HOW YOU WILL RECEIVE NOTICES IN THE SNAKE RIVER BASIN ADJUDICATION

All documents filed in the Snake River Basin Adjudication other than notices of claims are filed with the court. Notices of claims to water rights filed in the Snake River Basin Adjudication are filed with the Idaho Department of Water Resources. Copies of all documents filed in the Snake River Basin Adjudication will not be mailed to all parties (claimants) in the adjudication.

By order of the court, any document filed with the court will be mailed only to those parties who may be directly affected by it. A monthly docket sheet will be prepared by the department which contains a summary of all documents filed with the court in the previous month and the dates and locations of hearings scheduled for the following three months. The docket sheet will be filed with the district court clerk in each county within the Snake River Basin in Idaho. Copies of the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying. If you wish to receive a copy of the docket sheet each month, you should mark the appropriate place on your notice of claim form. You will be charged a small annual subscription fee to cover the cost of copying and mailing. Copies of any document listed on the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying.

Copies of all notices of claims filed with the department will be available for inspection from all offices of the department. Copies of the notices of claims may be obtained in person or by mail, but you will be charged for the cost of copying and mailing. (A claimant will not be charged for a copy of his or her own notice of claim, and a person who acquires property with water rights for which a notice of claim was filed will not be charged for a copy of the notice of claim filed by the previous owner.)

After the notices of claims have been reviewed, the director will prepare and file a report with the court. Part 1 of the report will contain the director's recommendations as to each water right claimed under state law. Part 2 of the report will list each federal reserved water right claimed. A number of reports will be prepared, one or more for each sub-basin in the Snake River Basin. When the report for your sub-basin is filed with the court, you will be mailed a notice informing you that the report for your sub-basin has been filed. The notice will be sent to the most recent address shown by the department's files. Attached to the notice will be a copy of those portions of the report describing the water rights you have claimed. If you do not agree with the way your water right is described, you may file an objection to the report with the court. You can also file an objection if you disagree with the way other claimant's water rights are described, and the notice will tell you where a copy of the full report is available for inspection. The notice will tell you when and where to file your objection. The notice of filing for each sub-basin report will also be published state-wide in local newspapers.

6. Water is claimed for the following purposes:

(both dates are inclusive)

(cfs)

(acre feet)

For irrigation purposes from 3/15 to 11/15 amount 3.3 or 6.5476

For _____ purposes from _____ to _____ amount _____ or _____

For _____ purposes from _____ to _____ amount _____ or _____

For _____ purposes from _____ to _____ amount _____ or _____

7. Total quantity claimed (a) 3.3 (cfs) and/or (b) 6.5476 (acre feet)

8. Total consumptive use claimed is 6.5476 acre feet per annum.

9. Non-irrigation uses; describe fully (eg. Domestic: Give number of households served; Stockwater: Type and number of livestock Etc.) _____

10. Description of place of use:

a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.

b. If water is used for other purposes, place a symbol of use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

Re: Thurman Mill Ditch Company's Water Rights

Dear Jan:

This letter is to follow-up our prior conversation regarding the recommendations for Thurman Mill Ditch Company's water rights. As we discussed, the boundaries for Thurman Mill Ditch Company (Thurman Mill) have been plotted on the aerial maps provided by IDWR, but the boundary does not include all of those areas which are capable of irrigation by Thurman Mill. Specifically, the boundary does not include the lands between Thurman Mill's point of diversion and Veterans Road.

Accordingly, I have copied that area on the maps which have been provided by IDWR and I am enclosing it herewith. However, the map does not extend far enough to the east to Thurman Mill's point of diversion. Thus, I have also prepared an additional aerial from Thurman Mill's point of diversion to the west.

Please update IDWR's records with regard to the boundaries of Thurman Mill Ditch Company. Please contact me if you have any questions regarding this matter.

