TRANSFER NO. 5314
WATER RIGHT NO. 63-03445

CONDITIONS OF APPROVAL AND REMARKS

1. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
2. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
3. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
4. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
- * 5. The total instantaneous diversion of water from all points of diversion under Transfer 5314 shall not exceed 4.74 cfs, nor a total combined annual volume of 1066.5 af.
6. After specific notification by the department, the right holder shall measure the diversion or shall enter into an agreement with the department to determine the amount of water diverted from power records and shall annually report the information to the department.
7. If Right 63-03445 is ever regulated, the domestic use which represents an expansion of use of water under this right shall assume a priority date of August 11, 1998.
8. The water used for domestic use under this transfer approval is applied to and irrigates land listed in the place of use to satisfy water quality requirements. Water shall not irrigate growing plants unless the water is first beneficially used for domestic use as authorized by the water right.
9. Domestic use is for a prison facility located within the E1/2NE, S32, T02N, R02E.

Dated this 18th day of December, 1998.

Chief, Water Allocation Bureau

MEMORANDUM

TO: File 63-03445

FROM: Pam Skaggs/State Office

SUBJECT: Transfer 5314

DATE: October 29, 1998

Transfer 5314 adds and changes the points of diversion, and changes the nature, season and place of use under Right 63-03445. One additional existing well is connected to the system and two new wells are being drilled under recently approved drilling permits associated with Permit 63-12296.

The Department of Corrections is building a new prison and will cease irrigation of 112 acres to provide water for domestic and fire protection uses. The domestic wastewater will be disposed of through land application as required to meet water quality standards.

Season of use was modified to year round for domestic and fire protection uses. Diversion volumes were adjusted to meet the proposed needs of the new prison and limited to maximum provided by previous irrigation use. No expansion occurs through this transfer approval.

Recommended conditions include irrigation overlap, multiple points of diversion limits, future annual reporting, future regulation & priority advancement, land application limits, and standard transfer conditions.

Change in Nature of Use Evaluation

				<u>Div. Vol./C.U. Vol.</u>
Before:	4.74 cfs	IRR	237 Acres	1066.5 afa/829.5 afa

IDAHO DEPARTMENT OF WATER RESOURCES
PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

RIGHT NUMBER: 63-3445

NAME AND ADDRESS: STATE OF IDAHO
DEPT OF CORRECTIONS
1299 N ORCHARD STE 110
BOISE ID 83706

SOURCE: GROUND WATER

TRIBUTARY:

QUANTITY: 4.740 CFS
1,066.500 AFY

Rights 63-3271, 63-3445, 63-3487, 63-7025 and 63-8088 when combined shall not exceed a total diversion rate of 18.64 cfs nor a total annual maximum diversion volume of 4860 af for irrigation.

Rights 63-3271, 63-3445, 63-3487, 63-7025, 63-8088, 63-30297 and 63-30298 when combined shall not exceed a total diversion rate of 21.24 cfs, a total annual maximum diversion volume of 6914.5 af for municipal use and irrigation.

PRIORITY DATE: 04/16/1965

POINT OF DIVERSION:

T02N R02E S27 SWSW Within ADA County
T02N R02E S27 NESE Within ADA County
T02N R02E S27 SWSE Within ADA County
T02N R02E S27 SWSE Within ADA County
T02N R02E S30 SESE Within ADA County
T02N R02E S32 NENE Within ADA County
T02N R02E S32 SENE Within ADA County
T02N R02E S32 NWSE Within ADA County
T02N R02E S33 NWNE Within ADA County

PURPOSE AND
PERIOD OF USE:

<u>PURPOSE OF USE</u>	<u>PERIOD OF USE</u>	<u>QUANTITY</u>
IRRIGATION	03/15 11/15	4.740 CFS 1,066.50 AFY

The period of use for the irrigation described in the Transfer No. 67055 approval may be extended to a beginning date of 3/1 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 3/15 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of the approval.

3125 ACRES TOTAL

This right is limited to the irrigation of 237 acres within the place of use described above in a single irrigation season.

11/17/2006

IDAHO DEPARTMENT OF WATER RESOURCES
PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

Rights 63-3271, 63-3445, 63-3487, 63-7025, 63-8088, 63-30297 and 63-30298 when combined are limited to the irrigation of 1,080 acres within the place of use described above in a single irrigation season.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - License

The diversion and use of water described in Transfer 67055 may be subject to additional limitations agreed to by the protestant(s) and the right holder under separate agreement to which the Department is not a party and which may be enforceable by a court of law.

