CONDITIONS OF APPROVAL AND REMARKS

1. Use of water under this water right will be regulated by the watermaster of State Water District No. 63.
2. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
3. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
4. Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by these rights from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and groundwater recharge purposes at the Surprise Valley diversion. Use of water under these rights each year shall not exceed the reported amounts.
5. The amount of water diverted from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights these rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
6. The number of acres available for irrigation under these rights from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and groundwater recharge purposes divided by 0.0156 cfs per acre.
7. Each year the amount of water available for irrigation at the Surprise Valley diversion shall be reduced by the amount of water to be diverted for industrial and groundwater recharge purposes under these rights.
8. Diversion and use of water for industrial purposes under these rights shall not be more consumptive nor more depletive of water flowing in the Boise River than an equivalent diversion and use of water for irrigation purposes under these rights.

TRANSFER NO. 5273
WATER RIGHT NO(S) . 63-00120F/63-00198Q/63-00199B/63-00200B

CONDITIONS OF APPROVAL AND REMARKS

9. The rate of flow diverted under these rights at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.
10. When the authorized diversion of water under these rights is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under these rights at the Surprise Valley diversion must also be reduced by an equivalent proportion.
11. Prior to diversion of water under this approval, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.
12. The annual volume of water used for industrial and groundwater recharge purposes shall be measured using separate totalizing measuring devices and the right holder shall report the totals to the department by Dec. 31 of each year.
13. Place of use is within the Nampa and Meridian Irrigation District boundaries.
14. Right 63-00198Q is limited to the irrigation of 40 acres within the authorized place of use.
15. The place of use for industrial and groundwater recharge purposes under these rights is limited to the lands served by the Surprise Valley diversion.

Dated this 27TH day of JANUARY, 2000.

13. Other Water Rights Used:

14. Remarks:

Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.

Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.

Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and groundwater recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.

The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and groundwater recharge purposes divided by 0.0156 cfs/acre.

Each year the amount of water available for irrigation at the Surprise Valley diversion shall be reduced by the amount of water to be diverted for industrial and groundwater recharge purposes under right nos. 63-199B and 63-200B.

Diversion and use of water for industrial purposes under right nos. 63-199B and 63-200B shall not be more consumptive nor more depletive of water flowing in the Boise River than an equivalent diversion and use of water for irrigation purposes under those rights.

The place of use for industrial and groundwater recharge purposes under right nos. 63-199B and 63-200B is limited to the lands served by the Surprise Valley diversion.

The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.

The annual volume of water used for industrial and groundwater recharge purposes under right nos. 63-199B and 63-200B shall be measured using separate totalizing measuring devices and the right holder shall report the totals to the department by Dec. 31 of each year.

When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.

Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.

The right holder shall accomplish the change authorized by transfer 69594 within one (1) year of the date of approval.

The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of 0.72 cfs.

The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.

In administering water rights from Mores Creek and its tributaries, the diversion and use of water under this right from the Green Ranch diversion shall be

subordinate to other rights from Mores Creek and its tributaries, existing prior to November 20, 2001, with the following exception: this right, when diverted at the Green Ranch diversion, shall not be administered as subordinate to other rights from Mores Creek and its tributaries to the extent of a recognized delivery call from any Boise River water right holder against Mores Creek that is necessary to serve the water requirements of the senior right holder while making reasonable use of existing natural flow and storage water rights available to the right holder.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

15. Basis of Claim: Decreed

CONDITIONS OF APPROVAL AND REMARKS

1. Use of water under this water right will be regulated by the watermaster of State Water District No. 63.
2. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
3. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
4. Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by these rights from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and groundwater recharge purposes at the Surprise Valley diversion. Use of water under these rights each year shall not exceed the reported amounts.
5. The amount of water diverted from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights these rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
6. The number of acres available for irrigation under these rights from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and groundwater recharge purposes divided by 0.0156 cfs per acre.
7. Each year the amount of water available for irrigation at the Surprise Valley diversion shall be reduced by the amount of water to be diverted for industrial and groundwater recharge purposes under these rights.
8. Diversion and use of water for industrial purposes under these rights shall not be more consumptive nor more depletive of water flowing in the Boise River than an equivalent diversion and use of water for irrigation purposes under these rights.

