WATER RESOURCES
WESTERN REGION

Transfer No. 4259 proposed to add a point of diversion, change the place of use and change the nature & season of use under Right No. 63-00148A. The transfer approval includes irrigation use only, two diversion points and the confirmed irrigation of 159.2 acres.

Place of use was confirmed by region staff based on 1987 NAPP photo and the applicant supplied no additional information to demonstrate that more acres should be included. The rate is based on the rate of 0.02 cfs/acre or 3.18 cfs. 6.00 cfs is the portion of the right identified as abandoned, reflecting the development of the previously irrigated land over time.

Season of use and diversion volume were adjusted to current standards. Recommended conditions include watermaster control, multiple points of diversion/measuring devices, future annual reporting, protest agreement/region conditions, irrigation overlap, right-of-way and standard transfer conditions.

RE: The Huntington Apartments
Boise, ID

Dear Mr. Chatburn:

Thank you for bringing to our attention the membership we have in South Boise Water Company.

I assume the original owners of the Huntington joined your group when they built the apartment property, and we did not recall this.

Enclosed is our relinquishment and will offer non-financial support of your goals when called upon.

Thank you.

Very truly yours,

Craig E. Angelo

2. Quantity and quality of return flows and location of discharge:

All water not used for irrigation will be returned to Loggers Creek in the NWNW of Section 24, T3N, R2E, BM.

3. Describe effects on other water uses resulting from the proposed change: Many of the lands to which the Decree applied have ceased to use water for irrigation because of urban development.

Use of the water has changed over the years from irrigation to aesthetic use, with most of the water being returned to the Boise River system after running through the ditches and ponds within the water company service area.

I hereby assert that no one will be injured by such change and that the change does not constitute an enlargement in use of the original right. The information contained in this application is true to the best of my knowledge.

I understand that any willful misrepresentations made in this application may result in voiding its approval.

1. Approval of this transfer is subject to the requirements of the Order dated April 17, 1992.
2. The date of priority of this right is advanced to August 14, 1987 in relation to other Johnson Creek rights. The date of priority in relation to water rights of the Boise River is June 1, 1865.
3. The change authorized by this transfer shall be accomplished within one (1) year of the date of this approval.
4. Failure to comply with the conditions of this transfer is cause for the director to issue an order to show cause why the approval of the transfer should not be rescinded.
5. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
6. Use of water under this water right will be regulated by the watermaster of State Water District No. 63.

IDAHO DEPARTMENT OF WATER RESOURCES
Water Right Report 63-148C

Conditions of Approval:

1. 020 Use of water under this right may be affected by an agreement between the protestant and the right holder.
2. R32 This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.5 afa per acre for irrigation of the lands above.
3. T04 Approval of this transfer in no way grants any right-of-way or easement for use of a delivery system owned by person(s) other than the right owner.
4. T07 The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
5. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
6. T09 Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
7. T17 Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.

Remarks:

1. General The total instantaneous diversion of water from all points of diversion under Transfer No. 4259 shall not exceed 3.13 cfs, nor total combined annual volume of 704.2 af.
Use of water under this water right will be regulated by the watermaster of State Water District No. 63, Boise River and tributaries.
Approval of this transfer does not authorize any expansion in the utilization of this water right.
If in the future additional uses are found to have been made which increase the rate of flow, volume diverted or volume consumptively used under this water right, then the additional uses will be immediately curtailed.

Comments:

1. SKAGGS 9/7/1993 TRANSFER 3918

Comment: Transfer No. 3918 was filed to change the point of diversion, place of use and source of a portion of Right No. 63-00148, splitting the right into parts A and B.

2. LESTER 12/3/1993 TRANSFER 4259

Comment: Transfer No. 4259 adds a point of diversion & changes the place of use under Right No. 63-00148A. The proposed change in nature of use was not approved. Transfer is associated with Application No. 63-12079.

3. PSKAGGS 3/30/1999 TRANSFER 5084

Place of UseConditions of Approval:

1. 135 The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

IDAHO DEPARTMENT OF WATER RESOURCES

Adjudication Recommendation Report 63-148C V1

2. 155 This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and preceding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and preceding to the earliest, shall be reduced to 60 percent of their decreed quantities.
3. C18 This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.
4. S45 Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released for flood control by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoir dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.