Yours very truly,

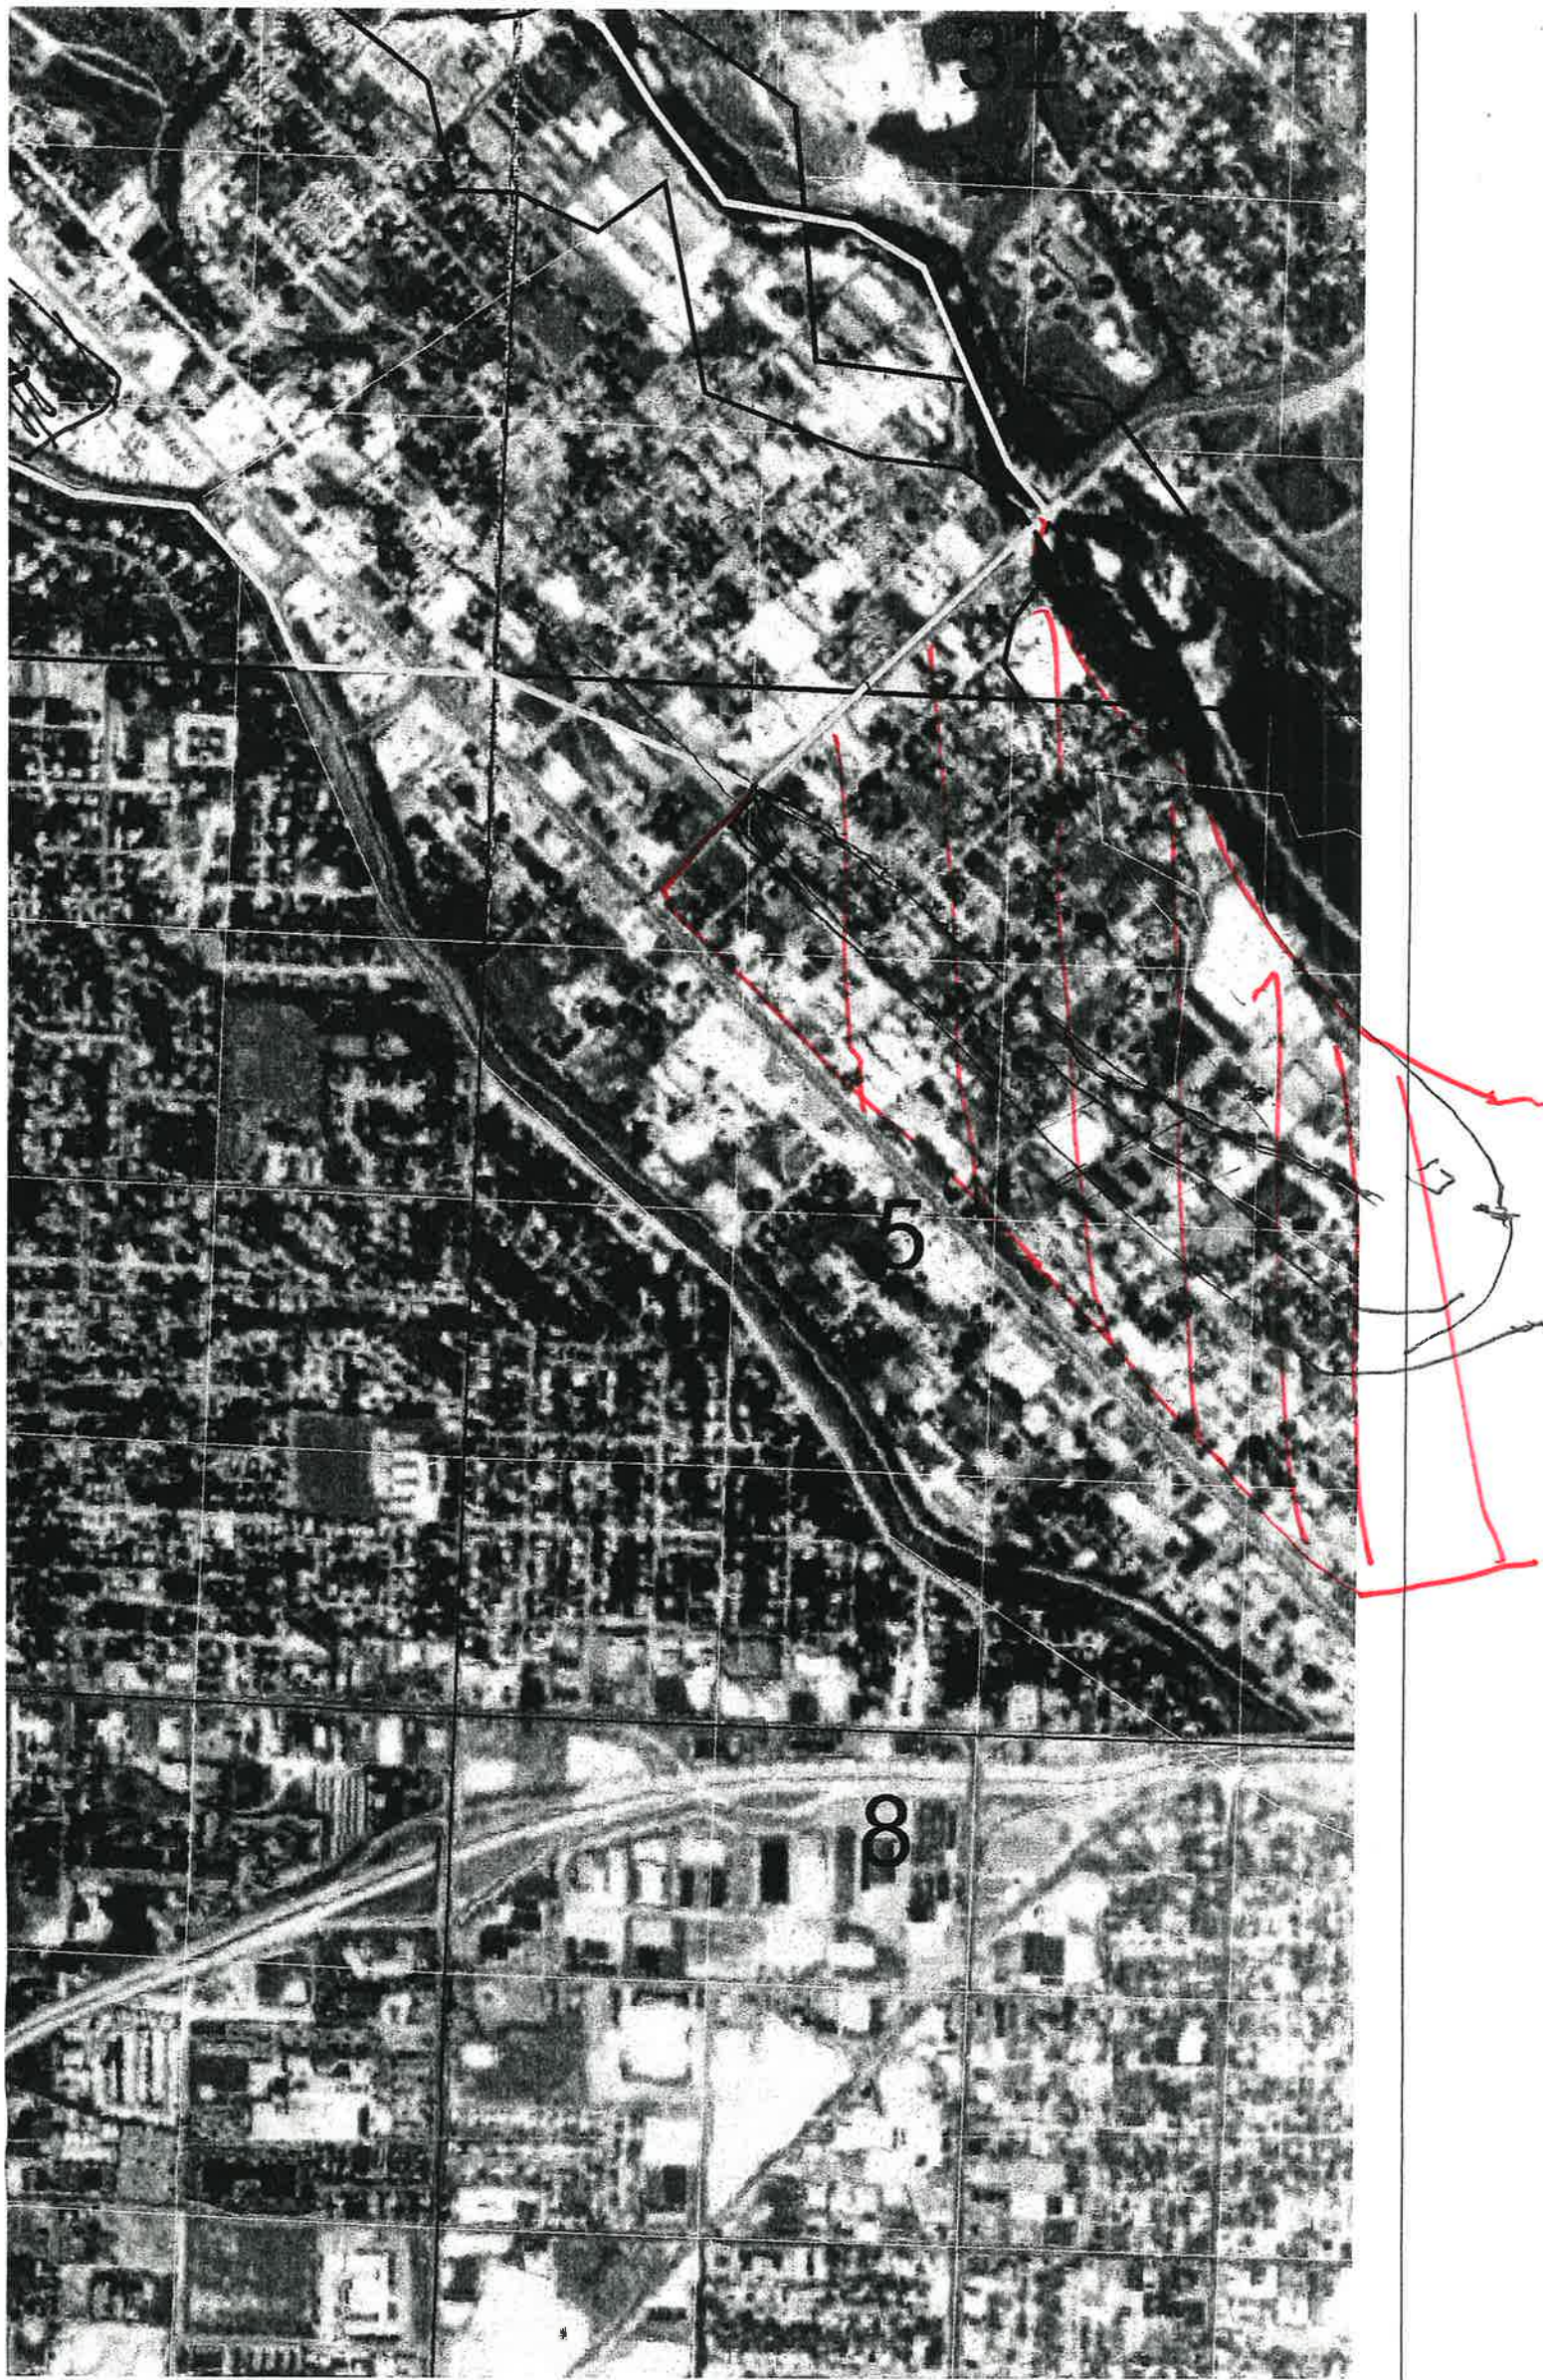

S. Bryce Farris

Amended map on 11-22-05.

10-21-05

Phone Call – Bryce Ferris

Thurman Mill Ditch Co. Rights

Wants to change the boundaries. The ditch company would like to include the land under the ditch from the point of diversion to the boundary as it currently appears.

Approximately $\frac{1}{4}$ mile. I told him we would have included it if they would have told us that in the beginning and I see no problem in including it now. The total acres will remain the same as our recommendation, so there is no expansion of acres.

He will be sending in a copy of the map with the boundaries outlined next week.

06/22/2005

IDAHO DEPARTMENT OF WATER RESOURCES
PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

RIGHT NUMBER: 63-135

NAME AND ADDRESS: THURMAN MILL DITCH CO LTD
10611 W TREELINE CT
BOISE ID 83713

SOURCE: BOISE RIVER

TRIBUTARY: SNAKE RIVER

QUANTITY: 3.300 CFS

This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and preceding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and preceding to the earliest, shall be reduced to 60 percent of their decreed quantities.

PRIORITY DATE: 06/01/1864

POINT OF DIVERSION:
T03N R02E S5 NESE Lot 11 Within ADA County

PURPOSE AND
PERIOD OF USE:

<u>PURPOSE OF USE</u>	<u>PERIOD OF USE</u>	<u>QUANTITY</u>
IRRIGATION	03/01 11/15	3.300 CFS
Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released for flood control by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoir dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.		