CONDITIONS OF APPROVAL AND REMARKS

9. The rate of flow diverted under these rights at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.
10. When the authorized diversion of water under these rights is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under these rights at the Surprise Valley diversion must also be reduced by an equivalent proportion.
11. Prior to diversion of water under this approval, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.
12. The annual volume of water used for industrial and groundwater recharge purposes shall be measured using separate totalizing measuring devices and the right holder shall report the totals to the department by Dec. 31 of each year.
13. Place of use is within the Nampa and Meridian Irrigation District boundaries.
14. Right 63-00198Q is limited to the irrigation of 40 acres within the authorized place of use.
15. The place of use for industrial and groundwater recharge purposes under these rights is limited to the lands served by the Surprise Valley diversion.

WHEREAS, the District published notice of the filing of the petition in the Idaho Press-Tribune and The Idaho Statesman and no objections were made to the petition either prior to or during the annexation hearing.

WHEREAS, the Board of Directors of Nampa & Meridian Irrigation District deem it in the best interest of the District to annex the above-described property to the District.

IT IS HEREBY ORDERED BY THE MEMBERS OF THIS BOARD OF DIRECTORS:

1. That the above-described lands consisting of 50.00 Ridenbaugh Acres be annexed to the Nampa & Meridian Irrigation District.
2. That a period of ninety (90) days from the date of this Order be allowed for presentation to the Board of a petition signed by two percent (2%) of the landowners of the District requesting an election to approve or disapprove said annexation.
3. That this Order shall not become effective until said ninety (90) days have passed without such petition being presented or until approval of the annexation at an election.
4. That this Order shall be recorded at the Ada County Recorder's office and shall be made a Minute entry of the Minutes of the Board.

Weick seconded the motion made by **Aschenbrenner** to adopt the Resolution and Order for Annexation, it passed unanimously, and the Resolution and Order for Annexation was adopted and approved.

Dated 5 June 2001.

STANDARD FORM 5

STIPULATED ELEMENTS OF A
WATER RIGHT

This form is used to report the stipulated elements of one water right acquired under state law and/or one federal reserved water right. Submission of this form will not automatically result in the issuance of a partial decree. The Presiding Judge or Special Master will conduct any hearing necessary to determine whether the facts, data, expert opinions and law support the issuance of a partial decree for the water right.

The parties agree that the Snake River Basin Adjudication Court has jurisdiction of the parties and subject matter to enter a partial decree for this water right; that they have been served with sufficient process, according to the law; and that they have appeared, prosecuted, and defended their positions with regard to this water right dispute.

The parties and IDWR agree and stipulate that the elements of this water right should be described per the attached, *which removes federal public land from the digital boundary*. The parties and IDWR have further indicated their concurrence by initialing each of the attached pages.

RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

RIGHT NUMBER: 63-199B

NAME AND ADDRESS: NAMPA & MERIDIAN IRRIGATION DISTRICT
C/O RINGERT CLARK LAW
ATTN DAN STEENSON
PO BOX 2773
BOISE ID 83701-2773

SOURCE: BOISE RIVER
MORES CREEK

TRIBUTARY: SNAKE RIVER
TRIBUTARY: BOISE RIVER

QUANTITY: 169.600 CFS

When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.

This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and proceeding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and proceeding to the earliest, shall be reduced to 60 percent of their decreed quantities.

Each year the amount of water available for irrigation at the Surprise Valley diversion shall be reduced by the amount of water to be diverted for industrial and ground water recharge purposes under right nos. 63-199B and 63-200B.

The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of .72 cfs.

The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more volume than can be beneficially used for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.

PRIORITY DATE: 05/01/1878

Water shall not be diverted under this right at the Green Ranch diversion if such diversion would cause injury to rights senior in priority to November 20, 2001 that are authorized to divert from Mores Creek and its tributaries.

Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released for flood control by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoirs dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.

Diversion and use of water for industrial purposes under right nos. 63-199B and 63-200B shall not be more consumptive nor more depletive of water flowing in the Boise River than an equivalent diversion and use of water for irrigation purposes under those rights.

PLACE OF USE:

~~69495 ACRES TOTAL~~

The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and ground water recharge purposes divided by 0.0156 cfs/acre.

This right when combined with Right Nos. 63-198AJ, 63-200B, 63-2392B, 63-2968, 63-30181 and ~~63-32695~~ can be used to irrigate up to 69,495 acres within the boundary of the Nampa Meridian Irrigation District.

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

The place of use for industrial and ground water recharge purposes under right nos. 63-199B and 63-200B is limited to the lands served by the Surprise Valley diversion.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

The annual volume of water used for industrial and ground water recharge purposes under right nos. 63-199B and 63-200B shall be measured using separate totalizing measuring devices and the right holder shall report the totals to the department by Dec. 31 of each year.

