfully,

Cindy E. Bird

5/9/03 29-4058 Thompson. by Cindy Bird
There is a decree for this area, signed
8-1-1891. If this source was or should
have been in the decree then he
would get a 8-2-1891 priority. If not
it's possible that this might be a
posted notice.

Emailed Candice & Ernie to see
if Candice would look at that for
me.

Candice did not feel this was part of
the decree.

6/10/03 Sidney Thompson stopped by the
office about 4pm and I explained
that to him and also told him that
he claimed 0.03 cfs per acre and
if he had documentation that it needed
extra water we might be able to
recommend the higher rate per acres.
Because the state standard is 0.02 cfs/ac.
