

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE STATE OF IDAHO,
IN AND FOR THE COUNTY OF TWIN FALLS

IN RE THE GENERAL ADJUDICATION
OF RIGHTS TO THE USE OF WATER FROM
THE SNAKE RIVER BASIN WATER SYSTEM

CIVIL CASE NUMBER: 39576

Ident. Number 63-150
Date Received: 3/21/1990
Receipt No: W011520
Received By:

AMENDED

**NOTICE OF CLAIM TO A WATER RIGHT
ACQUIRED UNDER STATE LAW**

1. Name of Claimant(s)

SOUTH BOISE WATER CO Phone: (208)336-5508
C/O BARRY ESCHEN PRESIDENT
PO BOX 6005
BOISE ID USA 83707

2. Date of Priority: 06/01/1865

3. Source: BOISE RIVER Trib. to: SNAKE RIVER

4. Point of Diversion:

Township	Range	Section	1/4 of 1/4 of 1/4 Lot	County	Type
03N	03E	19	SW SW SW	ADA	
03N	02E	24	NE NW SE	ADA	

5. Description of diverting works:

Diversions from Boise River: (1) Diversion in 03N, 03E, Sec. 19, commonly known as "Chatburn", consisting of weir and control gate in south bank of Boise River, diverts water to a conveyance commonly known as "Loggers Creek"; (2) Diversions in 03N, 02E, Sec. 24, SE1/4; (a) commonly known as "Chronic" - wing dam and control gate; (b) berm with concrete abutment (these diversions are used as alternates to Chatburn). Rediversions from Loggers Creek: (1) dam commonly known as "Larkey Dam" and control works in 03N, 02E, Sec. 24, NW1/4 into the conveyance commonly known as the "Rossi-Mill Ditch"; (2) pumps in Loggers Creek at various locations in 03N, 02E, Sec. 14, Sec 23 and Sec. 24; and (3) diversion to the conveyance commonly known as the "Meeves 2 Ditch", which leaves Loggers Creek in Sec. 24, SW1/4, NW1/4, NW1/4.

IRRIGATION
AESTHETIC

04/01 10/31 0.8
04/01 10/31 0.8

7. Total Quantity Appropriated is:
0.8 C.F.S.

8. Total consumptive use:

9. Non-irrigation uses: Aesthetic use of this water right occurs in Loggers Creek and the Rossi-Mill Ditch as an alternate use to irrigation.

10. Place of use:

AMENDED
NOTICE OF CLAIM
TO A
WATER RIGHT
ACQUIRED UNDER STATE LAW

Please type or print clearly

1. Name of Claimant (s) South Boise Water Company Phone (208) 336-5508
Mailing Address P.O. Box 6005 c/o Barry Eschen, President Zip 83707

2. Date of Priority (Only one (1) per claim) 6/1/1865

3. Source of water supply (a) Boise River
which is tributary to (b) Snake River

4. a. Location of existing point of diversion is: Township 03N Range 03E Section 19.

SW 1/4 of SW 1/4 of SW 1/4, Govt. Lot, _____ B.M., County of _____ Ada

Additional points of diversion if any: T.03N, R.02E, S.24, NE1/4, NW1/4, SE1/4, B.M., Ada County (2 diversions)
T.03N, R.02E, S.24, SW1/4, NW1/4, NW1/4, B.M., Ada County (rediversion): T.03N, R.02E, S.14, S.23 and S.24, Ada County
(various points of diversion)

b. If instream flow, beginning point of claimed instream flow is:

Township _____ Range _____ Section _____, _____ 1/4 of _____ 1/4 of _____ 1/4,

Govt. Lot _____ B.M., County of _____

ending point is: Township _____ Range _____ Section _____, _____ 1/4 of _____ 1/4 of