After specific notification by the Department, the right holder shall install suitable measuring devices or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.

Rights 63-3271, 63-3445, 63-3487, 63-7025, 63-8088, 63-30297 and 63-30298 are diverted through the points of diversion described above.

The right holder shall accomplish the change authorized by Transfer No. 67055 within one year of the date of the approval.

Under Transfer approval 67055, the Director retains jurisdiction to require the right holder to install and maintain an acceptable measuring device(s), including data logger(s), at the dedicated distribution lines to the authorized place of use for rights enumerated in the transfer.

MEMORANDUM

TO: GARY SPACKMAN AND NORM YOUNG

FROM: STEVE LESTER *SL*

DATE: JULY 30, 1998

RE: DEPT. OF CORRECTIONS APPLICATIONS

This memo serves to clarify to newest action by the Dept. of Corrections (IDOC) in anticipation of requests for immediate pumping for construction work. The applicant will be forwarding a letter very soon requesting immediate authorization for the uses proposed in these two filings. Also note that IDOC, or at least Pat Donaldson's office, is in the midst of relocating to the Syringa Bank building. Attached is an original application for a temporary right plus a copy of a transfer application, both for the new prison project. The temporary right is forwarded for your consideration while the transfer will be advertised as soon as possible unless something occurs to prevent that.

IDOC needs water for new prison construction while amended application 63-12296 is being considered for approval. That application proposes two new wells in E 1/2 NE 1/4 Section 32 for the new prison in the same tracts. If the new wells are authorized to be drilled and used right away in 63-12296, the temporary right plus the transfer application will not be needed.

A higher quality water than normally found in irrigation wells is needed for some of the construction work. Therefore, a temporary right from existing IDOC Well #3 is requested. This will provide not more than 10,000 gallons/day.

The transfer, also conceived as a temporary measure, to change part of the irrigation in 63-03445 will provide up to 500,000 gallons/day via existing IDOC Well #5 for the other construction needs. Pat acknowledged that this is a lot of water for such work. A large quantity is anticipated in the early phases of construction with a significantly diminished amount needed as time goes by.

It appears that the temporary appropriation can be approved without delay. The transfer is another matter. See the attached diagrams for "before and after" comparisons of right 63-03445. The right was licensed for Well #2 for 237 acres in Section 32. Seventy-eight acres are proposed to be retired, providing up to 1.56 cfs / 351 afa for construction purposes (labeled as "domestic" in the transfer for lack of a better term and to be consistent with the proposed use in 63-12296).

Information has not been provided to compute the total volume of water to be diverted and/or consumed in the construction process. Consider the following:

500,000 gpd = 1.53 af/day

78 acres to be retired includes up to 351 afa

351 af / 1.53 af/day = 229 days of non-irrigation use possible.

IDOC Applications
July 30, 1998
Page 2

It is hard to imagine that construction use will be more consumptive than irrigation use. It appears that an expansion will not occur during the construction process while 63-12296 is under consideration. Note that IDWR's 1994 I-R photo and SRBA field work confirm irrigation in the current P/U for the license.

The right is claimed as licensed except that Well #5 has been included. Ron Howerton's SRBA field findings (his excellent draft of conclusions, maps etc. is available at Western) found a PPOU for this license, license 63-08088 and expansion claim A63-30296. While it is possible to base the transfer on the draft PPOU recommendation, the SRBA claims have not been amended yet to reflect that.

I think it is less cumbersome to base the transfer on the licensed right but include Well #5 for this temporary arrangement. When the dust settles, so to speak, IDOC can consider a more permanent transfer for the 78 ± acre portion of 63-03445. Then new SRBA recommendations can be made to incorporate such actions. It seems premature to get bogged down in the SRBA possibilities at this time.

FIRE PROTECTION same as DOMESTICConditions of Approval:

1. R65 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
2. T07 The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
3. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
4. T09 Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

Remarks:

1. General The total instantaneous diversion of water from all points of diversion under Transfer 5314 shall not exceed 4.74 cfs, nor a total combined annual volume of 1066.5 af.
After specific notification by the department, the right holder shall measure the diversion or shall enter into an agreement with the department to determine the amount of water diverted from power records and shall annually report the information to the department.
If Right 63-03445 is ever regulated, the domestic use which represents an expansion of use of water under this right shall assume a priority date of August 11, 1998.
The water used for domestic use under this transfer approval is applied to and irrigates land listed in the place of use to satisfy water quality requirements. Water shall not irrigate growing plants unless the water is first beneficially used for domestic use as authorized by the water right.
Domestic use is for a prison facility located within the E1/2NE, S32, T02N, R02E.

