JUN 2 2005

ADS. P

Department of Water Resources

1. Water Right No(s): See Exhibit "A" attached hereto.
Adjudication Claim No(s): See Exhibit "A" attached hereto.
2. The following REQUIRED information must be submitted with this form:
 - A. A copy of the most recent DEED, TITLE POLICY, CONTRACT OF SALE or other legal document indicating your ownership of the property and water rights or claims in question, WITH ATTACHED LEGAL DESCRIPTION.
 - AND
 - B. PLAT OF PROPERTY or SURVEY MAP for parcel of ten acres or less. (These are usually attached to your deed or on file with the county.)
 - OR
 - C. For water rights or adjudication claims involving ten or more irrigated acres, a USDA Farm Service Agency AERIAL PHOTO with irrigated acres outlined and point(s) of diversion clearly marked.
3. Name and Address of Former Owner/Claimant J.R. Simplot Company, a Nevada corporation
999 Main St., One Capital Center, Boise, ID 83702
4. New Owner/Claimant(s) Johnson Research, L.L.C., an Idaho limited liability
New Mailing Address 24007 Hwy. 20/26
City, State and ZIP Code Parma, ID 83660
New Telephone Number (208) 722-5829
5. Date you acquired the property December 5, 2003
6. If you have acquired only a portion of the former owner's property, IDWR may need to split the water right(s) or adjudication claim(s). If this applies, describe in detail your portion of each water right or adjudication claim in the spaces below. If necessary, attach additional pages.
Number of acres you irrigate _____ Number and type of stock _____
Diversion rate in CFS _____ Number of homes _____ Other uses _____
If a water right or adjudication claim is being split and you are not sure how to identify your portion of the original right or claim, please contact the nearest IDWR office for assistance.
7. Signature of New Owner or Claimant(s) 
(Corporations or other organizations must submit a list of directors and/or officers demonstrating authority to sign form.)
8. For Snake River Basin Adjudication Claims: Please attach a Notice of Appearance completed by your attorney, if you wish IDWR to correspond with him or her for all matters related to your claims..

Pending Permit

*63-11390	June 6, 1990	Irrigation and Stockwater	Sand Run Gulch	Permit
-----------	--------------	---------------------------	----------------	--------

* An assignment of this permit is required to update the current permit holder, J. R. Simplot Company. This assignment will be filed with the IDWR on or before November 21, 2003. *Simplet agrees to transfer the assignment to Johnson Research by 11-10-03*

Unclaimed Rights

**63-5129	April 1, 1878	Boise River	Irrigation	Statutory claim
**63-5130	April 1, 1977	Wastewater	Irrigation	

**These statutory claims were originally filed by the Parma Irrigation District. 20 acres within the SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 16 T.5N R.5W were claimed by the District on land owned by Simplot. The irrigation district did not file claims to these rights in the Snake River Basin Adjudication. 5 landowners claimed portions in the Snake River Basin Adjudication under split claims A thru E. As of November 4, 2003, an SRBA claim is not of record covering Simplot's 20 acres. Simplot will file claims to its portions of these rights on or before November 21, 2003.

Those rights above which are based upon statutory claims filed prior to the commencement of the SRBA will require evidence to support the priority date claimed during the proceedings of the SRBA.

BARGAIN AND SALE DEED

GRANTOR, **J.R. SIMPLOT COMPANY**, whose principal address is 999 Main Street, Suite 1300, Boise ID 83702, for Ten Dollars and other good and valuable consideration, the receipt of which is hereby acknowledged, does hereby bargain, sell and convey unto **JOHNSON RESEARCH, L.L.C., an Idaho limited liability company**, whose principal address is 24007 Highway 20/26, Parma ID 83660, as GRANTEE, and to Grantee's successors and assigns forever, all of the following described real estate located in Canyon County, State of Idaho:

See Exhibit A, attached hereto and made a part hereof.

TOGETHER WITH all improvements, easements, hereditaments, all appurtenant water and water rights, ditches and ditch rights, claims to water rights, and any stock in ditch or irrigation companies appurtenant thereto, which water-related rights and claims include, but are not limited to, those matters set forth on Exhibit B, attached hereto and made a part hereof, and all other appurtenances, and SUBJECT TO such rights, easements, covenants, restrictions and zoning regulations as appear of record or based upon the premises.

In construing this deed, and where the context so requires, the singular includes the plural and the masculine, the feminine and the neuter.

IN WITNESS WHEREOF, Grantor has hereunto caused this deed to be executed in its corporate name this 4th day of December, 2003.

152.6 ACRES TOTAL

This right is limited to the irrigation of 18 acres within the place of use described above in a single irrigation season.

Right Nos. 63-4535, 63-4536, 63-4537, 63-5197 and 63-11390 are limited to the irrigation of a combined total of 236.9 acres in a single irrigation season.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This right remains subject to the right of the original appropriator, in good faith and in compliance with state laws governing changes in use and/or expansion of water rights, to cease wasting water, to change the place or manner of wasting it, or to recapture it.

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

IDAHO DEPARTMENT OF WATER RESOURCES
Adjudication Recommendation Report 63-4535 V1

Conditions of Approval:

1. E62 When combined, Right Nos. 63-4535, 63-4536, 63-4537, 63-5197 and 63-11390 shall provide no more than .02 cfs per acre.
2. K06 This right is limited to the irrigation of 18 acres within the place of use described above in a single irrigation season.
3. E55 Right Nos. 63-4535, 63-4536, 63-4537, 63-5197 and 63-11390 are limited to the irrigation of a combined total of 236.9 acres in a single irrigation season.
4. C18 This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

Remarks:Comments:

1. Igraves 8/17/2006 Tributary

Comment: Tributary was clarified and amended to Sand Hollow Creek per field exam findings.

2. Igraves 8/17/2006 P/U

Comment: Property aka the Yeakel Place and/or the SSI Farm. P/u was amended to ppu per field exam findings.

3. Igraves 8/17/2006 Priority Date

Comment: Various affidavits were provided in an effort to support a 1931 priority date along with an explanation letter from Jeff Johnson.

4. Igraves 8/17/2006 Flow Rate

Comment: Flow rate measured was 3.33 cfs. This right is limited to .36 cfs.

5. Igraves 8/17/2006 Overlaps

Comment: Water from Sand Hollow Creek, represented by rights 63-4536, 63-5197 and 63-11390, and water from another unnamed drain, aka Kiesel Drain represented by right 63-4537, can be used on the property. This right and 63-4537 can only be used on acres north of Sand Hollow Creek. The other three rights can be used on acres north and south of the creek.

ADDITIONAL INFORMATION NEEDED FOR IRRIGATION FIELD EXAMS

Field Examiners, please complete the following checklist. Mark "unknown" or N/A if information doesn't apply or information is unavailable.

IF CURRENT OWNER DOES NOT MATCH PROOF REPORT PLEASE GIVE NEW OWNER CHANGE OF OWNERSHIP FORM TO COMPLETE.

1.) Pump information:

63-4535 - 63-4536 63-4537
and 63-5197

Well or Diversion Identification No.*	Motor Make	Hp	Motor Serial No.	Pump Make	Pump Serial No. or Discharge Size
Big Pump SANDHOLLOCK	LOUIS ALLIS	20HP	1923 F-3	PERMA	20159
Kiesel Diversion	ONDE	DITCH	NO	PUMP	
UNNAMED DRAIN	OPEN		DITCH	NO	PUMP.

8.4 FT - Big Pump

2.) Lift (distance from pump to water) _____

3.) How was lift determined (well log, measurement, owner)? MEASUREMENT

4.) Pressure against pump (this is checked using the owner's psi gauge, your gauge, or an estimate by owner) 10 PSI ESTIMATE

5.) Was a measurement made? YES If no can a measurement be made at a latter time? _____

6.) What type of measurement device was used? Polysonic - Big - Pump
Pygmy - Aquacore - Kiesel Drain
Pygmy - Aquacore - UNNAMED Drain

7.) Is there a pump curve available for pump? NO

8.) Please fill out the following:

Number of sprinklers _____

Sprinkler nozzle size _____

Number of Pivots (include gpm rating for each pivot) _____

FLOOD IRRIGATION.

FIELD EXAMINERS NOTES (descriptions, other uses, questions, ect.)

g e e m e m d

7-19-2006

Daniel A. Nelson

MEMORANDUM

TO: ADJUDICATION FILES 63-5179, 63-5181, AND 63-5182

FROM: DANIEL A. NELSON

DATE: 8/2/06

SUBJECT: FIELD EXAMINATION 63-4535, 63-4536, 63-4537, AND 63-5197

A field examination was done on the above rights on 7/20/2006 and 7/21/2006. This ground is currently owned by E.G. Johnson, but the farm is known as the SSI Farm. Mr. Johnson purchased this farm from SSI, thus giving it the name. I will be referring to this farm as the SSI farm to avoid confusion. **PLEASE NOTE: water right 63-4534A is also apart of the SSI farm, but is a self-contained system, and was field examined separately from the main farm's irrigation system.**

— There are three water sources supplying water to the SSI farm. The main source of water is Sandhollow Creek also known locally as Cole Slough. The other two sources are unnamed drains, one of which is known locally as the Kiesel Drain, and the other has no local name. In order to keep the sources straight, I will refer the three sources as the Sandhollow Creek, Kiesel Drain, and the Unnamed Drain.

A Parma Pump diverts water from Sandhollow Creek, and the diversion is referred to as the Big Pump Diversion. The pump is located on the north side of Sandhollow Creek. The water from this diversion can go across the creek and travel due west through a concrete ditch to irrigate the lands on the south side of Sandhollow Creek. **PLEASE NOTE: there are no other pipelines across the creek, so the only water source for the land south of the creek is the Sandhollow diversion.** The water from the Big Pump diversion is also diverted due north through a pipeline that open discharges in a ditch north of the diversion. The ditches on the north side of the creek are very flat and deep, which allows the owner to run the water in any direction they choose to irrigate all of the lands north of the creek from this diversion.