_____ 1/4, Govt. Lot _____ B.M., County of _____

5. Description of existing diversion works (Dams, Reservoirs, Ditches, Wells, Pumps, Pipelines, Headgates, Etc),
including the dates of any changes or enlargements in use, the dimensions of the diversion works as constructed
and as enlarged and the depth of each well. Diversions from Boise River: (1) Diversion in T.03N, R.03E, S.19, commonly known as "Chatburn,"
consisting of weir and control gate in south bank of Boise River, diverts water to a conveyance commonly known as "Loggers Creek;" (2)
Diversions in T.03N, R.02E, S.24, SE1/4; (a) commonly known as "Chronic" - wing dam and control gate; (b) berm with concrete abutment (These
diversions are used as alternates to Chatburn.). Rediversions from Loggers Creek: (1) dam commonly known as "Larkey Dam" and control works in
T.03N, R.02E, S.24, NW1/4 into the conveyance commonly known as the "Rossi-Mill Ditch"; (2) pumps in Loggers Creek at various locations in
T.03N, R.02E, S.14, S.23 and S.24; and (3) diversion to the conveyance commonly known as the "Meeves 2 Ditch," which leaves Loggers Creek in
S.24 SW1/4, NW1/4, NW1/4.

6. Water is claimed for the following purposes:

(both dates are inclusive) (cfs) (acre feet)

For Irrigation purposes from 4/1 to 10/31 amount .8 or _____

For Aesthetic purposes from 4/1 to 10/31 amount .8 or _____

For _____ purposes from _____ to _____ amount _____ or _____

For _____ purposes from _____ to _____ amount _____ or _____

7. Total quantity claimed (a) .8 (cfs) and/or (b) _____ (acre feet)

8. Total consumptive use claimed is _____ acre feet per annum.

9. Non-irrigation uses; describe fully (eg. Domestic: Give number of households served; Stockwater: Type and number of livestock Etc.) Aesthetic use of this water right occurs in Loggers Creek and the Rossi-Mill Ditch as an alternate use to irrigation.

10. Description of place of use: See Remarks

(a) If water is for irrigation, indicate acreage in each subdivision in the tabulation below.

(b) If water is used for other purposes, place a symbol of use (example: D for Domestic) in the corresponding place of use below. See instructions for standard symbols.

IDAHO DEPARTMENT OF WATER RESOURCES
PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

RIGHT NUMBER: 63-150

NAME AND ADDRESS: SOUTH BOISE WATER CO
C/O BARRY ESCHEN PRESIDENT
PO BOX 6005
BOISE ID 83707

SOURCE: BOISE RIVER

TRIBUTARY: SNAKE RIVER

QUANTITY: 0.800 CFS

This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and preceding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and preceding to the earliest, shall be reduced to 60 percent of their decreed quantities.

PRIORITY DATE: 06/01/1865

POINT OF DIVERSION:

T03N R02E S24 NENWSE Lot 5 Within ADA County

T03N R03E S19 SWSWSW Lot 6 Within ADA County

PURPOSE AND
PERIOD OF USE:

<u>PURPOSE OF USE</u>	<u>PERIOD OF USE</u>	<u>QUANTITY</u>
IRRIGATION	03/01 11/15	0.800 CFS
Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released for flood control by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoir dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.		

PLACE OF USE:

871.78 ACRES TOTAL

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

THIS RIGHT IS LIMITED TO THE IRRIGATION OF 871.78 ACRES WITHIN THE BOUNDARY OF THE SOUTH BOISE WATER COMPANY.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: Decreed

THIS RIGHT IS DESIGNATED AS NO. 18 IN THE BOISE RIVER WATER MASTERS RECORDS AND THE STEWART DECREE.

THE FOLLOWING RIGHTS ARE ALSO DIVERTED THROUGH POINTS OF DIVERSION DESCRIBED ABOVE: 63-149A, 63-148C, 63-164C, 63-185A, 63-185B, 63-2392C, 63-2392D, 63-9386B.

WATER IS DELIVERED THROUGH THE ROSSI-MILL DITCH AND AN UNNAMED STREAM KNOWN LOCALLY AS LOGGERS CREEK.

Re: Attorney of record filings

Dear Mr. Schulte:

In response to your letter of February 10, 2003, this firm represents the irrigation and drainage districts and canal companies listed below. The Claimant Acknowledgment of Change in Attorney forms for these parties are enclosed.

1. Ballentyne Ditch Company ✓
2. Boise Valley Irrigation Ditch Company ✓
3. Drainage District No. 2 ?
4. Eureka Water Company ✓
5. Farmers' Co-operative Ditch Company
6. South Boise Water Company ✓

We do anticipate receiving additional Claimant Acknowledgment of Change in Attorney forms from several other clients and will forward them to you directly.

