6. General Information:

a. Description of diversion system The historic diversion system for these water rights has been via the South Boise Mutual Irrigation Co., Ltd. diversion dam, into the Bubb ditch. One intent of this transfer is to add a new potential diversion site of the Ridenbaugh Ditch operated by the Nampa Meridian Irrigation District.

b. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? Yes No. If yes, provide a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes.

c. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer:
Total number of acres irrigated will not change.

d. Remarks:

See Attachment B

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

63-0243

This is to certify that I have examined Application for Transfer of Water Rights No. 63-0280/0281/0282/0283/0284/0242

And said application is hereby APPROVED, subject to the following limitations and conditions:

1. A lockable controlling device and totalizing flow measuring device acceptable to the Department shall be permanently installed and maintained as part of the diverting works.

2. Use of water under this right is subject to control by the watermaster of State Water District 63, Boise River.

3. The change authorized by this transfer shall be accomplished within one (1) year of the date of this approval.

4. Failure to comply with the conditions of this transfer is cause for the director to issue an order to show cause why the approval of the transfer should not be rescinded.

Attachment B

Remarks for Transfer of Water Right. These concepts identify the methodology of preparation of this application.

1. The South Boise Mutual Irrigation Co., Ltd. (hereinafter Company) desires to place its most senior water rights on lands located on the west end of the delivery system. The concept of this transfer application is to move senior water rights to the west end of the service area, and replace these senior water right with a junior water right on lands in the east end of the service area which are no longer intended to be irrigated but which have been irrigated within the past five years. This east end junior water right will be available to be granted, bargained or conveyed to other waterusers in the Boise River system.

2. Records of the Department of Water Resources and of Water District 63 are summarized on three pages extracted from the 1987 Water District 63 Watermaster's Report, shown as attachments F, G and H. These attachments identify water rights that total 21.14 cfs, which is more water than the Company has utilized in recent years.

3. This transfer application is intended to move the following senior water rights to the westerly lands:

<u>Number</u>	<u>Priority Date</u>	<u>Amount</u>
63-00280	4-1-1865	1.80 cfs
63-00281	4-1-1865	0.50 cfs
63-00282	1870	0.30 cfs
63-00283	1870	0.70 cfs
63-00284	3-1-1889	0.84 cfs
Total:		4.14 cfs

4. To document the transfer, the following additional attachments are included:

Attachment I - Map showing current places of use of decreed water rights.

Attachments J through M - copies of decrees identifying water rights.

Attachment N - Statement by Company President Richard Harland, describing present water delivery patterns.

Attachment O - Copy of orthophotoquad of delivery area.

Attachment P - Copy of 1980 U-2 photograph of service area which describes irrigated acreage based on a review of the infrared photograph.

5. To determine the amount of current, valid water rights used by the Company, the presently irrigated acreage was computed using Attachment P. This acreage totals 284 irrigated acres. At 0.02 cfs/acre, the delivered amount of water would be 5.68 cfs. This amount was run through the "Loser" FORTRAN program to compute ditch loss. The result of this computer run is

MICROFILMED

AUG 17 1982

shown on Attachment Q. The irrigation diversion requirement via the present point of diversion into Bubb Ditch is described as 7.27 cfs. This quantity is not anticipated to change significantly if the point of diversion is changed to the Ridenbaugh Canal.

6. To account for the 7.27 cfs, first the 4.14 cfs of senior water rights are utilized. For each of the rights, 0.02 cfs per acre is assigned, and water in excess of this amount is considered to be "carriage" or "ditch loss" water. For example, water right no. 63-00280, decreed for 1.80 cfs, now appears to be used on only 62 acres. While the water right is requested to be moved to 62 other acres, at 0.02 cfs this amounts to only 1.24 cfs. The remaining 0.56 cfs (1.80 - 1.24) is considered to be some of the carriage water for the Company's water rights.

7. Water right no. 63-00242 specifies 2.40 cfs. It is presently used upon only 43 acres. Only 0.86 cfs has been recommended as a final amount for this water right because it has the same date of priority as 63-00243, and all remaining carriage water will be included in the latter water right.