Comments:

1. PSKAGGS 10/28/1998 TRANSFER 5314

Comment: Transfer 5314 adds & changes points of diversion, and changes the nature, season and place of use under Right 63-03445.

2. PSKAGGS 12/18/1998 AMENDED APPROVAL OF TRANSFER 5314

Comment: Amended approval with modified conditions signed 12-18-98.

FIELD EXAM NOTES

AGENT: Ron Howerton

FX October 11, 1995 & October 18, 1995

Accompanied by: Mel Schulte, Roger Vitek and Kyle Woodland on October 11, 1995

2nd FX October 18, 1995

Accompanied by: Mel Schulte, Don Gillis

Covered irrigation from DOC wells #2 & #5, Dairy & Meat Packing Plant

Revised Date: December 27, 1995

PERSONS OF CONTACT:

1. Roger Vitek; Expert for Domestic information. 338-1635 ext 380 or pager # 384-2659
 2. Victor Van Durme; Construction Supervisor, Roger's immediate supervisor, has well use figures and obtained population figures for the DOC. 336-0740 ext 5170, Fax 334-2758
 3. Kyle Woodland; Expert for waste water application to lands. Phone 336-1260 (Roger introduced and Kyle came with us for most of this FX Oct. 11, 1995).
 4. Don Gillis; Expert for most of the farm management (Roger introduced) set up appointment for October 18, 1995. (Farm manager) Phone 334-2815
- * The 1994 well data sheet shows the amount of water used for 2101 total of inmates plus staff. ((VVD))
 - * The current population at DOC is 1710 inmates and 567 staff. Total population is 2277. ((VVD))
 - * The projected population in 3-5 years is approximately 3000 inmates and 700 staff. ((VVD))

DOC WELL #1: A63-03271

1. DOC well #1 is being considered for refitting to change from a gravity system to a pressurized system.

DEPARTMENT OF CORRECTIONS (DOC)

FIELD EXAM NOTES

2. Wheel lines are now used as primary system from pump back system to rid of waste water, which is the primary source, from the DOC sewage ponds. Pasture grass is the crop. No Ten Mile Creek Overlap.
3. Uses are irrigation as claimed however, a change in POU occurred, need evidence of date of change to additional acres in the NWNW, SWNE of S27. No expansion found. ((1968)) DG
4. Roger said may want to use this well for domestic back-up in future.
5. 200 HP, US motor, serial # 1272210.
6. Well located in the NESE, S27, T2N, R2E.
7. Evidence shown by affidavit dated 21 November 1995, submitted by Don Gillis.

Recommendations:

- A. Irrigation: The POU of this well is receiving water from land application of waste water from the sewage lagoons. The newest pond, DOC pond #7, is not shown on our USGS 1992 thus the change was after 7-31-1987. IDWR map Y9. (Reduces 16 acres of irrigation).
- * These acres could be transferred however, the license was for 228 acres for 2.92 CFS for 0.013/acre. = 1/2 inch plus.
- * My FX found 163.5 acres, now which could be recommended in the SRBA for the same licensed amount of 2.92 CFS for almost a full inch (0.02) per acre in which would be the maximum allowed for this right. = 0.018/acre = 3/4 inch plus.
- * Thus, I don't recommend that they pursue a transfer for those acres. The amount of water would be about enough for 10 acres. The license may be better to be left alone and would be a stronger right later to file a transfer of from, with 3/4 inch plus to other lands. This would come if DOC wanted to stop irrigating portions of the current POU and only use their land application irrigation water on.

DEPARTMENT OF CORRECTIONS (DOC)

FIELD EXAM NOTES

DOC WELL #2: A63-03445

1. System for irrigation is wheel lines and underground piping.
2. 500 HP G.E. motor, model # could not be read.
3. Well located in the NWSE, S32, T2N, R2E. The License had the well located in the NESE, probably due to that this well is so close to the $\frac{1}{4}$ line. I used the NAPP map, ASCS and the DOC maps to determine the location along with the field verification in deciding this recommendation.
4. New acres not covered by any license appear in S32 in the NWNW, NENW & NENE. Other new acres not covered are in S31 in the NENE. Acres covered by previous licenses that are not used anymore may cover some or all. Some of these acres not irrigated appear to be in the NWSE, NESE, SWSE & SESE of S29. Evidence of the date of change is needed. ((1977)) DG
5. Irrigation wells 2 and 5 are used to back up each other for all irrigated acres? Need evidence for the date they were valved together. ((1978)) DG
6. Evidence shown by affidavit dated 21 November 1995, submitted by Don Gillis.