Please contact me if you have any questions or comments regarding this matter.

Yours very truly,

S. Bryce Farris

RE: TRANSFER #4259 FOR DECREED RIGHT 63-00148A
(PER REVIEW BY DRT)

A brief summary of this file will be helpful. The transfer was filed in late 1993 to relocate irrigated acres within the company service area plus codify aesthetic uses that apparently occurred as irrigation declined over time as stated in SRBA documentation. The company also filed a pending application for permit no. 63-12079 to cover year-around aesthetic use. The transfer was protested, and unresolved issues remained between the company and protestants.

By early 1995, irrigation and aesthetic uses were quantified via considerable coordinated work between the applicant and IDWR while the transfer remained protested. No additional information to refute IDWR conclusions has been offered to date. The applicant then indicated in August, 1995, that the transfer was to be amended to move a few shares upstream to irrigate the new Idaho City High School football field (split right). An amended version was prepared, involving some field verification etc. by the regional office. However, by late October, 1995, protests were resolved, and the company postponed the amendment option until the original transfer is completed. Everything is now in place to act on the original filing.

All references to an amended version should be stayed until after T.4259 is finalized. For the time being, disregard information noting split portions 63-00148C or D. That will follow after 63-00148A is reconfigured in T.4259. What follows is an updated version of the reviewer's 1993 analysis memo regarding reconfiguration of use within the company service area only.

ANALYSIS FOR TRANSFER NO. 4259

South Boise Water Company ("Company") filed a transfer application for right no. 63-00148A, an irrigation right for 9.18 cfs. Based on SRBA information, Company rights 63-00148A and 63-00150 serve the same lands within the Company service area, although decree information shows that #148A was for unspecified land in T3N R2E and that #150 served two tracts in T3N R2E S.15, a subset of the P/U of #148A. Both rights share the same priority, and this review shows that #148A supplies a complete irrigation and aesthetic allotment to the Company service area.

The fate of right no. 63-00150 will be determined in the SRBA process. It does not appear that this right serves any beneficial purpose, and the right most likely will be recommended for disallowal sometime in the future unless new information is revealed. That, however, is beyond the scope of this transfer.

A summary of application attachments would be helpful. Attachments A through F reflect the applicant's information and the rest are department additions.

MICROFILMED
SEP 27 1996

- Attachment A - Requested P/U for two uses after transfer. This is in addition to 8.6 new acres shown on page 1 of transfer.
- Attachment B - Summary by section and tract for existing irrigation uses, also identifies land to be deleted from service area.
- Attachment C - Map showing service area and tracts with existing irrigation and proposed irrigation as well as land to be deleted.
- Attachment D - Information concerning water agreement for subdivision.
- Attachment E - Copy of Company shares for new subdivision.
- Attachment F - Company's explanation of transfer.
- Attachment G - NAPP photocopy to verify recent irrigated acres.
- Attachment H - Map used in calculating ditch loss, also shows gov't lots.
- Attachment I - Ditch loss calculations with data for Loggers Creek flows; data is from 63-09386 exam (River Run).
- Attachment J - Reviewer's recommended P/U for dual uses after transfer.
- Attachment K - Verification of 7 additional acres in company service area.
- Attachment L - SRBA claims A63-00148A and A63-00150.
- Attachment M - Water District #63 "average year flow" (1980) analysis.
- Attachment N - Summary of verification of aesthetic P/U.

IRRIGATION USE

VERIFICATION OF ACRES

The applicant listed 218.3 acres served in the last five years per Attachment B. Acres per tract were shown. IDWR review found 159.2 acres based on 1987 NAPP photo X 59 NE (original available at Region). Differences centered on three tracts within BSU and one tract between ParkCenter Blvd. and the river (roughly, across from ParkCenter Mall). Department figures are shown in pencil on the right-hand margin of the attachment, and the areas not matching are briefly summarized on page 8 of Attachment B.

Lacking information to the contrary, the 159.2 acre figure will be used for further analysis. The applicant has not been able to supply any information to date demonstrating that more acres should be included.

