HOW YOU WILL RECEIVE NOTICES IN THE SNAKE RIVER BASIN ADJUDICATION

All documents filed in the Snake River Basin Adjudication other than notices of claims are filed with the court. Notices of claims to water rights filed in the Snake River Basin Adjudication are filed with the Idaho Department of Water Resources. Copies of all documents filed in the Snake River Basin Adjudication will not be mailed to all parties (claimants) in the adjudication.

By order of the court, any document filed with the court will be mailed only to those parties who may be directly affected by it. A monthly docket sheet will be prepared by the department which contains a summary of all documents filed with the court in the previous month and the dates and locations of hearings scheduled for the following three months. The docket sheet will be filed with the district court clerk in each county within the Snake River Basin in Idaho. Copies of the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying. If you wish to receive a copy of the docket sheet each month, you should mark the appropriate place on your notice of claim form. You will be charged a small annual subscription fee to cover the cost of copying and mailing. Copies of any document listed on the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying.

Copies of all notices of claims filed with the department will be available for inspection from all offices of the department. Copies of the notices of claims may be obtained in person or by mail, but you will be charged for the cost of copying and mailing. (A claimant will not be charged for a copy of his or her own notice of claim, and a person who acquires property with water rights for which a notice of claim was filed will not be charged for a copy of the notice of claim filed by the previous owner.)

After the notices of claims have been reviewed, the director will prepare and file a report with the court. Part 1 of the report will contain the director's recommendations as to each water right claimed under state law. Part 2 of the report will list each federal reserved water right claimed. A number of reports will be prepared, one or more for each sub-basin in the Snake River Basin. When the report for your sub-basin is filed with the court, you will be mailed a notice informing you that the report for your sub-basin has been filed. The notice will be sent to the most recent address shown by the department's files. Attached to the notice will be a copy of those portions of the report describing the water rights you have claimed. If you do not agree with the way your water right is described, you may file an objection to the report with the court. You can also file an objection if you disagree with the way other claimant's water rights are described, and the notice will tell you where a copy of the full report is available for inspection. The notice will tell you when and where to file your objection. The notice of filing for each sub-basin report will also be published state-wide in local newspapers.

6. Water is claimed for the following purposes:

(both dates are inclusive) (cfs) (acre feet)

#1 For cooling/irrigation purposes from 1/1/ to 12/30 amount up to 0.445cfs or _____

#2 For cooling/irrigation purposes from 1/1/ to 12/30 amount up to 0.445cfs or _____

1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

The well is used primarily for cooling. However, we would like to have back-up irrigation capability.

2. Describe the changes you wish to make in the proposed recommendation:

Add 0.060 CFS / 9.00 AFT irrigation.

3. Give a brief explanation as to why you disagree with these portions:

 I AGREE with this proposed recommendation: no changes need to be made.

** This portion of the campus is irrigated primarily by Nampa's non-potable water system. However, we would like to have this well as a back up system, and be available spring & fall after Nampa shuts off their system. The requirements would be similar to 63-5372 or 0.060 CFS / 9.00 AFT for irrigation.*

Comments:

1. vmusic 8/26/2006 RECOMMENDATION
Comment: RECOMMENDED AS LICENSED. NNU CLAIMED THE 2 OTHER WELLS AS PODS BECAUSE THEY COMBINED THEIR SYSTEM GRADUALLY SINCE ABOUT 2000. TRANSFER NEEDED.
2. vmusic 8/26/2006 USE
Comment: THOUGH THE APPLICATION AND THE LICENSE STATE THE USES ARE HEATING AND COOLING, THE LICENSING EXAM VERIFIES THAT THE WELL IS ONLY USED FOR COOLING. ONLY COOLING CLAIMED. RECOMMENDATION CORRECTS LICENSED USES. ADDITIONALLY, THE WELL IS CURRENTLY USED FOR IRRIGATION BUT A TRANSFER IS NEEDED BECAUSE THE CHANGES WERE MADE IN THE DELIVERY SYSTEM SINCE 2000.

Dear Mr. Van Schyndel,

Thank you for your response to my letter request of March 14, 2006, regarding the claims referenced above. Enclosed with your response, dated April 13, 2006, was my original correspondence to NNU. I am returning this correspondence to you for your files. The pages entitled "IDAHO DEPARTMENT OF WATER RESOURCES Adjudication Claim Report [number]" are printouts from the IDWR database of the claims NNU filed in the Snake River Basin Adjudication (SRBA).

