

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE STATE OF IDAHO,
IN AND FOR THE COUNTY OF TWIN FALLS

IN RE THE GENERAL ADJUDICATION
OF RIGHTS TO THE USE OF WATER FROM
THE SNAKE RIVER BASIN WATER SYSTEM.

CIVIL CASE NUMBER: 39576

Ident. Number: A63-00222D

Date Received: 3/02/1990

Receipt No: W010350

Received By: Rch

NOTICE OF CLAIM TO A WATER RIGHT
ACQUIRED UNDER STATE LAW

1. Name: EUREKA DITCH CO. NO. 2
Address: C/O ROBERT T. ROBERTSON
23483 CENTER POINT RD.
CALDWELL, ID 83605 208-459-4798

2. Date of Priority: JUN 01, 1883

3. Source: BOISE RIVER Trib. to: SNAKE RIVER

4. Point of Diversion:

Township	Range	Section	1/4 of	1/4 of	1/4	Lot	County
04N	03W	7	SE	SW		R	CANYON
		17	SE	NW			CANYON
	04W	12	NE	SE		R	CANYON

5. Description of diverting works:
WEIR, HEADGATES, DITCHES, GRAVITY FLOWS

6. Water is used for the following purposes:

Purpose	From	To	C.F.S.	(or)	A.F.A.
IRRIGATION	03/15	11/15	1.700		

7. Total Quantity Appropriated is:
1.700 C.F.S. (and/or) A.F.A.

8. Total consumptive use is Acre Feet Per Annum.

9. Non-irrigation uses:
NONE

10. Place of Use:

IDAHO DEPARTMENT OF WATER RESOURCES
PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

RIGHT NUMBER: 63-222D

NAME AND ADDRESS: EUREKA DITCH CO NO 2
C/O BILL DORAMUS
21766 HOWE RD
CALDWELL ID 83607

SOURCE: BOISE RIVER

TRIBUTARY: SNAKE RIVER

QUANTITY: 1.700 CFS

Whenever it becomes necessary for the watermaster to deliver this right the following condition shall apply. This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and proceeding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and proceeding to the earliest, shall be reduced to 60 percent of their decreed quantities.

PRIORITY DATE: 06/01/1883

POINT OF DIVERSION:

T04N R03W S7 SESW Rediversion Within CANYON County
T04N R03W S17 SENW Within CANYON County
T04N R04W S12 NESE Rediversion Within CANYON County

PURPOSE AND
PERIOD OF USE:

<u>PURPOSE OF USE</u>	<u>PERIOD OF USE</u>	<u>QUANTITY</u>
IRRIGATION	03/01 11/15	1.700 CFS

Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only when the natural flow in the Boise River below the Star Bridge in Township 04 North, Range 01 West, Section 18, NE¼ of the SE¼ of the SE¼, Boise Meridian (approximate river mile 33.9) is sufficient for water to be available for diversion at the point of diversion described above, provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.

PLACE OF USE:

2990 ACRES TOTAL

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

This right when combined with Rights No. 63-223K, 63-3572, 63-21361, 621362, 63-21363 and 63-32241 can be used to irrigate up to 2990 acres within the boundary of the Eureka Ditch Company No. 2.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

This right is designated as No. 88 in the Stewart Decree and the Boise Water Distribution Report.

Idaho Department of Water Resources

JUN 21 1996

STATE OF IDAHO
DEPARTMENT OF RECLAMATION

In the Matter of the Application of

WILBUR FRESHWATERS
Caldwell, Idaho

For a Change of Point of Diversion on Boise River,
Water District # 12-A, Canyon County

ORDER GRANTING CHANGE

No. 175

WHEREAS, On the 27th day of March, 1944, at the Department of Reclamation of the State of Idaho, at Boise, Idaho, the application of Wilbur Freshwaters, of Route 2, Caldwell, Idaho, for a Change of Point of Diversion on Boise River came on regularly for hearing, pursuant to published notice, in due and statutory form; and,

WHEREAS, No protest has been filed against the application, and the evidence filed by the applicant with the application shows that it became necessary to change the point of diversion, and that no other decreed water right or water user will be injured thereby;

NOW, THEREFORE, IT IS HEREBY ORDERED that the said application be and the same is hereby granted, and that a Certificate of Change in Point of Diversion be issued to the applicant herein, as provided by the laws of the State of Idaho.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the Department of Reclamation of the State of Idaho to be hereunto affixed, this 11th day of April, A. D. 1944.