Statutory claims 63-4536 and 63-5197 are the only statutory claims using this diversion. Water right 63-4536 lists an unnamed drain in Section 14, but in reality the unnamed drain in question naturally flows into Sandhollow Creek, and is diverted out of Sandhollow Creek at the Big Pump Diversion. Both of these water rights list points of diversion that are no longer used. According to the current owners, the pumps have been in place since they purchased the property. They believed that the system was redesigned when SSI purchased the property in the early 1980's (approximately 1982). Therefore, an accomplished transfer has occurred on both of these rights. The correct point of diversion is the SENESW S15 T5N R5W. This is the only diversion out of Sandhollow creek for these lands.

The water from the Kiesel Drain is diverted from the drain north of Highway 20/26/95. A ditch carries the water from the drain, under the highway, and into a diversion pond. This pond is actually the main distribution point for the water irrigating the ground north of Sandhollow Creek. The water in the pond can travel both east and west to various ditches to flood irrigate the pastures under this system.

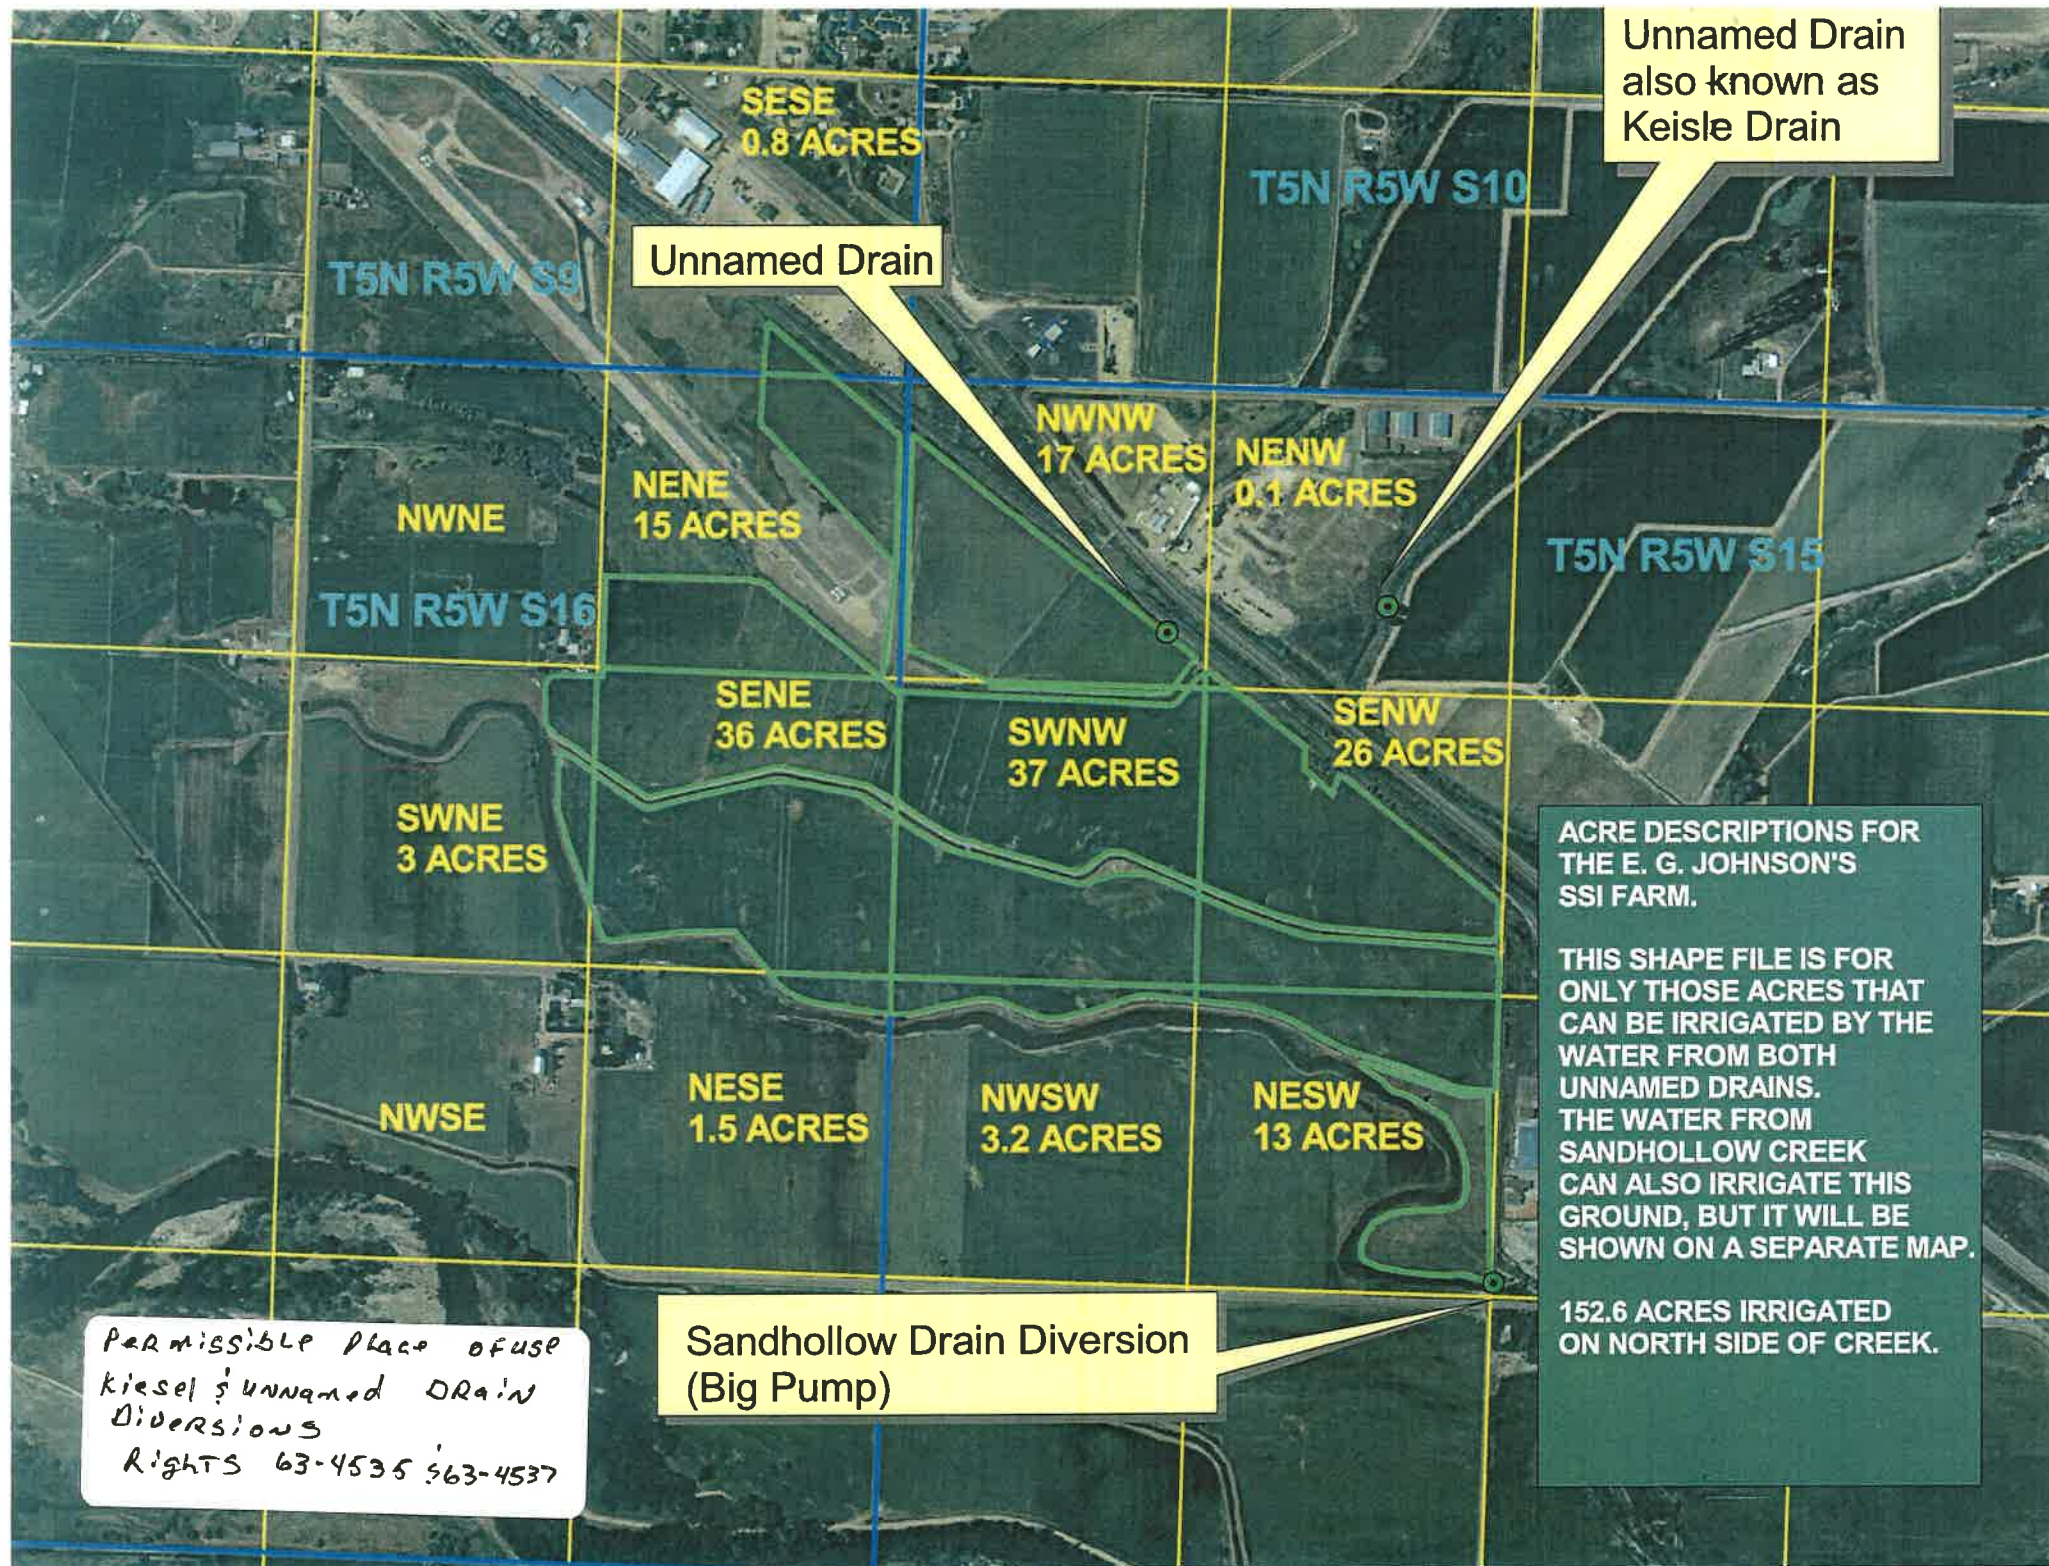

The water from the Unnamed Drain is really not diverted. The drain runs past a log fence facility on the north side of Highway 20/26/95 and is piped under the highway and the railroad tracks. The pipeline for the drain then open discharges directly into the irrigation ditch. So all of the water from this drain is used. The ditches from the point of diversion travel west to allow irrigation of the fields beside the Parma Airport, and west to the distribution pond.