Also enclosed are "Statutory Claims" filed by NNU in 1985 and aerial photographs of NNU for 1987 and 2004. Statutory claims were made pursuant to an attempt by IDWR to identify water uses prior to the current licensing procedure. These claims were superseded by the SRBA claims filed in 1989. NNU employee, Hal (surname illegible), formerly the business manager and then V.P., Financial Affairs, filed all of the claims. He may be a source of information for some of issues presented herein. I will be referring to both sets of claims in this letter. The aerials are included for illustrative purposes as I describe NNU's claims and water use. The SRBA seeks to verify water uses at a point in time, which is 1987 when the SRBA commenced, so I included the 1987 photo. I included the 2004 aerials because the resolution is excellent in establishing points of reference.

Your response to my March 2006 letter was sufficient for evidence of priority but did not adequately explain changes made to NNU's historical water use. Idaho statutes require that changes made to a use of water after 1987 be approved by IDWR through a transfer process. If an additional quantity of water is needed, an application for a new water right must be made and approved by IDWR through the licensing process before the water is used. The licensing statute for groundwater was enacted in 1963.

Issues:

1 – The statutory claims filed in 1985 indicate that Well 3 irrigated 12 acres of soccer, baseball fields and a track and associated field in the SWSW of Section 27 (63-5371), and that Well 2

Dick Van Schyndel letter
Director of Operations, NNU

Page 2

provided water for the heating and cooling of the Student Center and irrigated 2 acres of lawn in the SESW of section 27 (63-5372). However, the SRBA claims for uses from these wells are for 22.5 acres irrigation each, though 63-5271 claims the 22.5 acres in the SWSW and 63-5272 claims the 22.5 acres irrigation in the SESW of Section 27. Both claim heating and cooling uses as well.

Based on my review of aerials from 1987 to 2004, NNU has not historically irrigated nor does it own 22.5 acres in the SWSW Section 27. The 2004 aerial indicates that NNU is currently irrigated about 8 acres in the SWSW Section 27. Further, the 2004 aerial shows irrigation of approximately 14 acres in the SESW, though irrigation was not claimed in this quarter-quarter section in the SRBA claims.

2 – All three SRBA claims add a point of diversion in Section 34. This appears to be an attempt to correct the legal description of Well 2. However, the Student Center building is approximately 13'-14' from the Section 34 line and if it is located as close to the building as the diagram sent to me indicates, the well is in Section 27. NNU will have to actually measure the distance of the well from the Student Center to determine what section it is in. A 2004 aerial blow-up of the Student Center is provided for this purpose.

3 – The quantity of water claimed in 63-5371 and 63-5372 is for .45 cfs. An IDWR subcontractor who conducted a field exam at NNU in 2002 calculated theoretical flows for the 2 wells based on information provided by NNU. The calculated flows were 0.14 cfs from Well 3 (63-5371) and 0.16 cfs from Well 2 (63-5372) for a total of 0.30 cfs. Based on the current statutory standard of 0.02/acre irrigation, this is enough water to irrigate 15 acres, which comports with acres claimed as irrigated in the 1985 statutory claims.

I have provided with this letter a list of consultants, one of which you may want to retain to assist you in clarifying NNU's historical water use and reconciling discrepancies in the claims. Presently and if I do not hear from NNU, I intend to recommend to the SRBA court that NNU's water rights are for a total of 14 acres of irrigation in the SESW of section 27 for claims 63-5371 and 63-5372, and the cooling use as licensed for 63-3498.