Remarks:

1. Explanatory THIS RIGHT IS DESIGNATED AS NO. 16 IN THE BOISE RIVER WATER MASTERS RECORDS AND THE STEWART DECREE.
2. Quantity THIS RIGHT WHEN COMBINED WITH ALL OTHER RIGHTS SHALL PROVIDE NO MORE THAN .02 CFS PER ACRE AT THE FIELD HEADGATE.
3. Explanatory WATER IS DELIVERED THROUGH THE ROSSI-MILL DITCH AND AN UNNAMED STREAM KNOWN LOCALLY AS LOGGERS CREEK.
4. Explanatory THE FOLLOWING RIGHTS ARE ALSO DIVERTED THROUGH POINTS OF DIVERSION DESCRIBED ABOVE: 63-149A, 63-150, 63-164C, 63-185A, 63-185B, 63-2392C, 63-2392D, 63-9386B.
5. Place of Use - Irrigation THIS RIGHT IS LIMITED TO THE IRRIGATION OF 871.78 ACRES WITHIN THE BOUNDARY OF THE SOUTH BOISE WATER COMPANY.
6. Explanatory THIS RIGHT IS A SPLIT FROM FORMER RIGHT 63-148.

NARRATIVE/REMARKS/COMMENTS

Designated as right #16
The claimed "aesthetic" use cannot be allowed because it would expand the right by allowing for a diversion when the irrigation component is not needed. Water is not diverted specifically for aesthetics. Aesthetics is incidental. The irrigated acres are supported by the companies share holder list (see attached) at one acre per share and also establishes the acre limitation for the company

The current boundary extends to the West to include both Ann Morrison and Kathryn Albertson parks based on information provided by the company that shows the land was irrigated by the Ridenbaugh family or as a "China Garden" (See attached) the parks are not currently irrigated with SBWC water but the companies' waste water passes through the parks.

T.4259 was withdrawn by letter dated 4-22-2003 resulting in amended claims for 63-148 C and 63-150

AFTER EXAM THE FILE SHOULD CONTAIN:

An aerial photograph of the South Boise area, showing a dense urban grid. A prominent red line traces a boundary across the map, starting from the top left, curving around a central area, and extending towards the bottom right. The map is overlaid with a grid of red and blue lines, likely representing property boundaries or water service zones. The text "SOUTH BOISE WATER COMPANY BOUNDARY MAP" is centered in the upper portion of the image.

DIRECT EXAMINATION BY WOOD

Mr. Rossi stated the history of the title of this ditch correctly; I came into possession of it in the year 1878; the title is now held by Mr. Rossi and myself; I was the owner at the time this suit was brought and my answer was filed; since that time I conveyed a half interest to Mr. Rossi in the part of the ditch used for sawmill purposes, retaining a full interest for the water for the flour mill; Mr. Rossi stated correctly the capacity of that ditch. Since I have owned the ditch it has been used for running the flour mill, running logs, and at the present time it is used for electric light power; I don't know exactly how much land is irrigated from this ditch, it is all the land between the ditch and the river; we don't pay any attention to the amount of land, we only know the amount of water we give them out of the ditch; they have all got twice as much water as they need, I guess. I irrigate about 30 acres in all in my home place.

date?

(Map of the State Engineer, sheet No. 6, handed witness.)

Mrs. Ridenbaugh and I own land on what appears to be the island where the Ninth street bridge crosses; that land is irrigated, and always has been since I have owned it; there is about 118 or 120 acres in my patent; that has all been irrigated from this ditch and is still irrigated; there is some land irrigated west of the Ninth street bridge between the slough and the bluff, down towards the electric power plant.

1186

some of the land originally described as the Porter land by Mr. Rossi; I never paid any attention to the amount of water used for the China garden, they always had all they wanted; my land is similar to the other bottom land along the river.

