MEMO

June 28, 1971

TO: Application for Permit No. 63-7383 - Seven Suckers Irrigation District
FROM: Donald W. McEldowney
SUBJECT: Pre-examination

On June 2, 1971, I conducted a field examination of the proposed application in order to determine the actual source of water supply, the volume of water available at this point for appropriation, and the mechanics necessary to accomplish the appropriation as requested.

Prior to this date, I have talked with the officials of the Fish and Game Department, and on this date, I talked with the manager of the Fishery Department at the Eagle Island Hatchery. The Fish and Game has held that they do not wish any appropriation to be made directly from their wells which supply water for the fish hatchery. They have stated that they have no objection to appropriation being made on the discharge at the point at which the flume is now installed for measurement. However, they want it specifically understood that they may decide not to waste water at that point and do not want to be held liable for injury.

At the point in which the flume is installed on the discharge system from the hatchery, the hatchery manager stated that there is 2.89 cubic feet per second available on a year-round basis and that occasionally they have as much as 3 cfs available at this point. They state that other waste water being discharged into the slough at this point not through the flume, but through two 16" culverts, fluctuates from as little as 3 second feet to as much as 12 to 15 second feet; that this water that is being discharged at this point is waste water from the Penitentiary grounds and sub-water being drained from above the Penitentiary. The hatchery manager being familiar with the slough and the other conveyances at that point states that the river is not directly contributing on the surface to the water being discharged into the slough.

STATE OF IDAHO

In the Matter of Application for)
Permit No. 63-7383 in the name)
of SEVEN SUCKERS IRRIGATION DISTRICT)

MEMORANDUM DECISION

Application 63-7383 was filed by Seven Suckers Irrigation District on January 26, 1971, seeking a permit to appropriate 2.5 second feet of water from an "unnamed stream" which is tributary to the Boise River in the SW $\frac{1}{4}$ of the SE $\frac{1}{4}$, Section 13, Township 4 N., Range 1 W.

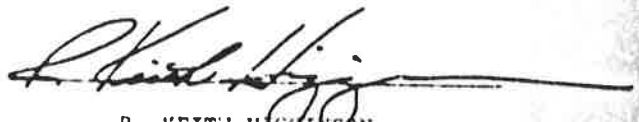

The District proposes to allow the water to flow into the Boise River and to then claim credit for this water by diverting the same quantity into the District's ditch within the NE $\frac{1}{4}$, Section 24, Township 4, Range 1 W. Water from the Fish and Game Department fish hatchery wells has been running into the Boise River for many years. It has been used for irrigation and other purposes by water users who divert from the river below the point of entry.

The Irrigation District proposes to make no change in the past deliveries and use of this water but only to claim credit for the water which is there without any effort on the part of the District. From our examination of this matter it appears that water from the wells has flowed into the river for a sufficient period of time that it has become a part of the water supply of the river and can therefore be appropriated only to the extent that there is water available for use with a priority of 1971.

The applicant's proposal to obtain this water by exchange cannot be accomplished since they are unable to show that they have taken possession of the water from the unnamed stream and applied it to beneficial use.

It is therefore ordered and Application for Permit No. 63-7383 is hereby approved for diversion and use of water from the Boise River with a priority of diversion of January 26, 1971. Use of water under this permit is subject to the control of the watermaster and no water may be diverted unless and until all prior water rights are first satisfied.

Dated this 6th day of October, 1971.

STATEMENT OF WATER RIGHTS FOR EAGLE ISLAND PENITENTIARY FARM ON BOISE RIVER

By Wm. E. Welsh, Watermaster, Boise River

In the case of the Farmers' Cooperative Ditch Company vs. the Riverside Irrigation District, Ltd., et al, commonly referred to as the Stewart Decree, are found the following awards:

6	6-1-64	T. C. Catlin	3.30	165
52	6-1-71	Catlin & Mace	7.86	393

Upon examining an agreement now on file in the office of the Secretary of State which was entered into by the various parties of interest in the Catlin & Mace Ditch just immediately prior to the time of the purchase of the Penitentiary Farm by the State of Idaho, I find that rights numbers 5 and 52 were divided among these various users as follows: Also right Number 6.

Charles P. Mace and Mary Mace	8.03	June 1, 1864	5
Charles P. Mace and Mary Mace	22.05	June 1, 1871	52

Name	Inches	Date of Priority	Number
Karl Fischer, A Bachelor	249.45	June 1, 1871	52
Karl Fischer, A Bachelor	165.00	June 1, 1864	6

It is also noted that there is in this same file a stock certificate issued to the State of Idaho by the Hart-Davis Ditch Company for 165 shares which covers the 165 inches of water represented in right number 6. The abstract on file in the office of the Secretary of State shows that the State of Idaho purchased the T. C. Catlin Farm as described in the agreement referred to above from Karl Fischer, together with all water rights appurtenant thereto.

Therefore, the water rights now belonging to the State of Idaho for the Eagle Island Penitentiary Farm are as follows:

Number	Date	Name	Amount Decreed Second / feet	Inches
5	June 1, 1864	Catlin & Mace	1.815	90.75
