6. If the change in ownership affects the entire water right for each water right or adjudication claim number listed in item 1, THEN SKIP THIS ITEM AND GO TO ITEM 7. If the change in ownership divides the water right(s) among multiple owners, you must describe, in detail, your portion of each water right after the change. Fill in the appropriate spaces in the box(es) below to describe your water right(s) after the change (one water right per box, you may copy this page as necessary). If your quantity of water is greater than a proportionate split, you must attach documentation to show justification for a larger amount. If you are not sure how to identify your portion of the original water right or adjudication claim records, please contact the nearest IDWR office for assistance.

Dear Mr. Shaw;

Per your request, the following information is submitted on Pioneer Reservoir (in no particular order). Our records show that this reservoir will hold 844 acre feet of water. Based on the existing decreed water rights, it appears that Pioneer was built in 1910; water rights with earlier priorities do not mention storage. All three of the storage rights in the reservoir have the same priority date, 3-2-1910.

I don't have a complete land list for Mr. Webb's farm. However, he claimed a portion of Right 37-00822 on the SE 1/4 of Sec. 5. Our records show Rights 37-00819 thru 00822 appurtenant to this land. Right 37-00821 is from Dry Creek, whereas the other rights are from Clover Creek. Right 37-00822 is for 2/9 of the reservoir (187.6 AFA). Mr. Webb has claimed 211 AFA of this right. The Kast CK Cattle Co. has claimed 264 AFA of this right. Therefore, both parties have over-claimed their portion of this right. Kast also claimed half of 37-00819 and all of 37-00820.

Kast has also claimed additional storage rights that apparently do not involve the old Sanders place. Right 37-00825 is also for 2/9 of the reservoir (187.6 AFA). Kast has claimed 264 AFA of this right. Right 37-00828 is for 1/3 of the reservoir (281.1 AFA). Kast has claimed 400 AFA of this right. Again, both rights have been overclaimed.

While 7/9 of Pioneer Reservoir (656.4 AFA) were decreed, 1139 AFA (12/9) of the reservoir have been claimed in the SRBA. Since some of the original reservoir was not decreed, I would assume that there was some dead storage that could not be taken out for irrigation. These numbers are based on the most-recently-recorded capacity of the reservoir, of course, as I do not know what the reservoir could hold before the original dam was rebuilt.

Although there are several direct-flow rights decreed and claimed below the reservoir, you stated that all the water used below the reservoir comes only from storage. In this case, these rights may

have been forfeited for five consecutive years on non-use. The SRBA will rule on the validity of all claims at a later date. Since there is no watermaster on Clover Creek, each water user is responsible for maintaining his own water rights. If you feel that a watermaster is needed, you can petition IDWR to establish a water district. Sec. 42-600 thru 900 of the Idaho Code deal with this issue.

Archie Walker has recently filed an application for a water permit to appropriate wastewater tributary to Pioneer Reservoir. You had asked to be informed of this. Due to the Snake River Basin Moratorium, no action will be taken on his application until the beginning of 1998 or later.

Sincerely,

James E. Stanton