** no Paul?*

CROSS EXAMINATION BY QUARLES

It looks to me as if the parties using water for irrigation from this ditch use about twice as much as they need; I don't think there is any loss by evaporation, it is right next to the river; it would possibly increase the evaporation by spreading the water out.

CROSS EXAMINATION BY MARTIN

I am acquainted with what is now the first subdivision of the Dundee addition; that is part of the land that has always been irrigated from this ditch.

CROSS EXAMINATION BY THOMPSON

This 118 acres has been irrigated to my knowledge since 1878; it has been all irrigated at different times; the river cut it out in different places, but it has all been irrigated except what is in the river bottom; at present there is about 60 acres in the China garden, and the rest of it is in the river; what is now in the river was irrigated before the river cut it out. There is about 60 acres of this in cultivation; that is just a guess. Where the river bottom is now was a garden five years ago.

**RE: WITHDRAWAL OF TRANSFER NO. 67972 (4259) FOR SOUTH BOISE
WATER COMPANY'S WATER RIGHT NO. 63-148A (63-148C)**

Dear Mr. Steenson:

The Department of Water Resources ("department") acknowledges receipt of South Boise Water Company's ("company") request to withdraw the transfer referenced above. The transfer proposed a change in the place of use, nature of use and season of use under water right 63-148A. It included the transfer of 8.6 acres already irrigated within the company service area to the Avery Springs Subdivision, and proposed that some of the irrigation use within the company service area be changed to year-around aesthetic use to reflect historic practice. The transfer was approved on April 8, 1997 with a reduced place of use, diversion rate, and annual volume. The department received a petition for reconsideration from the company on April 22, 1997, and issued an order granting the petition on April 24, 1997. A subsequent transfer (no. 66506/5084) was approved on April 12, 1999 that split water right 63-148A into parts C and D. Water right 63-148C represents the portion of the right retained by the company.

In your letter to the department dated September 23, 2002, you identified conclusions drawn during discussions with department staff with regard to the withdrawal of transfer no. 67972. It was determined that, pending review by the Snake River Basin Adjudication ("SRBA"), a change in the place of use to new lands within the company's service area and authorized under the water right would not require a transfer. Additionally, accomplished transfers in the form of a change in nature of use, are recognized by the SRBA pursuant to Idaho Code 42-1425. It is understood that the company will amend their claim to reflect changes made prior to November 19, 1987.

The department considers transfer no. 67972 to be withdrawn. Water right 63-148C will represent the original status of right 63-148A prior to the filing of the application for

transfer, but will exclude the changes accomplished through subsequent transfer no. 66506, represented by right 63-148D.

Please contact the department if you have any questions.

Sincerely,

Cynthia Bridge Clark

Re: Transfer No. 4259 for South Boise Water Company's Water Right No. 63-00148A: Withdrawal of Transfer

Dear Jeff:

As we discussed with you, Norm Young, and Dave Tuthill last October and more recently when I met with you and Cindy on September 5th, South Boise Water Company hereby withdraws its transfer application no. 4259 which proposed to change water right no. 63-00148A to add year-around aesthetic use and change a portion of the place of use. South Boise's withdrawal of the transfer is premised upon the following understandings, which we confirmed with you during our meetings:

1. Pursuant to I.C. §42-219, a transfer is not necessary for the proposed change in place of use because the new lands are within South Boise's service area and the place of use authorized by water right no. 63-00148A.

2. The proposed addition of aesthetic use can be claimed in the Snake River Basin Adjudication (SRBA) as an accomplished transfer pursuant to I.C. §42-1425. Based upon our representations that the aesthetic use predates November 19, 1987, the Department will likely recommend that the aesthetic use be included in the SRBA decree for the water right. Accordingly, South Boise will amend its SRBA claim to include the aesthetic use, and it is evaluating whether to claim wintertime use pursuant to I.C. §42-1425 and/or 1426 as well. South Boise recognizes that there are additional issues regarding expansion and injury to other water rights which would be involved in a claim for the expanded period of use.

3. South Boise's withdrawal of transfer application no. 4259 will return water right no. 63-00148A to its status prior to filing the application, and none of the Department's determinations

or actions in processing the application will have any effect upon the water right.

