)
) FOR WATER RIGHT 63-02351B

A notice of claim was filed for the above-captioned water right pursuant to I.C. § 42-1409. The Director of the State of Idaho Department of Water Resources (IDWR) examined the water system for this reporting area. The *Director's Report* contained a recommendation or abstract for the elements of this water right.

On June 19, 2007, the Riverside Irrigation District, through its attorney Albert P. Barker, filed an objection to the *Director's Report*, asserting that the source of the right should be described as wastewater. On June 26, 2008, the parties filed a *Standard Form 5 - Stipulated Elements of a Water Right* which resolved the objection. The Idaho Department of Water Resources concurred with the stipulation.

II. CONCLUSIONS OF LAW

Therefore based on the file and record herein and pursuant to the *Standard Form 5*, IT IS RECOMMENDED that water right 63-02351B be decreed with the elements as set forth in the attached *Recommendation for Partial Decree Pursuant to I.R.C.P. 54(b)*.

2. Igraves 8/29/2006 Source

Comment: The original license described the p/d located 50 feet above the confluence of Roswell and Main Drains. Based on the topo map, Roswell Drain is an unnamed drain and Main Drain is East Alkali Drain. The licensing exam indicates the p/d located on the unnamed drain tributary to East Alkali Drain. The source and tributary have been clarified.

3. Igraves 8/29/2006 P/U

Comment: 15 acres were originally licensed in the NENE S25. Claimants parcel encompasses 9 of the original 15 licensed acres. An SRBA field exam was conducted in 1995. The examiner found 6 acres irrigated at that time, however, all 9 acres appear irrigated based on the 1987 photo. The remaining 6 acres licensed in the NENE have not been claimed.

RE: Claim(s) to a Water Right filed in the Snake River Basin Adjudication

Claim Nos. A63-02351B

Dear Claimants:

The Department of Water Resources will be conducting claim verification field exams in your area beginning in March. An examination is needed to verify your water use in order to complete our report for the court's decree.

The field exams are conducted to gather information about your water right. This information may include the source of water, type of usage, amount of water used, number of acres irrigated, and the legal description of the point of diversion and/or place of use.

Please contact this office by March 10, 1995, in order to make an appointment at a time which is convenient for you. Although it is not mandatory that you accompany IDWR's examiner, it is helpful if someone familiar with the water delivery system is present during the exam. This will help insure that your water right is described accurately for the report to the court.

To make an appointment, or if you have any questions or concerns about the field exam, please contact me at your earliest convenience.

Sincerely,

Maria Minicucci
Water Agent, Adjudication Bureau

NOTES: 05/19/1995: License file shows location of "Main Drain" inaccurately. Drain runs through the NENE along from the west and along in a North North east direction in the NWNE. The drain does not go through the south half of the NENE as shown in the licensing field exam. This misrepresentation of the location of the "main drain", now East Alkali Drain, made the irrigated acres appear greater than they actually were, or are currently. As per ~~the~~ Mr. Story, the land to the west of the Roswell spillway is not irrigated. ~~that~~ ASCS does not indicate any acres to the west of the spillway (and east of road).