Recommendations:

- A. Irrigation: PPOU recommended with expansion claim and application that can be withdrawn if expansion claim is approved.
- B. Total CFS: Same as total licensed CFS for both wells #2 & #5 @ 9.54 CFS for the expanded acre total of 582.

DOC WELL #3: A63-03487

1. Main well for domestic use, covers 600 people.
2. 500 HP, US motor, serial # 7846-T03S268R105R-2, pressure @ 52 PSI.
3. Valved from well #4 as a back-up source.
4. Water level at 496. RV
5. Uses are domestic, irrigation, fire protection, stock use also, but not covered by this license.
6. 300,000 gallon domestic storage tank & 1.5 million gallon fire protection storage tank. RV
7. Well located in the SWSWSW, S27, T2N, R2E.
8. Evidence is needed to support the date that DOC well # 4 was hooked up to DOC well # 3 for backup? ((1978)) DG
9. Evidence shown by affidavit dated 21 November 1995, submitted by Don Gillis.

Recommendations:

- A. Irrigation: Licensed for an inch per acre, found 130 irrigated acres, acres changed but not to new tracts of land thus, no accomplished date of transfer needed for irrigation. Can recommend found acres at 2.60 CFS @ 0.02 CFS/ACRE.
- B. Domestic: Recommended for 600 people @ 1.11 CFS.
- C. Fire protection: Recommended at system capacity @ 5.40 CFS.

DEPARTMENT OF CORRECTIONS (DOC)

FIELD EXAM NOTES

DOC WELL #5: A63-08088

1. System for irrigation is wheel lines and underground piping.
2. 500 HP G.E. motor, model # 5K6326XC400A
3. Well located in the SESE, S30, T2N, R2E.
4. New acres not covered by any license appear in S32 in the NWNW, NENW & NENE. Other new acres not covered are in S31 in the NENE. Acres covered by previous licenses that are not used anymore may cover some or all. Some of these acres not irrigated appear to be in the NWSE, NESE, SWSE & SESE of S29. Evidence of the date of change is needed. ((1977)) DG
5. Irrigation wells 2 and 5 are used to back up each other for all irrigated acres? ((1978)) DG
6. Evidence shown by affidavit dated 21 November 1995, submitted by Don Gillis

Recommendations:

- A. Irrigation: PPOU recommended with expansion claim and application that can be withdrawn if expansion claim is approved.
- B. Total CFS: Same as total licensed CFS for both wells #2 & #5 @ 9.54 CFS for the expanded acre total of 582.

DOC WELL #6: TESTING BY BSU

1. Not used, located in the NWNWNE, S33, T2N, R2E, possible new use for additional backup for DOC wells #3 & #4.

DEPARTMENT OF CORRECTIONS (DOC)

FIELD EXAM NOTES

RECOMMENDATIONS FOR NEW FILINGS:

1. Two BENEFICIAL USE CLAIMS are recommended to be filed from DOC wells #3 & #4. One for the DAIRY uses and one for the MEAT PACKING PLANT.
 - * Date DAIRY USE started. ((AUGUST 1977)) Less than 13,000 GPD are used. SEE DAIRY LOTUS PRINTOUT. Wells, ((#3 & #4)) DG
 - * The water uses in the MEAT PACKING PLANT are less than 2500 GPD. Date was it started? ((AUGUST 1977)) Wells, ((#3 & #4)) DG
2. One EXPANSION CLAIM and one APPLICATION FOR PERMIT is recommended to cover 33 additional irrigated acres not covered by the licenses from DOC wells #2 & #5.
3. One APPLICATION FOR PERMIT is recommended to be filed to cover future growth of population and irrigation. From DOC wells #3, #4 & #6.
 - * Several acre amounts of irrigation were found around the compound. The irrigation is not covered by any license.
 - * Any one specific date would be suspect for one date of change or expansion for these new acres.
 - * The DOC is continuously adding new buildings. Then, adding small amounts of lawn to these building areas.
 - * Thus, none of this expansion should be considered for accomplished transfer.
 - * This new application is recommended to catch all of these small amounts of irrigation and not be considered a part of the existing licenses.