Please provide me a letter confirming these understandings, and take whatever action is necessary to effectuate South Boise's withdrawal of transfer application no. 4259

Yours very truly,

MEMORANDUM

To: File 63-148

From: Cynthia Bridge Clark

Date: October 3, 2001

Re: Review of Transfer 67972 (4259) and Petition for Reconsideration

History of water right 63-148

- Decree for 63-00148:
 - POD in T3N R2E Sec. 24, POU in T3N R2E
 - 460 inches (9.6 cfs)
 - For use from June 1, 1865
- Transfer 3918 split 63-148 into A and B.
- Transfer 4259 related to 63-148A (AJ Claim 63-148A). Approved, and petition filed by applicant.
- Transfer 5084 split 63-148A into C and D. This transfer was approved despite the hold on Transfer 4259 for review of the Petition for reconsideration. South Boise Water Corporation's (SBWC) right is now covered by 63-148C. ELK CR to MORRIS CREEK FOR 10 CITY HIGH SCHOOL FOOTBALL FIELD

Note: Analysis below relates to history of 63-148A. The SBWC's portion of this right is now described by 63-148C. The changes will need to be addressed prior to any revisions made to transfer no. 4259.

Reason for transfer 4259

- Transfer 4259 proposes to add a point of diversion, change place of use, change nature and season of use under water right 63-148A.
- The applicant intends to change the place of use of a portion of their water right to the Avery Springs Subdivision. The water to be transferred was historically used for irrigation on 8.6 acres within the company service area, and will now be used to irrigate 8.6 acres in the Avery Springs Subdivision (advertisement said 9 acres). The original 8.6 acres will no longer receive company water.
- Additionally, Steve Lester notes that the applicant intended to codify aesthetic uses developed as irrigation declined over time. They also requested that conveyance losses be considered.
- Avery Springs Subdivision filed application for permit no. 63-12079 for 2.5 cfs for aesthetics, diversion to storage and aesthetic storage.

Approved Transfer Review

- See summary of transfer below for quantities specified on the application, recommendation, and approval.
- See Steve Lester's Memorandum dated January 5, 1996 for review details.
- Irrigated Acres:
 - Applicant provided a list of irrigation service locations from 1988 to 1993 (Application Attachment B). It includes the legal description, number of acres, and owner description. Steve Lester reviewed the list and noted areas where there was a discrepancy between the number of acres reported by the applicant and those found during review. (For reference see Attachment C, a map that identifies the SBWC service area, the locations served by the company, area to be dried up, and the location of the Avery Springs subdivision.)
 - The acreage reduction in most of these locations was related to urbanization and the increase in paved area and building development.
 - Acreage in two other QQ is being dried up for transfer to the Avery Springs subdivision.
 - The applicant did not provide information demonstrating that additional irrigated acres should be included. Therefore the department approved the 159.2 acres confirmed by the reviewer.
- Aesthetic areas:
 - The applicant was asked to provide a list of locations where SBWC water is used for aesthetic purposes (Attachment N). All of the listed tracts are identified as open waterways with some ponds. Steve Lester conducted field investigations of several of the identified locations, and ultimately recommended that all of the locations listed in Attachment N be approved with the exception of an area on the north side of the river. Tracts that did not have open waterways were not recommended. Attachment J summarizes the tracts recommended by the reviewer.
 - In his January 5, 1996 memorandum, page 4-5, Steve Lester discussed options for quantifying the amount of water associated with aesthetic use.
 - The department did not approve any aesthetic uses.
- Rate and Volume:
 - The approved flow rate of 3.18 cfs and diversion volume of 716.4 afa were related to the number of irrigated acres. Additional water for conveyance loss was included in the reviewer's recommendation, but was not approved.

