Department of Water Resources
Eastern Region

1. Describe the portion of the proposed recommendation with which you disagree (*e.g. priority date, period of use, source):
Period of use is not acceptable.

2. Describe the changes you wish to make in the proposed recommendation:
There should be no limitation or restriction on the use of this water.

3. Give a brief explanation as to why you disagree with these portions:
Water was filed on and put into use in 1905. Water has been used for irrigation and stock use for nearly 100 years. Maintenance by myself and immediate family members has been on-going for over 60 years. As modern technology progresses there are new and better/economical ways and means of better use of this water.

DO NOT

I AGREE With this proposed recommendation: no changes need to be made.

REF: Snake River Basin Adjudication (SRBA)

Subject: Private Water

Dear Will and Elizabeth,

I got back a response from the Department of the issue of private water. Unless the use is de minimus and falls within the definition of a "deferred use" our position is to recommend filing a claim. The deferred uses are ground water for domestic use or stock water all other uses need to be claimed in the SRBA.

The adjudication statute 42-1401A(12) defines water systems to include springs and lakes and does not exclude private springs and lakes. The SRBA commencement order requires all rights to the use of water within the boundaries of the water system to be adjudicated, and does not exempt claimants of private springs and lakes from the adjudication. If the claimant wants a determination by the court that the spring or lake is "private", the claimant should indicate on the "source" blank on the claim form.

Idaho Code 42-101 declares, "All the waters of the state, when flowing in their natural channels, including the water of all natural springs and lakes within the boundaries of the state are declared to be property of the state...." All natural springs and lakes are therefore public water, subject to appropriation, subject to the laws that establish the procedures for making an appropriation, subject to the laws that govern the distribution of water, and subject to the laws that govern the adjudication of water rights. The state constitution declares natural streams to be public and therefore subject to the appropriation laws. A natural channel is "a stream of water flowing in a definite channel, having a bed, and sides or banks."

Can it be recommended in the SRBA if it wasn't claimed in the Bancroft-Lund Decree? The Bancroft-Lund was a general adjudication and falls under the adjudication statute 42-1401A(12) described above. Which means that if the point of diversion and place of use falls within the Bancroft-Lund boundaries then it required you file on in the prior adjudication. The only other way it can be recommended in the SRBA is if you or your predecessor was not a party to the Bancroft-Lund Decree.

SCANNED

DEC 08 2005

The two springs located in the section 26 was decreed in the SRBA for the purpose of stock water under water right 29-10185, and therefore cannot be used for the purpose of irrigation. Continuing to use the water for the purpose of irrigation would be an illegal diversion and would subject to a fine.

If you would like to file a claim to the water in the SRBA I have all the necessary claim forms in my office. You have the right to object to the recommendation in the SRBA and have the SRBA judge make a ruling on the claim.

I understand your frustration in this matter but remember don't shoot the messenger. If you have any additional question, please feel free to contact me at 547-3993.

Sincerely,

Cindy E. Bird
Adjudication Bureau.

Sent: Tuesday, April 16, 2002 11:59 AM
To: Carlsen, Ernie; Bird, Cindy
Subject: RE: Private Water

Because the Bancroft Lund was a general adjudication the key inquiry is whether or not the sources of water fall within the boundary that was adjudicated. There is a map titled Bancroft Lund Area in our Director's Report. If the point of diversion AND place of use of the water right both fall within the boundary then it was required to be filed on whether or not their predecessors were defendants.

Subject: RE: Private Water

Cindy, Need more information to determine if a favorable recommendation can be made on the SRBA claims. Were the sources of water in question subject to the Bancroft Lund? Were the parties or their predecessors defendants in the Bancroft Lund? (Jon Jonnson is not listed) You will need to research the ownership to determine who owned the property at the time of the B-L. Candice will need to address the source question. It is my understanding that a "no" answer to either question means you can pursue a favorable recommendation. A "yes" answer to both questions means that without a supporting right in the B-L the recommendation will be to disallow the SRBA claims using code P02 for both a general remark and condition.

Subject: Private Water

Cindy

Unless the use is de minimus and falls within the definition of a deferred use our position is to recommend filing a claim. The claimant needs a water right in order to legally irrigate even from a "private source." The term private water merely refers to who can appropriate that water, not whether a water right is needed in order to use it. The water user can not be denied the opportunity to file a claim in the SRBA even without a water right in the Bancroft Lund.