PLACE OF USE:

1782 ACRES TOTAL

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

THIS RIGHT IS LIMITED TO THE IRRIGATION OF 1782 ACRES WITHIN THE BOUNDARY OF THURMAN MILL DITCH COMPANY

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

WATER IS DELIVERED THROUGH THE THURMAN MILL CANAL

DESIGNATED AS NO 7 IN THE STEWART DECREE AND THE BOISE RIVER WATER MASTERS RECORDS

Overlap with other water rights: _____

Does overlap increase rate of flow, volume, additional acres, different source for same acres? Explain: _____

Delivery System Narrative: The Thurman Mill Canal is approx. 7 miles long. It carries water for Thurman Mill, Warm Springs Ditch Co. and Drainage Dist. #4. The Warm Springs Canal discharges to the canal in 4N, 1E Sec. 21. A drain called the "Injunction Drain" enters the canal in SWSE, S23, 4N, 1E. There is such a large amount of commingled water in the system it is impossible to segregate the water owned by the entities that use the Thurman Mill Canal.

Well or Diversion Identification No GPS ID	Motor Make	Hp	Motor Serial No.	Pump Make	Pump Serial No. or Discharge size

FLOW MEASUREMENTS:

Attach appropriate documents

NARRATIVE/REMARKS/COMMENTS

Designated as #7
Some of the Thurman Mill claims have a POD legal different from the decreed legal by one quarter - quarter. Some of the decreed POD's simply list the Thurman Mill Canal as on the lower as a POD. Therefore, I do not think an accomplished change in POD occurred, but more likely the decree either transposed the legal or did a poor job of describing the actual POD legal.

[illegible]

AFTER EXAM THE FILE SHOULD CONTAIN:

- ☐ Completed claim checklist
- ☐ Photographs of POD's and POU
- ☐ GPS readings
- ☐ Completed map and or GIS layout showing POD's and POU

THURMAN MILL SLOUGH AND CANAL

Number 508

1974

When the Thurman Mill Slough and Canal was constructed in March of 1866, 6,000 inches of water under a four-inch pressure was appropriated and diverted. The canal begins on the south side of Boise River at a point opposite Governor's Island in the SE 1/4 of the NE 1/4 of Section 5, T3N, R2E. From its diversion point, the canal extends westerly for about seven miles.

In addition to the main canal, a few landowners constructed small ditches which originated from the Thurman Mill Slough. By 1903, six miles of laterals were in use. By 1905, the canal had been enlarged to more than twice its original size. Major improvements and extensions of the canal had been made in 1885 and 1890.

Mrs. Martha E. McCarthy, owner of the largest property under the canal, irrigated 500 acres. She had purchased her land from William M. Thurman, who had himself bought land from Peter L. More on May 20, 1872. More was the first user of the Thurman Mill Slough water.

When Thurman purchased this property from More, the transfer included More's mill site and the water ditch. The water at first was utilized to run the mill and provide limited irrigation for adjacent lands. But as additional settlers moved into the area, the water came to be used exclusively for irrigation. By 1905, the canal irrigated over 2,000 acres of land located in T4N, R1E.

In 1906, the Thurman Mill Slough and Ditch received water rights (7, 10, 11, 36, 37, 41, 54, 61, 62, 75, 76, 78, 79, 80, 81, 82, 83, 84, 87, 115, 116, and 128) of 2,288 inches of water.

Re: Thurman Mill Ditch Company, Ltd

Gentlemen:

I enclose eleven Notices of Claim to a Water Right based upon the Stewart Decree and a Notice of Claim to a Water Right based on the Hartson Decree.

After removing subdivided properties from the acreage within its original delivery system, the Thurman ascertained that there were 1,575 irrigable acres. Thus, I enclose the Thurmans check in the amount of \$1,625.00.

Very truly yours,

Elbert E. Gass

Re: Snake River Basin Adjudication (SRBA) claims review

We are currently reviewing the water right claims filed in the SRBA by all ditch companies and irrigation districts in Ada County prior to preparing our recommendations to the SRBA court. Your claims are part of this review process.

One of the end products resulting from the review process mentioned above will be a map for your organization that will include the land irrigated by your water rights and the outer perimeter boundary of the places of use. You may have already reviewed the boundary and place of use for your water rights with an employee of the department. However, if you have not recently reviewed and returned a map to us please call me at the number below as soon as possible. Establishing the most accurate boundary and place of use for your water rights is a very important initial step in our review process.