Summary of Transfer (see Steve Lester's January 5, 1996 memo)

<u>Parameter</u>	<u>63-148A</u>	<u>SL Recommendation</u>	<u>Approval</u>
Acres:	459 ac (based on decree) 279.3 ac (AJ Claim) 218.3 ac (Application)	159.2 ac	159.2 ac
Rate:			
Irrigation	9.18 cfs (decree) <i>460 in.</i> 4.78 cfs (AJ Claim)	3.18 cfs	3.18 cfs
Ditch Loss	---	0.86 cfs	---
Aesthetic	4.4 cfs (AJ Claim)	5.14 cfs	---
<i>Total</i>	<i>9.18 cfs (decree)</i> <i>9.18 cfs (claim)</i>	<i>9.18 cfs</i>	<i>3.18 cfs</i>
Diversion Vol:			
Irrigation	2065.5 afa (4.5 afa/ac)	909.8 afa	716.4 afa
Aesthetic		1155.7 afa	
<i>Total</i>	<i>2065.5 afa</i>	<i>2065.5 afa</i>	<i>716.4 afa</i>
Consumptive Vol:			
Irrigation	1606.5 afa (3.5 afa/ac)	557.2 afa	
Aesthetic (non-consump?)		0 afa	
<i>Total</i>	<i>1606.5 afa</i>	<i>557.2 afa</i>	---

Petition for Reconsideration

1. Approval improperly reduces place of use from 279.5 to 159.2 acres.
2. Approval improperly reduces rate from 9.18 to 3.18 cfs (therefore annual volume is also low).
3. Approval fails to include aesthetic, and fish and wildlife uses.
4. Approval fails to justify reasoning.

Questions/Findings

- The department found a reduction in irrigated acres due to urbanization, but did not approve any change in nature of use from irrigation to aesthetics, or include conveyance losses.
- Though the applicant contests the number of irrigated acres approved, SBWC has not submitted information demonstrating where the additional acres are located. Since the transfer was also an effort to define the changes in nature of use, a review of the historic use throughout the service area and the issue of forfeiture were relevant to the transfer review.

- If aesthetic use is to be considered a beneficial use, it may be necessary to confirm in more detail whether efforts were made to develop the water for aesthetics, or whether the existing canal structures running through the property qualify as a beneficial use.
- If the aesthetic uses are considered to be beneficial, they need to be quantified and the season of use addressed. It might also be necessary to evaluate the consumptive value of the current use.
- Should conveyance losses be considered?

RE: TRANSFER #5084 FOR 63-00148A, SOUTH BOISE WATER CO.

This transfer file has a long and complicated history even though the current proposal is quite simple: move a little water from the South Boise Water Company (SBWC) service area in southeast Boise upstream to Elk Creek to irrigate the Idaho City High School football field. If successful, the change will solve the illegal diversion complaints that have plagued this situation off and on for several years.

Mr. Ace Chatburn, SBWC President, requested that application processing resume (held since last summer, see my 6/17/97 letter if more background is needed) earlier this year. I helped SBWC prepare the transfer. Cindy Hodges started the review, and I inherited the file when Cindy went to work at the state office. It seemed more effective for me to resume work with the file rather than involve yet another staff member.

Note that key review steps of the current transfer already are embedded in Transfer 4259 which reshaped SBWC service area in southeast Boise. That transfer was approved in April, 1997, but SBWC filed a "petition to reconsider" the decision. IDWR review of that matter is underway at the state office. Thus, the current transfer can proceed to provide water to the upstream site while the SBWC portion of the right is being reconsidered.

DOCUMENTS

The transfer consists of four pages and five attachments using the transfer pilot form. Note the following details of the application:

1. Pages 3 and 4 form the necessary checklist;
2. Attachment A is T. 4259 filed in 1995 to reconfigure SBWC service area in Boise - as previously noted, SBWC is waiting to see if IDWR will revise that transfer approval. That decision significantly reduced the right but did not recognize the non-irrigation uses (amenity water) requested in T. 4259.
3. Attachment B shows the new P/U at the high school in Idaho City;
4. Attachment C documents that SBWC shares at Huntington Apartments have been relinquished to move those shares upstream to Idaho City while Attachment D depicts the five shares provided for the football field; and
5. Attachment E shows the new P/U is owned by Basin School District #72.