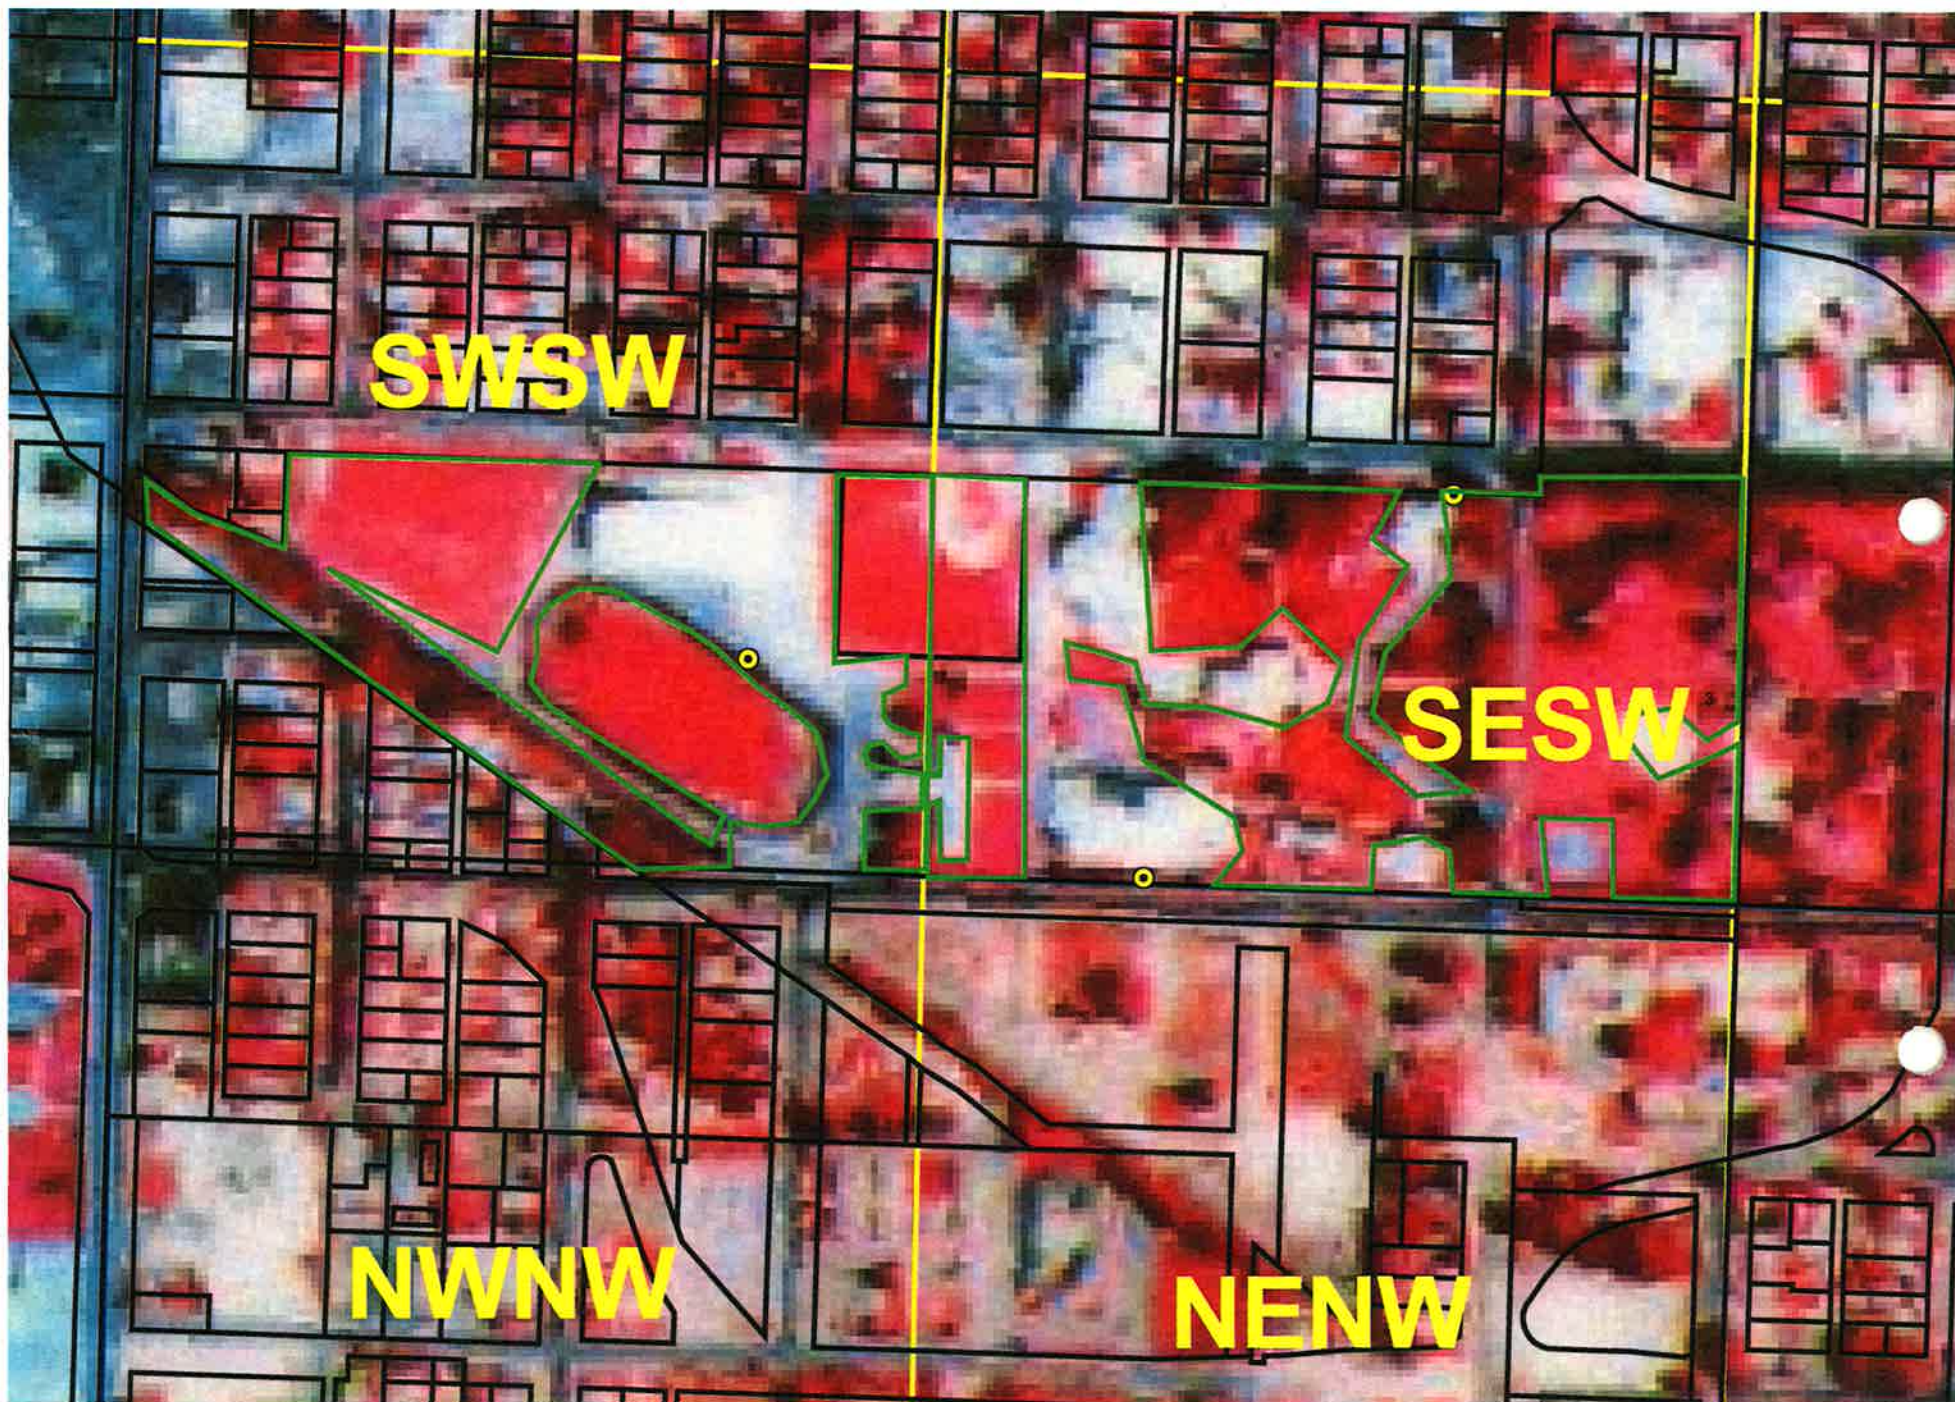

Please call me at (208) 334-2190. Thank you for your timely attention to this matter.

RE: SRBA Claims 63-3498, 63-5371, and 63-5372.

Dear Ms. Music,

Attached find a diagram that describes the three wells on the campus of Northwest Nazarene University and their delivery systems. 63-3498 is used for both irrigation and HVAC cooling. The other two wells are used exclusively for irrigation. All wells can be combined or isolated depending on usage and need. This flexibility was engineered into the system gradually over the past five years.

As evidence of priority we offer for well 63-5372 evidence of the date of construction (01/01/61) of the student center building. The well is located just off the South foundation of the building and was created to support the landscaping and at that time, the water based "swamp cooler" used to cool the building. The current cooling system for the student center does not use the well water. Well 63-5371's priority date of 03/15/48 coincides with the construction of Chapman Hall, a residence hall that was demolished in CY 2000. The well was used to support landscaping and athletic fields in that area and is still in use for that purpose.

If you have any questions, please feel free to call at 208-467-8445.

Problems:

- 1 - srba claims all add a pod in sec 34. this pod was not identified during field exam in 2002
- 2 - NNU does not own 22.5 ac in swsw s 27 as claimed in the 2 b/u claims
- 3 – how many acres and where do they irrigated
- 4 – is a transfer needed
- 5 – is an application needed for additional acres irrigated
- 6 – have they historically used irr d/cc shares
- 7 – is amended claim needed for pou changes
- 8 – subcontractor calculated theoretical flows from each of the wells based on info provided by claimt. Total of all wells = .34 cfs, not the max.45 cfs claimed