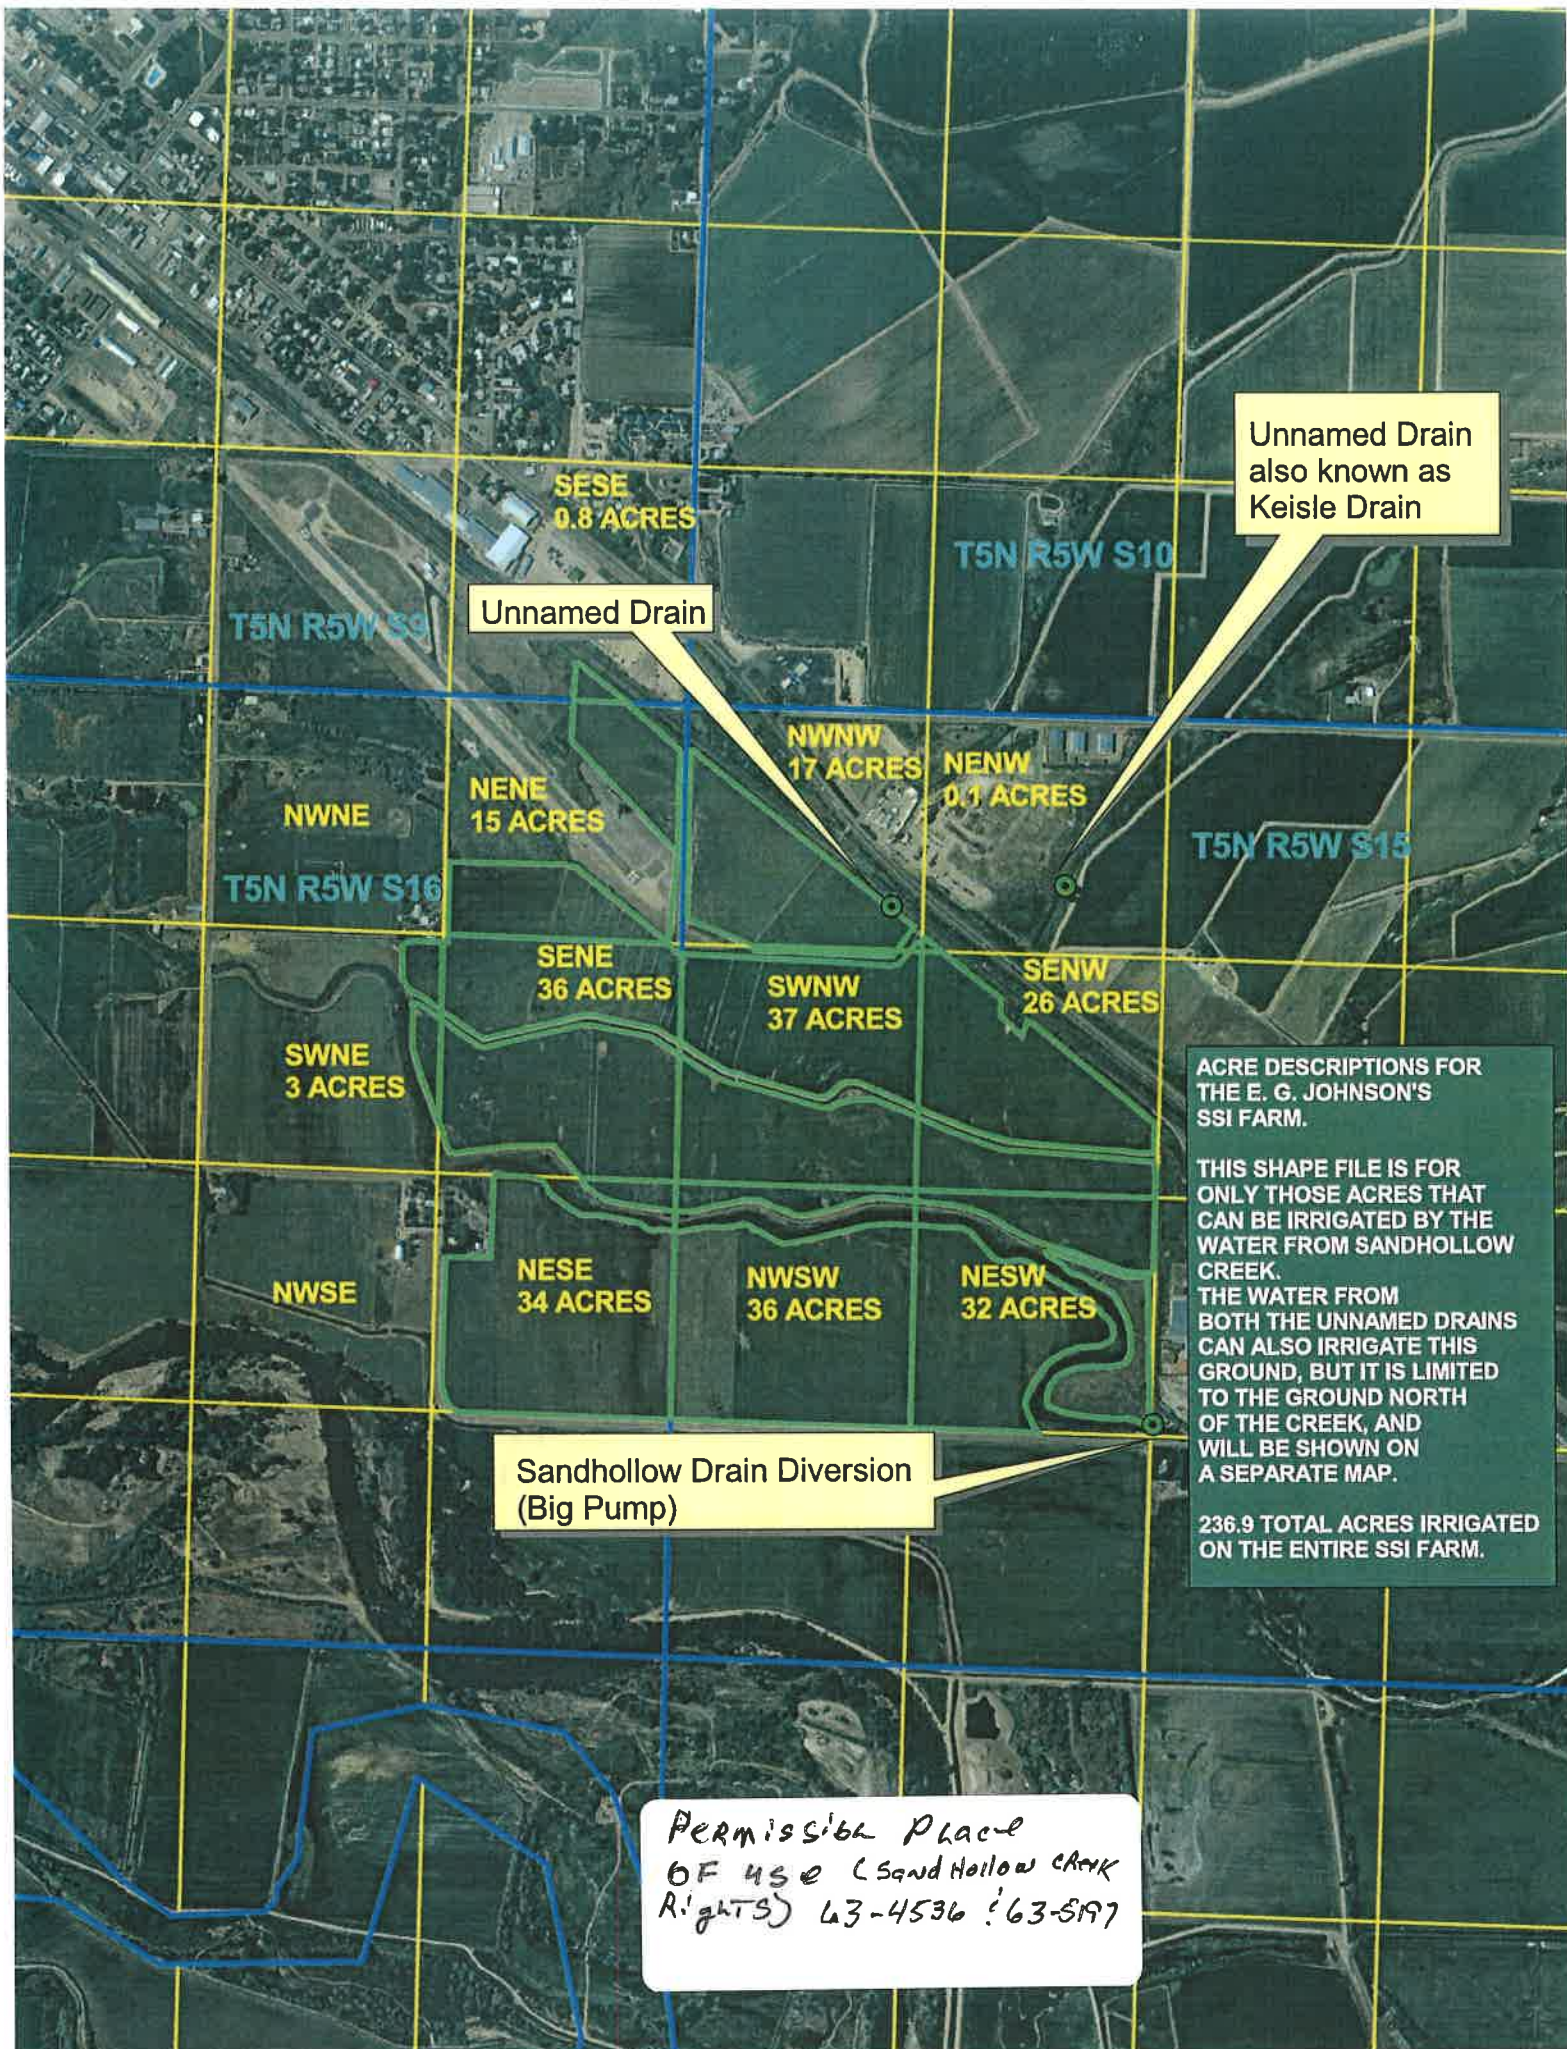

The water from the Kiesel and the Unnamed drains can and are irrigating all of the lands north of the Sandhollow Creek. Therefore, I would recommend that these rights be put into a permissible place of use for all the lands north of the creek. Water right 63-4537 does describe 81.2 acres of the 152.6 acres irrigated under this system. The map for 63-4537 covers all the ground on the north side of the creek except for the 18 acres described in water right 63-4535 from the unnamed drain, and the lands described in the three Sandhollow Creek water rights.

The three diversions were measured, and the Sandhollow Creek diversion provided 3.42 cfs to the system. The two Sandhollow Creek water rights requested 2.00 cfs for 63-4536 and 1.33 cfs for water right 63-5197, which are under the amount measured for this diversion. However, these diversion rates greatly exceed the rate per acre limitations of an inch or 0.02 cfs per acre. Therefore, water right 63-4536 should be limited to 0.97 cfs and 218.7 afa for the 48.6 acres irrigated, and water right 63-5197 should be limited to 0.89 cfs and 200.7 afa for the 44.6 acre irrigated. The volume allowed is based on the standard 4.5 afa per acre. Both water rights 63-4536 and 63-5197 should be recommended for the number of acres requested within a 236.9-acre permissible place of use shown on the maps. This permissible place of use would include lands on both sides of Sandhollow creek, since the water can be delivered over the entire farm from this point of diversion, so it only makes sense to have these rights described in the permissible place of use.