8. A portion of water right no. 63-00243, which will be designated as 63-00243A, applies to the remaining 90 acres of land that do not have a ^{senior} water right. The recommended amount for this right is 1.80 cfs, plus the 0.47 cfs of carriage water for a total of 2.27 cfs to bring the total right to 7.27 cfs.

see back page of this sheet.
137 acres

-- See Addendum to Attachment B --

-- 9. Another portion of water right no. 63-00243, which will be designated as 63-00243B, will be replaced on the land from which the senior water rights are being taken. This land, which totals 127 acres, is land that is currently in the process of being developed for subdivision use and this water right will likely be conveyed to other Boise River waterusers. The extent of this water right is identified as 0.02 cfs per acre irrigated, plus ditch loss of 0.49 cfs (per the Loser routine as shown on Attachment R), for a total of 3.03 cfs.

9. The water rights in excess of 7.27 cfs plus ^{3.50*}~~3.03~~ cfs are considered to have been lost through abandonment or forfeiture. Thus, the following rights are considered to have been lost:

<u>Number</u>	<u>Priority Date</u>	<u>Amount</u>
63-00240	5-1-1889	0.06 cfs
63-00241	5-1-1889	0.02 cfs
63-00242B -	5-1-1889	1.54 cfs
63-00243C	5-1-1889	~~0.70 cfs~~ 0.23 cfs*
63-00244	5-1-1889	2.94 cfs
63-00245	5-1-1889	0.05 cfs
63-00246	5-1-1889	0.10 cfs
63-00247	5-1-1889	0.03 cfs
63-00298	5-1-1889	<u>5.40 cfs</u>
Total:		~~10.84 cfs~~ 10.37 cfs*

Addendum to Attachment B

Prepared by Dave Tuthill on March 22, 1990

Recently, the Department was approached by Mr. Jeff Fereday, Esq., regarding the historic use of water to irrigate the Gilmore property, which is located in the vicinity of the center of Section 24, T 3N, R 2E. Mr. Fereday indicated that Mr. Gilmore had represented to him that the property in question had been irrigated into the mid 1980's, and that the property was served via the Bubb ditch by the South Boise Mutual Irrigation Company, Ltd. Mr. Fereday was concerned that only a small portion of the acreage was found to have been irrigated in the photo-investigation conducted by Dale Melton, Richard Harland and Dave Tuthill on February 23, 1989.

I advised Mr. Fereday that to make any changes to the photo-investigation, additional information would be required. He subsequently obtained additional photographs from the ASCS office, and reviewed early 1980's NHAP photography with Mr. Doug Harrison of the SCS. The results of this information were inconclusive -- there appeared to have been partial but not fully effective irrigation of the property. Upon the receipt of this information, I visited Mr. Harrison's equipment studio to personally review the information. Based on a detailed study of the photographic materials, and discussion with Mr. Harrison, I have concluded that the lands should be partially credited as having been irrigated, because although the lands were not dry, the irrigation patterns were not fully effective. A total of 22 acres in the parcel had been initially shown to be un-irrigated. Per discussions with both Mr. Fereday and Mr. Harland, an acceptable approach is to give credit for irrigation of half, or 11 acres, of the land.

To conform with the advertising of the Application for Transfer, the 11 acres can be added to the NW 1/4 SE 1/4, Sec. 24, T 3 N, R 2 E. This change has been annotated on the application in strikeout asterisk format. The result is that the lands from which junior water rights are eligible for removal total 148 instead of 137.

With respect to the rate of flow, I reviewed the information in item 9. of Attachment B. The acreage used to determine the rate of flow was 127. This is an outdated acreage, and should be 137 prior to the addition of the 11 acres of Gilmore lands. Thus the total acreage should be 148. A new run of the Loser ditch loss routine shows that the rate of flow diverted from the Boise River to provide 0.02 cfs for this acreage is 3.50 cfs. This is the newly recommended rate of flow for water right no. 63-00243B. This rate, when combined with the recommendation of 2.27 cfs for water right no. 63-00243A, totals 5.77 cfs, which is less than the originally decreed amount of 6.00 cfs for water right no. 63-00243. The remaining 0.23 cfs will be shown as the amount forfeited (63-00243C).