MARK R. KULP
State Reclamation Engineer
By

Roy S. Thompson
Supervisor of Water Distribution

RECORDED

STATE OF IDAHO

DEPARTMENT OF RECLAMATION

CERTIFICATE OF CHANGE IN POINT OF DIVERSION OF DECREED WATER RIGHT

No. 175

THIS IS TO CERTIFY THAT WILBUR BRESHEARS, of Caldwell, Idaho, is the owner of and using a certain water right, bearing date of priority of June 1, 1883, for 1.70 cubic feet per second of the waters of Boise River, County of Canyon, State of Idaho, decreed to W. A. Black, by decree of Judge George H. Stewart, of the Seventh Judicial District of the State of Idaho, in and for the County of Canyon, in the case of

FARMERS COOPERATIVE DITCH COMPANY,

Plaintiff,

vs.

RIVERSIDE IRRIGATION DISTRICT,

Defendant,

being appurtenant to the following described land:

NE $\frac{1}{4}$ and N $\frac{1}{2}$ SE $\frac{1}{4}$ Section 8,
Township 4 North, Range 4 West, B. M.

That the said decree bears date of January 18, 1906, and is entered in the records of the Department of Reclamation of the State of Idaho, in Volume 5 of Decrees, at Page 410.

That the said applicant, Wilbur Breshears, has become the owner of said water right by purchase.

That now upon the application of Wilbur Breshears, of Caldwell, Idaho, for Certificate of Change in Point of Diversion, made before the State Reclamation Engineer of the State of Idaho, and the said application having been granted, the right to change such point of diversion is hereby confirmed.

That said change in point of diversion shall not modify in effect said decree, water right or place of use. Said water to be limited at any time to an amount actually needed and beneficially used for such purposes, and shall not exceed the following amount, to-wit:

1.70 cubic feet per second of the waters of
Boise River, with priority date of June 1, 1883.

That said water right is appurtenant to the NE $\frac{1}{4}$ and N $\frac{1}{2}$ SE $\frac{1}{4}$ Section 8, Township 4 North, Range 4 West, B. M., being the place of use.

That the water right above described from the Boise River has been conducted to the place of use through the Riverside Ditch, with point of diversion near the center of Section 20, Township 4 North, Range 3 West, B. M., B. M.

That the water right above described will hereafter be conducted to the place of use through the Aureka Ditch, with point of diversion near the Southeast corner of Section 12, Township 4 North, Range 4 West, B. M.

Riverside Irrigation District Canal to the lands of the Applicant through the Pioneer Dixie Ditch.)

THAT THE RIGHT To the use of the water aforesaid, hereby confirmed, is restricted to the lands or places of use specifically set forth in this transfer, as provided by the laws of the State of Idaho.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the Department of Reclamation of the State of Idaho, to be affixed at Boise, Idaho, this 29th day of April, 1940.

JAMES SPOFFORD,
Commissioner of Reclamation

Mr. George Wright
Route 2 Box 566
Caldwell, ID 83605

Dear Mr. Wright:

Since your visit to the office with Mr. Breshears in December, I have obtained some information regarding the amount of water needed by the Eureka Canal Company.

The information that you provided about the canal company's irrigation system is tabulated as follows:

- Total irrigated acreage: 3300
- Distance from point of diversion to first delivery: 1.3 miles
- Length of main channel of the primary delivery ditch: 6.5 miles
- Type of soil in the delivery ditch: variable, with some gravelly sections

Using this data, we have computed that the maximum rate of flow required at the field headgate, using one miner's inch (.02 cfs) per acre, is 66.0 cfs. If we plug this data into our computer routine using a typical soil constant for the area (2.5 feet per day), we find that the percentage loss is 30.9%, which indicates that the rate of flow diverted must be 86.4 cfs.

I note from the enclosed letter that Mr. Mark Jensen of the Soil Conservation Service has computed the required flows to be 1.42 miner's inches per acre. This is equivalent to 93.72 cfs for a total diverted flow.

The discrepancy between the rate of flow computed by Mr. Jensen and the rate of flow computed by the Department is based on the estimate of irrigation efficiency at the field headgate. Mr. Jensen estimates a 50% efficiency. We use 60%, based on the "Irrigation Guide", a Soil Conservation Service publication. Note from the attached photocopied page that for furrow irrigation with slopes of 2%-3% (a maximum in your area), the efficiency should be 60%. If Mr. Jensen had used a 60% on-farm efficiency, his computations would have revealed that less water would be required, and the required rate of diversion would be very near to the 86.4 cfs that we found to be needed.