The water right on the Kiesel Drain, 63-4537, requested a diversion rate of 3.00 cfs for 81.2 acres. The Kiesel drain diversion was measured at 4.99 cfs, which is more than requested. However, once again, this diversion rate exceeds the rate per acre limitation. Therefore, water right 63-4537 should be recommended for 1.62 cfs and 365.4 afa for the 81.2 acres requested. The volume allowed was the full 4.5 afa per acre standard. I would also incorporate the acres under this right into a permissible place of use. However, the permissible place of use for this right should only include the 152.6 acres on the north side of Sandhollow creek. A permissible place of use makes sense on this water right also, since it can and is irrigating all of the ground on the north side of Sandhollow Creek.

The water right on the Unnamed Drain, 63-4535, requested a diversion rate of 0.60 cfs for 18 acres. The Unnamed drain diversion was measured at 3.33 cfs, which is more than requested. However, once again, this diversion rate exceeds the rate per acre limitation. Therefore, water right 63-4535 should be recommended for 0.36 cfs and 81 afa for the 18 acres requested. The volume allowed was the full 4.5 afa per acre standard. I would also incorporate the acres under this right into a permissible place of use. However, the permissible place of use for this right should only include the 152.6 acres on the north side of Sandhollow creek. A permissible place of use makes sense on this water right also, since it can and is irrigating all of the ground on the north side of Sandhollow Creek.

ACRE DESCRIPTIONS FOR
THE E. G. JOHNSON'S
SSI FARM.