FIELD EXAM CONVERSATION MEMO

DATE OF MEMO: September 26, 1995

ADJ. NO(S): A63-3271, A63-03435, A63-3487, A63-7025 & A63-8088

NAME OF CONTACT: ROGER VITEK, DEPT. OF CORRECTIONS

PHONE NO: 338-1635 EXT 380 OR PAGER 384-2659

AGENT: RON HOWERTON

DATE SET FOR FIELD EXAM: OCTOBER 11, 1995 09:00 MEET AT GATE

LOCATION: DOC-SOUTH OF GOWEN FIELD

- COMMENTS:
1. THIS FX WILL HELP DETERMINE WHAT IS NEEDED FOR A NEW APPLICATION FOR PERMIT THE DOC MAY NEED TO COVER IT'S CURRENT USES INCLUDING DOMESTIC AND IRRIGATION USES.
 2. ALSO TO PREPARE A NEW APPLICATION FOR ANY ADDITIONAL FUTURE USES.
 3. BOTTOM LINE SRBA RECOMMENDATIONS FOR EXISTING RIGHTS.

TYPE OF SYSTEM: IRRIGATION IS ALL SPRINKLERS, DOMESTIC AMOUNT FOR THE INSTITUTION INCLUDES STAFF, WHICH APPEARS TO BE MORE THAN WHAT IS ON PAPER NOW.

September 18, 1995

CUSTOMER

ROGER VITEK

SUBJECT: a. Amend claims A63-03487 & A63-07025 to show both wells are used as backups & what proof is needed to submit for date of change.

b. Also claims A63-03445 & A63-08088 need proof of date of change as above. Claims already showed both wells, no need to amend.

1. Roger came in today to find out more of what needed to be done on the above claims.
2. Roger gave me the go ahead to make temporary claim files to amend A63-03487 & A63-07025 to show 2 wells. When I complete that, I can call him and he will get the appropriate person to sign the amended claims.
3. After this is done I will schedule a field exam to verify this change. He said the change was before 1987, so proof of the date of change will need to be shown on all four rights for recommendation in the SRBA.
4. We also discussed that additional volume occurs with the addition of new space for inmates need to be covered as future expansion continues. This will need to be addressed by filing new application(s) per system. I told Roger that I would look at the amounts covered and give him a total now covered under the current rights. Then, he could relay that information back to the Dept of Corrections for a new application to cover the additional volume and/or CFS.
5. We also discussed the dairy use. This appears to be an expansion of license A63-03487. However, it appears to be an exempt use under 42-111a.

CUSTOMER ROGER VITEK

SUBJECT: Well's used as back-up's

1. The first situation was that wells 2 & 5 are hooked up as so they are back-up wells for each other. Evidence needs to be shown to support the date of change. The claim's don't need to be amended however, because it was claimed that way. Claims (A63-03445 & A63-08088)
2. The second situation is the same for wells 3 & 4. Evidence needs to be shown to support the date of change. But, both of the claims need to be amended to show both P/D's. Also, well # 3 claimed stock as a use, we cannot add this to the license, but they might be able to claim it as a beneficial use or use a domestic exclusion. Claims (A63-3487 & A63-07025)
3. Well 1, had stockwater use on the License, but not listed on SRBA claim. Claim (A63-03271)
4. He will come in tomorrow, Friday the 15th of September, with some evidence for the date the systems were used as back-ups.
5. Claims will need to be amended by authorized signature "T" file's can be made and mailed back.

TRANSFER NO. 5314
WATER RIGHT NO. 63-03445

CONDITIONS OF APPROVAL AND REMARKS

1. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
2. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
3. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
4. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
- * 5. The total instantaneous diversion of water from all points of diversion under Transfer 5314 shall not exceed 4.74 cfs, nor a total combined annual volume of 1066.5 af.
6. After specific notification by the department, the right holder shall measure the diversion or shall enter into an agreement with the department to determine the amount of water diverted from power records and shall annually report the information to the department.
7. If Right 63-03445 is ever regulated, the domestic use under this right shall assume a priority date of August 11, 1998.
8. The water used for domestic use under this transfer approval is applied to and irrigates land listed in the place of use to satisfy water quality requirements. Water shall not irrigate growing plants unless the water is first beneficially used for domestic use as authorized by the water right.
9. Domestic use is for a prison facility located within the E1/2NE, S32, T02N, R02E.