SF5 Right No. 63-199B

The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.

Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and ground water recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.

Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.

Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.

~~The right holder shall accomplish the change authorized by transfer 69594 within one (1) year of the date of approval.~~

This right is also designated as Right No. 67 in the Boise River Stewart Decree and Boise River Water Distribution Report.

_____ **COMES NOW** Nampa & Meridian Irrigation District ("NMID"), by and through its counsel of record, Ringert Law Chartered, and Doug Bullock and Heather A. Cunningham ("Claimants") hereby enter into the following Stipulation.

WHEREAS, Claimants have filed a late claim for water right # 63-33117 and at the time of this Stipulation the Idaho Department of Water Resources has not issued a recommendation for said late claim. Since the recommendation has not been issued, neither Claimant or NMID have filed an objection and/or response relating to the late claim.

WHEREAS, NMID has claimed certain water rights which are currently pending the SRBA. Claimants have not filed an objection and/or response to NMID's claimed water rights but Claimants' late claim, water right #63-33117, is a competing claim to a portion of the water rights

claimed by NMID.

WHEREAS, even though the parties have not filed objections and/or responses to the claims of the other party, NMID and Claimants have reached an understanding to resolve their competing claims in the SRBA and NMID and Claimants stipulate and agree to the following:

1. NMID will adopt the Resolution attached hereto as Exhibit A, and incorporated herein by this reference, for the purpose of confirming Claimants' continued right to the delivery of water to Claimants' lands pursuant to contracts entered into between NMID and Claimants' predecessors in interest.
2. This Stipulation, including the attached Resolution, will be placed by the Idaho Department of Water Resources in the water right record and file for the following water rights which have been claimed by NMID: water right nos. 63-198AJ, 63-199B, 63-200B, 63-2392B, 63-2968 and 63-30181.
3. By means of this Stipulation, Claimants hereby agree to the withdrawal of Claimants' late claim for water right no. 63-33117. If necessary, Claimants will take any further action required by the Court or IDWR to ensure that Claimants' late claim for water right no. 63-33117 is withdrawn.
4. Each party agrees to bear its own attorney fees and costs.

EXHIBIT A

RESOLUTION OF THE NAMPA & MERIDIAN IRRIGATION DISTRICT

WHEREAS, the Nampa & Meridian Irrigation District ("NMID") has certain water right claims which are currently pending in the Snake River Basin Adjudication; and

WHEREAS, Doug Bullock and Heather Cunningham ("Claimants") have filed a competing claim (63-33117) for the portion of the water right delivered by NMID to Claimants' lands, and which is also pending in the Snake River Basin Adjudication; and

WHEREAS, NMID and Claimants desire to settle the issues involving NMID and Claimants' competing claims to a water right; and

WHEREAS, as part of said settlement of the issues with Claimants, NMID recognizes and agrees that Claimants receive water from the water rights of NMID pursuant to contractual rights and are not landowners of the District. More specifically:

(1) Claimants are successors in interest to a portion of the property previously owned by R.S. Rule and Eliza Rule, who contracted with NMID for the delivery of water to their land in 1922 and a true and correct copy of said contract attached hereto as Exhibit A and incorporated herein by this reference. Further, the legal description of Claimants property to which Exhibit A is applicable is attached hereto as Exhibit A-1 and incorporated herein by this reference;

(2) Claimants are successors in interest to a portion of the property previously owned by J.R. Fruit and Eva M. Fruit, who contracted with NMID for the delivery of water to their land in 1922 and a true and correct copy of said contract attached hereto as Exhibit B and incorporated herein by this reference. Further, the legal description of Claimants property to which Exhibit B is applicable is attached hereto as Exhibit B-1 and incorporated herein by this reference; and

(3) Claimants are successors in interest to a portion of the property previously owned by Lorin P. Houmann and Franciska Houmann, who contracted with NMID for the delivery of water to their land in 1922 and a true and correct copy of said contract attached hereto as Exhibit C and incorporated herein by this reference. Further, the legal description of Claimants property to which Exhibit C is applicable is attached hereto as Exhibit C-1 and incorporated herein by this reference

WHEREAS, as part of the said settlement of the issues with Claimants, NMID further recognizes and agrees to continue to deliver water to Claimants, depending on availability, from the water rights of NMID, pursuant to the above referenced contracts so long as those contracts are in full force and effect.