MICROFILMED
APR 13 1999

Other information used in this review and attached includes:

- a. schematic tracing splits of this right;
- b. field map dated 7/7/95 and notes dated 8/16/95 (both resulted from T. 4259 review that I did) regarding the Huntington Apartments site;
- c. the original amended page 1 of T. 4259 to show that the earlier transfer was to be amended in 1995 to cover the school irrigation; that amendment was withdrawn before it could be acted on by IDWR and is now replaced by T. 5084; and
- d. my review memo dated 5/6/97 summarizing the situation just before SBWC placed a hold on this transfer in June, 1997 (good background material).

CURRENT RECORDS AND PROPOSED CHANGE

The transfer was prepared based on the result in T. 4259 in which the right was greatly reduced. If T. 5084 splits the right into C (SBWC) and D (school), T. 4259 once resolved will define SBWC service area within 63-00148C. Currently, SBWC has 3.18 cfs and 716.4 afa to serve 159.2 verified acres in Boise. That is a full allotment of water for the acres described by T. 4259.

SRBA claims will automatically be amended after transfer approvals are issued, thereby codifying the splits. In the end, all of the water and acres verified in T. 4259 and 5084 will be accounted for by split claims. For now, the important thing is that the right is fully claimed in the SRBA. This subject has already been discussed in T. 4259.

Note that a SRBA update of A63-00148A has not been completed due to the pending review of T. 4259. SBWC's other right (63-00150 with junior priority) will most likely be recommended for disallowal in the SRBA since all of SBWC lands are fully covered by senior right 63-00148A. This also was covered in the review of T. 4259.

VERIFICATION AND OTHER ANALYSIS

The entire right 63-00148A for SBWC was verified per T. 4259. Now, the new transfer will take a small portion of that verified use and relocate it upstream under a new priority. A new priority is needed to prevent injury in the upstream setting.

Note that Attachment K in T. 4259 confirmed that the Huntington Apartment site includes 7 acres of "irrigation credit" based on 1987 NAPP information. Also, it appears that apartment development started in 1991. SBWC successfully addressed the forfeiture issue for that site as discussed in my 5/6/97 memo. The water is available to be moved upstream to Idaho City. Ace Chatburn assured me verbally and by his action in resuming the transfer process in T. 5084 that SBWC is not concerned about the loss of this small amount of water from its service area in Boise.

A problem occurs for the Huntington Apartments site in southeast Boise in the current transfer. The site was irrigated until 1991 with SBWC surface water. A

MICROFILMED

APR 13 1999

supplemental ground water irrigation right was obtained in 1991 (63-11519, copy attached). The right was examined in 1992 and licensed in 1993 with a condition of approval requiring full use of surface water. Now, the apartment site is irrigated only with ground water, violating the condition of approval. A letter will be sent to the property owner to document that this problem must be addressed prior to the next irrigation season. This factor does not prevent the transfer from advancing. *

Watermaster comments were received on 6/30/97. The application was advertised in Ada and Boise Counties plus comment letters were sent to concerned parties identified in previous complaints about the football field irrigation. Idaho City and the school district have agreed to the nature of the check-dam to be used by the school for the Elk Creek diversion - see the City's 6/9/97 letter agreeing to remarks on page 2 of the application.

RECOMMENDATIONS

1. The transfer looks approvable.
2. A check-dam for the Elk Creek diversion must not exceed one-half the width of the creek as defined by the normal flow during the irrigation season.

3. Right 63-00148A will be split as follows:

63-00148C SBWC, 3.13 cfs and 704.2 afa for 156.5 acres from 3/15 to 11/15. Note that 2.7 acres for relocation include 12.2 afa (2.7 x 4.5) that decreases to 9.5 afa at its new site (2.7 x 3.5) per IDWR standards; and

63-00148D Basin School District No. 72, .05 cfs and 9.5 afa from 4/15 to 10/15 from Elk Creek tributary to Mores Creek with a priority date of 5-6-1997 for 2.7 acres. Standard irrigation season and diversion volume are applicable.

Note that cfs and afa values are limited to standard decimal places per IDWR convention so some discrepancy may occur due to rounding factors.