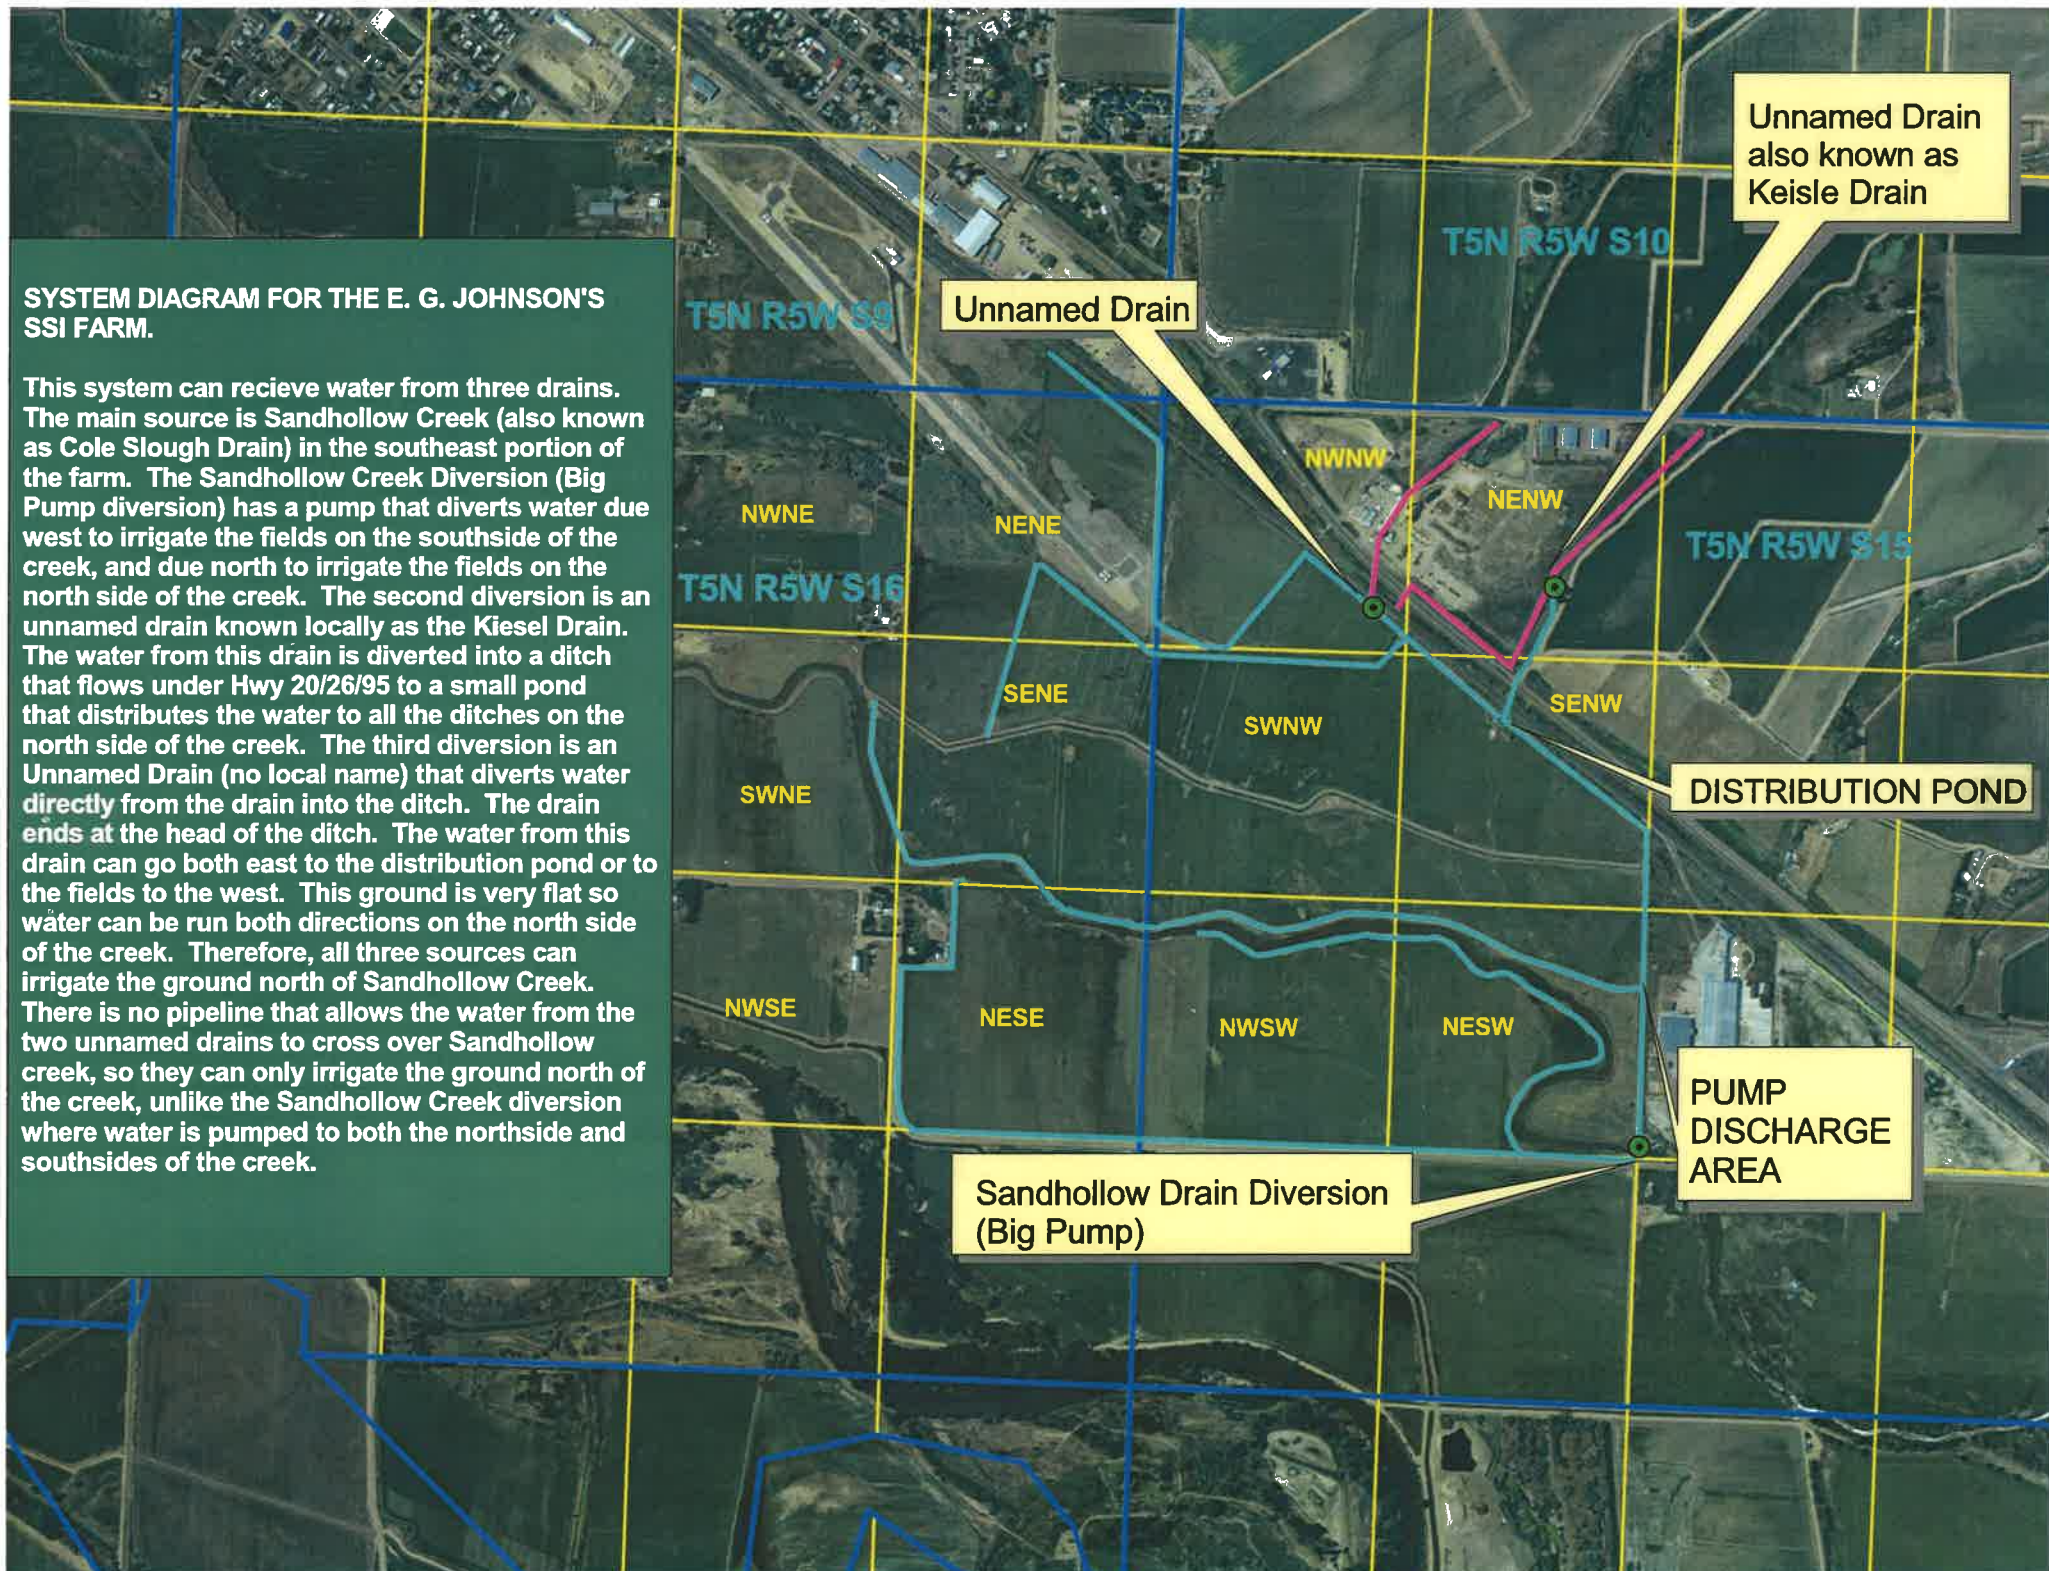

THIS SHAPE FILE IS FOR
ONLY THOSE ACRES THAT
CAN BE IRRIGATED BY THE
WATER FROM SANDHOLLOW
CREEK.
THE WATER FROM
BOTH THE UNNAMED DRAINS
CAN ALSO IRRIGATE THIS
GROUND, BUT IT IS LIMITED
TO THE GROUND NORTH
OF THE CREEK, AND
WILL BE SHOWN ON
A SEPARATE MAP.

236.9 TOTAL ACRES IRRIGATED
ON THE ENTIRE SSI FARM.

PERMISSIBLE PLACE
OF USE (Sandhollow Creek
Rights) 63-4536 & 63-5197

SYSTEM DIAGRAM FOR THE E. G. JOHNSON'S SSI FARM.

This system can receive water from three drains. The main source is Sandhollow Creek (also known as Cole Slough Drain) in the southeast portion of the farm. The Sandhollow Creek Diversion (Big Pump diversion) has a pump that diverts water due west to irrigate the fields on the southside of the creek, and due north to irrigate the fields on the north side of the creek. The second diversion is an unnamed drain known locally as the Kiesel Drain. The water from this drain is diverted into a ditch that flows under Hwy 20/26/95 to a small pond that distributes the water to all the ditches on the north side of the creek. The third diversion is an Unnamed Drain (no local name) that diverts water directly from the drain into the ditch. The drain ends at the head of the ditch. The water from this drain can go both east to the distribution pond or to the fields to the west. This ground is very flat so water can be run both directions on the north side of the creek. Therefore, all three sources can irrigate the ground north of Sandhollow Creek. There is no pipeline that allows the water from the two unnamed drains to cross over Sandhollow Creek, so they can only irrigate the ground north of the creek, unlike the Sandhollow Creek diversion where water is pumped to both the northside and southside of the creek.

PHOTOGRAPHER AND DATE OF PHOTOS DANIEL A NELSON 7/19/2006

FILE NUMBER 63-4535, 63-4536, 63-4537, & 63-5197

These are photos of the points of diversion. The top photo is the Big Pump diversion from Sandhollow Creek. The you can see that the pipeline goes both directions from the pump.

The second photo is of the unnamed drain diversion. The unnamed drain as you can see diverts directly into the cement irrigation ditch.

The third photos are of the main distribution pond for the irrigation of the lands north of Sandhollow Creek. The water comes into the pond through a pipe that goes under Highway 20/26/95 and the railroad tracks, and discharges in the middle of the pond. The water in the pond go leave the pond through headgates on the east and west side of the pond. Water from the Big Pump diversion and the Unnamed drain can also be sent to this pond through the same ditches (see page 2 of pictures)..