Dated this 29th day of October, 1998.

Chief, Water Allocation Bureau

MEMORANDUM

TO: File 63-03445

FROM: Pam Skaggs/State Office

SUBJECT: Transfer 5314

DATE: October 29, 1998

Transfer 5314 adds and changes the points of diversion, and changes the nature, season and place of use under Right 63-03445. One additional existing well is connected to the system and two new wells are being drilled under recently approved drilling permits associated with Permit 63-12296.

The Department of Corrections is building a new prison and will cease irrigation of 112 acres to provide water for domestic and fire protection uses. The domestic wastewater will be disposed of through land application as required to meet water quality standards.

Season of use was modified to year round for domestic and fire protection uses. Diversion volumes were adjusted to meet the proposed needs of the new prison and limited to maximum provided by previous irrigation use. No expansion occurs through this transfer approval.

Recommended conditions include irrigation overlap, multiple points of diversion limits, future annual reporting, future regulation & priority advancement, land application limits, and standard transfer conditions.

Change in Nature of Use Evaluation

				<u>Div. Vol./C.U. Vol.</u>
Before:	4.74 cfs	IRR	237 Acres	1066.5 afa/829.5 afa

MEMORANDUM

To: Water right no. 63-03445 (transfer no. 5314); Application for water right no. 63-12296; both in the name of the Idaho Dept. of Corrections
From: Gary Spackman *Gary*
Date: September 25, 1998

Re: **Analysis of the filings and conditions of approval**

In 1995, the Department of Corrections (Corrections) filed application to appropriate water no. 63-12296 for a new prison enlargement to be located near the existing state prison off of Pleasant Valley Road. The application was protested by United Water Idaho (United Water). The application was amended and republished. Because Corrections was anxious to construct the wells proposed by the application, Corrections also filed an application for transfer of an existing water right, hoping that it could be approved faster than the application for a new water right. It, too, was protested by United Water. As a result, both applications propose some overlapping component of the other.

United Water withdrew its protests to the application for transfer and the application for a new water right. Both applications can now be processed.

Corrections stated during the preparation of the application for transfer that, once the new water right application is approved, Corrections might want to transfer water right no. 63-12296 back to an irrigation water right. I recognize that the application for transfer was filed as an afterthought, and will analyze application to appropriate water no. 63-12296 as if there are no other water rights appurtenant to the lands upon which the application for transfer proposes as a place of use.

Application for transfer no. 5314 (Water right no. 63-03445)

Steve Lester's memo dated August 18, 1998 clearly explains the transfer proposal, and I incorporate his analysis by reference. I will compare the beginning and ending descriptions of the water right with other similar applications we have considered in the past.

Application for transfer no. 5314 proposes to add two beneficial uses of water (domestic and fire protection) to water right no. 63-03445. IDWR has traditionally required that the irrigation water right must be reduced by the quantity of water that will be diverted for the new use, even if the new use will be nonconsumptive. In Steve's analysis, Corrections proposes to reduce the irrigated acres from 237 acres to 125 acres, fallowing 112 acres. On the heels of the proposal to reduce the number of irrigated acres, Corrections then states that it will land apply the domestic water to as many as 200 acres of land. The net result of the transfer will be to add beneficial uses of domestic and fire protection and add 88 irrigated acres to water right no. 63-

03445, resulting in an enlargement of use.

To prevent an enlargement of use, I propose the following conditions:

1. If this water right is ever regulated, the domestic use under this right shall assume a priority date of August 11, 1998. (The date the application was filed).
2. The total number of acres irrigated or to which water is land applied shall not exceed 237 acres in any calendar year.
3. (046)
4. If this water right is transferred within five years after this application for transfer is approved, the transfer shall not be limited by its relationship to permit no. 63-12296.

Application to Appropriate Water no. 63-12296

I propose approving application no. 63-12296, but recognize that it is not supplemental to water right no. 63-03445 for a period of five years from the date of final approval. I recommend the following condition of approval:

1. This right and water right no. 63-03445 provide water to the new state prison addition. This permit may supply all the water for the new prison addition, however, if water right no. 63-03445 is transferred for another use within five years after the date of final approval of this application.
2. Water diverted under this right is considered to be fully consumed.