Acres to no longer receive Company water are listed on pages 2 and 3 of Attachment B (8.6 acres). The water will be moved to 8.6 new acres in Avery Springs Subdivision.

MICROFILMED
SEP 27 1996

RATE OF FLOW INCLUDING CONVEYANCE LOSS

The implied duty of water in the decree is .02 cfs/acre, and 3.18 cfs can be credited to the irrigated land identified by IDWR as follows:

$$.02 \text{ cfs/acre} \times 159.2 \text{ acres} = 3.18 \text{ cfs.}$$

Conveyance loss must be analyzed in two parts due to the nature of the delivery system. Company water is diverted from the river via Loggers Creek with its two P/D. Water is then withdrawn from Loggers Creek via a pipeline originating in SWNE S.24 and also from the Rossi Mill Ditch starting in NWNW S.24. Conveyance loss for the pipeline is not a factor. Loss must first be estimated for Company water conveyed from the river to the head of the Rossi Mill Ditch, and additional loss should be quantified for use of this primary ditch within the service area.

The recent Riverview Ventures (Wood Duck Island, 63-00248, 278, 279) transfer #4286 provided a similar example where loss through a larger diversion was determined (all of Ridenbaugh Canal flow from P/D to point of withdrawal from canal for Wood Duck Island). The best available information to calculate loss via Loggers Creek is exam information from 63-09386 (River Run license) where Loggers Creek capacity was measured as 80.33 cfs. That measurement was made about 300' from the P/D in NWSE S.24. Since that time the situation has changed - Loggers Creek shows two P/D, with the second one located upstream in SWSW S.19. Also see T. 3918 that split 63-00148 into A and B.

To give the Company the benefit of the doubt, let 80.33 cfs be used from the most upstream P/D to the head of the Rossi Mill Ditch for purposes of loss calculations. The Moritz calculation shows a loss of 3.82%. Next, determine loss for the Rossi Mill Ditch where the first headgate is assumed to be about 1/4 mile away (NWNE S.23 P/U from Attachment B), and the remaining ditch length is estimated as about 2.25 miles (ending in NW 1/4 S.15 near BSU). The loss program shows 23% for this ditch carrying the verified 3.18 cfs.

The sum of losses is approximately 27% (3.82 + 22.99). The total amount of irrigation and conveyance loss use for 63-00148A is as follows:

$$3.18 \text{ cfs} \times 1.27 = 4.04 \text{ cfs.}$$

VOLUME OF WATER

The right is not exempt from the 100%-75%-60% cuts in the decree but is old enough to escape cuts to 0% in normal years since the priority date is older than 1870 as noted in the Wood Duck Island transfer #4286. That transfer showed that 1865 Boise River rights are not cut to zero. It therefore becomes unnecessary to calculate the volume diverted based on the number of days of delivery at 100-75-60%. Even at an extended delivery rate of 60%, the volume diverted would exceed the volume required for the land.

Therefore, the limiting factor for diversion volume is the irrigation requirement of 4.5 afa/acre, which should be adjusted for the 27% conveyance loss already noted as shown in the following calculation:

$$4.5 \text{ afa/acre} \times 159.2 \text{ acres} \times 1.27 = 909.8 \text{ afa}$$

It follows that consumptive volume is limited to 557.2 afa using the local consumptive use value of 3.5 afa/acre for 159.2 acres. Irrigation P/U is shown

MICROFILMED
SEP 27 1996

in Attachment J. Other irrigation details are found in Table 1 at the end of this memorandum.

AESTHETIC USE

CHANGE IN NATURE OF USE & SEASON

The applicant wants to codify reduced irrigation use that has changed over time to aesthetic use by virtue of existing ditches found throughout the service area. This change is reflected in SRBA claim no. A63-00148A noted in Attachment L. While this fits the test of common sense, it is problematic to verify and quantify the concept within normal transfer limitations.

Let us start first with what cannot be approved in the application. Aesthetic use outside of the irrigation season cannot be approved. The concurrent application for permit 63-12079 for aesthetic use all year can address the non-irrigation season, at least for the Avery Springs portion of the Company's service area. The P/U for 63-12079 is limited to that subdivision.