DESCRIPTION OF RIGHT(S) OR PORTION THEREOF, AFTER THE REQUESTED CHANGE

I. Right Number	Priority	Amount (cfs/ac-ft)	Nature of Use	Period of Use	
<u>63-00284</u>	<u>3-1-1889</u>	<u>.84 cfs</u>	<u>Irrigation</u>	<u>3/15</u>	to <u>11/15</u>
<u>63-00242A</u>	<u>5-1-1889</u>	<u>.86 cfs</u>	<u>Irrigation</u>	<u>3/15</u>	to <u>11/15</u>
<u>63-00243A</u>	<u>5-1-1889</u>	<u>1.34 cfs</u>	<u>Irrigation</u>	<u>3/15</u>	to <u>11/15</u>
<u>63-00243E</u>	<u>5-1-1889</u>	<u>.93</u>	<u>Municipal</u>	<u>3/15</u>	to <u>11/15</u>

63-00243E to be conveyed to Boise Water Corporation per Quitclaim Deeds and contract between SBMIC and BWC.

Per transfer 3755: 63-0243A 2.27 cfs/ 91 acres = .024945 cfs/acre

In proposed split: Irrigation 53.6 acres x .024945 cfs/acre = 1.34 cfs
Municipal 37.4 acres x .024945 cfs/acre = .93 cfs
Total 2.27 cfs

Per transfer 3756: BWC received 148 acres with 682 afa, conditions of approval.
It follows: 682 afa/148 acres = 4.6 afa/acre.

For 63-0243E: 37.4 acres x 4.6 afa/acre = 172 afa.

For full verification of acres, rates, volumes, transfer 3755-3757.

2. Quantity and quality of return flows and location of discharge:

Approximately 65% of the diversion will return to the river in relatively good quality,
primarily as treated effluent discharged from Boise City Sewage treatment plants.

3. Describe effects on other water uses resulting from the proposed change:

None anticipated. This transfer should not increase, and may lessen, the consumptive
use under this water right. This transfer also has been designed to leave ample
carriage water in the South Boise Mutual system.

Above information extracted from previous BWC transfer 3756 (for 63-00143C).

I hereby assert that no one will be injured by such change and that the change does not constitute an enlargement in use of the original right. The information contained in this application is true to the best of my knowledge.

I understand that any willful misrepresentations made in this application may result in voiding its approval.

PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

RIGHT NUMBER: 63-281

NAME AND ADDRESS: SOUTH BOISE MUTUAL IRRIGATION CO LTD
C/O TOM GILMORE
2130 COLORADO AVE
BOISE ID 83706

SOURCE: BOISE RIVER

TRIBUTARY: SNAKE RIVER

QUANTITY: 0.500 CFS

This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and preceding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and preceding to the earliest, shall be reduced to 60 percent of their decreed quantities.

PRIORITY DATE: 04/01/1865

POINT OF DIVERSION:

Intervenors.
.....

JUDGEMENT AND DECREE.

THIS CAUSE, came on regularly for trial upon the answer and cross-complaint of the above named intervenor, C. H. Foster, the said intervenor appearing in person and by his counsel Cavanah, Blake and MacLane, said intervenor having been heretofore, by consent of all parties to this action and by the order of this Court, permitted to intervene in this action and file herein his answer and cross-complaint and asked to proceed with the trial, all of the parties to said suit having heretofore, under stipulation, answered and denied the allegations of said answer and cross-complaint of said intervenor, and the several parties being before the Court, all present consented to the hearing of the evidence in the above entitled cause, and since the submission of the evidence S. Glee Hardies and Amelia Eisley have become the owners of the premises and water rights as hereinafter stated, and an order of this Court having been made substituting the said S. Glee Hardies and Amelia Eisley in the place of the said C. H. Foster as defendants and intervenors herein,

