FR: RON HOWERTON
DT: June 7, 1995
RE: NUMBER CHANGE A63-00276B to A63-00276A

1. Claim A63-00276B was given a "B" split suffix prior to an ownership change received August 17, 1993 to Crawford.
2. A transfer was filed (# 4215) by Schroder on 63-00276 and approved January 18, 1994, splitting the water right into A, B & C by allocations.
3. The water allocation staff assigned new split suffixes for this right without regard to adjudication's split "B".
4. This number change is to match up the assigned adjudication split suffix "B" to the water allocation assigned suffix "A".
5. The Crawford Claim (now suffix "A") remains unchanged by the transfer because allocations appeared to view this "A" part as getting the remainder not covered by the B & C suffixes.
6. Transfer 4215 amends the ownership change for the "B" & "C" suffixes. But not for Crawford's Claim. *** However, we should note that the field exam that determined the acre totals, showed that Crawford's acres were 4, not the 5 as claimed.
7. Additional review will later be needed by the adjudication staff to determine the recommendation for the "C" claim and double check the "A" & "B" splits.
8. Also, note that the Crawford claim names the source as Kallarney Slough and the allocation transfer field exam clarified that this was a local name and the correct source is Boise River tributary to the Snake River.***

*** See the copy of the field exam information included in the Crawford's file.

Re: Notice of Claim to a Water Right No. 63-276A

Dear Claimant(s):

Enclosed is a copy of the above referenced claim(s), which reflect the change in ownership of the land and appurtenant water rights, covered under the original filing.

Please note that the enclosed Notice of Claim to a Water Right is not a final determination of your water right. This claim was filed during claims taking in the Snake River Basin Adjudication (SRBA) and has not yet been verified by this Department. Water rights are established and maintained by beneficial use of water for the uses designated on this claim form dating back to the priority date listed. This claim will be investigated, verified and recommended to the SRBA Court for court decree sometime in the near future. You will be notified prior to the beginning of any verification of this water right.

In addition, we have forwarded the change in ownership you submitted for water right 63-10688 to our state office, as it is a decreed water right and will be processed there. If you have any questions regarding this right: you may contact Karilynn Townsend at 208-287-4952.

Thank you for your patience and cooperation, as we have had several water right changes to process. If you have any questions concerning the enclosed information, please feel free to contact this office.

Sincerely,

Ref: Number Change A63-00276B to A63-00276A

Dear Edna Crawford,

Enclosed is a computer generated copy of your Claim No. A63-00276A which was previously numbered A63-00276B when originally filed.

During normal claims review of this claim we found that a transfer was filed on 63-00276 causing the original water right to be split into parts A, B, and C. The Department assigned new split suffixes to this right by the transfer. This number change is to match up those splits to your adjudication claim. Your claim has now been renumbered to A63-00276A.

This renumbering does not affect any other items on your claim at this time.

If you have any questions concerning this claim in the future, please refer to this new claim number.

Feel free to contact this office if you have any questions concerning this letter.

Sincerely,

MEMORANDUM

TO: FILE NO. 63-00276

FROM: PAM SKAGGS/^{ab}STATE OFFICE

SUBJECT: TRANSFER NO. 4215 *OK*

DATE: January 13, 1994

=====

On 05-27-93, Gerald E. Schroder filed Application for Transfer No. 4215 which requested a change in place of use and correction of the point of diversion of all of Right No. 63-00276. Before processing was completed at the region, a portion of the property was sold to Ronald and Sharon Stutheit, splitting the transferred property and identifying a separate point of diversion for each parcel.

Due to the vagueness of the decree information, a field exam was conducted by the region to confirm the history and existing use of the right. The exam found that both Schroder and Stutheits own a portion of the right at reduced rates and acres. Also, that a portion of the right may have been lost through forfeiture. This question should be addressed in the SRBA. (See Steve Lester's memo of 11-29-93 for exam results.)

The transfer document has been prepared according to the field exam recommendations for Schroder and Stutheits. The portion identified as Crawforth is not part of this transfer and has not been included in the approval, except as part of the unchanged portion of the right. A summary of the split is as follows:

<u>WR NO.</u>	<u>OWNER</u>	<u>CFS/ACRES</u>	<u>ASSOCIATED ADJ NO.</u>
63-00276	Crawforth	1.60/(80)	A63-00276 (Schroder)
T63-00276A	Crawforth	0.88/(44)	A63-00276B (Crawforth 5Acres)
T63-00276B	Schroder	0.52/26.0	(Part A63-00276)
T63-00276C	Stutheit	0.20/10.0	(Part A63-00276)
TOTALS = 1.60/(80) 36.0 Acres Confirmed.

TO: FILE
 FROM: STEVE LESTER *SL*
 DATE: NOVEMBER 29, 1993
 SUBJECT: RECOMMENDATIONS FOR T.4215, 63-00276

Mr. Schroder filed a transfer application to : application seeks to codify an accomplished t: A63-00276 and to add a P/D for the new owners transfer application, another owner filed A63- (Crawforth). To remain consistent with SRBA f. are used: A for Schroder, B for Crawforth, and separately for this part, C results from split in transfer,.

A field exam was conducted on 11/5/93 (see attached findings) to document the extent of use within the last five years under this right. A summary of the field exam information follows.

OWNER & PORTION	RATE	POINT OF DIV.	PLACE OF USE
(B) Schroder 276A	.52 cfs	NWNENW/NENWNW S.17 ¹ (pump at river)	24.5 ac. SWSW S.8 1.5 ac. NWNW S.17
(A) Crawforth 276B	.08 cfs	NWSW S.8 (pump at unnamed slough ²)	4.0 ac. NWSW S.8
(C) Stutheit 276C	.20 cfs	NWSW S.8 (new pump to be used)	10.0 ac. NWSW S.8 ³
TOTAL	.80 cfs		40.0 ac.

Conveyance loss is not applicable in this case (pump and pipeline). The balance of the rate of flow in this right, 1.60 cfs decreed minus .80 cfs recommended equals .80 cfs, is considered lost through lack of beneficial use. The volume requirement of 4.5 afa/acre applies to the above recognized acres.

1. Single point on or near QQQ line - this is a clarification of legal rather than a change from pages 1, 3, 4 and 5 of application.
2. Locally known as Kallarney Slough per A63-00276B.
3. Note forfeiture of 5.2 acres in ASCS field #1 north of slough in NWSW S.8. This is due to presence of well established native trees, grasses and forbs and lack of delivery system for this field. Applicant could not provide additional data to document beneficial use of water in this field within last five years.

Re: Transfer of Right No. 63-00276

Dear Mr. Schroder:

Enclosed is a copy of the recommended portions of the above-referenced right regarding the transfer application that you filed. The recommendations resulted from the field examination conducted on 11/5/93.

Your portion of the right, to be known as 63-00276A, will provide .52 cfs for 26 acres south of Hexon Road, including the three acres between your home and the river. The amount of water for your acres is the full irrigation allotment allowed under Idaho law for these acres.

As you can see, three owners have different portions of the right for different acres. Because Mrs. Crawford is not involved in the recent filing or in the recent sale of property, there is no need for me to send a letter to her. However, I am sending a letter to the Stutheits in which their portion of the water right is defined.

Any of the parties is welcome to contact me if more information is needed. Thank you for your cooperation in completing the transfer process, and I hope we have the opportunity to work together again.

Sincerely,

Steve Lester