MEMORANDUM

TO: FILE

FROM: STEVE LESTER 

DATE: AUGUST 18, 1998

RE: DEPT. OF CORRECTIONS (DOC) TRANSFER, RIGHT 63-03445

This memo replaces the one dated July 30, 1998 which was based on the first version of the transfer application. That version proposed a temporary change to provide water to build but not to run the new prison. The earlier memo with its "before and after" diagram is useful background information before looking at the latest proposal.

The new transfer application proposes to retire 112 acres irrigated by ground water to provide water to build the new facility and for up to 75% of the water needed for total build-out at the new prison.

DOCUMENTS

The application consists of 7 pages and 1 attachment utilizing the transfer pilot program form. Note the location of the following application items:

Pg. 3 & 4 - checklist to advise applicant in filing

Pg. 6 & 7 - water right and adjudication records

Attach. A - map showing uses after transfer; this is from IDWR's 1994 I-R 7.5' scale.

The application was prepared via many calls, visits and faxes involving the applicant (contact is Pat Donaldson), applicant's attorney Richard Burleigh, and IDWR.

Other information used in this review includes the worksheet and a copy of the draft SRBA findings (both attached) plus overlap information noted in the transfer file.

CURRENT RECORDS & PROPOSED CHANGE

The current license includes DOC well #2 with its full allotment of water to irrigate 237 acres. This is the only recorded right for the acres. The well site is mistakenly shown in the NESE and can be corrected as the NWSE per the 1995 SRBA field investigation. SRBA field work took place when it appeared that SRBA recommendations were close to being made; that schedule has since been revised.

The SRBA claim matches the license including the incorrect P/D. The claim also includes DOC well #5, which is the licensed well for right 63-08088 for other acres. Note that wells 2 and 5 also serve expansion claim A63-30296 discussed

in the next section of this memo.

All of the licensed acres in NENE, SENE and NESE Section 32 will be retired except for five residual acres to cover landscaping irrigation in/near the new prison to be built in NENE and SENE. Two new wells will be drilled in the prison tracts to serve the prison, and existing wells 2 and 5 will be used to some degree in the construction and service aspects of the project, including irrigation use. Waste water from the prison will be land applied in the NW 1/4 and NESE Section 32. This is listed as "domestic" on page 1 of the application as suggested by IDWR's interim waste water policy.

The plan will deliver about 75% of the total build-out water needs for the new prison. Temporary right TP-63-22 from DOC well #3 (P/D for separate rights not associated with licensed or proposed P/U) will provide a minor amount of construction water while this transfer will provide the balance to build the prison. A copy of the temporary right is attached.

VERIFICATION & OTHER ANALYSIS

Ron Howerton's excellent 1995 draft SRBA summary (attached) documented that DOC wells 2 and 5 are joined in a common system serving 582 acres. That includes the acres licensed in 63-03445 and 63-08088 plus 33 acres in expansion claim A63-30296. See pages 4, 5, 10 and 11 from the 1995 draft. Page 5 of the draft charts the licensed and tentative SRBA acreage comparisons. Pages 4 and 10 discuss 63-03445 and 63-08088, respectively. Page 11 summarizes steps to be taken (as of 1995) by DOC.

The important conclusion at this time is that 237 acres were verified through 1987 by the draft SRBA summary. Very minor discrepancies were found in NENE and NWSE for 63-03445 but the SRBA total equals the licensed total. The same acres remain verified in the last five years per Application Attachment A, the 1994 I-R map. Therefore, the licensed acres are available for transfer without any forfeiture.

As noted in the July 30 memo, it is recommended that the transfer proceed on the licensed record instead of delving into the more complex PPOU suggested in the draft SRBA findings. The latter option is overly complex for the current need. Also, amended SRBA claims to reflect the PPOU have not been filed yet. It is preferable to use the license record, complete the transfer process, and then let DOC amend its SRBA claims later to craft the PPOU for wells 2 and 5 for use in Sections 29, 30, 31 and 32 (PPOU). The minor acreage discrepancy is not significant enough to worry about at this time - let 237 acres be recognized and re-configured in the transfer. Later, let the SRBA cover the minor mismatches, e.g.. minus 1 acre in NWSE when comparing the license and PPOU.