The issue of private water is discussed in Adjudication Memo #11. Note that because the spring you and I visited last fall actually flows into a natural channel, Memo #11 suggests it does not fit the definition of private water. Also, without a water right, in the context of conjunctive management the water user could face curtailment unless the court decrees the springs as a separate source and without a claim before the court the water user can not pursue such a ruling. And, even though a water right is from a private source does not mean that it will be decreed as separate; it is presumed that all rights are interconnected and the only basis for decreeing them as a separate source is because they are in fact not tributary or were decreed earlier as non-tributary and the rest is on a case-by-case basis.

REF: Snake River Basin Adjudication (SRBA)

Subject: Water Right 29-522 not claimed in the SRBA

Dear Will and Elizabeth,

When I checked on the water rights in the NWNW of section 26, township 8 south, range 40 east I found a Bancroft-Lund decree, 29-522, that is not claimed in the SRBA. If water rights are not claimed in the SRBA then they will be lost even if they were claimed in the Bancroft-Lund Adjudication. I've enclosed the necessary forms to claim the irrigation water under 29-522. It appears that the domestic and stock water was claimed under water rights 29-10185 and 29-10186 and decreed June 15th, 1998 in the SRBA. The filing fee for this claims is \$50.00 plus \$1.00 an acres for the 30 acres and a \$50.00 late fee.

I didn't find any irrigation rights in the SESE of section 22 or the SWSW of section 23, township 8 south, range 40 east. Also, I've emailed the Department attorney for this area to find out what the Department wants to do on the private water issue. If you have any further questions please feel free to give me a call at 547-3993.

Sincerely;

Cindy E. Bird

Water Right 29-556

Willard and Elizabeth Cheirrett

Figure 1. Township 8 south, Range 40 east.

April 13, 2002 I met with Willard and Elizabeth Cheirrett at 10 am for a field examination on their property in the Bancroft-Lund area. Irrigated acreage under this water right is, shown in figure 1 below, located in the NWNW, E1/2NW, NE, NWSE and the E1/2SE all within section 27, township 8 south, range 40 east of the Boise Meridian.

The Bancroft-Lund decree decreed to Lynn Greenwood 2.0 c.f.s. from a spring that sinks to irrigated 395 acres within these same quarter-quarter listed above, as well as stock water and wildlife in the NENE.

When Lynn Greenwood filed the SRBA claim he claimed a different point of diversion, didn't claim all the uses, and decreased the number of irrigated acres.

This property has been in the Cheirrett Family since the 1900's. It was for a time out of the Cheirrett Family but reacquired by Will and Elizabeth Cheirrett in February of 1996.

Photo 1. Looking westerly at the NENE of section 27.

Photo 1 above was taken from the Cheirrett home looking westerly to the NENE of section 27. Will installed the first pivot in the NE quarter in 1996 and the second pivot in the NW quarter in 1998, both within section 27, township 8 south, range 40 east.

The water in the first pond is commingled from both the spring and Farms Land & Irrigation Company. There is several ways of removing the water from the pond. First, it can be gravity fed to the second pond through a 12-inch pipe. Secondly, there is a gate installed in the south end of the pond that can be opened to flood irrigated land in the NWNW of section 26. Finally, the water can be pumped through a 6 or 8 inch buried pipe with a 15 hp pump to a mainline and risers that run east to west between sections 22, 23, 26 and 27.

Once in the second pond it goes into a 10 inch pipe at the south end of the pond and runs south until it meets the pipe that runs west to a 40 hp pump on the east side of Ivins Road and is pumped under the road to the pivots in section 27.

SCANNED

DEC 08 2005

Photo 2. Where the spring surfaces on the Cheirrett property. Looking west from the canal bank.

Photo 2 is looking westerly from the Farms Land & Irrigation Company canal bank where the spring surfaces on the Cheirrett property. The spring is enclosed within the fenced area and gravity flows into the first pond through an 8" pipe at the east end of the pond. Photo 2 also shows the Farms Land & Irrigation Company Canal running along the hillside.

Photo 3. Canadian Geese nest.