It is hard to argue with the idea that water flowing throughout the service area has been enjoyed for aesthetic use by the customers. Verification of where aesthetic use is believed to have occurred is summarized by Attachment N. Some tracts do not have open waterways, therefore the dual uses are not found in all service area locations. Aesthetic P/U is defined in Attachment J.

RATE OF FLOW

Because the Company's portion of the base right was decreed for 9.18 cfs or 459 miner's inches, it is assumed from the decree that at one time 459 acres were irrigated at the rate of one miner's inch per acre. Over time the service area declined to its present size of 159.2 acres, resulting in the flow for 299.8 acres (459 - 159.2) changing from irrigation to aesthetic use.

However, as seen earlier in this memorandum, irrigation with conveyance loss can be awarded 4.04 cfs. The total amount of the right minus the irrigation and loss components leaves 5.14 cfs available for aesthetic use. Note that application no. 63-12079 identifies 2.50 cfs for aesthetic use at Avery Springs Subdivision, a part of the Company service area. It does not seem unreasonable that about twice that amount has been beneficially used for similar use throughout the entire service area.

No reasonable method has been found to determine the amount of water required for aesthetic use -- it remains a subjective term not easily adapted to a "volume required, volume diverted" analysis. A review of delivery data might be helpful in this regard.

According to records of Water District #63, a typical water year (1980) would provide about 8 cfs as an average natural flow delivery to the Rossi Mill Ditch but up to 11 cfs has been delivered to the ditch (June, 1980). Water deliveries for the typical year are compiled in Attachment M. The full right has been delivered in recent typical years, and dual beneficial uses can be seen via verified irrigation and the "common sense" approach for aesthetic use, which is supported by the delivery records.

MICROFILMED
SEP 27 1996

VOLUME OF WATER

What limitations should be placed on aesthetic volume? Consumptive use will be minimal, essentially zero. Diversion volume is another matter. Thus far, 4.04 cfs of the original 9.18 cfs has been awarded to irrigation, leaving 5.14 cfs for aesthetic use. That amount is the "irrigation equivalent" of 257 acres (divide 5.14 cfs by .02 cfs/acre), which is the basis to compute the diversion volume for aesthetic use.

Conveyance loss is already accounted for, and additional loss is not added for this non-consumptive use since it is assumed that essentially all of the aesthetic flow returns to the river in one manner or another. It should be noted that the most downstream area for return flows centers around Capitol Boulevard (Attachment C, service area boundary), thus causing minimal impact to other diverters throughout the Boise River system.

With an irrigation requirement of 4.5 afa/acre, the diversion volume for 257 acres would have been 1156.5 afa. Adding the 909.8 afa for current irrigation needs, a total diversion volume of 2066.3 afa is realized. Due to rounding factors, this compares favorably with the diversion volume of 2065.5 afa for 459 acres (4.5 afa/acre X 459 acres) that were assumed to have been originally served by the 9.18 cfs. Since the realized figure is 0.8 afa greater than the expected value, reduce the diversion volume for aesthetic use by that amount:

$$2066.3 \text{ afa} - 0.8 \text{ afa} = 2065.5 \text{ afa.}$$

Total uses, rates, and volumes are summarized below.

RECOMMENDED USES

A full irrigation compliment, including a 27% loss factor, is provided for 159.2 acres shown to have been irrigated in the five year period prior to the transfer application filing. The rest of the right is converted to aesthetic use based on water district delivery records and the "common sense" test previously mentioned. No expansion of use is found. It does not appear that injury has occurred or will occur since delivery records show that the recommended flow has been delivered for some time and no information has been found indicating that these deliveries have caused problems for other water users. Furthermore, the proposal appears to be consistent with the local public interest and the conservation of water resources within the state.

Approval of the transfer will result in amending SRBA claim A63-00148A so that adjudication information matches the reconfigured water right. Table 1 on the following page summarizes the reviewer's recommendations.

MEMORANDUM

TO: FILE
FROM: STEVE LESTER
DATE: DECEMBER 20, 1991
RE: TRANSFER APPLICATION FOR 63-00148B

The transfer application proposes to split the right to create 63-00148B to allow irrigation of 1/4 acre owned by Douglas and/or Sherry Ladd and located upstream in the Clear Creek drainage. The transferred water will replace permit 63-10528 (in process of being voided).

According to Mr. A. H. Chatburn of the South Boise Water Co., the total amount of water available in the company rights is 10.00 cfs via 9.2 cfs from 63-00148 and .80 cfs from 63-00150. The company was capitalized for 1000 shares. Therefore, 10 cfs / 1000 shares equals .01 cfs/share. The company intends to transfer two shares (.02 cfs) from property owned by Mrs. Martin Nelson and located at 406 Warren St.

The 1/4 acre yard at 406 Warren St. was irrigated by river water in 1990, according to Mr. Chatburn. Currently, a pressurized sprinkler system from a well (municipal or private?) is used to irrigate the lawn (see Transfer Memo No. 6 for continued irrigation of the Boise yard). The irrigated area for the proposed place of use is approximately 1/4 acre (field exam dated 7/2/90 for 63-10528).

Note the limited information in decreed right 63-00148. Additional information is obtained from SRBA Claim A63-00148. This leads to Claim A63-00150, which claims the same 279.5 acres in A63-00148. Because the information in the claims will be evaluated in the adjudication review within the next few years, the current transfer application should focus on 63-00148, the right decreed for S.14 in which 406 Warren is found. The other decreed right is for S.15.

Page 1 of the transfer application only shows 63-00148B since the remainder of the right will not be changed at this time. The resolution of details for 63-00148A (and A63-00150) can wait until adjudication review. Note that adjudication claim information was used to complete page 4, parts B and C. This was done to show the land from which water will be removed.

To analyze the transfer, should the department use a thorough review to determine the available flow, diversion volume, and consumptive volume based on carriage water, water district delivery records, confirmation of total acres irrigated within one of the past five seasons, and so on? A complete analysis of this type was done in the recent South Boise Mutual Irrigation Co., Ltd. transfer (see 63-00242 & 00243, 63-00280 through 00284).

I do not think this type of review is currently warranted. A complete review of the decreed rights can be done in the SRBA. For the time being, it is sufficient to know that equal parcels of land for two shares of water from 63-00148 are involved. The transfer could be conditioned to include future adjustments of rate of flow and/or consumptive use etc. if necessary.

RE: Late fees + Amendment to Claim A63-00148

Mr. Chatburn came in today to request until May 1st to pay his late fees due to assessments being collected in April. At the same time we spoke about what I had mentioned ^{about} ~~that~~ Boise City Canal Co. ~~is~~ ^{has} adj. claims - they changed irrig. use to aesthetics on the water that had been used for irrig. but wasn't now. Aesthetics being for the homes along the canal who have landscaped or have pet ducks, etc. Mr. Chatburn has decided to show aesthetics for an additional 4.4 cfs left over after giving 1" per acre for 280 acres they now serve. I informed him that the priority date maybe a problem, however, ~~that~~ we may only need approx. dates when the irrig. use changed to aesthetics. Also, the Boise River decree allots more than 1" per acre in some areas for river bottom lands & all would be considered during our final review.

Dear Claimant(s):

Enclosed is a copy of the DENIED Extension of Time request form previously submitted in connection with the above referenced Notice of Claim(s).

At the time you filed the Notice of Claim(s) the required filing fee was paid. However, because the claim(s) was postmarked and/or received at a Department of Water Resources office after the filing deadline for the county in which the water right(s) lies, a late fee was required. The late fee is either a \$50 flat fee or 15% of the original filing fee, whichever is greater, for each claim. Your extension request was filed to try and avoid having to pay this late fee, which now must be paid due to the denial of this request. The late fee due for this claim(s) is \$ 100.

Please submit this late fee within 30 days from the date of this letter in order to insure your claim(s) is recommended to the court for decree in the Snake River Basin Adjudication. If this late fee is not received within the 30-day time period, your claim(s) will be returned to you, your original filing fee refunded, and unless we hear from you prior to submitting our report to the court, the water right(s) covered by this claim(s) will be invalid. If there is a problem with submitting this late fee, either a letter or phone call must be received within the 30-day time limit to keep this claim(s) valid. Feel free to contact this office with any questions you may have.