NOW, THEREFORE, upon motion made by Mr. Sisco and seconded by Mr. Pline, the Board of Directors of Nampa & Meridian Irrigation District adopts and approves this Resolution confirming the rights of the Claimants to continue to be delivered water, depending on availability, from the water rights of NMID, pursuant to contracts so long as those contracts remain in full force and effect.

Dated the 17 day of October, 2009.

THIS AGREEMENT, Made this 27th day of March, 1922,
between Nampa & Meridian Irrigation District, first party, and R. S. Rule and his wife,
Eliza Rule,

second parties,

WITNESSETH:

WHEREAS, second parties are the owners of the following land, to-wit: Lot one (1) in block eight (8)
and lot four (4) in block nine (9) Scott's Subdivision,

in Ada County, Idaho, with a water right appurtenant thereto from Boise River through the Ridenbaugh Canal, and first party,
as the owner of said canal, has heretofore maintained and operated the same and delivered the water to which second parties have
a right to them and to their predecessors for an annual maintenance charge paid in advance of the irrigation season; and

WHEREAS, The parties hereto desire to reach an agreement as to the proper method of determining said annual charge to be
paid in future:

NOW, THEREFORE, As a complete settlement of all differences between said parties relating to said charge in the past and
to establish a permanent method for fixing the amount and time of payment in the future, the parties agree as follows:

First party agrees to perform the annual maintenance work on account of said water right of second parties and to deliver the
water perpetually hereafter to which second parties have a right during the irrigation season of each year into the lateral at the
point where second parties and their predecessors have been accustomed to receive the same, and second parties and their successors
in title to said water right agree to pay first party annually for said service a maintenance charge equal to one-half of the general
maintenance rate on Ridenbaugh water rights lawfully levied by first party against lands within the District for the previous year,
under Section 4384, Compiled Statutes of Idaho. Provided, that in no event shall second parties ever be required to pay or to contribute
to the payment of the principal or interest of any bonded indebtedness of the first party; nor to contribute in any manner to
its sinking fund or reserve fund; nor to the payment of the construction cost of its irrigation works; nor the construction, or maintenance
cost of its drainage works, under or pursuant to this contract. The charges for maintenance are to be paid in advance on
or before the first day of April of each year and first party will be under no obligation to make delivery of water until payment has
been made. Provided, That second parties shall be entitled to a copy of the annual statement of the classified expenses of the district
issued in the month of January each year to its land owners and first party will place second parties on its mailing list for
said statements, and if for any reason they do not receive the same, they shall be furnished a copy on application.

It is further agreed that said water right of second parties is from the appropriation diverted from Boise River by the Morris
Canal in the year 1878, the same being the first appropriation of the Ridenbaugh Canal system of first party, and first parties agree
to adopt a resolution classifying said land and water right in said appropriation and in the first class of water rights appropriated by
said canal from Boise River.

It is further agreed that the maintenance charges for said land for 1921 shall be governed by this contract, and in case payment
has been made thereof at a higher rate than herein provided, the excess shall be credited upon the maintenance charge for 1922.

This agreement shall perpetually bind the parties, their heirs, successors and assigns.

IN WITNESS WHEREOF, The President of first party has hereunto affixed the name of said District and his signature in
execution of this agreement, pursuant to a resolution of its board of directors, heretofore duly and regularly adopted, authorizing
and directing him so to do, and the Secretary of first party, in like manner authorized and directed, has attested the execution hereof,
and in witness whereof, the second parties have hereunto affixed their signatures the day and year first above written.

Bryce,

Attached are Draft SF5s for the above sub cases. Please review these to insure that the items we agreed upon are included.

You had also requested that I look at the points of diversion listed on 63-31937 to be sure all the ditch companies were covered. This right lists 7 points of diversion for 9 canal companies. The reason for this is that the point of diversion in the SENE, S5, T3N, R2E is the main diversion for the Farmers Union Canal Co. which also carries water for the Boise Valley Irrigation Ditch Co., using the same diversion point. Also, the point of diversion listed in the NESE, Lot 1, S.23, T4N, R1E is the main diversion for the New Dry Creek Ditch Co. which also carries water for the New Union Ditch Co. using the same diversion point. All other points of diversion are single points for the remaining ditch companies. In checking the current decreed acres for each ditch company involved in this right, the total acres had changed from that previously recommended. This was due to objections, etc., on these rights and the decreed total for all companies is 31,536.3 acres rather than the previously recommended 29,309.15 acres. This change has been reflected on the attached draft SF5 for 63-31937. Once the SF5 for 63-31937 is signed by all, I will add the explanatory remark concerning the uncuttable delivery of these credited rights to Drainage District No. 4's Right No. 63-31936 as agreed upon.