PHOTOGRAPHER AND DATE OF PHOTOS DANIEL A NELSON 7/19/2006

FILE NUMBER 63-4535, 63-4536, 63-4537, & 63-5197

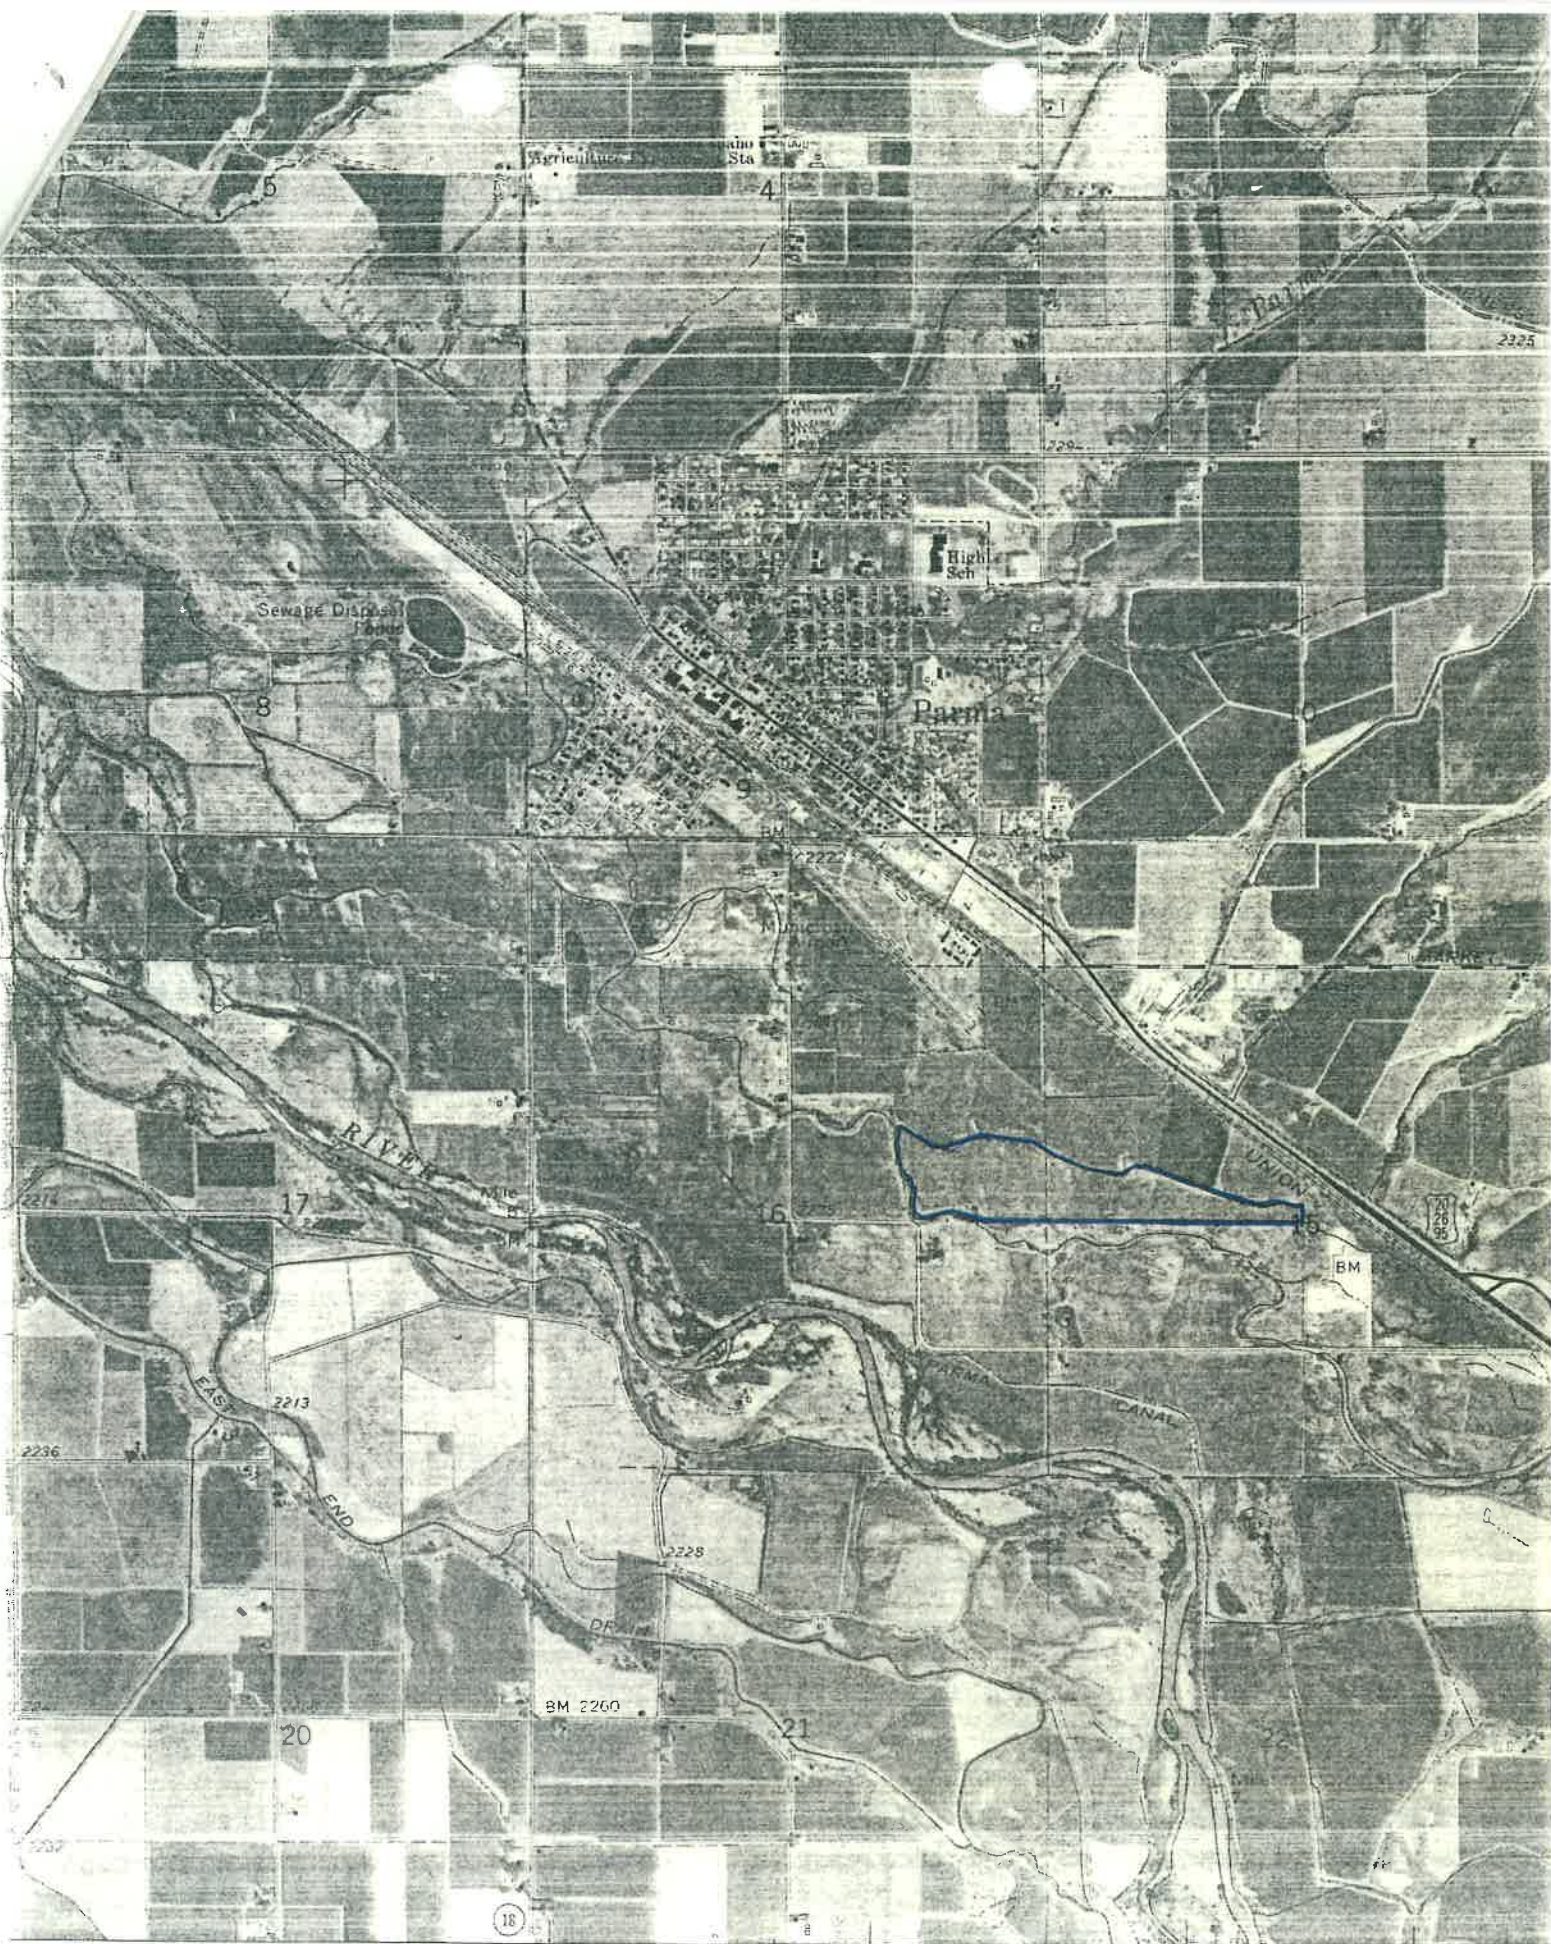

The picture above shows the place of use for the SSI farm from the bank of the distribution pond.

The picture below shows the ditch heading west from the unnamed drain diversion .

The picture to the right shows the water coming from the unnamed drain diversion. As you can see from this picture and the picture above, the ditches are built wide and deep, so they can move water in any direction by simply putting in a canvas dam. The water in both pictures is actually moving up gradient. All the drains flow toward the fences.

FIELD EXAM MEMO

DATE: 6/16/2006

TO: Dan Nelson

FR: Lori Graves

RE: A63-4534A, A63-4535, A63-4536, A63-4537, A63-5129F, A63-5130F, *A63-5197*

Dan, the above claims are currently in the name of SSI and Simplot, but the current owner is Johnson Research LLC (Ed Johnson). A change of ownership notice has been received by the department but has yet to be processed.

Items needed for each claim include:

1. Flow measurements
2. Acres irrigated
3. System diagram
4. Are there surface water shares used anywhere?

Notes

Claims A63-5129F & A63-5130F are not diverted per Ed's review and investigation. Please have Ed sign the attached Withdrawal Notice.