At this point I would encourage you to examine these computations, and then visit our regional office to file a claim. The office is located near the

intersection of Franklin and Cole roads, at 92 So. Cole Rd., and it is staffed with people qualified to assist you. The rate of flow that you claim is up to you, and it should be based on not only these computations, but some physical measurements as well.

I hope that this information will be of value to you, Mr. Wright. If you have questions concerning this analysis, feel free to call me at 334-4104.

Sincerely,

A handwritten signature in dark ink, appearing to read "David R. Tuthill". The signature is fluid and cursive, with a large initial "D" and a stylized "T".

Subject: 210 - ENG - Irrigation Water Requirements

Date: March 5, 1981

To: Gerald Gordon
District Conservationist
Caldwell, Idaho

I have analyzed the irrigation water requirements for the Eureka Canal Company. The analysis is based on the Soil Survey of Canyon County; Field Office staff knowledge of the soils, crops, efficiencies, and farm operations and management; and the Idaho Irrigation Guide.

The major soils of the area are:

Letha Fine Sandy Loam
Moulton Fine Sandy Loam
Baldock Loam
Notus Sandy Loam
Falk Fine Sandy Loam

Approximately 90% of the soils are fine sandy loams with 10% ranging from loam to silt loam. The fine sandy loams are underlain with sand and/or gravel at depths generally ranging from 14 to 33 inches. All of the soils have rapid or moderately rapid permeability at depths below 30 to 40 inches. The average water table depth before drainage is about 30 inches. Approximately 85% of the area has been drained. The average water table depth in the area after drainage is 42 inches. This is the depth which was used to determine the total water holding capacity of the soil. It was assumed that crops would be irrigated to a depth of 42 inches except for pasture which has a root zone depth of 36 inches.

The soil survey information showed that the average water holding capacity on 90% of the soils is 4.0 to 4.5 inches. This correlated very closely with the weighted water holding capacity which was computed when completing page 2 of 6 of form ID-ENG-40, the consumptive use data of the sprinkler system design data worksheets. The weighted value was computed to be 4.47 inches.

The consumptive use was computed using the following crops and acreages:

Pasture	1650 acres
Hay - alfalfa	330 acres
Corn - silage, row crops	990 acres
Small grain - oats, barley	330 acres

TOTAL 3300 acres

The consumptive use values were taken from the Idaho Irrigation Guide.

Gerald Gordon
Page Two
March 5, 1981

Water is measured shortly after it is diverted from the Boise River. Because of this, losses in both the canal system and on-farm systems must be taken into account when estimating the efficiency. It was assumed that the canal system has an efficiency of 75% and the on-farm systems have an average efficiency of 50%. This gives an overall efficiency of 37.5%. This was rounded to 40% in the calculations.

The computations on the attached worksheet show that when an eight day irrigation frequency is used, a net application of 2.08 inches is needed during the peak consumptive use period. This is equal to a system capacity of 42,247 gallons per minute or 12.80 gallons per minute per acre. 12.80 gpm per acre is also equal to 1.42 miners inches per acre.

This analysis shows that one inch per acre is not adequate on these types of soils with current cropping patterns and management.

Subject: Eureka Ditch Company NO. 2 Boundary Map

Dear George;

I have enclosed a map that, due to our records, meets the extents of your company's irrigation boundary. If this map is correct, give me a call and let me know. If I need to make changes, indicate them on the map. You can then either mail the map back to me, or I will be happy to meet with you at your convenience. I will make the changes and send you a final copy of the boundary. Thanks again for all your cooperation.

If you have any questions, please don't hesitate to call me at (208) 327-7998.

Sincerely,

Mark Larson
GIS Specialist
Adjudication Technical Section

The image is an aerial photograph of a rural landscape, likely in Idaho, showing a grid of agricultural fields. A yellow line delineates a specific area, possibly a water right boundary. The fields are colored in various shades of red, brown, and grey, indicating different land uses or soil types. A black line, possibly a road or canal, runs diagonally across the lower left portion of the image. The grid is labeled with 'T5N' and 'T4N' on the left side, and 'R5W' and 'R4W' on the bottom side. Various numbers are scattered throughout the grid, likely representing section numbers. A text box in the upper center provides information about the map's origin and preparation.