Concerning the SF5 for DD#2's Right No. 63-32480, you indicated that you wanted me to look at the conditions on 63-31937 and see if any applied to 63-32480. The only changes I made to 63-32480 were to the name in order to make it the same as 63-31937 for future research of these rights. I also crossed out the total acres per new Department preference and because it is redundant with the other acreage conditions on this right. In the end I did not add any conditions from 63-31937. This 50 cfs right is not listed in the Boise River Water Distribution Report for Water District 63 as having ever been credited back to the point of diversion for these ditch companies. We could only find the 100 cfs under 63-31937 as having been credited. So, I treated this right as a regular waste water beneficial use recommendation.

Also attached is a digital boundary map for the Nampa Meridian Irrigation District. This map reflects the addition of the Creason Lateral irrigated lands and the removal of the BLM lands. Since the addition of the Creason land and the removal of the BLM lands were between 3 and 4 acres each, I decided not to change the total number of acres that can be irrigated within NMID's digital boundary.

There will be no changes to the written recommendations for Nampa Meridian Irrigation District's Right Nos. 63-198AJ, 63-199B, 63-200B, 63-2968 and 63-30181. The objections in those sub cases were the addition of the Creason Lateral lands and removal of BLM lands. This has been corrected as shown on the digital boundary map. This map will be submitted with the SF5s for these rights and a special cover page for the signatures bringing attention to the boundary changes.

Please let me know if these are ready to go or if you need to discuss these rights. I have a conflict for the June 2nd meeting and would like to get these on their way asap which I know you definitely want to also.

Sincerely,

Shurte, Jan

Hi Lori,

Attached are the changes Bryce and I came up with on Right Nos. 63-2392B, 63-31937 & 63-32480. He wanted the season of use remark off of there because the source is not the Boise River. I said ok and then thought – these are credited back up and diverted out of the Boise River questioning whether to leave it or take it off. Then I looked on all the other rights for these credits back up and none of them have the season of use remark. So, please omit it on all of these rights. (I am writing this so I can put it in the file as to why I removed the remarks). Another change is omission of the digital boundary pou language and putting in the other remark as indicated on 63-32480. I did put in digital right before boundary for each ditch company on the remark to be moved. One last change also on 63-31937 is the addition of the name Little Pioneer Canal. Bryce was worried we would mix it up with the Pioneer Irrigation District. I can see his point there.

The name of their firm is Ringert Law. So, on all the rights we need to take out Clark. That will include 63-198AJ, 63-199B, 63-200B, 63-2968 and 63-30181 for NMID also. For NMID's SF5s I have attached an example of the changes on 63-198AJ that will apply to all of them. Omit Clark in the name and cross out the total acres. It is redundant to the condition below it. These rights are boundary changes only, but we still need to print each one out in SF5 form and send with the special boundary change SF5 cover sheet and a copy of the map. Ray has copies of the maps already and will just need to know about the above cover sheet.

Call if you have any questions. Would you please send me a copy of the SF5s so I can review one last time before we send them to Ray.

Thanks,
Jan

Notices of claim were filed for the above-captioned water rights pursuant to I.C. § 42-1409. The Director of the State of Idaho Department of Water Resources (IDWR) examined the water system for this reporting area. The *Director's Report* recommended that these water right claims be disallowed.

On June 18, 2007, the claimant of water right 63-32000, the Lindsey Lateral Association, filed an objection to the *Director's Report*, asserting that the water right should not be disallowed. On June 30, 2009, IDWR filed an *Amended Director's Report* for water right claim 63-32000, again recommending that the claim be disallowed. On July 27, 2009, the Lindsey Lateral Association, through its attorney Candice M. McHugh, filed a *Notice of Acceptance of Amended Director's Report for Disallowed Water Right Recommendation*, in which the claimant agreed to the disallowance of the claim. No objections were filed to water right claims 63-00199C and 63-00200C, but those claims were identified as uncontested claims that may be affected by the outcome of contested claim 63-32000.

Therefore based on the file and record herein, IT IS RECOMMENDED that the SRBA District Court enter a final order **disallowing** water right claims 63-00199C, 63-00200C, and 63-32000 with prejudice.

WATER DELIVERY AGREEMENT

THIS AGREEMENT, Made and entered into this 5th day of ^{May} ~~March~~, 1975, by and between CECIL A. THOMAS and MARGIE L. THOMAS, husband and wife, parties of the first part, hereinafter referred to as "Thomas", Nampa & Meridian Irrigation District, an irrigation district organized and existing under, and by virtue of, the laws of the State of Idaho, party of the second part, hereinafter referred to as "Nampa & Meridian", and Settler's Irrigation District, an irrigation district organized and existing under, and by virtue of, the laws of the State of Idaho, party of the third part, hereinafter referred to as "Settler's",

W I T N E S S E T H:

WHEREAS, Thomas owns the NW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 31, Township 3 North, Range 1 East, B.M., in Ada County, Idaho, to which there is appurtenant a water right for 20 miners inches of the waters of Boise River; and,

WHEREAS, for many years water has been delivered to Thomas and his predecessors in interest through the irrigation system of Nampa & Meridian, under said water right of Thomas, for the irrigation of the lands hereinbefore described, such deliveries having

been made on the basis of what is commonly referred to by Nampa & Meridian as a "rental right"; and,

WHEREAS, irrigation of said lands can be accomplished more effectively by delivery of water through the irrigation system of Settler's instead of through the irrigation system of Nampa & Meridian,

NOW, THEREFORE, in consideration of the premises and of the mutual covenants hereinafter set forth, the parties agree as follows:

Settler's agrees that, beginning with the 1975 irrigation season and in each irrigation season thereafter, it shall deliver to Thomas through its irrigation system ^{the} 20 miners inches of the ^(change - about 20") waters of Boise River, ~~under the same water right under which~~ Thomas now receives ~~water~~ through the Nampa & Meridian irrigation system. Delivery of such water shall be made to Thomas at the head gate of PAULIN'S ACQUAKE Lateral.

Nampa & Meridian and Settler's hereby consent to a change in the point of diversion for said water right of Thomas such change to be accomplished by adding the main diversion works of the Settler's Canal as a supplemental point of diversion under the water right of Thomas.

Thomas hereby releases Nampa & Meridian from all obligation to deliver water to Thomas under his said water right and Nampa & Meridian hereby releases Thomas from all obligation to pay tolls, charges and assessments of Nampa & Meridian for the year 1975 and all subsequent years with respect to the lands hereinbefore described.

Thomas agrees to pay Settler's, for the year 1975 and for all subsequent years, his proportionate share of the cost and expense of operating, maintaining and repairing the irrigation system of Settler's, the same as if said described lands of Thomas were within Settler's irrigation district. Any toll, charge or assessment levied against said lands of Thomas by Settler's shall be due upon receipt of a statement from Settler's and shall be paid within thirty (30) days after receipt of the applicable statement. Thomas acknowledges and agrees that Settler's shall have such lien rights as are provided by the laws of the State of Idaho to secure payment of any such toll, charge or assessment.

The covenants, conditions and agreements herein contained shall constitute covenants to run with, and running with, the lands of Thomas hereinbefore described and with the irrigation system of Settler's, and shall be binding on each of the parties hereto and

on all parties and all persons claiming under them or any of them,
and the benefits hereof shall inure to each of the parties hereto
and their respective successors, assigns, heirs or personal repre-
sentatives.

IN WITNESS WHEREOF, Thomas has hereunto subscribed his name
and each Settler's and Nampa & Meridian has hereunto caused its
corporate name to be subscribed by its officers first thereunto
duly authorized by resolution of its respective board of directors,
all as of the day and year herein first above written.

RECORDED

22 May 1975

Cecil A Thomas
Route #1
North Locust Grove
Meridian, Idaho 83642

Dear Mr Thomas:

I enclose two copies of the completed contract transferring water rights from the rental rolls of this District to Settlers Irrigation District.

The Board of Directors has ordered cancellation of the 1975 levy. The account, by method of the contract, will be removed from our record.

I am mailing the application form by which you earlier attempted to transfer the water right and your personal check, made at date of 19 June 1974, payable to the Department of Water Administration for a fee of \$30.00, to the Department of Water Resources.

To facilitate the transfer, the Idaho Department of Water Resources and the Watermaster for Idaho Water District #63 are being furnished a copy of the Water Delivery Agreement and Settlers' copy is being forwarded to that office. The original copy remains here and will be placed of record.

It is very pleasant to have this transfer finally cleared through this office.

Yours truly,

Joseph C Voight
Secretary of the District

When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.

This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and proceeding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and proceeding to the earliest, shall be reduced to 60 percent of their decreed quantities.

Each year the amount of water available for irrigation at the Surprise Valley diversion shall be reduced by the amount of water to be diverted for industrial and ground water recharge purposes under right nos. 63-199B and 63-200B.

The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of .72 cfs.

The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more volume than can be beneficially used for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.

PRIORITY DATE: 05/01/1978

Water shall not be diverted under this right at the Green Ranch diversion if such diversion would cause injury to rights senior in priority to November 20, 2001 that are authorized to divert from Mores Creek and its tributaries.

Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released for flood control by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoirs dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.

Diversion and use of water for industrial purposes under right nos. 63-199B and 63-200B shall not be more consumptive nor more depletive of water flowing in the Boise River than an equivalent diversion and use of water for irrigation purposes under those rights.

PLACE OF USE:

69495 ACRES TOTAL

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and ground water recharge purposes divided by 0.0156 cfs/acre.

This right when combined with Right Nos. 63-198AJ, 63-200B, 63-2392B, 63-2968 and 63-30181 can be used to irrigate up to 69,495 acres within the boundary of the Nampa Meridian Irrigation District.

The place of use for industrial and ground water recharge purposes under right nos. 63-199B and 63-200B is limited to the lands served by the Surprise Valley diversion.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

The annual volume of water used for industrial and ground water recharge purposes under right nos. 63-199B and 63-200B shall be measured using separate totalizing measuring devices and the right holder shall report the totals to the department by Dec. 31 of each year.

The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.

Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and ground water recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.

Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.

Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.

The right holder shall accomplish the change authorized by transfer 69594 within one (1) year of the date of approval.

This right is also designated as Right No. 67 in the Boise River Stewart Decree and Boise River Water Distribution Report.

Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released for flood control by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoirs dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.

PLACE OF USE:

69467 ACRES TOTAL

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

This right when combined with Right Nos. 63-198AJ, 63-200B, 63-2392B, 63-2968 and 63-30181 can be used to irrigate up to 69,467 acres within the boundary of the Nampa Meridian Irrigation District.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

Water shall not be diverted under this right at the Green Ranch diversion if such diversion would cause injury to rights senior in priority to November 20, 2001 that are authorized to divert from Mores Creek and its tributaries.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.

Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.

When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.

Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.

The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and groundwater recharge purposes divided by 0.0156 cfs/acre.

The annual volume of water used for industrial and groundwater recharge purposes under right nos. 63-199B and 63-200B shall be measured using separate totalizing measuring devices and the right holder shall report the totals to the department by Dec. 31 of each year.

Each year the amount of water available for irrigation at the Surprise Valley diversion shall be reduced by the amount of water to be diverted for industrial and groundwater recharge purposes under right nos. 63-199B and 63-200B.

The place of use for industrial and groundwater recharge purposes under right nos. 63-199B and 63-200B is limited to the lands served by the Surprise Valley diversion.

The right holder shall accomplish the change authorized by transfer 69594 within one (1) year of the date of approval.

The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.

This right is also designated as Right No. 67 in the Boise River Stewart Decree and Boise River Water Distribution Report.

Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and groundwater recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.

Diversion and use of water for industrial purposes under right nos. 63-199B and 63-200B shall not be more consumptive nor more depletive of water flowing in the Boise River than an equivalent diversion and use of water for irrigation purposes under those rights.

Re: Preliminary Recommendations for Nampa & Meridian Irrigation District's
(NMID) Water Rights

Dear Don:

As we discussed by phone today, enclosed is a letter from Daren Coon, NMID's Secretary/Treasurer, identifying a parcel of land that should be included in the place of use for NMID's water rights.

As we also discussed today, the statement under the quantity element of NMID's water rights related to the Green Ranch diversion should state the amount of water to be used from that diversion as 4.5 afa per acre, rather than 3.5 afa per acre.

Water right 63-30181 has the shorter statement regarding the authorized rate of flow for the Surprise Valley diversion, but does not have the language relating to the amount of water to be used from the Surprise Valley diversion that is in 63-198AJ, 63-199B and 63-200B.

If possible, it would be helpful for future reference if the remarks could be in the same order in each of the water rights.

Today you confirmed that the explanatory material is included in the recommendations for internal IDWR record-keeping purposes only, so that, for ease of reference in IDWR's files, transfer conditions are associated with SRBA decrees. The court will not consider the explanatory material, and it will not be included in NMID's decrees. There is, therefore, no opportunity or need for NMID to object to any of the statements in the explanatory material. Any inaccuracies in those statements can be corrected later at an appropriate time.

I have, nonetheless, reviewed the statements in the explanatory material sections of each of the recommendations for NMID's water rights. The following statement in the recommendations for water rights 63-199B and 63-200B concerns me: "The place of use for industrial and groundwater recharge purposes under right nos. 63-199B and 63-200B is limited to the lands served by the Surprise Valley diversion." I recognize that the statement is one of the conditions in the water right as a result of the transfer to add the Surprise Valley diversion and lands served by it. I think the statement is correct as to groundwater recharge, but I think it is not entirely accurate with respect to industrial use in light of I.C. § 43-335, which allows an irrigation district to lease water rights for use on industrial lands within its boundaries under certain circumstances:

LEASING OF WATER RIGHTS BY IRRIGATION DISTRICT WITHIN THE DISTRICT BY DISTRICT'S WHERE LANDOWNER CAN RECEIVE WATER THROUGH THE DISTRICT'S IRRIGATION SYSTEM. Any irrigation district which has within its boundaries residential, commercial or industrial lands, or any combination of those lands, and which holds water rights for those lands, shall have the right to lease, to any municipality, municipal provider, public utility, domestic water users organization which furnishes water service to those lands, or to any other entity for the distribution of water to those lands for uses other than culinary purposes, those water rights which are held for any residential, commercial or industrial lands for which the owner has elected not to receive his proportionate share of the irrigation district's water through the irrigation system of the district; provided, however, that no water right under which water is delivered through a community ditch shall be leased without the written consent of the ditch users who do not elect not to receive water from the district. For purposes of this chapter, the terms "municipality" and "municipal provider" shall be defined as provided in section 42-202B, Idaho Code; "culinary purposes" shall mean the use of water for direct human consumption, cooking, sanitary purposes, and other such uses. Nothing in this chapter shall be construed as amending or affecting the laws of Idaho pertaining to the control and regulation of public utilities, municipal providers or water corporations.

Since the statements in the explanatory material are not at issue in the SRBA process, this is really an academic issue at this point. The situation contemplated by the statute is, I believe, the only one in which the referenced statement in the explanatory material and the water right is not entirely accurate.

As we discussed over the phone, we are verifying the 40 acre limitation in water right 63-198AJ. Subject to double-checking, it appears that NMID does not have any other concerns with the preliminary recommendations.

Subject: NMID Irrigated Acres

Dan, John and Daren,

This am we reviewed where we are at in computing NMID acres. Here is an approach that might fit the unique situation for NMID:

1. We are finding that the irrigation delivery organizations in the Treasure Valley have been able to identify sufficient irrigated acres to justify the acres originally assigned water in their plat books. This target of irrigated acres count has widely been achieved.
2. Lands irrigated under the NMID service area have changed greatly over the years due to urbanization. To the extent that land was not removed from the rolls, the irrigation water right remains.
3. NMID place of use includes both the tax roll and rental roll lands.
4. In some cases NMID water is used on land that was originally platted as too high to receive water. In other cases NMID water is not used on land that was platted to be irrigated with NMID water. It is our understanding that originally unplatted land now receiving NMID water has been added to the rolls on an acre-by-acre basis under the supervision of NMID.
5. Darren advised us at the last meeting in our office that he had counted the acreage in the plat books, but we are not aware of a tabulated copy of this information.
6. To justify the acreage in the original plat books we need a tabulated copy of the information.
7. IDWR has assisted different water delivery organizations in different ways via the SRBA process -- this is not a one-size-fits-all process.
8. IDWR recognizes that there is only one copy of the plat book. Accordingly we would be willing to visit your offices during normal business hours, and tabulate the acres to which water was originally provided by keying into a laptop the number of irrigated acres per tract as described in the plat book. We would be willing to share the resulting spreadsheet with you and ask for a double-check. This listing could be used to back up a count of acres irrigated by the project.

How does this approach sound? Please advise if you would suggest improvements to the approach. Our goal is to create a defensible count of acres -- hopefully one that both NMID and IDWR can support as we make our recommendations to the SRBA Court.

Thanks, Dave

P.S. Anita, would you please place a copy of this email in our NMID file?

Re: Amended Notices of Claim to water right numbers 63-00199B and 63-00200B

Dear Jan:

Enclosed please find amended notices of claim to water right numbers 63-00199B and 63-00200B. On behalf of our client Nampa & Meridian Irrigation District, and pursuant to the requirements of SRBA Administrative Order Number 1 § 4.d.(2)(a), I ask that you file these amended claims in place of the original claims to the same water rights. Please notify me by letter once these amended claims have been accepted as filed by your office.

If you should have any questions or concerns regarding these amended claims, please contact me. Thank you for your assistance.

Sincerely,

Charles L. Honsinger