Claim A63-4534A is a split of the original statutory claim. The other portion is owned by Tree Top Ranch and filed as A63-4534, which you also have to examine. Tree Top's portion should not be represented by the whole original number and will probably be renumbered in the recommendation process. The original statutory claim listed two p/ds. Tree Top uses the NWNW S23 p/d and Johnson uses the SWNE S16 p/d.

Claim A63-5197 overlaps license 63-11390 (same source, same acres). The license lists Sand Run Gulch Creek as the source, with a condition stating that it is locally known as Sand Hollow Creek. Please have Ed confirm if he wants to pursue the claim, which will result in a licensed acre reduction or withdraw the claim and leave the license in tact. Note: the claim lists a different p/d than the license. Does Ed use both for the acres or has the claimed p/d been abandoned? I've included a withdrawal notice in the claim file and a copy of license 63-11390 with an associated photo.

Ed Johnson is the contact person for the above claims. His cell number is 250-1526.

Thanks Dan

RE: Water Right No's. 63-4535, 63-4536, 63-4537 63-5197 63-4534A

Dear Ms. Graves:

Thank you for your letter dated June 14, 2006 regarding the above listed water rights. We appreciate the opportunity to utilize existing affidavits on file in your office as evidence of priority supporting a 1931 date on portions of the property located in section 15. Please note that this is basically one continuous field that encompasses property in sections 9, 15 and 16 and it appears quite evident that the fields in question were managed in this manner. As support of the water usage on this property, please find enclosed an affidavit from Mrs. Nola Yeakle that supports a claim as far back as 1941 on all of our property. We also offer as evidence the 1939 map that your office has on file.

In addition, you currently have in your files a statement written by Dencil Rippey supporting evidence of priority dating back to 1931. We have obtained an additional statement from Mr. Rippey in which he remembers how water was delivered to the remaining portion of the property from the south. Also that cattle ran on the property and that sod was grown on the property. This should add further evidence to the 1931 priority date for the remainder of the property.

Regarding claim 63-5197, in addition to Mrs. Yeakle's affidavit, my father Dr. E.G. Johnson has submitted a letter describing his knowledge of a changed point of diversion concerning this right that dates prior to 1987. As such, we are requesting that we retain the water rights on this right with a priority date as far back as the evidence that we have submitted will support (1931 via Mr. Rippey's statement). This will require an amendment to license number 63-11390 to 60 acres.

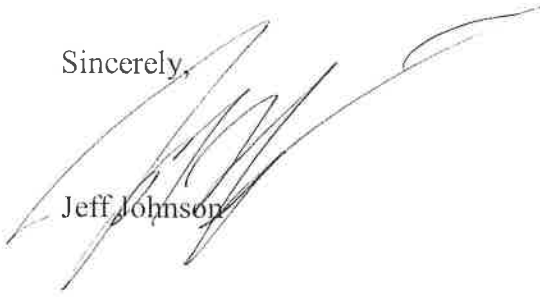

Upon a field exam conducted by Dan Nelson from your office it became apparent that the drains in this area are all somewhat interconnected and appear to be part of the Sand Hollow system. For example the Cole Slough.

We also appreciate the fact that you will process our change in ownership notice on claims 63-4535,36,37 and 97 in addition to license 63-7576 and 9432 and rights 63-20548 and 20549 as well.

Finally, regarding claims 63-5129F and 63-5130F, we do believe that there is some photographic evidence that the Parma Canal system did exist prior to 1939. However, it appears that we have adequate water supplied via other water rights that are also filed on this ground. As such, we will be willing to withdraw our claim to 63-5129F and 63-5130F pursuant to the successful decree of these other claims.

Should you need anything further, please don't hesitate to call.

Sincerely,

Jeff Johnson

My Husband, Lester Yeakel and I, ^{and his family} were
owners of the property located in sections
15, 16 + ~~18~~ 9 in Township 5N Range 5W.
I first became acquainted with the property
in 1941 when I helped Lester irrigate.
I am familiar with the sources of water
and that the fields in question were irrigated.

6-30-06

Water Right: 63-4534A, 63-5197, 63-4535, 63-4536, 63-4537

Priority Date:

My name is Dencil Rippey and I was raised in Parma Idaho and graduated from Parma High School in 1947. My father worked for Lester Yeakel who owned the property pertaining to Water Right Numbers listed above. We lived in a house owned by Lester when I was a small child (mid 1930's) that was located on the west end of the property. Lester ran cattle on the property at the time we lived there and they worked them in the corrals located near the home we lived in. I remember my dad building a sod shed at the time we lived there. They went out and plowed some of the ground to get the sod. I was too young at the time for me to remember the irrigation practices but it seems logical that feed was grown on the property through irrigation to support the cattle. When I was a teenager in the mid 40's I worked for Lester on the same place when they leveled it. As a teenager I remember the water that came to the north side came down a drain north of the rail road tracks. They used water to irrigate the south side that came through the old Hamilton Place.

Sincerely,

Dencil Rippey
2720 Sunflower Dr.
Nampa, ID. 83686-7118

July 18-06

This memo was prepared by E.G. Johnson following a conversation with Mr. Rippey and accurately reflects our conversation and his recollection. I personally remember, as a teenager, the Hamilton Place that lay south of the railroad tracks and east of the subject property. I believe Sand Hollow Creek either ran through it or just south of it.

E.G. Johnson

Ms. Lori Graves
Sr. Water Resource Agent
Department of Water Resources
2735 Airport Way
Boise, ID. 83705-5082

Dr. Ms Graves:

This letter is in response to your letter dated June 16, 2006 concerning Claim Number A63-5197 for 44.6 acres and License 63-11390 for 100 acres of coverage on property previously owned by SSI Land & Cattle. Both claim and license are from waters supplied via Sand Hollow Creek and are for the same 100 acres. The point of diversion has changed as described on the claim, however, I am familiar with the irrigation that took place on the property from about 1970 until present. At least a portion of the property was owned by Lester and Nola Yekeal who sold to SSI. Lester was in the cow-calf business and I was his veterinarian from about 1970 thru 1980. I was on the property numerous times during those years and observed the irrigation practices and water sources. We would like to retain the 44.6 acre Right A63-5197 and amend the license, Number 63-11390, to 60 acres. Point of diversion for both claim and license is now as described on the license, SE1/4NE1/4SW1/4 Sec. 15, Twp 05N, Rge 05W, B.M. CANYON. County.

Sincerely,

E.G. Johnson D.V.M.

I, Willard A. Bishop, was in the employ of the Fred J. Kiesel Estate and the Tri State Investment Corporation from the years 1931 through 1937.

My duties included taking care of the financial business of the Corporation.

This affidavit is to certify that I was, and am, familiar with the following described parcels of land and their water rights. The parcels were owned by the Fred J. Kiesel Estate and the Tri State Investment Corporation.

The descriptions are as follows:

The South West Quarter (SW $\frac{1}{4}$) of the North West Quarter (NW $\frac{1}{4}$) and all that of the East Half (E $\frac{1}{2}$) of the North West Quarter (NW $\frac{1}{4}$) laying and being South of the Oregon Short Line right of way, all in Section Fifteen (15) Township Five (5) North Range Five (5) West of Boise Meridian. Containing 69.37 acres, more or less, together with any water rights or ditch rights which now or may hereafter become incident or appertenant to said land. Also:

That part of the North West $\frac{1}{4}$ (NW $\frac{1}{4}$) of the North West $\frac{1}{4}$ (NW $\frac{1}{4}$) of Sec. 15. Township Five (5) North Range Five (5) West of the Boise Meridian, Canyon county, Idaho, lying South West of the right-of-way of the Oregon Short Line Railroad Company.

The water rights before and during my management of the described property was water that was developed by the Fred J. Kiesel Estate by means of drains, called Kiesel Drains, which were diverted to the above described property.

W. A. Bishop

On this--24th-- day of Oct, 1977, before me a notary public in and for said State of Idaho, personally appeared Willard A. Bishop, known to be the person who name appears on this instrument.

Louis J. Sney
Notary Public for the State
of Idaho

This affidavit is to certify that I have known Lester Yeakel for many years.

My Parents and I having lived on the Kiesel Estate property owned by Mr. Yeakel. This was in the early 1930's. Later our Family moved to the Village of Parma. We had contact during the years then in 1948 and 1949 I worked for Mr. Yeakel. Part of my duties was irrigating. I am familiar with his water system for the Kiesel Property which he owns. This was water which was diverted to his property by means of a check which was placed in the drain which was known at the time as the Kiesel Drain. The water was diverted at the check into an open ditch which ran north to south under the Highway and Railroad track and to his property. At this time there were no other party or parties using water from this Drain.

The descriptions for the property are as follows:

The South West Quarter (SW $\frac{1}{4}$) of the North West Quarter (NW $\frac{1}{4}$) and all that of the East Half (E $\frac{1}{2}$) of the North West Quarter (NW $\frac{1}{4}$) lying and being South of the Oregon Short Line right of way, all in Section Fifteen (15) Township Five (5) North Range Five (5) West of Boise Meridian. Containing 69.37 acres, more or less, together with any water rights or ditch rights which now or may hereafter become incident or appertenant to said land. Also

That part of the North West $\frac{1}{4}$ (NW $\frac{1}{4}$) of the North West $\frac{1}{4}$ (NW $\frac{1}{4}$) of Sec. 15 Township Five (5) North Range Five (5) West of the Boise Meridian, Canyon County, Idaho lying South West of the right-of-way of the Oregon Short Line Railroad Company.

Daniel Ruppig

Earl J. Smith
Oct 8 1979

This affidavit is to certify that I was in the employ of Lester Yeakel for the years 1935 through 1937. At that time He and I replaced the old original diversion check, which was installed by the Kiesel Estate to divert water to the following property.