The total amount of water we will recommend for your water rights will be based on the standard of one inch (0.02 cubic foot per second) per acre for the actual acres irrigated with your water rights as described in your boundary map. However, it is possible to have additional water for delivery loss within your ditch system and additional water for lands that require more water due to the nature of the soils. We might need additional information from you to quantify the amount of water needed for delivery loss within your canal and ditch system. We might also need from you additional data to support and quantify any excess water in addition to one inch per acre for irrigation that might be necessary.

It is our plan to prepare recommendations for your SRBA claims during the summer of 2003. In order to prepare the most accurate recommendations it's imperative that the boundary and place of use map for your organization be completed before we proceed.

If you need additional information or want to discuss these matters in more detail please call me at the number below.

Cordially,

Mel Schulte
Sr. Water Right Agent

Re: IDWR Preliminary Recommendations for Thurman Mill Ditch Company

Dear Mr. Schulte,

Please find the enclosed Notice of Error Reply forms in response to your preliminary recommendations for the water rights owned by Thurman Mill Ditch Company. Please contact me if you wish to discuss the proposed corrections to the preliminary recommendations.

Yours very truly,

Jon C. Gould

THURMAN MILL DITCH COMPANY

ADDITIONAL INFORMATION

DATE: JUNE 8, 2005

BY: Mel Schulte

The main contacts for Thurman Mill Ditch Company are Bart DeChambeau, President, and his wife Bonnie, Secretary (376-3769). They became officers mid-way through the claim review process. I met with them personally to explain the importance of the boundary/place of use map and requested they provide us with the number of shares in the company's records. I made several telephone requests for a boundary/place of use map that had been reviewed by the company and the shareholder information previously requested. The amended map was not provided until the notice of error period and we still have not received the shareholder information.

The place of use for Thurman Mill is made up mostly of land in the heart of Garden City that has experienced a great deal of change through the years from irrigated farms to residential, commercial and light industrial uses. A lot of the irrigated land is composed of small lawn and garden areas that are very difficult to estimate the acres irrigated. It was my intention to use the shareholder information and digitized information to cover the company's decreed rights but without cooperation from the company it is not possible to use this approach.

Another problem associated with Thurman Mill is the fact their ditch system carries not only their own water, but also the rights owned by Warm Springs Ditch Company and Drainage District No. 4. After the water is co-mingled it is impossible to know whose water is delivered to which entities users. It appears their delivery ditch is inadequate to carry all of the decreed and other water allocated to it in any one single diversion. Also, the volume of water diverted into the Thurman Mill canal has decreased through the years.

The Thurman Mill delivery system is made up of numerous smaller laterals and ditches in addition to the main canal. The main canal is approximately 9-10 miles long and the amount of water required as carry water in order to push water from the river diversion to the end could be substantial.

The acreage limitation of 1782 acres is based on one acre per inch of decreed water as we have used in other recommendations. The number of digitized acres for larger parcels within the boundary is 1271.1 acres but this number does not include all of the smaller uses and subdivisions.

There may be an overlap of boundaries between Thurman Mill and Fairview Acres Water Users west of Veterans Parkway. This determination cannot be made until Thurman Mill provides us with a boundary map.

63-19084 was disallowed in favor of Drainage District No 4's claim for the same right. Ringert & Clark represents both DD #4 and Thurman Mill and attorney Bryce Farris has discussed this matter with both organizations.

The diversion rate for 63-30131 was increased from 5.6 cfs to 6.0 cfs because 63-214B right was understated in the water master's records. It is described as having a rate of 2.60 cfs and should be 3.0 cfs. Copies of the water right records are in the file.

The recommendations for Thurman Mill are open for scrutiny.

* 37.56 cfs = Boise River decrees as claimed
 11.42 " = credited waste water

* Overclaimed by 2.32 35.24 = correct amount after deducting 2.32 cfs
 35.24 ÷ 0.2 = 1762 acres

[illegible]

This is a historical map of a rural area, likely in the United States, showing land parcels and a network of ditches. A large, irregularly shaped area is highlighted with green diagonal hatching, representing the Stewart Decree acres. The map is divided into sections by a grid of lines, with some sections labeled with numbers like 20, 29, and 32. The text 'Thurman Mill Ditch Co' and 'Stewart Decree acres = 1810' is overlaid on the map. The map also shows a river or stream flowing through the area, and various smaller features like roads and buildings.

Thurman Mill Ditch Co