The remaining 25% of the full water needed for the new prison complex might be provided by pending application 63-12296, if amended, and/or by another transfer at a later date. It is acceptable to put off this question for now. The attached worksheet shows that 112 acres can provide 75% of the water needed for the total project. This will include water to build and operate the new prison by making good use of a senior priority. Not enough information is available to analyze the consumptive use impact of land application of waste water. However, it is hard to imagine that such use would exceed the

consumptive use for 112 acres of irrigation.

Recall that permit 63-12297 covered pre-1987 development at the *existing prison*, while application 63-12296 originally was intended for post-1987 development that had been completed by 1995 plus future growth at the *existing prison*. All that has changed. The permit lapsed but is duplicated at least in part by expansion claim A63-30296. The application for permit was amended to cover the new prison site, and it may be revised again if necessary. As a tangent to the transfer application, water right/adjudication coverage at the existing prison site should be explored in more detail. DOC recently indicated that this will soon be done. These factors do not impede the transfer application for 63-03445.

RECOMMENDATIONS

1. The transfer looks approvable. Transfer approval will change the SRBA claim, which can be amended later if DOC proceeds with a PPOU involving this right. No SRBA shape file has been created yet.
2. Forfeiture is not observed in the SRBA or the current water right scenarios.
3. It is assumed that ownership and related documentation is not applicable for state land in this proposal.
4. The two new wells to be drilled should meet public water supply standards.
5. Land application of waste water should comply with DEQ standards.
6. DOC should meet with IDWR to sort out the water right/SRBA coverage for the existing prison site. Application 63-12296 for the new prison site can also be discussed to see if it should be amended. DOC has contacted Western Region to initiate such a meeting.
7. IDWR should expedite transfer processing as much as possible.

APPLICATION FOR TRANSFER OF WATER RIGHT CHANGE IN NATURE OF USE DESCRIPTION PART 3

A. CHANGE IN NATURE OF USE

1. New Nature of Use	Period of Use	Diversion Rate (cfs)	Annual Diversion Volume (acre-feet)	Annual Consumptive Use Volume (acre-feet)
<u>Domestic</u>	<u>1/1 to 12/31</u>	<u>~~1.56~~ 2.24</u>	<u>504.1</u>	<u>Not to exceed 392</u>
<u>Fire Protection</u>	<u>1/1 to 12/31</u>	<u>4.94</u>	<u>—</u>	<u>—</u>
	<u>to</u>			

2. ☐ If present water use is other than irrigation, attach an estimate of the annual volume of water that has been consumptively used. Also, provide justification for the estimate.
3. ☐ Attach copy of design report or system design supporting required water flow rates and volumes for the new use. Describe attachment(s):

The prison is to be constructed w/ capacity of beds requiring 600,000
gallons per day. Construction needs require 500,000 gallons per day

4. If water or waste will be discharged from project, describe quantity, quality and location of the discharge:

Waste water will be land applied per DEQ requirements and
will result in 100% consumptive use of the water.

5. Describe measures that will be taken to prevent impacts to other water uses and water users:

No impacts are anticipated

* 112 Acres retired to provide up to
 450,000 gpd for prison complex.
 Add'l. 150,000 gpd will be provided via
 other water right actions.

LICENSE OF WATER RIGHT

License of Water Right No. 32333/63-3445 Priority April 16, 1965 Amount 4.74 cfs

THIS IS TO CERTIFY, that the Idaho State Penitentiary
of Boise, Idaho, has complied with the terms and conditions of Permit
No. 32333/63-3445 issued pursuant to Application for Permit dated April 16, 1965,
and has submitted proof to the Department of Water Administration on December 22, 1969,
that he has applied water to a beneficial use; an examination by the Department indicates that the
works have a capacity of 6.19 cfs, and that the water has in fact been applied to a
beneficial use; a right to the use of water from a ground water source

tributary of _____, is hereby confirmed in the following amounts:
Amount 4.74 cfs for Irrigation from March 15 to Nov. 15 (both dates inclusive)
Amount _____ for _____ from _____ to _____ (both dates inclusive)
Amount _____ for _____ from _____ to _____ (both dates inclusive)
Subject, however, to the condition that no more than 4.74 cfs of water be diverted at
any one time, said waters to be diverted within the _____

NE1SE1 Sec. 32, Twp. 2 N, Rge. 2 E, B. M.

in the county of Ada; and that the amount of water so diverted and to which such
right is entitled and confirmed is for the purposes aforesaid and is limited to the amount which can
actually be beneficially used and shall not exceed 1,066.5 acre feet per year or
4.5 acre feet per acre.

Description and location of place of use:
