HOW YOU WILL RECEIVE NOTICES IN THE SNAKE RIVER BASIN ADJUDICATION

All documents filed in the Snake River Basin Adjudication other than notices of claims are filed with the court. Notices of claims to water rights filed in the Snake River Basin Adjudication are filed with the Idaho Department of Water Resources. Copies of all documents filed in the Snake River Basin Adjudication will not be mailed to all parties (claimants) in the adjudication.

By order of the court, any document filed with the court will be mailed only to those parties who may be directly affected by it. A monthly docket sheet will be prepared by the department which contains a summary of all documents filed with the court in the previous month and the dates and locations of hearings scheduled for the following three months. The docket sheet will be filed with the district court clerk in each county within the Snake River Basin in Idaho. Copies of the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying. If you wish to receive a copy of the docket sheet each month, you should mark the appropriate place on your notice of claim form. You will be charged a small annual subscription fee to cover the cost of copying and mailing. Copies of any document listed on the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying.

Copies of all notices of claims filed with the department will be available for inspection from all offices of the department. Copies of the notices of claims may be obtained in person or by mail, but you will be charged for the cost of copying and mailing. (A claimant will not be charged for a copy of his or her own notice of claim, and a person who acquires property with water rights for which a notice of claim was filed will not be charged for a copy of the notice of claim filed by the previous owner.)

After the notices of claims have been reviewed, the director will prepare and file a report with the court. Part 1 of the report will contain the director's recommendations as to each water right claimed under state law. Part 2 of the report will list each federal reserved water right claimed. A number of reports will be prepared, one or more for each sub-basin in the Snake River Basin. When the report for your sub-basin is filed with the court, you will be mailed a notice informing you that the report for your sub-basin has been filed. The notice will be sent to the most recent address shown by the department's files. Attached to the notice will be a copy of those portions of the report describing the water rights you have claimed. If you do not agree with the way your water right is described, you may file an objection to the report with the court. You can also file an objection if you disagree with the way other claimant's water rights are described, and the notice will tell you where a copy of the full report is available for inspection. The notice will tell you when and where to file your objection. The notice of filing for each sub-basin report will also be published state-wide in local newspapers.

MAP X-7 (STAR)

An aerial photograph of a vast agricultural landscape, likely in the western United States, characterized by a dense grid of rectangular fields. A large, irregularly shaped region in the center of the image is highlighted with a red overlay. This red-shaded area is further defined by a blue boundary line. Within the red area, a network of yellow lines is visible, possibly representing irrigation canals or smaller land parcels. The surrounding landscape consists of various shades of green, brown, and blue, indicating different types of terrain and vegetation. In the upper right corner, there are some white rectangular areas that appear to be missing or cut out from the map.

AFFIDAVIT.

TER #4

State of Idaho) SS.
County of Canyon)

J. L. Langford being first duly sworn, upon his oath deposes and says: That affiant is the duly elected, qualified and acting Secretary of the Canyon County Water Company, organized and existing under and by virtue of the laws of the State of Idaho, as a co-operative irrigation corporation, and affiant makes this affidavit for and on behalf of said corporation.

That the said corporation, Canyon County Water Company, is the owner of a decreed water right appurtenant to the following described lands, to-wit:

A strip of land lying between the East line of Canyon County and the Ca on Boise River at Caldwell, Idaho, on the North side along and bordering upon the said Boise River, and lying South of and under the canal system of said Canyon County Water Company, as evidenced by the decree dated the 18th day of January, in the cause entitled Farmer's Co-operative Ditch Co. vs. Riverside Irrigation District, Limited, and others, defendants, brought in the District Court of the then Third, now Seventh, Judicial District of the State of Idaho, in and for Canyon County.

That said corporation, Canyon County Water Company, intends to change the point of diversion, as described in said Decree to the following described point: A point on the North bank of said Boise River Six Hundred Ten feet East from the North end of what is commonly known as the Star Bridge, the said point being located ~~at approximately 900 feet South from the~~ and 900 feet East from the North-west corner of the South-west quarter of the Section 17 in Township 4 North, of Range 1 West from the Boise Meridian, in Ada County, Idaho.

That such change will be made for the following reasons, to-wit:

For the purpose of securing a better heading on the River, where the water can be diverted with less danger and risk of both life and property.

That no one will be injured by such change and that ~~as~~ the said corporation Canyon County Water Company, will make such change at its own risk and expense.

Subscribed and sworn to

J.E. Draper, J.E. Bodle, W.L. Watt & S.L. Spurgeon being first duly sworn, upon their oath deposit and say:

That they ^{are} the owners of a decreed water right appurtenant to the following described land to-wit:
Lots 1, 2, 3, 4, 5, & 6 of the PERNEL RESERVE in Sec. 19, T. 4 N., R. 2 W., B. 1 N.

as evidenced by the decree dated June 18th day of January, 1906
in the cause entitled Farmers' Cooperative Ditch Company, Plaintiff,
vs. River Side Irrigation Company, Defendant, brought
in the district court of the Seventh Judicial District of the State of Idaho, or

That he is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho
No. _____

That he intends to change the point of diversion, as described in said decree or permit, to the following point:

SW 1/4 Sec. 12, T. 4 N. R. 1 W. B. 1 N.

That such change will be made for the following reasons, to-wit: That certain small portions of the tract or lots belonging to the petitioners cannot be irrigated through the ditches and canals of the Canyon County Water Company, Ltd., because of too high elevation.

That no one will be injured by such change and that deponent will make such change at his own risk.
And further deponent saith not.

IRRIGATION	03/01 11/15	0.380 CFS
Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released for flood control by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoir dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.		

PLACE OF USE:

9404 ACRES TOTAL

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

Total acres authorized for irrigation under Rights 63-124N, 63-125G, 63-126E, 63-161X, 63-168B, 63-168D, 63-173, 63-198AC, 63-254, 63-255 63-370 and 63-31937 are reduced by 16.0 acres per approval of Transfer 70947 to a total of 9404 acres.

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

THIS RIGHT IS DESIGNATED AS NO 35 IN THE STEWART DECREE AND THE BOISE RIVER WATER MASTERS RECORDS.

WATER IS DELIVERED THROUGH THE MIDDLETON IRRIGATION ASSOCIATION AND THE MIDDLETON MILL COMPANY DITCH SYSTEM

Dear Mr. Rosti:

The soils information requested regarding water holding capacities of various soils within the Middleton Irrigation Association is as follows:

67.8% are silt loam soils and have a water holding capacity of approximately 2.1 inches per foot;

32.2% are sandy to gravelly loam soils, and have a water holding capacity of approximately 1.5 inches per foot.

Irrigation water allotment for typical silt loam soils is 1.0 inches per acre.

It would be a safe assumption that the sandy, gravelly soils within the Middleton irrigation Association lands would require more frequent irrigation because of the lower water holding capacity. It would further appear that the 1.0 inches per acre allotment for silt loam soils would be insufficient for the sandy, gravelly soils. The irrigation water deficit is approximately 28% on the sandy, gravelly soils which make up 32.2% of the lands in your irrigation project area.

If you need further information please give us a call.

Sincerely,

An aerial photograph of a rural landscape, likely in the western United States, showing a patchwork of agricultural fields. A large, irregularly shaped area in the center is highlighted with a red overlay and a blue border. Within this red area, there are yellow lines and a pattern of small black dots, possibly representing a specific land use or ownership. The surrounding landscape consists of various shades of green, brown, and blue, indicating different types of terrain and vegetation. In the background, there are dark, mountainous hills.

MIDDLETON WATER COMPANY CANAL

Number 527

1974

The Middleton Water Company Canal begins on the north bank of the Boise River in the southwest 1/4 of the southeast 1/4 on Section 12, T4N, R1W. It runs southwesterly through T4N, R1W and across T4N, R2W. On August 26, 1876, settlers in the area incorporated under the name Middleton Canal Company. The purpose of the company centered on construction of a canal to supply water onto lands of stockholders. Initial work on the project began in the fall of 1877 and completion of the canal was accomplished in the spring of 1878. In 1877, the company acquired the right to appropriate and divert 6,400 inches of water under a four-inch pressure. On June 13, 1885, the company underwent a reorganization, and became reincorporated under the name of the Middleton Water Company. Like its predecessor, the chief function of the company was the operation and distribution of the canal's water to the stockholders.

By 1900, the canal extended fifteen miles in length and utilized an estimated flow during the irrigation season of 120 second feet. The cost of the works was placed at \$20,000 with the ownership divided into shares. Each share entitled its holder to ten inches of water to flow over a weir. The annual assessment amounted to 20¢ per acre and could be worked out at \$2 per day per man and \$4 per day per man and team. The system at that time irrigated 3,300 acres.

In 1903, the canal maintained a capacity of 593 second feet and measured fifteen miles in length with twelve miles of laterals. Waters of the company's ditches which united with the Middleton Mill Ditch were divided equally.

The stockholders of the company in 1905 owned 6,963.52 acres under the system. Out of this total, 5,704.5 acres received irrigation water. In 1906, the canal received water right (65) of 5,704 inches.

ADDITIONAL INFORMATION

BY: MEL SCHULTE

The main contact for Middleton Mill Ditch Co is Marty Galvin (585-2922). The main contact for Middleton Irrigation Association is Sam Rosti (286-7685). Attorney Jerry Kiser represents these companies. Both Marty and Sam assisted in review of the boundary and place of use map. Marty Galvin assisted in a field review of the POD, delivery system and delivery loss measurements.

The two companies share the same POD and delivery systems but have different officers and boards of directors.

There are no major issues associated with Middleton Mill/Middleton Irrigation claims. Marty Galvin could express concern with the acre limitation of 9159 acres because the Boise River water masters records list 9580 total acres for the two companies and because there is an excess of 10200 acres within the boundary. I explained to Marty the water master admits that 9580 acres is just an estimate and not very accurate but I don't think Marty is convinced. The 9159 acres is based on the number of acres claimed. They may want to amend their claims to the total digitized acres of 9296 acres. They provided information that shows they have 8703.1 shares plus 142.74 shares within the City of Middleton for a total of 8845.84.

MIDDLETON MILL DITCH COMPANY CANAL

Number 505

1974

The Middleton Mill Ditch Company canal begins on the north bank of the Boise River in T4N, R1W, Section 13. It runs a general westerly course through Middleton and five miles beyond for a total distance of about twenty-seven miles. Throughout its course, the canal utilizes natural sloughs when practicable. The canal services a strip of land twelve miles long and about two miles wide. This land lies north of the Boise River and south of the canal.

The first four miles of the canal were built in 1864 by M. V. Palmer, F. O. Palmer, David Allison, and Alex Allison. These men diverted 1,000 inches of water through the canal. In 1871, the canal and water rights were acquired by J. C. Isaac, H. P. Isaac, and J. M. Steavenson. This crew enlarged and extended the canal fourteen miles from the mill slough to Middleton that year and they diverted 8,000 inches of water under a four-inch pressure through the canal. At this time, 6,000 acres were irrigated by the canal. They further extended the canal one mile in 1872, one-and-one-half miles in 1878, and four miles in 1885.

The extensions built below and west of Middleton were known as the Canyon Hill extensions and covered 2,000 acres.

Around 1877, S. S. Foote and a Mr. Packard bought the Middleton Mill and Ditch. By 1884, Foote was the sole owner. On April 27, 1889, the Middleton Mill Ditch Company was organized and stock distributed to the land owners in proportion to water utilized--one share of stock equaling 1/500 part of water. In 1889, the company books revealed there were 4,341 acres under irrigation. However, according to the company's secretary at that time, an additional 2,700 acres were irrigated without the owners of these lands paying any fees. Consequently in 1889, over 7,000 acres were watered from the canal. With incorporation of the company in 1889, the mill at Middleton was shut down and the 8,000 inches diverted was utilized entirely for irrigation. In 1903, the State Engineer listed the canal's capacity at 282 second feet with thirty-three miles of lateral ditches. In 1906, the canal received water rights (3, 53, and 120) of 3,175 inches.

3. Remarks The addition of this point of diversion with pump will provide a more sophisticated irrigation system. No more water will be diverted from all three points than was initially possible with two points. also, no more water will be diverted from the east-west drain than is flowing in the north-south drain. Note that this transfer replaces transfer #2091 on #63-2406 which was determined to be filed on the wrong right. The fee on that transfer will suffice for this one.
I hereby assert that no one will be injured by such change and the change does not constitute an enlargement in use of the original right. The information contained in this application is true to the best of my knowledge.

An aerial photograph of a large agricultural area, likely in the western United States, characterized by a dense grid of red-colored fields. A blue line traces a long, irregular boundary across the middle of the image. Within this boundary, many smaller areas are outlined in yellow. In the upper right corner, there are three small, separate aerial map fragments. A yellow rectangular box is superimposed on the upper left portion of the main map, containing black text. In the lower right corner, there are some small, faint labels: 'MIDDLETON IRRIGATION DISTRICT', 'POINT OF DIVISION', '2000', and 'TAN, RIVER'.

An aerial photograph of a large agricultural area, likely in the western United States, characterized by a dense grid of rectangular fields. A significant portion of these fields is shaded in red, indicating a specific land use or ownership. A blue line traces a boundary around a central, elongated area of this red-shaded land. Within this blue boundary, a network of yellow lines is visible, possibly representing irrigation canals or smaller land parcels. The surrounding landscape includes some darker, more irregularly shaped areas, possibly forests or undeveloped land, and a winding road or riverbed is visible in the lower-left quadrant. In the upper right, there are smaller, separate rectangular images showing different sections of the land.

DIGITIZED ACRES = 9277.3 + 142.7 = 9420**

An aerial photograph of a vast agricultural landscape, likely in the western United States, characterized by a dense grid of rectangular fields. A large, irregularly shaped area in the upper-middle portion of the image is highlighted with a red overlay and a blue border. Within this red area, a network of yellow lines indicates a specific sub-region or infrastructure. The surrounding landscape shows a mix of green, brown, and grey fields, with some darker, possibly forested or undeveloped areas visible in the background. The overall image has a high-contrast, somewhat pixelated appearance, typical of older digital maps or satellite imagery.