The descriptions are as follows:

The South West Quarter (SW $\frac{1}{4}$) of the North West Quarter (NW $\frac{1}{4}$) and all that of the East Half (E $\frac{1}{2}$) of the North West Quarter (NW $\frac{1}{4}$) laying and being South of the Oregon Short Line right of way, all in Section Fifteen (15) Township Five (5) North Range Five (5) West of Boise Meridian. Containing 69.37 acres, more or less, together with any water rights or ditch rights which now or may hereafter become incident or appertenant to said land. Also

That part of the North West $\frac{1}{4}$ (NW $\frac{1}{4}$) of the North West $\frac{1}{4}$ (NW $\frac{1}{4}$) of Sec. 15. Township Five (5) North Range Five (5) West of the Boise Meridian, Canyon County, Idaho lying South West of the right-of-way of the Oregon Short Line Railroad Company.

I was well acquainted with the water system. At that time Mr. Yeakel was the only one using the water as it was developed for that purpose. This was the only available water for the property.

RE: EVIDENCE OF PRIORITY

Snake River Basin Claim Nos: A63-4036A, A63-4534A, A63-4535, A63-4536, A63-4537

Dear Mr. Johnson,

In the past, the above referenced claims were submitted during the Snake River Basin Adjudication (SRBA) claims taking. Enclosed are computer generated print-outs and maps of the claims for your reference only, it is not necessary to return this print-out. These claims are based on either a "Statutory Claim" or "Beneficial Use" of the water. Water rights of this type are established by historical use of the water for a beneficial use purpose, dating back to the time the water was first used; this date being the "Priority Date" as shown on the enclosed print-outs. Your claims have not been confirmed by a previous filing with the Department of Water Resources since there is no decree, license, or permit on file to verify the use of this water. For this reason, the Department is required to gather evidence from claimants supporting the date of priority for claims based on historical beneficial use of water.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes why evidence of the priority date is necessary, along with examples of types of evidence that can be submitted to fulfill this requirement. While I encourage you to read the entire pamphlet, I direct your attention to the two sections entitled **"What Kind of Evidence is Required"** and **"Some Examples of Documents Which May Be Evidence of the Priority Date."**

It is important that each element of the Notice of Claims be substantiated. For instance, regarding claims for irrigation, the evidence should tend to show that diversion works were in place, that they were capable of diverting the claimed diversion rate, and that the diverted water was beneficially used on the entire claimed place of use on or before the claimed priority date.

If no evidence is submitted, or we do not hear from you within the time limit below, your priority dates, as claimed, may not be recommended to the SRBA court for decree. This could jeopardize your water use under these rights if water availability problems arise in the future.

Please note that I did find an affidavit in the file for claim A63-4537 (Kiesel Drain) supporting a 1931 priority date. The claim lists a 1928 priority date. Let me know if 1931 is satisfactory or submit supporting documentation for 1928.

Claims A63-4534A, A63-4535, A63-4536 and A63-4537 are listed in the name of SSI Land & Cattle Co. The department has yet to process your change in ownership notice, but will do so in the near future to allow the claims to be recommended in your name.

Page 2

Claim A63-4036A is the right we discussed on the telephone that lists 100 acres irrigated from Sand Hollow Creek and a 1930 priority date. I have previously sent you information regarding this right and still need supporting documentation for the priority date.

You will be receiving a call from Dan Nelson to set-up an appointment for a field exam regarding verification of your water rights in the near future.

The above requested information needs to be submitted by July 5, 2006. Please let me know if you may not be able to submit the information or have any questions not covered by this letter and the enclosed pamphlet, by the date indicated above.

Respectfully,

A handwritten signature in cursive script, appearing to read "Lori Graves".

DEPARTMENT OF WATER RESOURCES

CLAIM TO A WATER RIGHT

Under the provisions of Section 42-225a, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. **The filing of this claim does not confirm the water right but will serve for information purposes only.** It may, however, become the basis for future adjudication of the water right by the Court.

Notice is hereby given that LESTER S. &/or NOLA YEAKEL
(name of claimant)
of Route 2, Parma, Idaho 83660, claims a right to the diversion and beneficial use of
(mailing address)
the public water of the State of Idaho

The extent and nature of said claim is as follows:

- (1) Describe source of water: (name of stream, lake, spring, etc., or ground water) Unnamed Drain
_____, tributary to, Kiesel Drain
- (2) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:
- | | | | |
|----------------------|-------------------------------|----------------------------------|------------------|
| Amount <u>0.60</u> | Use <u>Irrigation</u> | Period of Use: From <u>Apr 1</u> | To <u>Oct 31</u> |
| Amount _____ | Use _____ | Period of Use: From _____ | To _____ |
| Amount _____ | Use _____ | Period of Use: From _____ | To _____ |
| (cfs, gpm
or a/f) | (dom., irri.,
stock, etc.) | (both dates inclusive) | |

- (3) Total quantity of water claimed: 0.60 cubic feet per second, or _____ acre feet per annum, and/or _____ gallons per minute.
- (4) Priority claimed: (the date water was first applied to beneficial use) 1928

A claim is not acceptable on a ground-water source with a priority later than March 25, 1963 or on a surface-water source with a priority later than May 20, 1971. An exception to this rule is that a claim may be filed on domestic use from a ground-water source.

- (5) A) Point of diversion: (give location of point where water is diverted from its source)
NW ¼ NW ¼, Sec. 15 Twp. 5N Rge. 5W B. M. County of Canyon
 Additional points of diversion: _____

B) Describe means of diversion of water: (pump and pipeline, well, diversion dam, reservoir, length of ditch and field, etc.) Give sizes and capacities; be as specific as possible. Diverted by steel pipe in drain

- (6) A) Describe location of use by listing number of irrigated acres within each 40-acre tract in appropriate box. If use is not for irrigation, place an "X" in appropriate box to show location.

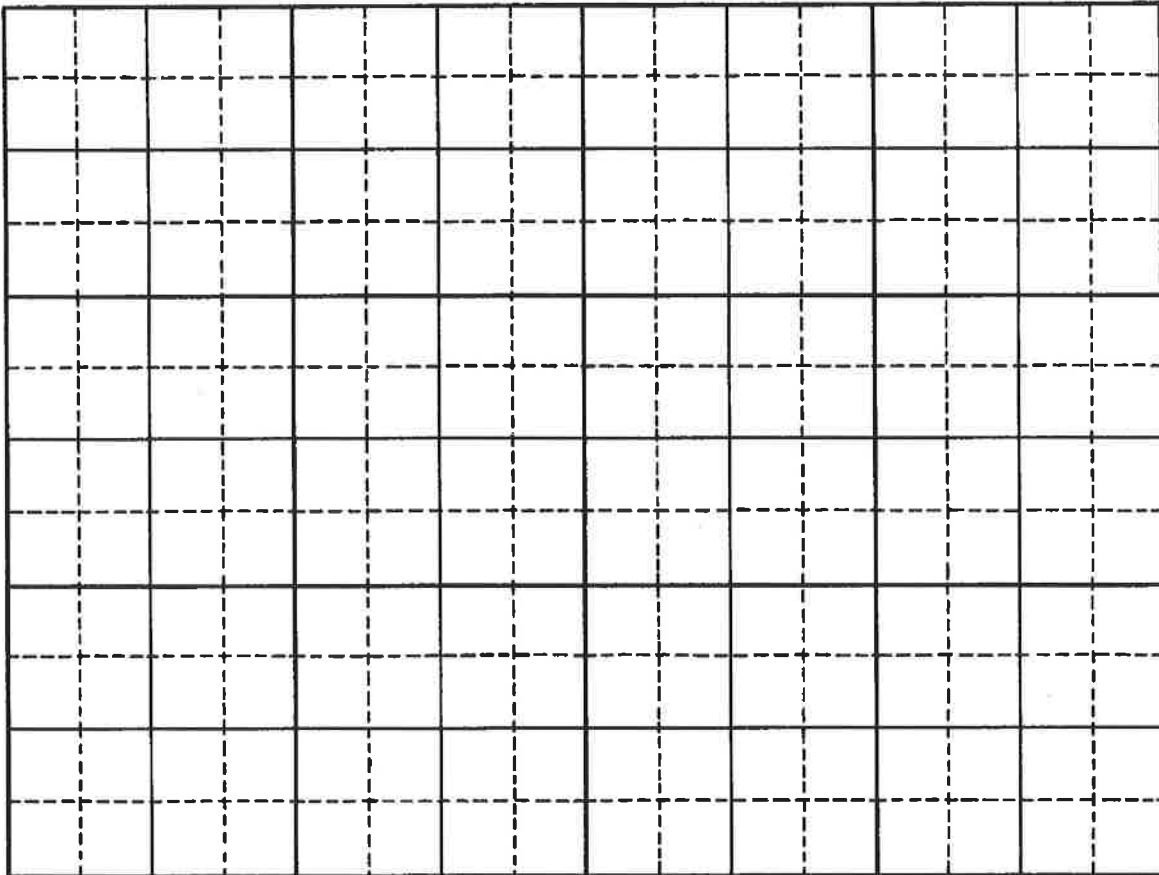

[illegible]

Total No. of acres 18

- B) If the water is used for other than irrigation, fully describe that use, being as specific as possible: _____

- (7) If you are claiming water as a member of an organization, list name of organization: _____

(8) Remarks _____

Scale: 2 inches equal 1 mile.

Map should show the location of the point of diversion and the place of use of the water by 40-acre subdivisions, section, township and range of the public land survey system.

State of Idaho)
County of Ada) ss.

Be it known that the undersigned, being duly sworn, deposes and says that he, she, they subscribed the foregoing claim to a water right, together with all attached information, and that the matters and facts therein are true to the best of the affiants knowledge.

Sworn to before me this 19th day of July, 19 77.