WHEREUPON, Witnesses were ~~present~~ and testified in behalf of said intervenor, and documentary evidence intro-

duced, and no other evidence was introduced by any of the parties to said cause upon said hearing, upon the said answer and cross-complaint of said intervenor, the evidence being closed, the cause was submitted to the Court for its consideration and decision, and the Court having filed its findings of fact and conclusions of law, from which it appears that all the material facts stated in said answer and cross-complaint in intervention are sustained and that the matters so alleged and proved are sufficient in law to entitle the said intervenors, S. Glee Hardies and Amelia Easley, to the relief prayed for in their said answer and cross-complaint in intervention; that said intervenors are the owners of the lands described in their said answer and cross-complaint in intervention, and that they are entitled to the use of water in the Boise river and its tributaries in the amounts claimed in their said answer and cross-complaint in intervention and as hereinafter stated; and it further appearing that all the material allegations in said answer and cross-complaint in intervention are true, and that said intervenors have a priority of right to the use of 25 inches of water, beginning with the irrigation season of 1865, and, also, with priority to 50 inches more of said waters, beginning with the irrigation season of 1870, and, also, with priority of 42 inches more of said waters beginning with the month of March, 1889, as hereinafter stated, and the Court having been fully advised in the premises.

It is ordered, adjudged and decreed, that the lands hereinafter described are arid in character and require the artificial application of water to render them valuable for agricultural purposes;

That the quantity of water required for the successful cultivation and irrigation of said lands, measured at the intake of the Canal or ditch of the "Bubb Canal" on the south-

erly bank of Boise river and where such bank is intersected by the line between Township 3 North of Range 2 East and Township 3 North of Range 3 East, is one inch of water per acre.

That the above mentioned one inch of water per acre is understood to be in the same status as the one inch of water per acre in the judgement rendered in the above entitled action, on or about January 19, 1906, and is subject to such modifications and temporary orders as this Court may make for the above entitled case;

63 0281 And it is further ordered, adjudged and decreed, that the said intervenor, S. Glee Hardies, he, and she is hereby, awarded the use of the water of the Boise river and the tributaries thereof upon the Northwest Quarter (NW $\frac{1}{4}$) of the Southwest Quarter (SW $\frac{1}{4}$), Section 24, Township 3, North Range 2 East Boise Meridian, in Ada County, Idaho, subject to the above modifications, of 25 inches of water beginning with the irrigation season of 1865, and, also, with priority to 15 inches more of said waters beginning with the irrigation season of 1870, and the said ^{Amelia} Wisley is awarded the use of the water of

63 0282 said river and its tributaries upon the Northeast Quarter (NE $\frac{1}{4}$) of the Southwest Quarter (SW $\frac{1}{4}$), and Lots 5 and 6 in Section 24, Township 3 North Range 2 East, Boise Meridian, in Ada County, Idaho, with priority of 35 inches of said water beginning with the irrigation season of 1870, and also with priority of 42

63 0283 inches more of said waters beginning with the month of March, 1889, and which said 77 inches of water is included in the decree heretofore entered herein, all of said waters herein awarded to said parties are to be carried through the Canal or ditch known as the said "Bubb Canal", and diverted from Boise river at the point of the intake of said canal at a point on the southerly bank of said Boise river near where such bank is intersected

by the line between Township 3 North of Range 2 East and Township 3 North of Range 3 East, and running thence in a westerly direction along the South bank of said river to a point in Section 24, Township 3 North of Range 2 East about 80 rods North from the South line of said Section and running thence in a westerly direction about two miles, in the quantities aforesaid, of water measured under a four inch pressure, and upon the following described lands situated in the County of Ada, State of Idaho:

The Northwest Quarter (NW $\frac{1}{4}$) of the Southwest Quarter (SW $\frac{1}{4}$), Section twenty-four (24) Township 3 North Range 2 East, Boise Meridian, in Ada County, Idaho, also:

The Northeast Quarter (NE $\frac{1}{4}$) of the Southwest Quarter (SW $\frac{1}{4}$) of Lots 5 and 6 in Section 24, Township 3 North, Range 2 East, Boise Meridian, in Ada County, Idaho.

RE: Snake River Basin Adjudication (SRBA)
Ada County

Dear Mr. Harland:

This letter is in response to your denied Extension Request dated August 4, 1989 and correspondence from Mr. David Tuthill, IDWR Western Regional Manager dated September 5, 1989 regarding the protection of your water rights in Ada County.

This letter is granting an Extension of Time for the filing of the above referenced Notice of Claim to a Water Right until January 1, 1990. The original filing deadline for the claim was August 8, 1989. Please keep this extension of time with your legal documents regarding your claims.

This extension is granted under the authority of §42-1409 (10), Idaho Code.

If you have any further questions please contact this office.

Signed this 21st day of September, 1989.