4. SRBA claims should not be amended until T. 4259 is resolved. Meanwhile, it would be useful to add a comment to WR and SRBA databases to briefly summarize the situation until the database updates are completed after T. 4259 is settled. A shape file has not been created for this right.

5. Right 63-00148D should include a measuring device that includes the rate of flow and total volume diverted. The school should keep records of water diverted for each irrigation season under this right, and the records should be available to the Boise River Watermaster and IDWR upon request.

BEFORE THE DIRECTOR

IDAHO DEPARTMENT OF WATER RESOURCES

IN THE MATTER OF APPLICATION
FOR TRANSFER OF WATER RIGHT
63-00148 BY THE SOUTH BOISE
WATER COMPANY

TRANSFER NO. 4259

PETITION FOR
RECONSIDERATION

The South Boise Water Company ("Petitioner"), through its attorneys Givens Pursley & Huntley, LLP, hereby petitions the Idaho Department of Water Resources ("Department") for Reconsideration of the Department's Preliminary Order issued on April 8, 1997 in the above-captioned matter. The grounds for this Petition are that:

1. The Preliminary Order improperly reduces the authorized place of use of water right no. 63-00148 to 159.2 acres. Water Right 63-00148 has and continues to be diverted to irrigate at least 279.5 acres within Petitioner's service area.
2. The Preliminary Order improperly reduces the total instantaneous rate of diversion for water right no. 63-00148 to 3.18 cubic feet per second ("cfs") and the total combined annual volume of diversions to 716.4 acre-feet. Water Right 63-00148

MICROFILMED

APR 13 1999

has been diverted, and continues to be diverted, to beneficial uses to the extent of 9.18 cfs by and for the benefit of Petitioner's shareholders.

3. The Preliminary Order fails to include and authorize aesthetic and fish and wildlife enhancement as authorized beneficial uses of Water Right 63-00148.

4. The Preliminary Order fails to contain a reasoned statement in support of the decision, findings of fact or a concise and explicit statement of the underlying facts forming the basis for and supporting the findings.

5. The actual facts do not support the result set forth in the Department's Preliminary Order.

6. The Department's Preliminary Order affects substantial property interests held in trust by Petitioner for its shareholders. However, the Department has improperly proceeded under the contested case procedures of Idaho Code § 67-5201 *et seq.* without providing Petitioner notice and opportunity through hearing, or otherwise, to present evidence concerning the actual facts supporting Petitioner's Application or to learn the basis for the Department's actions.

Petitioner hereby reserves each of its substantive and procedural rights, including the right to state other grounds for reconsideration which may become known to Petitioner, or to withdraw its Application for Transfer.

Petitioner respectfully requests that the Department schedule a conference between Petitioner and the Department at which Petitioner can learn the facts the Department believes support its Preliminary Order, and at which Petitioner may

determine what evidence, if any, may need to be presented at any hearing or otherwise.

RESPECTFULLY SUBMITTED this 22nd day of April, 1997.

CONDITIONS OF APPROVAL AND REMARKS

3. Approval of this transfer in no way grants any right-of-way or easement for use of a delivery system owned by person(s) other than the right owner.
4. The change authorized by this transfer shall be accomplished within one (1) year of the date of this approval.
5. Failure to comply with the conditions of this transfer is cause for the director to issue an order to show cause why the approval of the transfer should not be rescinded.
6. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
7. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
- * 8. The total instantaneous diversion of water from all points of diversion under Transfer No. 4259 shall not exceed 3.18 cfs, nor total combined annual volume of 716.4 af.
9. Use of water under this water right will be regulated by the watermaster of State Water District No. 63, Boise River and tributaries.
10. Approval of this transfer does not authorize any expansion in the utilization of this water right.
11. If in the future additional uses are found to have been made which increase the rate of flow, volume diverted or volume consumptively used under this water right, then the additional uses will be immediately curtailed.

Re: Snake River Basin Adjudication (SRBA) claims review

We are currently reviewing the water right claims filed in the SRBA by all ditch companies and irrigation districts in Ada County prior to preparing our recommendations to the SRBA court. Your claims are part of this review process.