Sincerely,

JAN SHURTE

SOUTH BOISE WATER COMPANY

ADDITIONAL INFORMATION

DATE: AUGUST 23, 2004

BY: MEL SCHULTE

The main contact for South Boise Water is the company president, Barry Eschen (336-5508). Barry was very helpful in providing information needed in reviewing their claims and is very knowledgeable about the company and delivery system. The firm of Ringert & Clark, Dan Steenson and Bryce Farris, represent South Boise Water.

The boundary and place of use for South Boise Water is an area in Southeast Boise that has experienced a great deal of residential and commercial development through the years. Most of the individual uses are small lawn and garden areas.

The number of acres recommended is the same as the number of acres claimed plus .25 acres missed in the claim. The number of acres claimed is based on the historical number of acres irrigated as described in the company's shareholder records and equals 872.38 acres. The 872.38 acres is pre-1939. Since then the company has adjusted the number to 638.74 assessed acres. Based on either the assessed number of acres or the historical number of acres the company delivers less than one inch per acre and less than one inch per share.

SBWC claimed an aesthetic component in addition to their irrigation component. The aesthetic component was disallowed because the aesthetic use is incidental to the irrigation use and to allow the aesthetic use would be an enlargement.

63-149A is a unique claim. It is based on an accomplished change in use for decreed right 63-149 that was awarded for manufacturing and general power production in the Stewart decree. SBWC contends that part (40 cfs) of the original right has historically been diverted into Loggers Creek since the manufacturing and power production ended in the 1920's. The water diverted for the aesthetic use is supported by a 1989 contract with IDF&G that allows 40 cfs to be provided from IDF&G's storage contract in Lucky Peak Reservoir and diverted through Loggers Creek. The contract provides that the 40 cfs diversion is subordinate to all upstream diversions and subordinate to storage rights upstream. Based on the information provide by the company, it was decided in a meeting with Dave Tuthill, Nick Spencer and Barry Eschen that we could recommend 63-149A with a subordination condition attached.

The company maintains two POD's, one is their main diversion and the second is a back up. Both were verified by GPS.

MTS

South Boise Water

1. ~~Exclude Section 9 (Ann Morrison Park & Albion Park) from boundary.~~
2. Add: S11, SWSW = .25 ac. to claim?
3. How many acres? $871.53 = \text{claim?}$ $872.38 = \text{total in shareholder records?}$ $638.74 = \text{current assessment base acres?}$
4. Aesthetics?
 - a - If allowed for year around will cause a problem for water master and IF&G's minimum flow for fish & wildlife.
 - b.

DISTRIBUTION OF DRAINAGE WATER
TO VARIOUS CANALS

CHART NO. 6

DRAINAGE DISTRICT NO. 2

	PERCENT OF TOTAL		PERCENT OF TOTAL
FARMERS UNION	20.99	CANYON COUNTY	12.68
BOISE VALLEY	10.03	BALLENTYNE	3.04
NEW DRY CREEK	9.47	BOISE CITY	3.01
NEW UNION	1.21	CONSUMERS	.11
MIDDLETON CANAL	35.00	LITTLE PIONEER	4.46

THE CREDITS GIVEN ABOVE ARE BASED ON A DRAINAGE FLOW OF 100 SECOND FEET.

JUDGE BRINK ORDERS, AUGUST, 1928, GIVES 90 INCHES ADDITIONAL TO FARMERS UNION.

DRAINAGE DISTRICT NO. 3

	PERCENT OF TOTAL		PERCENT OF TOTAL
BOARD OF CONTROL	49.00	ROSSI MILL	10.00
RIDENBAUGH	24.00	MEEVES	2.00
BUBB (SOUTH BOISE MUTUAL)	15.00		

THE CREDITS GIVEN ARE BASED UPON A DRAINAGE DISCHARGE OF 15 SECOND FEET.

DRAINAGE DISTRICT NO. 4

THURMAN MILL	570.98 INCHES
RIDENBAUGH	51.34 "
WARM SPRINGS SLOUGH	127.68 "

THE CREDITS ABOVE ARE BASED ON A DRAINAGE DISCHARGE OF 750 INCHES, AND THE AMOUNTS ARE A DIRECT COURT ORDER.

Cores irrigated for 148C were fine tuned
 in the transfer process by Steve L & the
 company - additional documents in the SO
 vault file.

Does one system (main ditch) serve all?
 How many POD's? where?