Photo 3 is looking westerly from the west bank of the first pond to the island located in the center of the second pond. Which is situated southwest of the first pond. At the time of my visit a pair of Canadian Geese were nesting on the island. Beside the Canadian Geese there was evidence of other birds and a herd of elk.

Photo 4. Looking south at screens and pipe to pivot from second pond.

Photo 4 is looking southward at the south end of the second pond at the screens for the pipe to the pivots. The diversion point from the pond is located in the NWNW of section 26 as decreed in the Bancroft-Lund Decree.

SCANNED

DEC 8 8 2005

Photo 5. Looking north at 15 hp pump to the risers.

Photo 5 was shot standing between the two ponds looking north. The small building houses the 15 hp pump that withdraws water from the pond in a 6" pipe to a mainline. The 1987/88 NAPP photography shows approximately 60 irrigated acres in the SWSW of section 23 and the SESE of section 22.

Photo 6. Looking north. Close-up of the pipes out of the 15 hp pump.

Photo 6 is a close-up of the pipe as it exits the small building west of the pond. The system includes a way to drain the system and flood irrigates the land in the NWNW of section 26 behind the Cheirrett home as shown in photo 6.

Photo 7. Looking north at southwest corner of the second pond.

Photo 7 was taken from the Farmers Land & Irrigation Bank looking in a northwesterly direction. Inside the culvert is a valve to the pipe.

SCANNED
DEC 08 2005

Photo 8. Looking northwesterly at spring seepage.

Photo 8 was also taken while walking along the canal banks and looking in a northwesterly direction. The spring water just beyond the second pond was flooding out onto the land in the NWNW of section 27.

Photo 9. Looking east at the pipe before they go under Ivins Road.

Photo 9 was taken from Ivins Road looking east towards the head of the east pipe section and the Farms Land and Irrigation Company. Just below the hill to the left of the photo is a vertical culvert that allows the Cheirretts to add canal water to the pivots on the Westside of Ivins Road. The 40 hp motor pumps the water under the road to the pivots. The Cheirrett's own a total of 610 acres that is irrigated with this spring and canal shares.

Bancroft, ID 83217

REF: Snake River Basin Adjudication
Claim A29-556

Subject: Changes in your water right after the Bancroft-Lund Decree

Response Date: April 22, 2002

Dear Claimants,

The claim listed above was adjudicated in the Bancroft-Lund Decree in the District Court of the Sixth Judicial District of the State of Idaho in and for the Country of Caribou, civil case number 2919 on July 28, 1992.

IDWR's initial investigation of the Notice of Claim listed above indicates some changes from the Bancroft-Lund Decree. Changes noted in the SRBA from the Bancroft-Lund adjudication are: the point of diversion, nature of use, period of use, and place of use.

Changes made to a water right after November 19, 1987 falls under **Idaho Code 42-222** and requires that an application for transfer be filed with the department. According to the Idaho code "a change in point of diversion, place of use, period of use or nature of use of all or part of the water, under the right shall first make application to the department of water resources for approval of such change. Such application shall be upon forms furnished by the department and shall describe the right decreed which is to be changed and the changes which are proposed, and shall be accompanied by the proper statutory filing fee."

The above Notice of Claim will be recommended as decree in the Bancroft-Lund adjudication and an application to transfer must be filed with the department after a decree has been issued to correct the changes. Has the number of irrigated acres been reduced from the previous adjudication? The previous adjudication decreed 395 acres and your Notice of Claim was filed for 384 acres.

Greenwoods owned some of the land for a
few years. It is now back in the Cherrett
Position.

6. **If the change in ownership affects the entire water right for each water right or adjudication claim number listed in item 1, THEN SKIP THIS ITEM AND GO TO ITEM 7.** If the change in ownership divides the water right(s) among multiple owners, you must describe, in detail, your portion of each water right after the change. Fill in the appropriate spaces in the box(es) below to describe your water right(s) after the change (one water right per box, you may copy this page as necessary). If your quantity of water is greater than a proportionate split, you must attach documentation to show justification for a larger amount. If you are not sure how to identify your portion of the original water right or adjudication claim records, please contact the nearest IDWR office for assistance.

