397 ACRES TOTAL

The rights listed below are limited to the irrigation of a combined total of 397 acres in a single irrigation season. Combined Right Nos.: 27-12028 and 27-7088.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

~~This right is subject to regulation by the watermaster of Water District 27.~~

IDAHO DEPARTMENT OF WATER RESOURCES RECOMMENDED

EXPLANATORY MATERIAL: BASIS OF CLAIM - License

Totalizing measuring devices shall be maintained at the well and at the rediversion pump from the Blackfoot River.

Right 27-12028 is also diverted through the ~~point(s) of diversion~~ point of rediversion described above.

Diversion and use of water under this right shall be reduced or curtailed when necessary to prevent injury to holders of prior rights diverted ~~from~~ from the Blackfoot River downstream from the point of rediversion.

If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.

The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.

Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 27.

RE:

Request for Preparations of SF5s for Water Right 27-12028

NOTES/COMMENTS:

The Shoshone-Bannock Tribes and Bryce Fielding have reached agreement in Basin 27 subcase 27-12028. It appears that Water Rights 27-07088 and 27-12028 are related and already designate a volume limitation for both water rights. This limitation as listed on the Groundwater right to be 1,590 AFY should also be added to the Surface water right 27-12028. We request an SF5 for 27-12028 to identify this volume as well.

Should you have any questions give Elese Teton a call at the number listed above.

E. NARRATIVE/REMARKS/COMMENTS

Water Meter

on 8-6-98 called John Davidson (521-1060, 521,0443) and discussed situation with him. I explained that Permit #27-07088 requires that any pumping rate at greater than 2441 (2500) gpm (5.44 cfs) requires permit holder to start the replacement pump on Rich lane (T2S, R 38E, Sec 7, SWNE (Lot 3)). This well (Rich lane) does not have a drive motor on it.

The current owner of the property on which the water is being pumped is Bryce Fielding.

GPS data was collected insure Fielding was not farming BLM lands

Was unable to review mainline placement, place of use, or measure the maximum flow at the replacement site, due to harvesting requirements.

RE: Water Right License 27-7088

Dear Bryce,

Recently, a water right license was issued for the water right 27-7088. In response to this administrative action, we have modified the Preliminary Director's Report for this right to reflect the license. Enclosed is a copy of the new Preliminary Director's Report (PDR) for this right and also for right 27-12028 along with the associate layout. In the new PDR, you will notice the points of diversion now include three: a point of diversion where the well is located, injection where ground water is discharged into the Blackfoot River, and redirection where water is diverted from the Blackfoot River. The place of use has been decreased to 397 acres to correspond with the license and the recommendation for right 27-12028. The location of the points of diversion and place of use are illustrated on the layout. You will also notice that several remarks have been added to the PDR, which are comparable to the remarks listed on the license.

In regards to right 27-12028, only remarks were added which correspond with some remarks listed on the PDR for 27-7088.

Please take the time to review the PDRs and return the Notices of Error with any comments or concerns you may have. If you agree with the reports, please note that as well. If you have any questions, please call our office at (208) 525-7161.

Respectfully yours,

Ernest Carlsen

CONDITIONS OF APPROVAL

- 61
- ① Ground water diverted under this right is injected into the Blackfoot River in exchange for diverting water from the Blackfoot River at the point of rediversion to irrigate the place of use. Water shall not be diverted from the Blackfoot River unless ground water is simultaneously being injected into the Blackfoot River at an equal rate.
 - ② Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 27.
 - ③ Totalizing measuring devices shall be maintained at the well and at the rediversion pump from the Blackfoot River.
 4. Diversion and use of water under this right shall be reduced or curtailed when necessary to prevent injury to holders of prior rights diverted from the Blackfoot River downstream from the point of rediversion.

WATER RIGHT NO. 27-07088

- ~~5.~~ This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor exceed a combined annual maximum diversion volume of 1590.0 af at the field headgate for the lands above.
- ~~6.~~ This right when combined with all other rights shall provide no more than 4.0 afa per acre at the field headgate for irrigation of the lands above.
- EL61 & 7. Rights 27-0004N (Snake River Basin Adjudication Claim No. 27-12028) and 27-7088 when
ES6 pou combined shall not exceed a total diversion rate of 6.05 cfs, a total annual maximum diversion volume of 1590.0 af at the field headgate, and the irrigation of 397 acres.
- EXP. 8. The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.
- EXP. 9. If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 27-7088, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before July 1, 19 82.

c. Other: For licensing purposes a scientific measurement of the diversion rate of the system as it is normally operated shall be provided by either properly installing an approved type of measuring device or by having a professional engineer certify the rate of diversion to the Department prior to submitting proof of beneficial use of water.

The rate of diversion of water for irrigation under this permit and all other water rights on the same land shall not exceed 0.02 cubic feet per second for each acre of land.

Witness my hand this 29th day of July, 19 77.