One of the end products resulting from the review process mentioned above will be a map for your organization that will include the land irrigated by your water rights and the outer perimeter boundary of the places of use. You may have already reviewed the boundary and place of use for your water rights with an employee of the department. However, if you have not recently reviewed and returned a map to us please call me at the number below as soon as possible. Establishing the most accurate boundary and place of use for your water rights is a very important initial step in our review process.

The total amount of water we will recommend for your water rights will be based on the standard of one inch (0.02 cubic foot per second) per acre or your historical diversion rate for the actual acres irrigated with your water rights as described in your boundary map. However, it is possible to have additional water for delivery loss within your ditch system and additional water for lands that require more water due to the nature of the soils. We might need additional information from you to quantify the amount of water needed for delivery loss within your canal and ditch system. We might also need from you additional data to support and quantify any excess water in addition to one inch per acre for irrigation that might be necessary.

It is our plan to prepare recommendations for your SRBA claims during the summer of 2003. In order to prepare the most accurate recommendations it's imperative that the boundary and place of use map for your organization be completed before we proceed.

If you need additional information or want to discuss these matters in more detail please call me at the number below.

Cordially,

Mel Schulte

Aesthetic Uses - 63-149A - SBWC.

* The key component in this claim is the subordination clause.

1. Lumber mill ended about 1910 - Barry will provide confirmation of change of use to aesthetic
 2. Power use ended about 1926? - Barry will provide documents to confirm change to aesthetics.
 3. 40 cfs is based on agreement between IDF + G SBWC Co., + River Run - Barry will provide copy
-

4. All other added aesthetic uses by SBWC + BCCC will not be allowed because of expanded use.
 - a - if no irrigation the aesthetic diversion would have to be diverted -
 - b - aesthetics is incidental to the irrigation - don't need a specific component.
 - c - water is not diverted specifically for aesthetic - - - The right is an irrigation right.

SOUTH BOISE WATER COMPANY

ADDITIONAL INFORMATION

DATE: AUGUST 23, 2004

BY: MEL SCHULTE

The main contact for South Boise Water is the company president, Barry Eschen (336-5508). Barry was very helpful in providing information needed in reviewing their claims and is very knowledgeable about the company and delivery system. The firm of Ringert & Clark, Dan Steenson and Bryce Farris, represent South Boise Water.

The boundary and place of use for South Boise Water is an area in Southeast Boise that has experienced a great deal of residential and commercial development through the years. Most of the individual uses are small lawn and garden areas.

The number of acres recommended is the same as the number of acres claimed plus .25 acres missed in the claim. The number of acres claimed is based on the historical number of acres irrigated as described in the company's shareholder records and equals 872.38 acres. The 872.38 acres is pre-1939. Since then the company has adjusted the number to 638.74 assessed acres. Based on either the assessed number of acres or the historical number of acres the company delivers less than one inch per acre and less than one inch per share.

SBWC claimed an aesthetic component in addition to their irrigation component. The aesthetic component was disallowed because the aesthetic use is incidental to the irrigation use and to allow the aesthetic use would be an enlargement.

63-149A is a unique claim. It is based on an accomplished change in use for decreed right 63-149 that was awarded for manufacturing and general power production in the Stewart decree. SBWC contends that part (40 cfs) of the original right has historically been diverted into Loggers Creek since the manufacturing and power production ended in the 1920's. The water diverted for the aesthetic use is supported by a 1989 contract with IDF&G that allows 40 cfs to be provided from IDF&G's storage contract in Lucky Peak Reservoir and diverted through Loggers Creek. The contract provides that the 40 cfs diversion is subordinate to all upstream diversions and subordinate to storage rights upstream. Based on the information provide by the company, it was decided in a meeting with Dave Tuthill, Nick Spencer and Barry Eschen that we could recommend 63-149A with a subordination condition attached.

The company maintains two POD's, one is their main diversion and the second is a back up. Both were verified by GPS.

Acres irrigated for 148C were fine tuned
in the transfer process by Steve L & the
company - additional documents in the SO
vault file.

Does one system (main ditch) serve all?
How many POD's? where?