Ex-Officio Recorder

Deputy 600

THIS INDENTURE, Made this 20th day of February, 1996, between
WILLARD J. CHEIRRETT AND ELIZABETH CHEIRRETT, husband and wife,
hereinafter called First Party, and **WILLARD JOHN CHEIRRETT, as**
TRUSTEE OF THE WILLARD JOHN CHEIRRETT FAMILY TRUST, of 1998 Ivins
Road, Bancroft, ID 83217, hereinafter called Second Party:

WITNESSETH: That the said First Party, for and in
consideration of the sum of **TEN AND NO/100 DOLLARS**, lawful money
of the United States of America, to said First Party in hand paid
by the said Second Party, the receipt of which is hereby
acknowledged, does by these presents, Grant, Bargain, Sell and
Convey and Confirm unto said Second Party, and to said Second
Party's heirs and assigns forever: All that certain lot, piece or
parcel of land situate, lying and being in the County of Caribou,
State of Idaho, more particularly described as follows, to-wit:

Township 8 South, Range 40 East of the Boise Meridian:

Section 27: ~~NE¼, E½NW¼, NW¼NW¼, N½SE¼, SE¼SE¼,~~
EXCEPT THEREFROM, the following described tracts:

1. Beginning at the Northeast corner of said
Section 27, and running
thence West 165 feet;
thence in a Southeasterly direction to a point 330
feet South of said Northeast corner;
thence North 330 feet, to the point of beginning.
2. Beginning at the Southeast corner of the
~~NE¼SE¼~~ of said Section 27, and running
thence North 417 feet; thence West 444.5 feet;
thence South 417 feet; thence East 444.5 feet,
to the point of beginning.

TOGETHER with 337½ shares of water stock of Farmers Land and
Irrigation Company.

TOGETHER WITH all oil, gas, other minerals and geothermal
rights, including but not limited to such rights relative thereto
as may have heretofore been reserved or heretofore; been reserved
or otherwise severed by separate conveyances affecting the
following described tract of land, to-wit:

Township 8 South, Range 40 East of the Boise Meridian:

Section 26: A tract of land in the ~~E½NW¼~~ described as follows:

Beginning at a point that is South 0°22'22" East
1100 feet from the North Quarter corner of said

SCANNED

RE: Snake River Basin Adjudication (SRBA)
Water Right Claim #29-556

Dear Water Right Holder:

We have been advised you are the current owner of the property and water right referenced above. Before we can modify our records to reflect your ownership of the property and water right referenced above, we need Form 42-248/42-1409(6) completed and returned. I have enclosed this form for your use.

I have also enclosed a copy of this water right claim, as we will recommend it to the SRBA COURT. Since this water right claim is not yet partially decreed, there is no filing fee due. We expect the Court to issue partial decrees in the near future, so please submit the ownership change soon.

Please feel free to call me at 547-3993 if you have any questions.

Sincerely,

Cindy E. Bird

REF: Snake River Basin Adjudication (SRBA)

SUBJECT: CRP Contract

Dear Claimant(s);

The Idaho Department of Water Resources has recently begun its water right review in Basin 29. The Notice(s) of Claim identified with the number shown above in the "address" label has been filed in the Snake River Basin Adjudication (SRBA).

It is our goal to recommend historical water rights within the Snake River Basin as accurately as possible. A field examination to verify items in the Notice will be conducted by Department personnel as soon as the weather permits. I was able to visit some of you this year before the snow arrived. While waiting for the weather to cooperate again I would like to collect some of the necessary documentation needed to recommend your claim to the SRBA court. The statute (42-104) requires the water be put to beneficial use to have a valid water right. One exception to the statute is if the land has been put into CRP. But evidence must be submitted to the Department of Water Resources to retain the water right otherwise the water right will not be recommended to the SRBA court.

If you have previously irrigated land that has been put into CRP, I would appreciate it if you could send me a copy of the contract when the land was put into CRP for my records, **by March 1, 2002. If you do not have any land in CRP please disregard this notice.** With no response from you, we will assume that you do not have any land in CRP. You may contact either the Farm Service Agency (FSA) or Natural Resource Conservation Service (NRCS) in Soda Springs at 547-4396 for a copy of the contract.

Please feel free to contact me in Soda at (208) 547-3993 if you have any additional questions. Have a safe and happy holiday.

Sincerely;

Cindy E. Bird
